On the evening of July 5, the Valdivia, one of the Pacific Steam Navigation steamers, left Callao for some of the northern ports. On Sunday, the 6th, the agent of the Pacific Steam Navigation Company applied to the senior Naval officer at Callao for assistance to be rendered to the Valdivia, reported to be on shore at Huaco. At noon the same day, the gun-vessel Sappho left Callao for the scene of the disaster, Capt. King, the Marine Superintendent of the Pacific Steam Navigation Company, having embarked in that vessel. On Monday night the Sappho returned to Callao. The Valdivia is on shore with all her compartments full of water, except the foremost and aftermost ones; there are also several plates out of her bottom. A very heavy surf runs on the sandy beach, but the passengers have been able to get from the ship to the shore in safety. The Sappho made several unsuccessful attempts to tow the Valdivia off, touching the bottom at intervals herself in the attempt; but the most unfortunate part is that the Sappho arrived at Huaco about 11 o'clock at night, and despatched a boat to within speaking distance of the Valdivia. This boat was in charge of a lieutenant, and Capt. King was a passenger; the night was moonlight, but by some unaccountable management the boat was capsized, and Capt. King was never seen afterwards. All the others saved themselves. We do not know yet whether this boat was sent away as a lifeboat's crew properly equipped, and we do not know why Capt. King was allowed to be a passenger in this boat upon such an occasion; but we out here cannot help thinking that if the Sappho was sent to the assistance of the Valdivia, it would have sufficed to have ascertained that the lives of those on board were not in immediate danger, and then to have rested until daylight; but, of course, if the mission of the Sappho was to put Capt. King on board the Valdivia at all hazards, we can then understand the case as it stands. We have had accounts of the surf-bound coasts of the West of Africa and of Natal, and considering the danger to ships' boats upon such coasts if allowed to approach more than to the edge of the surf, we out here cannot help thinking that recklessness or ignorance or both combined must have in a great measure contributed to the accident; but after the accident had happened, the able manner in which the boat's crew saved their lives is much to be admired from a swimming point of view; however, it would have been more creditable for the skill to have been displayed in another form before the accident than after it, upon the plea that prevention is better than cure, and that discretion is the better part of valour. In short, this business decidedly does not seem one for medals and decorations, cheap as they may be becoming now-a-days.

The Heroine is supposed to have left Vancouver on May 5 for Callao; she has not yet arrived, and nothing has been heard of her.

Much has been said about the new ten-shilling piece. Has it ever occurred to those in authority, that this coin will, if introduced, be a great nuisance to ships on foreign stations, as the same exchange for two of them will not be procurable as for a sovereign, and therefore, wherever English silver is at a discount, the unit of payment in English money will be the sovereign, as the ten-shilling piece, not being half-a-sovereign, will be of no more value as a legal tender, than a bad shilling or a composite counter.

NAVAL PRIZE-MONEY.

Notice is given, by the Department of the Accountant-General of the Navy and Comptroller of Navy Pay, to officers, seamen, and marines, and to all persons interested therein, that the distribution of prize-money for the captures by H.M.'s ships Harrier and Undine, specified below, will commence on Friday, Aug. 29, in the Prize Branch of the Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, New Street, Spring Gardens, S.W. The following are the shares due to an individual in the several classes for the respective captures:—

Captures by her Majesty's ship Harrier:—Slave-dhow Gazelle, Nov. 28, 1882.—Flag, £4 6s. 3d.; lieut. and commanding officer, £12 10s. 2d.; 4th class, £11 18s. 4d.; 5th class, £7 2s. 11d.; 6th class, £5 19s. 1d.; 7th class, £4 3s. 5d.; 8th class, £2 7s. 8d.; 9th class, £1 3s. 10d. Slave-dhow Simba, April 2, 1883.—Flag, £19 14s. 1d.; lieut. and commanding officer, £57 2s. 10d.; 4th class, £55 12s. 1d.; 5th class, £33 7s. 4d.; 6th class, £27 16s.; 7th class, £19 9s. 3d.; 8th class, £11 2s. 4d.; 9th class, £5 11s. 2d.

Captures by her Majesty's ship Undine:—Slave-dhow Fath-el-Kheir, March 6, 1883.—Flag, £8 7s. 11d.; lieut. and commanding officer, £24 17s. 4d.; 4th class, £18 14s. 6d.; 5th class, £11 4s. 9d.; 6th class, £9 7s. 3d.; 7th class, £6 11s. 1d.; 8th class, £3 14s. 11d.; 9th class, £1 17s. 5d. Slave-dhow Maile and 103 slaves, May 6, 1883.—Flag, £18 10s. 3d.; lieut. and commanding officer, £53 13s. 9d.; 4th class, £40 8s. 10d.; 5th class, £24 5s. 6d.; 6th class, £20 4s. 6d.; 7th class, £14 3s. 1d.; 8th class, £8 1s. 8d.; 9th class, £4 0s. 10d.

A BLOODLESS ENGAGEMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The following announcement appeared in the morning journals of yesterday:—"Suakim, Aug. 19.—The enemy attacked us on both sides last night. They advanced to a position within 200 yards of the forts on the east, but were soon dislodged by the fire from the ships and from the Marines in the new barracks. One dead body was afterwards found, and probably many of the rebels were killed." It would be interesting to know what amount of ammunition was expended to kill this one rebel, (?) and what description of projectiles were used by the Naval gunners? It appears to me remarkable that a somewhat greater result was not attained, considering that the Marines were armed with the modern "long-range," "low-trajectory" rifle of which we hear so much, and that some of the ships are furnished with the latest scientific (?) war appliances.—I am, &c.,

Athenæum Club, Pall Mall, Aug. 21. E. M. Boxer.

FRANCE AND CHINA.

The rupture between France and China appears to be now complete. The time allowed for the acceptance by China of the French ultimatum expired at 1 o'clock on Thursday. The Chinese Government having refused its assent, their Minister in Paris received his passports the same evening. The position of affairs is explained by the following semi-official statement: "Despite the successive respites granted to the Chinese Government and the moderation of the French negotiators, the Cabinet of Peking finally refused all satisfaction for the Lang-son treachery, and has recalled its Plenipotentiaries from Shanghai. The French Government was obliged, therefore, to address to the Chinese Government a last summons. M. Patenôtre accordingly received instructions to communicate to the Tsung-li-Yamên the vote of Parliament, and at the same time to state that the amount of the indemnity had been definitely fixed at eighty million francs, payable in 10 years, and that if compliance was not given to this demand within 48 hours, Admiral Courbet would be directed to take the necessary measures forthwith for securing to France the reparation due to her. The term of grace expired at 1 o'clock on Thursday, and M. de Semallé, the Chargé d'Affaires in Pekin, was immediately to quit the Chinese capital and join M. Patenôtre, who remains at Shanghai. In the course of Thursday, the Minister of China asked for an audience of M. Ferry. He had received orders from the Tsung-li-Yamen to return to his post in Berlin. Li-Fong-Pao accordingly took leave of M. Ferry, who caused his passports to be delivered to him immediately."

A Reuter's telegram, dated Paris, Aug. 22, says:—"Admiral Courbet's instructions were to commence to bombard the arsenal at Foochow on Thursday evening, which would correspond to sunrise in the far East. After the bombardment the troops will land to destroy the war material and stores, the value of which is estimated at about 1,000,000,000 fr. This operation will constitute an act of reprisal on the part of the French Government against China. The French troops will then proceed to occupy the port and mines of Keelung as security for the payment of the indemnity claimed by France."

THE LATE JOHN SULLIVAN, R.N., V.C.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I enclose a printed statement of the services rendered to his country by the late John Sullivan, V.C., R.N., chief boatswain, and, in common with the many hundreds of English and French who made his acquaintance during the Crimean Campaign, and who have since been favoured with his private friendship, I would esteem it a great honour if you would notice the case in the columns of the *Army and Navy Gazette.* I would suggest that the suddenness of his suspension, his speedy death while considering what proportion of his pension he should commute, the desolation of his home, with his parents depending on him (who are between 80 and 90 years of age), and both his daughters consumptive, who, as matters now stand, have nothing before them, without the Admiralty grant them a compassionate or patriotic allowance to keep them from want. A petition has been forwarded to their Lordships constituting a very exceptional case. You will see by the printed matter enclosed, that on a memorable occasion, Sullivan performed very conspicuous services, an eye-witness still affirms that by his coolness and skill he saved the day for the Allies. Had the Russians gained their object (and to all appearances they had the victory in their grasp), the consequences would have been most disastrous. And I now appeal to you to exercise your powerful influence in favour of the sick and infirm whom this brave and skilful man has left penniless on the world. Apologising for trespassing so long on your patience, believe me to remain yours, R. N.

"The late Mr. John Sullivan, formerly chief boatswain of Portsmouth Dockyard, while serving in No. 9 Battery in front of Sebastopol, first came under the notice of both Naval and Military officers through his accurate firing, for blowing up a magazine, and by his dismounting guns in the Malakoff. A subscription was started amongst the officers, and £16 odd presented to him. He also came under special notice for placing a broken gun-rammer, with a red handkerchief tied on it, in a very exposed position in front of his own battery, to direct the fire of our guns on the Russian batteries, he being exposed the while to a galling fire from the Russian riflemen, for which service he was awarded the V.C. During the temporary absence of the officers of his battery, the Russians massed some thousands of men between the Malakoff and the French works. Sullivan, being the petty officer in charge of No. 9 battery, loaded the guns with grape and canister, turned them on the Russians, and, to use the expression of an eye-witness, 'cut them into mincemeat.' The French, seeing such a large force coming towards their battery, were about to spike their guns, but, observing the onslaught that Sullivan, with his four guns, was making on them, opened fire, driving the Russians back into the Malakoff, having suffered great loss. The French officers, having witnessed what our battery had done for them, came over, and, finding no officer in charge, patted the guns and also John Sullivan on the back, exclaiming, 'Bono English!' and they did not forget to recommend him for the Legion of Honour. This information is given by one of the gun's crew, who states that his gun in the same battery burst (it was known as the 'Terrible's' gun), causing nine 16-lb. cartridges and several filled shells to explode, blowing the whole gun's crew under the embrasures, and killing all the crew with the exception of the man referred to, who was pulled out from under the rest and carried to a doctor by Sullivan. Strange to say, although this man was wounded in over thirty places, he is now serving in her Majesty's Dockyard at Portsmouth, looking none the worse for his hurts. He states, 'If it had not been for John Sullivan, I should not be here.' Sullivan was also awarded the Royal Humane Society's medal for saving life."

THE ARMY RESERVE.

The following Army Circular was issued from the War Office on Thursday :—"1st-class Army Reserve rejoining for Army service. 1. Permission will be given to a limited number of men belonging to sections B and C of the 1st-class Army Reserve (Infantry) to rejoin the colours to complete the unexpired portion of their first period of enlistment (12 years). Men so rejoining will not be required to refund the deferred pay they received on leaving the colours. 2. Men of the above-mentioned sections transferred to the Reserve previous to August 15, 1884, who wish to convert their service into Army service, may make application, personally or by letter, to the officer charged with their payment, provided they fulfil the following conditions :—(*a.*) Their total service in the Army and Army Reserve must be less than nine years. (*b.*) They must be unmarried. (*c.*) If they wish to be posted to a particular regiment, they must say so in their application. (*d.*) Their character when transferred to the Reserve must not have been recorded as bad. 3. The officer paying the Reserve will forward to the Adjutant-General every Monday through the officer commanding the regimental district a return in duplicate (on a form which will be issued to them), submitting for approval the names of men who wish to remain with the colours. 4. On approval being notified, these officers will furnish the men with passage or railway warrants to the places where they are to join their corps, at the same time paying them their ordinary and deferred (Reserve) pay up to date; and will send to the paymaster of the corps which the men have been ordered to join a No. 1 Report, showing to what date they have been paid. 5. The men will be entitled to Army pay and allowance from the day succeeding that for which they are shown by their No. 1 Reports to have received Army Reserve pay. 6. Those men who were in receipt of good-conduct pay on transfer to the Reserve will be allowed to resume their good-conduct pay on rejoining the colours. Service in the Reserve will not count towards the grant or restoration of good-conduct pay. The first charge for good-conduct pay after a man rejoins the colours will be supported by a copy of his record of service. 7. Non-commissioned officers will return to the Army with the rank they held on transfer to the Reserve. 8. It is to be distinctly understood that every man will be medically inspected immediately on the arrival at the corps which he is ordered to join, and will not be finally accepted from the Reserve or taken on the strength of any corps if found medically unfit for service, but will be sent back at the public expense to his place of residence, receiving 5s. subsistence allowance. If found permanently unfit, a notification, together with a report on Army Form B 248, will be sent to the officer in charge of the man's documents, who will proceed with his discharge in accordance with the provisions of Para. 82, Regulations for 1st-class Army Reserve. 9. Every man on final approval will receive a free kit. 10. When discharged from Army service they will receive Army deferred pay at the rate of 2d. a day from the date on which they were originally transferred to the Reserve—*e.g.*, if a man has been three years in the Army Reserve and serves another three years with the colours, he will receive deferred pay for six years, equivalent to about £18."

THE REORGANISATION OF THE MILITIA.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—Your article in last Saturday's *Gazette* in reference to the deficiency of Militia officers is further proof, were such needed, that it is high time some scheme should be introduced for the reorganisation of the Militia as a force, unless it be the intention of the authorities that the force should altogether decay and disappear. A short time ago, a statement of the exact deficiency in the Militia of non-commissioned officers and men was made in the House, and your article of Saturday shows that at present there exists a deficiency in the force of 968 officers. Given, therefore, that facts are stubborn things, I respectfully submit that in respect of the supply of both officers and men, and after a trial of about four years, the Territorial System has not proved beneficial to the Militia. No person who has studied the question "how to officer the Militia" will deny that it is a most difficult one to approach. On the one hand, there are those officers who only join the Militia with a view to passing through it by the competitive examination into the Line, and who consequently can only be looked upon as birds of passage. On the other hand, there are those officers who join with the *boná fide* intention of remaining in the Militia, and who therefore, in my opinion, are the chiefly interested parties in all questions affecting the welfare or otherwise of the force. Now, I really think there is some small amount of credit due to these officers for remaining in the Militia, and thereby, in their individual way, serving the country, when that country gives them so very little in return. But, Sir, I make bold to state, were the majority of officers asked the question, "Why do you remain in the Militia?"—if the answer were truthfully returned it would be, "Well, I hope there is yet a good time coming for the Militia, and I trust to see it an effective service." Then, assuming the interrogator followed up the question by saying, "Can you offer one or two suggestions which, in your opinion, would benefit the Militia?" I think, confining the answerer to that limited number of suggestions, the following would be the replies :—"Well, first, I should suggest that the force be made more popular with those officers who join for the purpose of remaining in it; and, secondly, that the officers, from colonels to captains (I assume that subalterns as a rule pass into the Line), be made more efficient than they at present are." Further questioning might probably result in the offering of hints as to how these suggestions could be carried out, and the following might be the prescribed course. Make the Militia more popular with its officers by giving them an opportunity of more closely identifying themselves with soldiering, and of showing more zeal for the profession of arms than is now afforded by the annual 28 days' training. This could be accomplished by the authorities permitting a certain per-centage per battalion of Militia officers to be held available for duty with Line battalions (if possible with their own link battalions) at all periods of the year. It not infrequently happens in garrison towns, from one cause or another, that Line battalions are under-officered, and if it were competent to keep a roster of Militia officers available for duty at brigade offices, such blanks could be quickly filled, and the Militiaman would be brought into close contact by such means with probably his own link battalions, with which consequently he would feel himself closely identified. Again, in most garrison towns there are certain Militia officers who hold certificates for musketry and signalling. Such might also be employed in these capacities as opportunity occurred, and in all cases where employment would be given there should of course be allowed the payment of the rank. It might be necessary to have a fixed period for such employment laid down, say not more than three consecutive months, at end of which time the next on roster, if so disposed, could be called upon, and so on down the roster. This scheme then briefly would give the Militia officer a certain position and status. It would afford the zealous officer opportunities of soldiering and associating himself with the Army of which now he is totally bereft. It would assuredly in great measure bridge over that great gulf now fixed between Line and Militia, and if any portion of such object were attained, surely one of the chief ideas of the territorial system would be more perfectly carried out? And now as to increasing the efficiency of Militia officers. This matter really hinges on what has just been discussed, for if the commanding officer of a Line battalion to which a Militia officer was attached for duty as suggested, found that officer inefficient and not in any way qualified to perform the duties assigned to him, it should be a point of honour with that commanding officer to report upon the matter. But if it were compulsory for every commanding officer of a Militia regiment, for every field-officer, and for every captain to qualify for certificates by examination at some fixed school of instruction, the present inefficiency so frequently met with in Militia officers would quickly disappear. I have said fixed school, for it is my belief far too much favour and affection exists at the present boards held for the purpose of testing the fitness of Militia officers for promotion. This subject, Sir, could be pursued very much further, but I fear I have already trespassed too largely on your space.—I am, &c.,

P. J.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—You deserve the thanks of every one interested in the Militia for exposing the desperate condition into which it is drifting. Militia officers have been carefully taught by the authorities that they themselves and their opinions are useless; every change recently made in the Militia has been made in the teeth of their views and wishes. They have only a nominal command now for a few weeks of their own men, who are virtually commanded, administered, and drilled—heaven save the mark!—at the depôts. Who can wonder if Militia officers are getting weary of thankless drudgery and sham commands? Let the Horse Guards appoint a Committee, presided over by some officer not irrevocably committed to War Office "fads," and one or two experienced commanding officers of Line and Militia battalions, and they will not require to take much evidence before finding out where the shoe pinches. But such a remedy is too simple and straightforward for adoption, and we shall have more tinkering by civilian clerks, and the last state will be worse than the first.—I am, &c.,

AUXILIARY.

The Sampson left Sheerness on Aug. 20 for the island of Heligoland with a party of riggers to put down moorings for a gun-vessel which the Admiralty have determined to station there for the protection of the North Sea fisheries. The riggers, who have only just returned to Sheerness from Queensferry, N.B., where they have put down new moorings for the Lord Warden, were in charge of Mr. Pratt, are expected to be absent about a fortnight. The Sampson will remain at Heligoland until their return.

The Rover, attached to the Chatham Steam Reserve, has been completed, and is awaiting orders from the Admiralty for being commissioned.

Admiralty orders were received at Chatham on Tuesday directing the Ajax to be got ready for being immediately commissioned, the order requiring her to be completed for the pennant in six weeks. It is expected that she is intended to take the place of the Achilles in the Channel Squadron, or of the Defence in the Reserve Squadron.

The dockyard authorities at Sheerness have commenced the preparation of the materials for the construction of the new composite gun-vessel Swallow, which is to be laid down upon the building slip as soon as the composite corvette Pylades is launched. The Swallow will be a gun-vessel of the Mariner type, and will be equipped with eight 5-in. breechloading guns mounted upon the Vavasseur system, together with one 6-pounder gun and two machine-guns. She will be manned by 100 men.

The Tsi Yuen, the third armour-clad corvette built at Stettin for the Chinese Government, has been launched, and has made her trial trip in the Swinemünde. She is of light draught, and is armed with a couple of 21-centimètre guns in one turret, and a 15-centimètre gun in the other, besides machine-guns to repel torpedo-boats; and is furnished with the electric light. When this vessel and her sister-ships will leave the Baltic for China is problematical.

A Parliamentary paper issued on Saturday shows the amount of shipping built in the Government dockyards and elsewhere for the Royal Navy since 1865-66. During these years the heaviest amount of tons weight of hull was built in 1867-68, when the total was 27,423 tons, the lowest having been 13,566 in the previous financial year. The next highest was in 1869-70, when 25,173 tons were built, and the third highest in 1876-77, when 24,230 tons was the total. The number of tons in 1880-81 was 16,821, in 1881-82, 18,610; in 1882-83, 19,917; and in 1883-84, 19,279.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, August 19, 1884.

2nd Dragoon Guards—Capt. F. C. L. Kay to be Major, vice F. J. Ashburner, seconded (July 10); Supernumerary Capt. N. Sadlier to be Capt., vice F. Gordon-Mackenzie, seconded (July 21).

12th Lancers—Capt. H. A. C. Walker resigns his commission.

ROYAL ARTILLERY.

Lieut.-Gen. and Hon. Gen. A. W. Macintire, C.B. (late Madras), on the Unemployed Supernumerary List, to be Col.-Comdt., vice Hon. Gen. G. Selby (late Madras), deceased (June 19); Major and Brevet Lieut.-Col. S. C. Kyle has retired upon retired pay, with the hon. rank of Col., under Article 100 I of the Royal Warrant of June 10, 1884 (Aug. 17); Major V. Wing retires upon retired pay, with the hon. rank of Lieut.-Col.

The under-mentioned Captains to be Majors :—C. H. Hamilton, vice Brevet Lieut.-Col. E. H. Dyke (late Bengal), promoted, with seniority next to and below Major R. E. Mundy (Jan. 1); L. Tillotson, vice G. M. J. Moore, seconded for service on the Staff (July 2); J. P. Freeth, upon the Seconded List, and G. B. Allen, vice G. S. Parry, retired (both dated July 30).

The under-mentioned Lieutenants to be Captains :—C. A. Howard, vice C. H. Hamilton, promoted; A. Chambers, vice Brevet Major C. S. B. Parsons, seconded for service on the Staff (both dated July 2); E. A. Burrows, vice L. Tillotson, promoted; C. H. Crofton, vice G. B. Allen, promoted (both dated July 30); W. Hely-Hutchinson Waters, vice L. E. Coker, seconded for service as an Adjt. of Auxiliary Artillery; A. H. Carter, vice E. Nash, seconded for service at the Royal Military College, Kingston, Canada (both dated Aug. 14).

The dates of promotion of the under-mentioned officers are altered as stated against their names :—Major H. A. Rigg, from half-pay (April 1, 1884, such antedate not to carry pay prior to June 18), G. Mackinlay (June 18), G. B. N. Martin (June 18), D. F. Jones (June 27), H. D. Dunlop (June 27), and A. W. Anstruther (June 27); Capts. G. E. Giles (Jan. 1), A. H. P. Turner (Jan. 9), E. J. Garston (Jan. 9), W. S. Churchward (Jan. 9), K. S. Dunsterville (Jan. 16), C. E. Walker (Jan. 16), W. F. G. Moberly (March 1), A. Tracey (March 13), W. A. Smith (March 18), G. H. Bittleston (May 31), W. J. Hicks (June 1), H. O. Piers (June 13), and P. L. Williams (June 17).

The first Christian name of Lieut.-Col. Lockhart (late Madras) is William, and not as stated in the *Gazette* of May 23. The surname of the officer appointed to a Lieutenancy and described as F. M. Dickenson in the *Gazette* of July 15, is Dickinson.

Grenadier Guards—Lieut. H. P. St. J. Mildmay to be Capt., vice J. Foster, retired (July 23).

Scots Guards—The restoration to the establishment of the regiment of Capt. and Lieut.-Col. W. E. Montgomery, as notified in the *Gazette* of July 1, is cancelled.

REGIMENTAL DISTRICT.

Lieut.-Col. and Col. E. D'H. Fairtlough, commanding the 83rd Regtl. District (the Royal Irish Rifles), has been placed on retired pay, with the hon. rank of Major-Gen. (Aug. 18).

LINE BATTALIONS.

The King's Own (Royal Lancashire Regiment)—Major D. L. Brain retires on retired pay, with the hon. rank of Lieut.-Col.; Lieut. J. M. Gawne to be Capt., vice A. Hunter, seconded (May 28).

The Royal Warwickshire Regiment—Lieut. H. King to be Capt., vice F. T. Clayton, seconded for service as a Deputy-Assist.-Comy.-Gen. (June 4).

The Norfolk Regiment—Lieut.-Col. and Col. H. C. Vibart retires on full pay, with the hon. rank of Major-Gen.

The Suffolk Regiment—Lieut. G. F. H. Dillon has been appointed a probationer for the Indian S.C. (May 25).

The Bedfordshire Regiment—Lieut. G. H. T. Swinton to be Capt., vice J. C. Tilly, seconded (Aug. 1).

The Leicestershire Regiment—Capt. and Brevet Major C. F. W. Moir to be Major, vice J. Creagh, promoted (July 15).

The Princess of Wales's Own (Yorkshire Regiment)—Capt. L. H. M. Levin to be Major, vice E. A. Bruce, seconded; Lieut. E. J. B. Buckle to be Capt., vice L. H. M. Levin (both dated Aug. 1).

The Lancashire Fusiliers—Lieut. E. R. Owen to be Capt., vice L. Marshall, seconded (Aug. 4)

The Royal Inniskilling Fusiliers—Lieut. W. S. B. Levett to be Capt., vice H. S. Tunnard, seconded (July 26).

The East Lancashire Regiment—Lieut. C. F. H. Medhurst to be Capt., vice J. F. Irwin, seconded (Aug. 1).

The Duke of Wellington's (West Riding Regiment)—Capt. C. W. Gore to be Major, vice E. G. Fenn, promoted; Capt. A. J. Preston to be Major, vice C. W. Gore, seconded for service as an Adjt. of Auxiliary Forces (both dated June 28).

The South Staffordshire Regiment—Qrmr. T. Jarrett is placed on temporary half-pay, on account of ill-health.

The Dorsetshire Regiment—Capt. M. B. Luby to be Major, vice A. M. Le M. T. Le Marchant, seconded for service as an Adjt. of Auxiliary Forces (July 2).

The Welsh Regiment—Major C. C. Smyth, from half-pay, to be Major, vice W. A. Aitchison, retired; Lieut. J. Sillem to be Capt., vice W. H. Tapp, seconded (June 6).

The Loyal North Lancashire Regiment—The date of the seconding of Lieut. F. R. Borrow is May 28, and not June 28, as stated in the *Gazette* of Aug. 5.

The Northamptonshire Regiment—Major R. Anson-Cartwright retires on retired pay, with the hon. rank of Lieut.-Col.

The Queen's Own (Royal West Kent Regiment)—Capt. W. H. Murphy to be Major, vice D. T. C. Belgrave, seconded; Lieut. E. H. Baines to be Capt., vice W. H. Murphy, (both dated June 11); Lieut. A. P. Cronyn to be Capt., vice R. R. Lonsada, retired (July 9).

The Manchester Regiment—Lieut. W. B. Graham to be Capt., vice E. P. Phillips, retired; Lieut. H. S. Smith, Adjt., to be Capt., to complete establishment (both dated July 9).

The Prince of Wales's (North Staffordshire Regiment)—Lieut. H. H. Higginson to be Capt., vice G. A. Chapman, appointed Adjt. 3rd Batn. (July 1).

Princess Louise's (Argyll and Sutherland Highlanders)—Capt. J. D. Fetherstonhaugh to be Major, vice P. D. Trotter, seconded (May 28).

The Prince of Wales's Leinster Regiment (Royal Canadians)—Capt. E. F. Owens to be Major, vice L. E. C. Inglefield, seconded; Lieut. E. G. M. Short to be Capt., in succession to Major E. F. Owens, Adjt. 5th Batn. (both dated June 4).

The Rifle Brigade (the Prince Consort's Own)—Supernumerary Major R. H. L. Anstruther to be Major, vice H. B. Buchanan, retired (Aug. 6); Major A. Borthwick retires on half-pay (Aug. 20).

Chaplains' Department—The Rev. F. L. Gascoigne, Chaplain to the Forces of the Second Class, to be Chaplain to the Forces of the First Class (Aug. 11).

Army Pay Department—Pymr. and Hon. Capt. T. C. Hood has been placed on half-pay on account of ill-health (June 19).

Army Hospital Corps—The date on which Lieut. of Orderlies D. Whiteley, half-pay, resigned his commission is June 28, and not June 27, as notified in the *Gazette* of July 22.

Half-Pay—Major and Brevet Lieut.-Col. E. R. Cottingham, from the Royal Artillery, to be Lieut.-Col; Capt. C. L. Becher, from the 7th Dragoon Guards, to be Major (both dated Aug. 11).

MEMORANDA.

Major-Gen. E. M. Playfair, Royal (late Madras) Artillery, has been placed upon the Unemployed Supernumerary List under Article 107 of the Royal Warrant of June 10 (Aug. 1).

Hon. Major-Gen. H. Percival, late Lieut.-Col., R.A., has been permitted to commute his retired pay (July 19).

Major A. Borthwick, half-pay, retires from the service by the surrender of his half-pay, with the hon. rank of Lieut.-Col.

Major S. Rudge, half-pay, late R.A., retires upon retired pay.

Capt. E. A. Johnson, who retired from the R.A., receiving a gratuity, is permitted to retain his rank, and wear the prescribed uniform (July 19).

Where not otherwise stated, the foregoing commissions and announcements bear date August 20, and the current year must be understood.

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, August 22, 1884.

Royal Horse Guards—Gent. Cadet Owen Gwynydd St. George Williams to be Lieut., vice Lord H. E. B. Somerset, resigned.

1st Dragoon Guards—Gent. Cadet Arthur Grant Crosse to be Lieut., vice J. A. Paterson, deceased.

5th Dragoon Guards—Gentlemen Cadets Wyndham George Rennie to be Lieut., vice O. H. Ames, transferred to the 2nd Life

Guards; Acland Alfred Gordon Anderson to be Lieut., vice J. D. Baird, resigned; Goodricke Thomas Peacocke to be Lieut., vice M. V. E. Sankey, resigned.

2nd Dragoons—Gent. Cadet Harry Plumridge Levita to be Lieut., vice W. H. Hippisley, promoted.

3rd Hussars—Gent. Cadet Harry Newman Morgan Thoyts to be Lieut., vice H. R. Crompton-Roberts, transferred to the Grenadier Guards.

4th Hussars—Gentlemen Cadets Henry Thomas Fenwick to be Lieut., vice F. H. Blacker, appointed Adjt.; George Herbert Gandet to be Lieut., vice P. J. Zigomala, transferred to the 19th Hussars.

5th Lancers—Gent. Cadet Thomas Burnett Ramsay to be Lieut., vice G. E. de V. Kennedy, resigned.

6th Dragoons—Gent. Cadet Henry Bagwell-Purefoy to be Lieut., vice W. H. Brown, promoted.

11th Hussars—Gent. Cadet Guy Wyndham to be Lieut., vice Lord E. W. Hamilton, promoted.

14th Hussars—Gent. Cadet Frederick Dunbar Sinclair Bentley-Innes to be Lieut., vice A. C. King, promoted.

18th Hussars—Gent. Cadet Ramsay Frederick Clayton Gordon to be Lieut., vice F. B. de S. La Terrière, seconded.

19th Hussars—Gent. Cadet Francis Woodward Clementson to be Lieut., vice H. D. Fanshawe, promoted.

21st Hussars—Gentlemen Cadets George Lewis Holdsworth to be Lieut., vice F. H. G. Cunliffe, resigned; Camborne Haweis Paynter to be Lieut., vice H. Finn, appointed Adjt.

Royal Engineers—Lieut.-Gen. and Hon. Gen. Sir J. S. Hawkins, K.C.M.G., to be Col.-Comdt., vice Gen. C. E. Ford, deceased (July 28); Lieut.-Gen. A. Fraser, C.B. (late Bengal), to be Col.-Comdt., vice Gen. J. R. Becher, C.B., deceased (July 10); Major and Brevet-Col. C. A. Sim (late Madras) to retire upon a pension and extra annuity, with the hon. rank of Major-Gen. (Aug. 24); Major V. F. Rowe retires upon retired pay, with the hon. rank of Lieut.-Col.; Capts. G. Macdonald to be Major, under the provisions of Article 10 (b) of the Royal Warrant of June 10, 1884 (July 19); S. Buckle, upon the Temporary Reserve List, to resign his commission (Sept. 1).

Grenadier Guards—Gent. Cadet the Hon. Walter Lewis Bagot to be Lieut., vice E. M. S. Crabbe, promoted; Hon. Queen's Cadet Wilfred George Howard Marshall to be Lieut., vice J. Foster, promoted; Gentlemen Cadets Arthur Henry Orlando Lloyd to be Lieut., vice the Hon. C. R. W. Colville (Master of Colville), promoted; Augustus Frederick Edward Walpole Webster to be Lieut., vice R. C. M. Ferguson, resigned; George Edward Pereira to be Lieut., vice H. J. Craufurd, promoted.

Coldstream Guards—Hon. Queen's Cadet Cecil Stanley Owen Monck to be Lieut., vice A. E. Codrington, seconded; Gent. Cadet the Hon. Victor Albert Francis Charles Spencer (late Page of Honour to the Queen) to be Lieut., vice H. C. Surtees, seconded.

LINE BATTALIONS.

The Royal Scots (Lothian Regiment)—Gent. Cadet Ernest Montague Jackson to be Lieut., vice J. C. Fenton, promoted.

The Queen's (Royal West Surrey Regiment)—Gent. Cadet Herbert Maitland Cowper to be Lieut., vice G. F. Pinkney, promoted; Queen's (India) Cadet Wilfred Ironside Ryder to be Lieut., vice A. F. Maitland, promoted.

The Buffs (East Kent Regiment)—Gentlemen Cadets Lionel George Nuttall Eales to be Lieut., vice A. H. Coles, seconded; Edward Thornton Buttanshaw to be Lieut., vice C. L. Connellan, appointed Adjt.; Edward Cecil Morgan Parry to be Lieut., vice H. R. Knight, appointed Adjt.

The Royal Warwickshire Regiment—Gent. Cadet Douglas Dyneley Baynes to be Lieut., vice H. King, promoted.

The Royal Fusiliers (City of London Regiment)—Gent. Cadet Charles Tyrell Shipley to be Lieut., vice G. Dease, promoted.

The Norfolk Regiment—Gentlemen Cadets John Balsir Chatterton to be Lieut., vice W. B. Mullins, appointed a probationer for the Indian S.C; Evelyn Chiappini Peebles to be Lieut., vice A. C. Becher, promoted; Hon. Queen's Cadet Gerald Oakeley Graham to be Lieut., vice W. H. Besant, seconded.

The Lincolnshire Regiment—Gentlemen Cadets Alexander William Hunt to be Lieut., vice W. S. Carpenter, seconded; Richmond Trevor Crichton to be Lieut., vice E. Herapath, promoted.

The Devonshire Regiment—Gent. Cadet Guy William George Sanders to be Lieut., vice H. Elliot, transferred to the King's (Liverpool Regt.).

The Suffolk Regiment—Gent. Cadet Guy Mortimer Audain to be Lieut., vice F. W. Scudamore, promoted.

The East Yorkshire Regiment—Gentlemen Cadets Henry Clowes to be Lieut., vice A. J. Richardson, appointed a probationer for the Indian S.C.; James Pennell Hill to be Lieut., vice G. W. Priestley, appointed a probationer for the Indian S.C.; Frank Popham Young to be Lieut., vice W. W. Ward, promoted.

The Royal Irish Regiment—Gent. Cadet Herbert John Jones to be Lieut., vice G. H. Bretherton, appointed a probationer for the Indian S.C.

The Lancashire Fusiliers—Gent. Cadet Lionel Rosen Jervis to be Lieut., vice H. W. Scott, promoted.

The Cheshire Regiment—Gentlemen Cadets William Martin Cubitt to be Lieut., vice C. C. Thackeray, deceased; Henry Bertram Powell to be Lieut., vice H. L. Silvester, seconded; Anthony Edward Ranelagh Tucker to be Lieut., vice A. G. B. Lang, appointed a probationer for the Indian S.C.; Donald John Campbell Macnabb to be Lieut., vice E. R. C. Graham, appointed Adjt.; Denzil Hughes-Onslow to be Lieut., vice C. R. H. Hardy, seconded.

The South Wales Borderers—Gent. Cadet George William Taylor to be Lieut., vice E. B. Grogan, transferred to the South Staffordshire Regt.

The King's Own Borderers—Gentlemen Cadets Hector St. John Tulloch to be Lieut., vice J. B. Thompson, deceased; the Hon. Henry Dundas Napier to be Lieut., vice G. N. Mayne, promoted.

The Cameronians (Scottish Rifles)—Gentlemen Cadets George Veitch Moore to be Lieut., vice H. Lysons, V.C., seconded; Herbert Sutherland Walker to be Lieut., vice C. B. Templer, appointed a probationer for the Indian S.C.; Leslie Dewing Blackburn to be Lieut., vice S. G. Grant, seconded; John Arthur Briggs to be Lieut., vice C. C. Douglas, seconded.

The Queen's Own Cameron Highlanders—Gent. Cadet Augustus de Ségur McKerrell to be Lieut., vice the Hon. I. Campbell, resigned.

The Royal Irish Rifles—Gent. Cadet Herbert Stephen Swabey to be Lieut., vice E. D. Heinemann, resigned.

The Connaught Rangers—Gent. Cadet George De Symons Barrow to be Lieut., vice A. de la C. Travers, appointed a probationer for the Indian S.C.; Queen's Cadet Arthur William Hadden Bell to be Lieut., vice H. J. McLaughlin, transferred to the 19th Hussars.

Princess Louise's (Argyll and Sutherland Highlanders)—Gent. Cadet Alan Foster to be Lieut., vice D. G. M. Fowler, promoted; Queen's Cadet Robert de Crespigny Boyd to be Lieut., vice A. H. Middleton, promoted.

The Rifle Brigade (the Prince Consort's Own)—Gent. Cadet Archibald Dundonald Stewart to be Lieut., vice W. P. Drummond, resigned.

The Royal Dublin Fusiliers—Gent. Cadet Ernest Arthur Dickinson to be Lieut., vice A. George, promoted.

1st West India Regiment—Gentlemen Cadets Reginald George Burton to be Lieut., vice A. H. Butler, resigned; Robert Henry Dewing to be Lieut., vice J. F. W. Bredin, promoted; Edward Crossland Windley to be Lieut., vice H. J. Thwaytes, promoted; Arthur Nelson to be Lieut., vice A. R. Murphy, resigned.

2nd West India Regiment—Gentlemen Cadets Oliver Caton Sherwood to be Lieut., vice H. W. G. Graham, transferred to the 1st West India Regiment; George Oates to be Lieut., vice F. E. S. Claridge, promoted; Cecil Buckley Morgan to be Lieut., vice W. C. Minchin, promoted.

School of Military Engineering—Lieut. C. V. Wingfield-Stratford, R.E., to be Adjt. of the Submarine Mining Battalion (July 26).

(The Cadets are all from the Royal Military College.)

MILITIA.

WAR OFFICE, PALL MALL, August 22, 1884.

ROYAL ARTILLERY.

3rd Brigade, Western Division—Owen Willmer White, gent., to be Lieut.

5th Brigade, Welsh Division—Major G. G. Williams to be Lieut.-Col. (June 4).

4th Brigade, South Irish Division—Capt. W. D. Maunsell to be Major.

INFANTRY.

4th Battalion, the Devonshire Regiment—The Hon. Henry Walter Trefusis to be Lieut. (Aug. 5).

4th Battalion, the South Wales Borderers—Henry Tracy Peel, gent., to be Lieut.

3rd and 4th Battalions, the Duke of Wellington's (West Riding Regiment)—The under-mentioned Lieuts. resign their commissions:—T. F. Kynnersley-Gardner and F. Fisher.

3rd and 4th Battalions, the Queen's Own (Royal West Kent Regiment)—Major-Gen. H.R.H. Arthur William Patrick Albert, Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.S.I., G.C.M.G., C.B., to be Hon. Col.

2nd Battalion, the Queen's Own Cameron Highlanders—Henry John Milnes Macandrew, gent., to be Lieut. (Aug. 6).

6th Battalion, the Rifle Brigade (the Prince Consort's Own)—Major and Hon. Lieut.-Col. J. T. Davys to be Lieut.-Col. (June 14).

5th Battalion, the Royal Dublin Fusiliers—The under-mentioned Lieuts. to be Capts.:—V. W. Manly and W. C. Roper-Caldbeck.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, August 22, 1884.

Staffordshire—Major and Hon. Lieut.-Col. H., Marquis of Anglesey, to be Lieut.-Col. (June 15); Lieut. F. J. Stainer resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, August 22, 1884.

ARTILLERY.

1st Ayrshire and Galloway—Lieuts. H. L. Murray-Dunlop, R.A., to be Adjt., in succession to Major W. R. Rudge, R.A., whose term of service as Adjt. has expired; H. L. Murray-Dunlop to have the rank of Capt. whilst serving as Adjt. in the corps (both dated Sept. 1).

1st Cumberland—The appointment of Lieut. M. Salter, notified in the *London Gazette* of April 20, 1883, is antedated to April 20, 1883.

3rd Lancashire—Capt. ffarington Power resigns his commission.

1st London (the City of London)—Major G. D. Laycock resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st North Riding of Yorkshire—Major R. Dixon, the resignation of whose commission was notified in the *London Gazette* of June 6, is permitted to retain his rank, and to wear the uniform of the corps on his retirement.

ENGINEER.

2nd Lancashire—The resignation of the commission held by Lieut. W. Brooker, notified in the *London Gazette* of June 15, 1883, is cancelled.

RIFLE.

2nd Volunteer Battalion, the East Yorkshire Regiment—Lieut. G. Cussons to be Capt.

Where not otherwise stated, the foregoing commissions and announcements bear date August 23, and the current year must be understood.

London Amusements.

With this week terminates the run of the revival of "Twelfth Night" at the LYCEUM. "The Bells" will be played on Saturday and Monday, and "Louis XI." and "Richelieu" will occupy four nights next week, Mr. Henry Irving closing his present season on the 28th inst.

The Promenade Concerts at COVENT GARDEN have had the advantage of a nightly varied vocal programme. On Monday Miss Helen D'Alton and Mr. Santley appeared, on Tuesday Madame Antoinette Sterling and Mr. Kearton, and on Wednesday Madame Rose Hersee sang "Voi che sapete" from Mozart's "Nozze di Figaro," and Mr. Santley sang Handel's "Revenge, Timotheus cries." For Thursday night the valuable aid of Mr. Joseph Maas was secured. Complaints continue to be made of the effrontery with which certain frequenters of the promenade thrust their undesirable companionship on any male visitor they see a chance of accosting. The unpleasantness is, however, much more easily pointed out than prevented.

The comic opera by Mr. Murray and Mr. Jakobowski, entitled "Dick," and produced last Easter Monday at the Globe, has been transferred to the GAIETY, with Miss Fannie Leslie as Whittington and Mr. Shine in his original character of Alderman Fitzwarren. Carefully placed on the stage and adequately represented, the two-act operatic extravaganza has met with a very cordial reception in its new quarters.

At the EMPIRE has been reproduced Mr. F. C. Burnand's three-act fairy burlesque drama of "Camaralzaman," brought out at the Gaiety last January. The extravaganza has no longer the support of Mr. Edward Terry; but Mr. Royce well supplies his place, and the vivacious Miss E. Farren, the graceful Miss Phyllis Broughton, the captivating Miss Connie Gilchrist, and the nimble actor and dancer, Mr. Elton, retain their original characters.

At the GRAND THEATRE, Islington, has been produced Mr. Bartley Campbell's American drama, called "The White Slave." The piece, which is in six acts, introduces as a sensational effect the explosion of a river steamer on the Mississippi; but the plot has not sufficient interest or novelty to counterbalance the diffuseness of the dialogue.

Mr. Edward Terry will introduce in the course of his provincial tour, commencing at Yarmouth this week, a new comedy, expressly written for him by Mr. Pinero.

The SAVOY THEATRE, where "The Princess Ida" has kept possession of the programme for some nine months, has succumbed to the influence of the hot weather and closed its doors, not to be reopened for several weeks.

The PRINCESS'S THEATRE will be reopened by Mr. Wilson Barrett with "Chatterton" and "Claudian" at the end of the present month, and "Hamlet" will be represented in October with some elaborate scenic effects.

At the SURREY, Messrs. Conquest and Meritt will commence their fourth autumnal season next week with a new sensational drama by Mr. Julian Cross, entitled "Outcast Poor; or, the Byeways of London."

Mr. James Willing's new drama called "Daybreak" will be produced at the STANDARD on September 1.

Mr. W. Morton, associated in partnership with Messrs. Maskelyne and Cooke, has become proprietor of the reconstructed Greenwich Theatre, now called the NEW PRINCE OF WALES'S, opened last Monday under favourable auspices by the "Royal Standard Dramatic Company."

The first division of the Channel Squadron, consisting of the Minotaur, Neptune, Sultan, and Seahorse, under the command of the Duke of Edinburgh, left Blacksod Bay on the 20th inst. for Moville, Londonderry; and the second division, under the command of Rear-Admiral Whyte, comprising the Agincourt, Achilles, and Northumberland, proceeded to Buncrane, Londonderry.

STIMULANTS and insufficient amount of exercise frequently derange the liver. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT.—"All our customers for ENO'S FRUIT SALT would not be without it upon any consideration, they having received so much benefit from it.—WOOD BROTHERS, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, August 23, 1884. Letters on Business and Remittances should be sent to Mr. RICHARD JAMES WOOD.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE great Duke of Wellington at one time filled the offices of some half-dozen Cabinet Ministers whilst Sir R. Peel was hastening from Italy to form a Government. Lord Wolseley, in one sense, may be considered as the embodiment of all the military intelligence of the country, and to be Minister of War, Commander-in-Chief, Adjutant-General, Quartermaster-General, and *de jure* General in command in the field of all expeditionary forces in time of war. We do not cavil at this in the least. Lord Wolseley is accepted by those in authority as the best man we have got. Governments accept his advice. Acting Commanders-in-Chief obey his directions. He has done everything he has had to do through his long career of service most admirably, and in his ordering of enterprises he has displayed all the instincts and qualities of a General of the first order. Not only has he been—we will not say fortunate, for that would imply that he left the things which ought to have been done to chance, or that he was favoured by circumstances he did not control—eminently successful in what he has done, but he has been happy in the selection of most capable officers, and in making sure of the conduct of the operations designed by him by entrusting them to tried and capable subordinates. The jealousy which seems inevitable—*invidia virtutis comes*—when a man rises to a great eminence, unaided by any accident of great position, fortune, or powerful patronage, may have been sharpened somewhat in Lord Wolseley's case by his preference for his ancient comrades; but he has never shown a narrow spirit, or shut out meritorious officers from their share of service, once he has satisfied himself that they can render it. In his theories we do not concur. He stands alone among all military commanders, past and present, in thinking that young soldiers are better suited for war than veterans; but he may justify his judgment, just as Napoleon showed he was right when he discarded the ancient customs and tactics of campaigning in his first Italian triumphs, and confounded the Austrian strategists; and Lord Wolseley may, as we hope he will, establish his doctrine that the English Army of to-day is the best England ever had for fighting purposes. On him devolves a great responsibility; but it is combined with great opportunities, and with the singular luck of being able to test the value of his opinions free from control or impediment. One consequence of his pre-eminence in the estimation of the Government and of the country seems to be overlooked. It involves an immense self-sacrifice. He must always be ready to "go where glory leads him,"—to leave society, friends, family, and all he has won, for arduous service at any sacrifice. If it be true that he in fact named himself to the first Egyptian command, it may be the case that Lord Wolseley has also appointed Lord Wolseley to the Gordon Relief Expedition. He may be quite certain, however, that the Government and the nation will be content, and that they will concur in the selection. But when the leading journal, in announcing the appointment as positive last Wednesday, attempted a needless justification of it by attempting to draw a parallel between the Red River march and the expedition from Cairo to Khartoum, our contemporary challenged criticism, and the easy demonstration of the dissimilarity of the enterprises in nearly every condition, except such as Fluellen found in the resemblances between Macedon and Monmouth. In truth, the dissimilarities are so numerous and so strong, that we wonder what on earth could have induced the *Times* to cast an air of ridicule over the present or forthcoming remarkable undertaking towards the centre of the Dark Continent, and a march across Canada to root out M. Riel from his stronghold. There is as much likeness between *portages* and the ascent of the Nile cataracts by a flotilla of steamers, barges, and boats, as there is between walking up Pall Mall and ascending Snowdon. But if the *Times* had declared that Lord Wolseley is, if not our only General, the best we have for the work, that the Government rely on him to get them out of the hole in which they have plunged and floundered, that the Duke of Cambridge heartily approves of the selection, and that Lord Wolseley himself desires to take the business in hand, there would have been nothing to say but "Amen!" He knows the country and the climate; he has been "on the Nile." He is acquainted with Pashas and people, and the name of the victor at Tel-el-Kebir will not be without its influence and prestige even at Berber and El Obeid. So, whatever the designs of our rulers may be, it would appear as if the military operations have a guaranteed success. Wolseley and Gordon are comrades in arms, and they have been cast together on service repeatedly since the days they both acted as engineers in the trenches before Sebastopol. Utterly opposite in many respects, they are alike in their soldierly aptitudes and capacity for command. The mystic, religious, eccentric, and, in some worldly things, unpractical Christian Pasha, and the keen, bright Adjutant-General are both somewhat fatalistic; and it would be interesting as a study of character if one could but learn what their respective views of the situation are when they shake hands at Khartoum, as we trust they will do in peace and honour ere three months have passed. And then? "Facilis ascensus Nili sed revocare gradum,"—and Gordon may insist on "smashing the Mahdi," and Lord Wolseley have to restrain his generous rage.

WHETHER any lesson is to be drawn from the *Defence* Court-martial, is a question which is evidently troubling the minds of Naval officers, and to which we should be glad to have an authoritative response. Some sort of answer has, no doubt, been given by the verdict of the court-martial, but we must recollect that their opinion was asked on the conduct of Captain Pollard, and that the formation of the fleet and the course directed to be pursued by the Admiral came only incidentally under their notice. If we are to read between the lines of the verdict it would, however, further appear that the officers of the court, three of whom were commanding ships in the Reserve Squadron, were of opinion that there was nothing unusual in the formation in which the ships were sailing, as they state the manœuvre which resulted in the collision to have been a "very simple" one. We do not think from the letters which appeared in our columns last week, and from other information in our possession, that this view is generally accepted by Naval officers, while it is certain that it is at variance with the ordinary instructions issued for the guidance of the ships composing a fleet. These we have referred to previously, and they need not be repeated. How, then, are we to account for the rider to the court-martial verdict to which we have above referred, and to the silence of the Admiralty on a subject of such importance? The answer is, we think, to be found in the very high professional character of the Admiral, and though we believe that it is admitted by the best judges that the formation under which the fleet was sailing was neither usual nor advisable, there is yet a not unnatural feeling against casting any stigma on the officer in command. Whilst we cannot find fault with this sentiment, there is undoubted danger in allowing such a view to become ingrained in the Naval mind, as that squadrons may safely be sailed at distances only two cables apart, and that changes of formation may, without undue risk, be attempted whilst the ships are in such close proximity. On this subject, our correspondent "Rear-Admiral" speaks with judgment and authority. He points out clearly the difference which exists, and which does not appear to be generally acknowledged, between the distance apart of the columns and the distance of the respective ships in each column. We quite agree with him when he says,—"It is absolutely and fatally untrue that the closer columns are together the safer the ships are. Ships in line ahead can hardly be too close, especially in thick weather, as, if one does run into the other, she does so before the second ahead has lost any of her way; and the consequences will probably be as slight as the collision of two such bodies can be expected to be." This is the gist of the whole argument, which does not appear to have been grasped by "An Eye-Witness," and others. If we appeal to facts, it will be found, as has been stated by Captain Colomb—who has given so much attention to the laws regulating collisions—that end-on collisions never occur; while Naval officers will unanimously support the opinion of "Rear-Admiral" as to the harmlessness of collisions between ships following each other. The reason is simple. With ships in line, the collision can only occur through a ship running into the stern of her next ahead; and the danger can be avoided through a movement of the helm involving an alteration in course of one or two points. This is so elementary a proposition that, but for the mistake which seems to be made by many who should be better informed, it would seem waste of time to insist upon it. On the other hand, the case of the *Grosser Kurfürst* as well as that of the *Defence* are clearly instances of dangerous collisions which have occurred through the columns being at only two cables length apart. Whilst, then, leaving a proper discretion to the Admiral to sail his columns close together under special circumstances, such as passing through narrow channels or entering and leaving port, we trust that this formation will be strictly the exception, and that no manœuvres will in future be attempted under such circumstances, except as explained below, until the columns have been opened out to their proper distance. There is, indeed, one exception to which a correspondent has alluded in the fact that several of our best Admirals have recently been in the habit of closing the columns together (though usually to not less than four cables, if we are correctly informed), during a fog; but under such circumstances, in our experience, no manœuvre is ever attempted, except that of reversing each line sixteen points by the leaders turning outwards. This formation then, when adopted, is accompanied by a special regulation intended to minimise the danger. It is evident that this is the sort of exception which proves the rule, and we would further point out that it is only adopted as the least of two evils, and to ensure the primary duty of "keeping touch" of the ships composing the Fleet during foggy weather.

WHEN Mr. Odo Russell arrived at Versailles towards the close of the year 1870, he delivered at once his *lettres de créance* at the German Chancellor's quarters in the Rue de Provence, and descending at a restaurant ("Le Petit Vatel") he awaited Prince Bismarck's summons to his presence. It did not come that day. No notice whatever was taken of the British Envoy. Next day a card was delivered at the residence of Mr. Russell, then correspondent of the *Times* with the German Army, commanding his attendance at the *königlicher Tafel* in black coat and white cravat, on the occasion of a banquet given by the King at the Prefecture to celebrate the anniversary of the marriage of the Crown Prince. Mr. Russell, supposing very naturally that the invitation was meant for his namesake, with whom he was well acquainted since the Crimean War, went over to Le Petit Vatel, and told him of the mistake, as he thought it to be; but the Envoy declared it could not possibly be meant for him, as he had not been received by Chancellor, Crown Prince, or King; and when Mr. Russell called at Les Ombrages, he was informed the invitation was intended for him, and went to the Prefecture accordingly. As the guests were leaving at night, Prince Bismarck asked Mr. Russell if he had seen "the gentleman they have sent me all the way from the Foreign Office; he should have gone to Berlin as he was about it?" "Yes, Prince, I have." "I do not know him, but I know of him. Is he a relation?" "I have not the honour of being a member of the House of Bedford." "A camp is not the place for negotiations, unless it be between belligerents. England has nothing to do here." At this moment the Chancellor's servant came up with a magnificent fur-lined coat, and helped him on with it. The Chancellor, who was smoking furiously, and who seemed rather *en colère*, continued,—"The business is to be settled by half-a-dozen sensible men sitting round a table somewhere else. Do you know what this is? (pointing to his fur cloak). It's a *schoube*—a Russian cloak. Well, you may tell your friends I have not the least inclination to see Europe wrapped up as I am myself! Good evening, Herr Doctor." Mr. Russell went to the Petit Vatel, where he found the Envoy with a few English friends. About 9.30 or 10 o'clock, he was called out by a waiter, who said, "an officer wished to see Mr. Russell," and on going into the corridor, he found one of the Chancellor's secretaries, who told him he had been sent to take "the English Foreign Office Secretary to the Kanzler." Mr. Odo Russell dressed in a hurry, and went off. It was late in the morning when he returned on foot in the snow, after various adventures, with patrols, and arrests, and the like, and he kept his bed for a day afterwards. So commenced the intercourse which ripened into great affection, familiarity, and esteem between Lord Ampthill and Prince Bismarck.

THERE is no more irritating and useless practice than that to which our Press is very prone,—lecturing our neighbours. Lord John Russell almost created a league against us when he was Foreign Secretary by his indulgence in the habit, and by assuming the rôle of mentor to friendly nations. By lecturing Germans, French, Austrians, and Russians, we provoke hostile criticism and hate. England has no right to be the world's schoolmaster; at least, if she have, the scholars will not admit it. Tell a proud and self-sufficient people that they cannot colonise, and that they do not make war properly, and see what the result is. Will they desist? Certainly not. They will persist. If they come to grief, it is their own affair, and their enemies will rejoice. There has been a great outcry over the bombardment of Foochow Arsenal. A correspondent, who never saw the like before or beheld such a rare spectacle, was horrified by ships blazing, and corpses floating, and wounded men struggling in the river, and despatched an emotional telegram to the *Times*, and the papers at once cry out "Murder!" "Cruel Slaughter!" "Massacre!" &c. The loss of the French was, apparently, heavier than that of the British Fleet at Alexandria, and the Chinese made a stout resistance. We can scarcely credit the statement that the boilers of a French torpedo-boat were blown up by hand grenades thrown from a Chinese vessel,* but it is made very categorically. We must await further details before we can join our contemporaries in criticising the operations; but, so far as we can judge, Admiral Courbet exhibited skill and courage, and has given guarantees of future success. With any other enemy to deal with, he might find that he had put his head in the lion's jaw in passing up the Min to destroy Foochow, intending to silence the lower forts on his way down; but we do not expect that he did so without considering all the *pros* and *cons* of the situation.

Their Royal Highnesses the Prince and Princess of Wales, with their family and suite, arrived on August 22 at Dalmeny Park, on a visit to the Earl and Countess of Rosebery. They were received by a guard of honour from the *Lord Warden*, consisting of 80 Marines and 80 Bluejackets, under Captain Corbet, R.M.L.I., and Lieutenant Napier, R.N. On August 23, their Royal Highnesses inspected the Forth Bridge works, the *Lord Warden* being dressed in honour of the occasion. Yards were manned, and a Royal salute was fired as the Prince arrived. Captain and Mrs. Kennedy had the honour of being invited to meet their Royal Highnesses at dinner the same evening. On Sunday, the Prince and Princess, with their family and suite, attended divine service on board the *Lord Warden*, the service being performed by Captain Kennedy. Before leaving the ship, the Prince of Wales requested that all the officers should be presented to him, and gave orders that the "mainbrace should be spliced" to all hands. The Royal party left Dalmeny for Aberdeen and Abergeldie, by special train, on August 25.

The Channel Squadron will remain in Dublin Bay until after the arrival of the mail leaving London on Saturday, August 30.

Gunner Bracknell, R.M.A., and Privates D. Brady and D. Pattison, R.M.L.I., proceeded on Friday morning in the *Sprightly* to Osborne, in charge of Lieutenant Frederick White, R.M., to receive from her Majesty the medal for conspicuous gallantry, in recognition of their services in the Soudan.

The Admiralty have offered the post of Chief Instructor in Electricity, as applied to torpedo and mine defence—a new appointment about to be created—to Mr. Grey, the well-known electrical engineer, who for many years has been in the employ of the British Indiarubber and Telegraph Company. We understand that Mr. Grey has expressed his willingness to accept this appointment on condition that he is given the relative rank of Post Captain.

From the Mediterranean we learn that the *Temeraire* and the *Coquette* are the only men-of-war left at Malta in the harbour. The former leaves in a few days' time for her first cruise after recommissioning. She recently made a successful trial of her engines, and proved herself one of our best steamers, in spite of the heavy masts and yards with which she is encumbered. With a huge foremast, with its yards, a heavy bowsprit, and with store-rooms in her bows filled with sails and rope, it is no wonder that she drew 28 ft. 6 in. forward and only 27 ft. 6 in. aft. at the time of her trial, and that, when at near full speed, she threw up a wave in front that was the wonder of all beholders. "However," says our correspondent, "I suppose we must be content to see the steaming and fighting powers of our best ironclads crippled. The muscles and general handiness of our young seamen are certainly developed by exercise aloft; but why not teach them in corvettes that will sail, instead of spoiling our ironclads? We must hope, I suppose, for reform in about twenty years' time, as I see that £800,000 are to be spent on the *Minotaur* class, these tin-pots being in want of extensive repairs. The *Coquette* leaves us very shortly, and, having changed her colour from black to white, rumour has it that the Red Sea is her destination. She is one of the slow-steaming, slow-sailing, badly-armed, little gun-vessels which crowd and swell the numbers of our *Navy List*. Unable to run away from a stronger vessel than herself, she is equally unable to catch anything but a worn-out merchant collier. The Japanese und Australian gun-vessels put us to shame, indeed, in these matters, several having called here in the past few months. Here, too, we can expect no reform, as the *Melita* has just been commenced in the dockyard, only to be finished, I hear, in six years' time. Some progress is at last being made with the new dock, but the Maltese workmen lack faith, so the mountains of sandstone are moving very slowly out of the way. We are hoping that the barracks will soon be commenced, as the pleasure of being hulked among the rats and other vermin on board the *Hibernia* is not one most people would choose, had they any choice or voice in the matter."

Captain Bedford has done excellent work in organising the flotilla on the Nile. Having thus had the hard work to do, it seems somewhat strange that he should be recalled to his ship at the moment when his flotilla is likely to go into action and do good service. Captain Boardman takes his place, and it is no easy task to succeed Captain Bedford. Commander Henderson has proceeded up the Nile with four steam launches. Commander Hammill has been appointed "to superintend the passing of the Nile steamers over the Cataracts, and to have general Naval charge and superintendence of all steamers and boats above Wady Halfa." Commander Hammill is an excellent officer, and no one could be better fitted for the task; but it is unfortunate that his employment almost necessitates the return of Captain Bedford to the *Monarch*.

The *Lord Warden* was struck by lightning during a terrific thunderstorm on August 12. No damage was done. The electric fluid descended by the mainmast and went overboard with a loud crash, speedily clearing the lower deck.

Major-General Bray has expressed in Wednesday's *Morning Post* an opinion which we have over and over again repeated and enforced, that long service did not fail, but that those who sought to administer the affairs of the Army at the time were utterly incompetent, and failed completely. The supply of recruits fell off, and it was inferred at once that long service disgusted the people, and that short service would give an efficient and an overflowing army and an ample reserve. No attempt was made to attract recruits by the baits held out to short-service men. Every soldier whose opinion was worth anything, with less than half a dozen exceptions, held that "pension" was, as General Bray says, "the palladium of the English professional army;" but pension was abolished, and now we are harassed by incessant devices to dodge out of our difficulties in dealing with the first line, which we have sacrificed to a reserve, and in trying to suck strength out of the latter to feed the former, and at the same time keep what we are depleting in health. General Bray's proposals will of course be derided by the "substantial justice" apologist for the Cardwell-Stanley breakdown in the *Times*. He says that in the interests of the service, (1), Reserve men of good character should be allowed to return to their regiments, if they fail in a year in the Reserve to obtain employment; (2), that soldiers of good character who have served 12 years with the colours should have the option of serving on for pension, and if discharged should receive a modified pension; (3), that all Reserve men called out for war should receive a graduated pension, at the end of the second colour service; (4), that pensions should begin at 15 years' service, and be graduated up to 21 years; (5), that pensioners of 15 years' service should be transferred to the Reserve, and after 10 years' Reserve service be entitled to full pension. The offer to the Reserve men of £18 deferred pay for three years' extra service is indeed, as he points out, £18 bounty for the term, or £6 per year, and we shall be fortunate indeed if we have not to pay far more dearly for men to fill the ranks should a war come upon us like a thief in the night,—a serious war with a military nation.

The *Avenir Militaire* contemplates the possibility of having to send 60,000 men to China; this would cost money, but then in the end the Chinese will have to pay. The *Avenir* considers that for the present Admiral Courbet has quite as many ships as he requires. General Millot's despatch on the Langson affair has now been received by the French Government, and it is to be remarked that he blames Colonel Degenne for having acted with too much precipitation. The Colonel, he says, was sent to take peaceful occupation of Langson, and when he found that the Chinese Commander had not yet received instructions to evacuate the place he should have communicated with him (General Millot), before resorting to the *ultima ratio*. Had the Colonel taken this step, a great deal of bloodshed and difficulty would have been avoided. It is clear, from General Millot's report, that there was not so much treachery on the part of the Chinese as was supposed. It is unfortunate that Colonel Degenne should have construed his instructions into a positive order to get hold of Langson, no matter how.

"You may depend upon it," a distinguished General officer observed, the other day, in the "Senior," "Lord Wolseley is going to the Soudan, or that order calling for men to extend their service with the colours would never have been issued." Now, what will be the effect of the order? His lordship will have the benefit of old and seasoned soldiers in his Nile campaign; and in despatches, much will be said about the admirable behaviour of "young soldiers."

We understand that the question of Sir R. Greaves, successor in the Adjutant-Generalship in India is still an open one, as the state of Sir Thomas Baker's health is such as to render it most improbable that he will go out to take up the appointment. The general feeling of the Indian Army seems to be in favour of Brigadier-General Annesley being transferred from Bombay, General Annesley being an officer of exceptional ability, and with great experience,—just the man, in fact, to fill the position with benefit to the service.

Major Gunter, Garrison-Instructor at Dover, has registered an improved field-sketching protractor, with new scale of shade in mezzotint, to facilitate the execution of rapid field sketches with contours, fortifications, and other military drawings. This protractor is not only divided in the usual way for laying off horizontal angles, but it has countersunk on its back surface the new scale of shade (lately issued by the War Office) just under the scale of horizontal equivalents, so that it can be applied at once in the field, and uniformity insured. The scale of slopes is marked off in a greatly improved method, showing at once, without turning over the protractor, as with the old pattern, the horizontal distance to be marked off on paper, and the calculated distance this represents on the ground for each degree of slope. Besides scales of 6 in. and 12 in., it has scales of 8 in. and of 3 in. and1 in. to a mile engraved along its edges (essential for rapid measurement). The latter are of great use for the 1-in. ordnance maps issued to officers for manœuvres, &c. On the front is also a diagonal scale for taking off at once tenths and hundredths of inches, and chains and links, scale 4 in. to a mile. The protractor is well made in strong boxwood, with a hole for a tape to fasten it on to a button, and is clearly engraved. It can be obtained at the Army and Navy Stores, Westminster.

---

* Admiral Courbet's despatch, received since the above was written, states it was a cannon shot.

THE BOMBARDMENT OF FOOCHOW.

Foochow has been bombarded by the French fleet. Admiral Courbet waited for no declaration of war, and has faithfully carried out the instructions of his Government to make reprisals on the River Min. This action was rendered necessary by the treachery that planned the Bac-Le ambuscade, whereby many French lives were lost after the Tientsin Treaty had been signed,—a treaty Monsieur Ferry and all Frenchmen now regard as a "trap," and the audacity which planned it as unparalleled in history. Admiral Courbet, therefore, considered himself fully justified in entering the River Min in time of peace, with hostile intentions in his mind. By so doing, he passed both the forts and torpedo defences of the Chinese in safety, and anchored his ships off the Foochow Arsenal, in water where no obstructions to his further movements existed. Having received orders from his Government on Thursday last, as announced last Saturday in the *Army and Navy Gazette*, to open fire on the Arsenal, Admiral Courbet gave the Chinese authorities four-and-twenty hours' notice on Friday, August 22, of his intention to commence making reprisals for the Bac-Le ambuscade; and on Saturday, no satisfactory offer of settlement of the French claims having been received, the French Fleet commenced by attacking the small Chinese gunboats, junks, and transports at anchor off the arsenal. No prizes were made, and no quarter appears to have been given. Even when the Chinese ships ran up the French colours in sign of submission, the torpedo-boats of Admiral Courbet's Fleet were sent to give them their *coup-de-grâce*. No doubt this afforded excellent practice in torpedo warfare, being a most realistic experiment, carried out at little or no risk to the torpedo-boats, only one of which was lost through a Chinese projectile penetrating her boiler, which, of course, exploded. But this sort of warfare finds little favour amongst civilised nations in this nineteenth century. As the Chinese ships sank at their moorings, their crews were left to sink or swim; and had it not been for the exertions of those on board the British men-of-war Vigilant, flying the flag of Vice-Admiral Sir William Dowell, and Champion, Captain Armand T. Powlett, most of the Chinese crews would have been found drowned. The Min river, from its mouth to Pagoda Rock was known or supposed to be defended by an elaborate system of torpedo and mine defence, sent out from England. The forts of Mingan and Kinpai, as also the arsenal Krupp battery, were known to be constructed so as to be able to concentrate their fire on an enemy ascending the river, but to possess very few guns bearing up stream. Hence, to pass both forts and torpedo defence safely, and without firing a shot or losing a man, was, in itself, a great achievement. The Arsenal of Foochow was thus placed at the mercy of the French Admiral, who, with the armour-clad Triomphante, the cruisers Volta, Duguay-Trouin, and Destaigne, and the gunboats Aspic, Vipère, Lynx, and Villars, easily sank the Chinese flotilla, silenced the Arsenal Krupp battery, and reduced the storehouses to ashes, as a final stroke, on Sunday last. Having thus chastised the Chinese for their treachery at Bac-Le, Admiral Courbet had to retreat down the River Min. By his telegraphic despatch to the French Minister of Marine, the French Admiral anticipated that his progress would be slow, for he allowed himself a full week to accomplish the distance, which, under ordinary circumstances, only occupies a few hours. Admiral Courbet, however, knew full well the difficulties he had to overcome. To silence the forts on the river bank would not take long, as these he now took in rear; but to sweep and countermine the river properly, so as to effectually clear it of the enemy's mines and torpedoes, would take time. The work, too, is one of a dangerous nature, and, should the torpedo defence really exist, and the Chinese know how to utilise it, Admiral Courbet will deserve the greatest praise should he succeed in bringing his fleet out of the Min river without the loss of a single ship.

The following is a list of the successful candidates for the Indian Medical Service who were successful at the Competitive Examination on August 11, and following days:—D. Prain, 2625 marks; A. T. Bown, 2610; J. T. W. Leslie, 2560; U. N. Mukerji, 2411; W. L. Price, 2378. Fifteen candidates competed for five appointments. All were reported qualified.

A telegram dated Durban, Aug. 26, says:—"There is renewed military activity in connection with Zululand. Lieut.-Gen. Sir Leicester Smyth, commanding the troops in South Africa, has left for Etshowe, and the 2nd Batn. of the South Lancashire Regt. starts to-morrow for the same destination to reinforce the troops already there."

THE ARMY MEDICAL SERVICE.

The following is a list of the candidates who were successful for appointments as surgeons in her Majesty's British Medical Service at the competitive examination in London on August 11:—

	Marks.		Marks.
J. R. Forrest	2475	C. W. Johnson	2110
M. W. Russell	2395	W. E. Berryman	2100
W. R. de Morinni	2370	A. T. J. Lilly	2080
B. F. Zimmermann	2355	R. Caldwell	2075
A. F. Stace	2340	C. C. Reilly	2065
A. Stables	2295	S. E. Duncan	2060
J. F. E. M'Craith	2285	J. Maher	2030
E. A. C. Smith	2265	A. Perry	2030
W. M. Hewson	2210	S. M. Cordozo	2010
G. E. Moffet	2210	A. de C. Scanlan	2000
H. A. Haines	2180	H. W. James	1990
J. D. Moir	2175	R. Trevor	1990
R. Crofts	2150	H. D. James	1970
G. M. Dobson	2140	W. Turner	1970
G. E. Hale	2130	B. O. W. Norpon	1960

THE STAFF COLLEGE.

The following is the result of the recent competitive examination for admission to the Staff College:—

Order of Merit.	Name and Corps.	Marks.
1.	Lieut. C. E. Callwell, R.A.	2,951*
2.	Capt. E. W. Fleming, R.A.	2,883*
3.	Capt. H. H. Hart, R.E.	2,850*
4.	Lieut. E. Agar, R.E.	2,793*
5.	Lieut. H. P. Northcott, 2nd W.I. Regt.	2,719*
6.	Lieut. A. H. Renny, Bengal S.C.	2,707*
7.	Lieut. E. H. Bethell, R.E.	2,646†
8.	Serjt.-Major. A. G. Creagh, R.A.	2,524*
9.	Capt. W. A. Smith, R.A.	2,508*
10.	Lieut. C. E. Haynes, R.E.	2,433†
11.	Capt. W. B. Fletcher, R.A.	2,413†
12.	Lieut. H. M. Johnstone, R.E.	2,409†
13.	Lieut. J. F. Daniell, R.M.L.I.	2,396*
14.	Lieut. C. E. Poynder, Madras S.C.	2,394*
15.	Lieut. F. N. Maude, R.E.	2,381†
16.	Major W. A. Collings, 1st Batn. Berkshire Regt	2,365*
17.	Capt. J. S. Baldock, R.A.	2,358†
18.	Lieut. A. E. Jones, Bengal S.C.	2,338*
19.	Lieut. F. Hammersley, 1st Lancashire Fusiliers	2,332*
20.	Capt. J. A. Grieve, R.A.	2,318†
21.	Lieut. H. H. Smythe, 2nd Batn. Scots Fusiliers	2,307*
22.	Lieut. E. B. Urmston, 2nd Argyll & Sutherland Hlndrs.	2,296*
23.	Major H. C. B. Farrant, Loyal North Lancashire Regt,	2,264*
24.	Capt. W. H. Hippisley, 2nd Dragoons	2,244*
25.	Capt. E. C. Bethune, 2nd Batn. Gordon Highlanders	2,239*
26.	Capt. C. R. Simpson, 2nd Batn. Lincolnshire Regt	2,206*
27.	Capt. G. F. C. Mackenzie, 2nd Batn. Suffolk Regt	2,137*
28.	Capt. F. W. D. Jackson, Bombay S.C.	2,099†
29.	Lieut. R. R. N. Sturt, Bengal S.C.	2,092†
30.	Capt. L. G. Fawkes, R.A.	2,083†
31.	Lieut. H. A. S. Barkworth, 1st West India Regt.	2,064*
32.	Lieut. L. W. Bodé, 2nd Batn. Middlesex Regt.	2,056*
33.	Major M. Churchill, 2nd Northampton Regt.	2,045*
34.	Capt. J. H. Rosseter, R.A.	2,036†
35.	Capt. E. R. Evans, 1st Batn. Royal Welsh Fusiliers	2,008*
36.	Capt. H. J. Craufurd, Grenadier Guards	1,997*
37.	Lieut. A. F. Gatliff, R.M.L.I.	1,991†
38.	Capt. C. E. de la P. Beresford, 1st Bn. Liverpool Regt.	1,990*
39.	Lieut. R. B. Williams, 1st Somersetshire L.I.	1,975*
40.	Capt. A. Daniell, Bengal S.C.	1,928†
41.	Lieut. W. F. L. Wogan Browne, 3rd Hussars	1,911*
42.	Capt. F. W. Kitchener, 2nd Batn. West Yorkshire Regt.	1,865†
43.	Lieut. C. J. Cockburn, 1st Batn. Royal Warwick Regt.	1,823†
44.	Capt. H. J. Murray Graham, R.A.	1,780†

* Successful. † No vacancies available.

Arrangements were made by Major Thrupp, Inspector of Army Signalling, to place London and Wimbledon in communication with the Spithead forts by day and night, for three days this week; the general idea on which the experiments are carried out being that an enemy having landed on the South Coast and intercepted telegraphic communication between Portsmouth, London, and Aldershot, communication had to be maintained by signalling by means of flags and the heliograph by day, and by night with the flashing lamp and a system of rockets. The stations were Wimbledon to Epsom Downs, 8 miles; Epsom Downs to Merrow Downs, near Guildford, 13 miles; Merrow Downs to Hungry Hill, 12 miles; Hungry Hill to Hind Head, 10 miles; Hind Head to Butser Hill, near Petersfield, 14 miles; and Butser Hill to the Spithead Forts, 14 miles. The Portsmouth and Butser Hill stations were worked by the signallers of the Southern District, under Major Browell, R.A.; Wimbledon station by the signallers of the Home District, under Lieut.-Col. Bonham, Grenadier Guards; and the remaining stations by the officers and non-commissioned officers of the 60th Army Signalling Class now under instruction. The following officers proceeded to the various stations:—Richmond or Wimbledon —Lieut. L. D'Aguilar, 1st Grenadier Guards, and Lieut. C. R. C. Paul, 1st Gloucester Regt. Epsom — Major M. Thrupp, Inspector of Army Signalling; Lieut. E. A. Ogle, 15th Regt.; Lieut. C. R. Sainsbury, 39th Regt.; and Lieut. E. B. Eagar, 5th Fusiliers. Merrow Down—Lieut. A. Morris, 20th Hussars; Lieut. Conway-Gordon, 74th Highland Light Infantry; Lieut. Warburton, 11th Hussars. Hungry Hill—Capt. Davidson, 60th Rifles, Assist.-Inspector of Army Signalling, and the remaining officers of the class. Hind Head—Capt. H. M. Carter, 62nd Regiment; Lieut. the Hon. R. F. Lawley, 7th Hussars; Lieut. N. J. Todd, 19th Regt.; and Serjt.-Major Hitchcock, R.E., Instructor, School of Signalling. During the experiments, the converted pattern and new Aldershot pattern lime-light were tested.

Col. Ridgeway, of the Afghan Frontier Commission, and his staff were to leave Simla on Thursday for Rindli, the last station on the Quetta Railway. It has been finally settled that the escort shall consist of 200 men of the 11th Bengal Lancers, under Major Bax, Capt. Heath, and Lieut. Drummond. Three hundred camels and 500 mules are to be assembled at Sibi to-morrow. The Commission will commence its march from Rindli about Sept. 4, but, as the arrangements are very backward, it will probably be delayed at Quetta for some days.

The *Standard* says:—"Capt. Lewis, R.A., who was recently directed to report upon the defences of Aden, having recommended that various important steps should be taken towards this object, some of these will be shortly adopted. The present fortifications will be improved and provided with modern ordnance, and other steps taken towards placing Aden in a more securely defensive condition. The recent visit to that place of Sir James Fergusson, Govenor of Bombay, had special reference to this question.

Reviews.

SOME MAGAZINES FOR SEPTEMBER.

The present number of the *English Illustrated Magazine* (Macmillan and Co.) is one of rare excellence, and deserves a far more extended notice than we can give it. Having paid due attention to the charming frontispiece, which represents an engraving entitled "Sweet Peas," by E. Schladitz, from a picture of G. Leslie, we find ourselves making "The Tour of Covent Garden," which affords material for abundant illustration. First comes "The Lion's Head Letter-box, from Button's Coffee House," then Mr. H. Thompson sketches for us "The Avenue in the Afternoon," and also in the "Early Morning." After which follows a very curious as well as striking (pardon the pun) scene, namely, "An Auction in Covent Garden." This is a real curiosity, and may be seen daily. "The Women of Chaucer," by the Rev. Alfred Ainger, and illustrated by H. Ryland, is full of interest. We then pause to criticise a game of "Cricket," and at the same time to submit that the picture of "The Young Cricketer" is strikingly out of drawing, as far at least as his bat is concerned. Miss Mary Hullah contributes a pleasing village story named "Friedt." The most interesting feature, however, in the number is the paper entitled "Greece in 1884," from the well-known pen of Professor Mahaffy. The subject is of the highest possible interest, and its treatment has been undertaken by a writer thoroughly competent to do it justice. Under such circumstances, it could scarcely avoid being attractive. Having indulged in a brief retrospect of the earlier days of Greece—the days of Pericles, when art and literature reigned supreme—the writer draws the attention of the traveller who is now revisiting Greece after a lapse of several years to the wonders that have become familiar to the world since then, and which speak so eloquently of what may be expected from the future. Witness the completion of the Schliemann Museum at Athens, "where the unmatched treasures of Mycenæ are now displayed before astonished eyes." Again, in the Parthenon may be found the famous statuette copied from Phidias's Athene; and also the recent wonder, an archaic bust, "on which the brightness of the colours is not more astonishing than the fine moulding of the figure." "Greece in 1884" is a subject the interest of which can never be exhausted; but it must always be a matter of regret that there are not more Schliemanns and Mahaffys to press forward the good work.

Cornhill, for September, is quite up to the average. It opens with a highly-spiced, sensational story, and concludes with four further chapters of Mr. James Payn's story, "The Talk of the Town." We also find an amusing "Glacier Expedition," and an interesting article on "Dynamite."

In *Longman's* "Jack's Courtship" and "Madame" are both continued. "The Art of Fiction" is explained by Henry James, and Bret Harte's "A Blue-Grass Penelope" is concluded. We must also say a few words on "The Chase of the Wild Red Deer," written by the Hon. T. W. Fortescue. The subject must always prove interesting to sportsmen, more especially to those who know, from experience, how to treat such a difficult subject. Not many more years than make half a century have passed away since the wild red deer was to be found in Moate Park, Lord Crofton's property, near Roscommon. There are many persons still living who can tell whether this is a veritable myth or not. At all events, the article in *Longman's* deserves attention.

The *Atlantic Ocean* (Macfarlane and Co.), a monthly magazine and record of steamship travel, has a great deal to say on not a few matters of importance. We must leave it to the reader to find what may suit his fancy best. He has plenty to select from. We only recommend him to study the prettily executed picture of Tivoli, one of the most beautiful ruins in the vicinity of the Eternal City. In the present number, Admiral Treeble, U.S.N., contributes a short historical article on "Steam Navigation."

The *Argosy*, a periodical "laden with golden grain," is making steady progress. Its weekly contributions consist generally of short stories selected with care and literary ability, and occasionally varied with lively anecdotes. In the number for September "the golden grain" is very visible, and we may select as an example a few soothing words about blindness, which are contributed by Alice King. It is a gently written article, one that will be read with interest, and one which will impart to the reader many strange facts connected with blindness and with the blind.

In *Temple Bar*, for September, the principal feature is the opening of a story, written by Charles Reade, called "A Perilous Secret," which fairly leads the reader to expect some startling, sensational writing. There are also in this number a continuation of "Personal Reminiscences of Charles Reade," "A Sketch of Life in St. Peterburg," Part 2 of "The Red Manor," concluding with two further chapters of that most charming tale, "Peril." The number is altogether an attractive one.

Staff Capt. R. Dyer, R.N., will at once take up his appointment as harbourmaster at Sheerness, on his return home from Malta.

Last night's *London Gazette* contains a list of unclaimed moneys lodged at the estates and will branch of the India Office under the Regimental Debts Act.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS. —The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

THE PROPOSED RELIEF EXPEDITION.

The following appeared in the *Standard* of Wednesday:—"We are informed that Gen. Lord Wolseley, G.C.B., will immediately proceed to Egypt to assume the temporary command of the military forces in that country. The preparations which have been for some weeks in progress for the organisation of an expedition up the Nile, in the event of its being required for the relief of Gen. Gordon and the garrison of Khartoum, are in a great degree similar to those which were adopted in 1870 for the despatch of the Red River Expedition. The Military authorities in Egypt have displayed great energy in acting on the instructions received from home, but the successful conduct of the Red River Expedition by Lord Wolseley has furnished him with an experience which is not possessed to the same extent by any other officer, and it has been thought desirable to entrust to him the supervision on the spot of the measures which have been, to a great extent, adopted on his advice. There is some reason to hope that Major Kitchener's mission to Dongola may within a short time afford the means of opening up communication with General Gordon; but, having regard to the near approach of the cold season, the Government are of opinion that no time should be lost in placing themselves in a position to proceed to his assistance in the event of his being unable to execute his mission by other means."

The Cairo correspondent of the *Standard* says:—"Lord Wolseley also lays down a plan of campaign by which he proposes to arrive with the whole expedition at Dongola on Nov. 7, one month after the date fixed for the arrival of the flotilla of boats at Sarrash. He declares himself confident of being able to accomplish this programme without difficulty, as he has only six cataracts to pass, whereas in the course of the Red River Expedition he had to convey his boats overland at no less than forty-six places."

Notwithstanding the difference of opinion on the subject of routes which existed between some military officers at Cairo and the home officials, notwithstanding also the statements recently made as to the possibility of recourse once more to the Suakim-Berber route, the *Daily News* is in a position to state that there never has been the slightest intention on the part of the latter to abandon the plan of a boat expedition. All the details have been carefully considered, and the conclusion has been that a campaign employing 5,000 men—5,000, that is, exclusively of the large number of camp followers and men detailed to keep up communications with the base—would cost at least ten millions sterling if the Suakim road were adopted. Those who have favoured the adoption of this latter route have contended that the Korosko, Abou-Hamed, and Debbeh-Khartoum deserts are as badly supplied with water as the Suakim line of march. The boat plan, however, obviates the necessity of a march across the Korosko desert, whereas the information now in the hands of the War Office authorities goes to show that the water supply in the 200 miles of desert between Debbeh and Khartoum would probably suffice for the requirements of the English force if it were to advance that way. This last point, however, has not yet been settled. In spite of the somewhat confident statements made in certain quarters, the question of routes southwards from Debbah is as yet open. The choice between land route and river route will be left entirely to the commander's discretion, and he will decide when he reaches Debbeh. The boats have been so designed as that they may be rowed, towed, sailed, poled, or tracked—to use the Canadian expression—or, in the event of insuperable difficulties to navigation, of being carried over land to the next point of embarkation. The principal authorities, however, are firmly of the belief that once they are floated at Assiout the boats will have never once to be lifted out of the river until the journey's end. Gen. Lord Wolseley's Red River Expedition, the method of which has suggested the present enterprise, was in many respects a much more formidable undertaking than the latter. The length of line, 1,200 miles for the double march, was only about half that of the Nile voyage from Assiout to Debbeh and back; but in the Canadian route there were obstacles of an extremely formidable character, which have no counterpart whatever in the Nile Valley. Besides, the Canadian country was just as destitute of supplies as Upper Egypt and the Soudan. There was plenty of water, no doubt; but so there is in the Nile, and of as good and wholesome a kind as exists in the world. There was a spot on the Canadian line of march at which the boats had to be carried over an eminence 800 ft. high. There is nothing of this sort on the Nile route. Facts of this kind show that some alarmist statements lately published on the feasibility of a boat expedition are the merest exaggeration of difficulties which no doubt exist, but which, nevertheless, the highest military authorities are perfectly confident of surmounting.

Sir Samuel Baker predicts that the expedition which is about to be organised for the relief of General Gordon will be a failure. In a letter to the *Times* he points out that the methods which the authorities are adopting for accomplishing their objects proves their complete ignorance of all concerning the Nile and the requirements of the locality.

Gen. Sir Redvers Buller left London on Tuesday for Egypt. He travels *viâ* Vienna and Trieste, and on arriving at Alexandria will proceed immediately to Cairo, there to take up his duties as chief of the staff and second-in-command to Major-Gen. Earle, who, says the *Daily News*, will probably, though it is not absolutely certain yet, retain the chief command in the forthcoming expedition to Khartoum. Sir R. Buller is accompanied to Egypt by Col. Alleyne, R.A.

The Press Association says:—"It was at first arranged that not more than 5,000 men should form the expedition; but now the complexion of affairs has been materially altered in many respects, and this number is to be increased by 2,000 men. Another battalion is ordered to prepare to embark for Egypt, the 1st Batn. Royal Scots, numbering about 700 men, and now quartered in the West Indies, who will leave Barbadoes in the troopship Orontes in time to arrive at Alexandria by October. These, with the two battalions from India, three from Gibraltar, Malta, and Cyprus, and the forces already at Alexandria and on the Nile, will make up a total strength of 14,000 men, from which force Lord Wolseley will be able to select the Expeditionary Army of 7,000. Orders are expected for the preparation of transports for the conveyance of 1,000 Marines from Suakim to Suez, whence, if they should be required, they will proceed by rail and road to Assouan. The flotilla of 400 river-boats, for the construction of which contracts had been signed, was found on Tuesday to be numerically insufficient, and Mr. Dunn, of the Construction Department of the Admiralty, in pursuance of further instructions, accepted contracts for nearly 400 more at the stipulated price of £75 from 13 boat and shipbuilders at Liverpool, Dundee, Hartlepool, Hull, London, and on the Clyde and Tyne. It is computed that six hired transports would be sufficient for the conveyance of the first 400 boats, the first batch of which will leave England between Sept. 1 and 8. Each boat will carry 12 to 14 men."

A Woolwich correspondent states that active preparations for the Nile Expedition have begun, and the exertions which have already become visible have been accelerated by the receipt of an order directing everything to be ready for embarkation on Sept. 4 and 5. The equipment for each boat is being separately packed in large vats, one for each of the 500 boats which are going up the Nile. These vats will not be taken on board the boats on account of the space which they would occupy, but will be unpacked in Egypt, and their contents stowed among the cargo which the boats will carry. The arrangement is for each boat to constitute a separate and perfect unit of the force, carrying its own provisions, medical drugs, and appliances, spare boots and clothing, camp requisites, and ammunition, and being as far as possible independent of the others. Each will be provisioned with 1,200 days' rations, being 100 days' food for 12 men; ten being soldiers and two sailors, one of the last-named to be a Canadian boatman, 500 of that class being now engaged on the other side of the Atlantic. Comy.-Gen. Ryland aud Qrmr. Steel are working with an augmented force in the Commissariat stores packing and issuing preserved meats and vegetables, tinned soup, biscuits, and other food supplies of the expedition, and every case is painted in large letters with the inscription, "Nile Boats."

A Reuter's telegram, dated New York, Aug. 27, says:—"Intelligence received here from Toronto states that the information published by the *New York Times*, respecting the proposed employment of Canadian boatmen for service on the Nile, appears to be quite authentic. It is added that the Marquis of Lansdowne has written to the Militia Department asking for the names of some Militia officers whose services are obtainable to take charge of the contingent. Preference will be given to officers who served under Lord Wolseley during the Red River expedition. Some French Canadian officers will also be taken, as it is expected that the majority of the boatmen will be French Canadians."

The preparations for the departure of the 8th (Railway) Compy. R.E. are now being carried out at Chatham, the officers and men being expected to leave in the course of a few days. The 8th Compy. has been formed into a Railway Corps for laying down and working the line of railway. Its present strength is 126 men, with five officers, but it is intended to be augmented by transfers from the Depôt Companies.

Messrs. Thomas Cook and Son have been instructed to transport 400 boats, each of the length of 35 ft., and with a beam of 8 ft., from Alexandria to Wady Halfa. One hundred will arrive from Alexandria on Sept. 20, 100 on the 25th, and 200 on Oct. 2.

The Cairo correspondent of the *Times* says:—"Lord Wolseley has telegraphed orders to the military authorities to push forward. The troops will commence their march from Saaras on Oct. 7, and they are expected to reach Dongola on Nov. 7. His lordship considers that the difficulties of the river route have been overrated."

By latest accounts Sir Evelyn Wood had not left Korosko. Major Stuart-Wortley had returned with his Bedouins to Assouan.

Major Denison, of the Governor-General's Body Guard, will take command of the contingent of Canadian boatmen to be despatched to Egypt.

The *Standard* says:—"On Lord Wolseley's arrival at Cairo the important question of how far the Egyptian Army will be utilised in the expedition will be definitely decided. There is a deep and unanimous feeling amongst the officers of that force that the men under their command will, in conjunction with British regiments, render a good account of themselves on active service. Many of the authorities, however, at Cairo and at the War Office are of opinion that it is advisable for the native troops to proceed only a certain distance beyond Wady Halfa. It is probable that the latter course will be adopted, only a few picked detachments proceeding to Khartoum. It may be added that the 9th Batn. of the Egyptian Army, now *en route* to Wady Halfa, is 480 strong, is composed entirely of negroes, and is in a very efficient condition."

The Government have entered into a contract with the agents of a meat preserving company in Chicago to supply half a million pounds of compressed beef, which is to form a reserve at the base of operations. As a novelty in the food supply of this expedition may be mentioned a quantity of bacon and hams. Some of the hams are being sent out preserved in paraffin, an expedient which is said to have answered well, without any unpleasant effect upon the flesh, but as objections might be entertained on the ground of natural prejudice to being fed upon meat kept in mineral oil, the experiment will be tried only on a sparing scale.

Owing to the great labour required in moving stores and materials in connection with the Expedition and the intense heat of the climate, the War Office has decided upon engaging 300 Kroomen from the West African Coast. They will be despatched to Egypt with all possible speed, probably embarking at Cape Palmas. These Kroomen have been selected as being especially adapted as labourers in a tropical climate.

Respecting the medical force which is to accompany the Expedition, the *British Medical Journal* gives the following particulars:—"We have ascertained that very ample arrangements have been and are being made for the medical care of this Expedition. The medical officers have been detailed for the service of the troops in the proportion of five to every 1,000 men. This is equivalent to the full proportion which is provided in Indian campaigns, and will no doubt be adequate to the necessities of the case. Administrative Deputy-Surg.-Gen. O'Nial, C.B, and the principal medical officer, Surg..Gen. Irvine (who has been home on leave) have already started for Egypt, and will be in medical charge of the Expeditionary troops. A detachment of non-commissioned officers and men and two quartermasters of the Army Hospital Corps have also been despatched, making a total, with those already in Egypt, of nearly 300 members of the Hospital Corps. Each boat, containing eight men, will, we learn, be provided with a case of hospital comforts. As to the formation of station hospitals, and the precise lines on which the medical arrangements will be organised, much latitude will naturally be left to the local authorities, who will be acquainted with the special exigencies of the campaign, and able to adapt the arrangements to the necessities which will arise. The result of the searching inquiry by Lord Morley's Committee was to prove that the mortality in the last Egyptian Campaign, notwithstanding some complaints which were made, was smaller than in any campaign of the kind known to history; and as the present Expedition is undertaken at a favourable season of the year, there is every reason to anticipate that the mortality will be light, possibly not more than two per cent."

Orders were received at Aldershot on Thursday afternoon for the immediate preparation for Egypt of detachments of the first division of the Telegraph and Field Park, Royal Engineers, numbering nearly 400 men. They are to embark at Gravesend next Wednesday, and are to be thoroughly equipped with stores of every description for telegraph, mining explosives, and surveying.

THE INDIAN RELIEFS.

The following movements are notified with reference to the reliefs of British and Native troops for 1884-85, published in G.O.C.C., dated March 20, 1884:—

Royal Artillery.—No. 1 Baty. Eastern Division: From England to Murree Hills. By sea, rail, and route march. To take over mountain equipment of No. 5 Baty. South Irish Division. No. 1 Baty. London Division: From England to Campbellpore. By sea and rail.

British Cavalry.—3rd Dragoon Guards: From England to Muttra.

British Infantry.—74th Highland Light Infantry: From England to Dagshai; 31st East Surrey Regt.: From Gibraltar to Ranikhet; 2nd Batn. 18th Royal Irish Regt.: From Malta to Subathu and Jutogh; 68th Durham Light Infantry: To stand fast at Allahabad; 40th South Lancashire Regt.: From Peshawur to Aden (instead of to Jullundur); 88th Connaught Rangers: From Ranikhet and Shahjehanpur. (Will be notified hereafter.)

Native Infantry.—4th Regt.: From Alipore to Cachar; 12th Regt.: From Cachar to Lucknow. By Government steamer and flat to Calcutta for temporary location at Alipore, until relieved by 18th N.I., and then by rail to Lucknow; 13th Madras N.I.: From Jubbulpore to Bellary; Detachment 13th Madras N.I.: From Jubbulpore to Bellary. By rail on relief by 27th Madras N.I.; 27th Madras N.I.: From Bellary to Jubbulpore.

THE VOLUNTEERS AT ALDERSHOT.

An official report on the attendance of 6,000 Volunteers to Aldershot to drill with the regular troops, and with special reference to the field-day on the 15th inst., was issued on the 25th inst. by Gen. Sir Archibald Alison, commanding the division. He states that "the object of the Northern force, as defined in the special idea for that force was—'Endeavour to hold the Southern force in check on the Fox Hills for two hours, and then retire by Pirbright'; that of the Southern force to, if possible, turn the flank of the Northern force, and attack and defeat it before it could reach Pirbright." After pointing out the chief features of the operations, the General says:—"The Cavalry and Horse Artillery, as a whole, were ably and quickly, but rashly handled. Hard thrusts were given and received, and any error made on either side quickly punished; but the loss on each side would have been extremely heavy." The plan of the Northern force for the infantry fight is then stated, together with the circumstances under which it actually took place, the General pointing out some defects in the movements. He then observes:—"This day was intended mainly for the Volunteers, and the way in which they worked in the field, and afterwards marched past, reflects much credit upon them. It shows the great interest taken by the men themselves, and the great pains taken by their commanding and company officers. It is but seldom that Volunteer corps have sufficient ground at their disposal for the practice of attack formations as a manœuvre. It was, therefore, with surprise and satisfaction that the Lieutenant-General Commanding observed the intelligent way in which many of the battalions worked and took advantage of every undulation of ground for cover. The Lieutenant-General would strongly impress upon the Volunteer officers the advantage of accustoming their men, when in attack formation, to fire as much as possible by volleys of half companies, or sections, and as little as possible—except when reinforced by the main body for the final rush—by independent firing." In conclusion, Gen. Alison expresses his great pleasure in regard to the admirable behaviour of the large force of Volunteers when in camp, and their perseverance and zeal in drilling and accustoming themselves to a soldier's life on service.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

PREVENTION OF COLLISIONS AT SEA.

By an Order in Council, published last week, new regulations, of which the following is a résumé, come into force, annulling the regulations contained in the Order in Council of Aug. 14, 1879, for preventing collisions at sea, and substituting therefore, the following regulations :—

1. Steamers under sail alone shall be regarded as sailing ships, and every steamer under both sail and steam is to be considered as a ship under steam alone.

2. Sea-going steamships shall carry, when under way, the following lights, from sunset to sunrise :—

3. A masthead-light on the foremast, at a height of not less than 20 ft. above the deck. Bow lights, starboard green and port red, constructed to throw a light from right ahead to two points abaft the beam.

4. Steamers when towing another ship shall carry two masthead lights instead of one.

5. Disabled ships, steamers or sailing vessels, shall carry three red lights (in globular lanterns) suspended vertically from the head of the foremast, and in the day-time three black balls or shapes. Telegraph ships shall, by night, carry, when picking up or laying a cable, in place of the masthead lights, three lights in globular lanterns placed vertically and not less than six feet apart, the highest and the lowest light being red, and the middle light white. By day a telegraph ship shall carry three shapes in the place of the lights, the top and bottom shape being globular and red in colour, and the middle one diamond-shaped and white in colour. When not making any way through the water at night, telegraph ships shall carry no side lights. All ships are to get out of the way of telegraph ships, showing these lights or shapes as if they were ships not under command.

6. A sailing ship shall never carry the steamer's masthead light, but when being towed she shall carry the same lights as are provided by Article 3 for a steamship.

7. Portable bow lights are to be used by small craft in bad weather, and are to be shown in time to prevent collision on nearing a ship. These lights are to be painted the colour of the light they throw, and are to be fitted with proper side screens.

8. All ships and vessels at anchor shall carry an anchor or masthead white light at a height not exceeding 20 feet from the deck.

9. Pilot vessels engaged on pilotage duties on their stations shall carry a white light at their mast head visible from all points of the compass, but no other lights. They shall also exhibit a flare-up light at short intervals not exceeding 15 minutes. When not engaged on their stations, pilot vessels shall exhibit lights similar to those carried by ordinary vessels of their class.

10. Fishing and other vessels of less than 20 tons register are not obliged to carry coloured side-lights. Every such boat or vessel shall have ready to hand a lantern fitted with a green glass on one side and a red glass on the other to exhibit to approaching vessels in time to avoid collision.

All fishing vessels and boats of 20 tons register or upwards, when engaged fishing off the coast of Europe, lying north of Cape Finisterre, shall exhibit two white lights from that part of the vessel whence they can best be seen, the said lights being so disposed that they shall be one above the other and not less than 6 feet or more than 10 feet apart. The lower light shall be more forward than the upper one. Should a fishing vessel become stationary, she shall show the light of a vessel at anchor and, in addition, make the fog signal. Fishing vessels may show flare-up lights in addition to the above, from that end of the vessel which is free from their fishing tackle. In fog and misty weather all fishing vessels shall blow their fog-horn and ring their bell alternately at intervals of two minutes.

11. A ship or vessel being overtaken by another shall show a white light or a flare-up light to the chasing ship.

SOUND SIGNALS FOR FOG.

12. The steam-whistle, the fog-horn, blown by bellows or other mechanical means, the bell (or in Turkish ships the drum), shall be provided in all steamers, the whistle being omitted in sailing vessels. These shall be used as follows :—

(*a.*) A steamship under weigh shall make with her steam-whistle, or other steam sound signal, at intervals of not more than two minutes, a prolonged blast.

(*b.*) A sailing-ship under way shall make with her fog-horn, at intervals of not more than two minutes, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*c.*) A steamship and a sailing-ship, when not under way, shall, at intervals of not more than two minutes, ring the bell.

SPEED OF SHIPS TO BE MODERATE IN FOG, &c.

13. Every ship, whether a sailing-ship or steamship, shall, in a fog, mist, or falling snow, go at a moderate speed.

STEERING AND SAILING RULES.

14. When two sailing-ships are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz. :—

(*a.*) A ship which is running free shall keep out of the way of a ship which is close-hauled.

(*b.*) A ship which is close-hauled on the port tack shall keep out of the way of a ship which is close-hauled on the starboard tack.

(*c.*) When both are running free with the wind on different sides, the ship which has the wind on the port side shall keep out of the way of the other.

(*d.*) When both are running free with the wind on the same side, the ship which is to windward shall keep out of the way of the ship which is to leeward.

(*e.*) A ship which has the wind aft shall keep out of the way of the other ship.

15. If two ships under steam are meeting end-on, or nearly end-on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where ships are meeting end-on, or nearly end-on, in such a manner as to involve risk of collision, and does not apply to two ships, which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are, when each of the two ships is end-on, or nearly end-on, to the other; in other words, to cases in which, by day, each ship sees the masts of the other in a line or nearly in a line, with her own; and by night to cases in which each ship is in such a position as to see both the side lights of the other. It does not apply by day to cases in which a ship sees another ahead crossing her own course; or by night to cases where the red light of one ship is opposed to the red light of the other, or where the green light of one ship is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

16. If two ships under steam are crossing so as to involve risk of collision, the ship which has the other on her starboard side shall keep out of the way of the other.

17. If two ships, one of which is a sailing ship and the other a steamship, are proceeding in such directions as to involve risk of collision, the steamship shall keep out of the way of the sailing ship.

18. Every steamship, when approaching another ship, so as to involve risk of collision, shall slacken her speed, or stop and reverse if necessary.

19. In taking any course authorised or required by these regulations, a steamship under weigh may indicate that course to any other ship which she has in sight by the following signals on her steam-whistle, viz. :—One short blast to mean "I am directing my course to starboard"; two short blasts to mean "I am directing my course to port"; three short blasts to mean "I am going full speed astern." The use of these signals is optional, but if they are used, the course of the ship must be in accordance with the signal made.

20. Notwithstanding anything contained in any preceding article, every ship, whether a sailing ship or a steamship, overtaking any other, shall keep out of the way of the overtaken ship.

21. In narrow channels every steamship shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such ship.

22. Where by the above rules one of two ships is to keep out of the way, the other shall keep her course.

23. In obeying and construing these rules, due regard shall be had to all dangers of navigation, and to any special circumstances which may render a departure from the above rules necessary, in order to avoid immediate danger.

NO SHIP, UNDER ANY CIRCUMSTANCES, TO NEGLECT PROPER PRECAUTIONS.

24. Nothing in these rules shall exonerate any ship, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

RESERVATION OF RULES FOR HARBOURS AND INLAND NAVIGATION.

25. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority relative to the navigation of any harbour, river, or inland navigation.

SPECIAL LIGHTS FOR SQUADRONS AND CONVOYS.

26. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for ships sailing under convoy.

27. When a ship is in distress and requires assistance from other ships or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, that is to say :—In the daytime—(1), a gun fired at intervals of about a minute; (2), the International Code signal of distress indicated by N C; (3), the distant signal, consisting of a square flag, having either above or below it a ball, or anything resembling a ball. At night—(1), A gun fired at intervals of about a minute; (2), flames on the ship (as from a burning tar barrel, oil barrel, &c.); (3), rockets or shells throwing stars of any colour or description, fired one at a time, at short intervals.

INDIAN ARMY NOTES.

The Ameer's answer to the last letter sent him about the Afghan Frontier Commission has been received at Calcutta. While repeating his desire to offer every assistance, he says that if the Candahar route were adopted he would be unable to guarantee the safety of the party along one piece of the road, namely, that passing through Zamindawar. This reply finally settles the question in favour of the Nushki route. On reaching the Helmund the party will probably proceed straight to Herat through the Afghan territory. The strength of the escort is still an undecided question. The last proposal is to send 200 men, all cavalry. This amount of force seems hardly sufficient to protect the party, which, with the followers, will probably number at least 500, and be accompanied by a long string of camels and baggage animals.

The *Times of India* says :—"We are glad to hear on very good authority that Sir Frederick Roberts has just sent in a scheme for the retirement of senior officers in the Madras Army. The block there is without a parallel in the history of the Staff Corps. There are 214 lieutenant-colonels, 68 majors, 37 captains, and 175 lieutenants. Things are not quite so bad in Bombay. But an acceptable retirement scheme can scarcely be devised for Madras that would not be welcomed in Bombay also."

"HEALTH EXHIBITION."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

The Army.

2ND DRAGOON GUARDS remain at Aldershot for the winter.

3RD DRAGOON GUARDS. On arrival in India the regiment will be stationed at Muttra.

4TH DRAGOON GUARDS. Serjt.-Major Clifford, who injured himself internally while engaged in a military tournament at Preston Park on Monday week, has died from his injuries. He had served 14 years in the regiment, and leaves a wife and two children.

5TH DRAGOON GUARDS. The dismounted party and married people proceed to-day by rail from York to Manchester, and one squadron by march-route from York to Liverpool. One squadron will proceed by march-route from York, *viâ* Leeds, Halifax, and Rochdale, to Manchester on Sept. 10, and one squadron from York to Manchester on Sept. 11.

4TH HUSSARS are to remain at Norwich for the present. Staff Serjt.-Major P. Brown, late of the regiment, Garrison Serjt.-Major of Dublin, died recently at his quarters in the Royal Barracks, of pneumonia, from which he had suffered for a considerable time. He was appointed Garrison Serjt.-Major in Feb. 1882.

7TH HUSSARS remain at Aldershot for the winter.

11TH HUSSARS. The first division has left England for Ireland, and disembarked on Wednesday from H.M.S. Assistance. The second division is due in Ireland about the 6th, and the third about the 15th prox.

12TH LANCERS. The *Bombay Gazette* says: — "The retirement of Capt. Montague will most probably be shortly gazetted, provided recent orders do not interfere, he having obtained leave to England on private affairs pending retirement. He joined the 12th Lancers from the 7th Dragoon Guards in Sept., 1883, as capt. The senior lieut. of the regiment has only three years' service or so, consequently the promotion, if the retirement be sanctioned, will not go regimentally."

13TH HUSSARS will leave Bombay in H.M.S. Serapis on Nov. 11.

19TH HUSSARS. Major French, adjutant, Northumberland Hussars, has been permitted to resign that appointment on his proceeding to Egypt to join his regiment.

20TH HUSSARS. The regiment is to be conveyed from Queenstown to Liverpool in H.M.S. Assistance. The first division embarked on Thursday. The remaining divisions will leave on the 6th and 16th prox. respectively. The regiment proceeds by march route to Aldershot.

21ST HUSSARS. Capt. Pigott left England on Wednesday for Egypt.

ROYAL ARTILLERY.

Capt. G. E. Giles has been appointed on the staff of the Police Force in the Straits Settlements, and has just left England for Malacca to assume duty. Capt. Giles was recently in command of the troop of the Cape Mounted Rifles, and took part in the operations against Morosi.

I and O Batys. 1st Brig., for England, and No. 6 Baty. Western Division, and No. 5 Baty. South Irish Division, for Aden, leave Bombay on Nov. 1 in H.M.S. Crocodile.

No. 8 Baty. Eastern Division, and No. 7 Baty. London Division, will embark at Aden, *en route* to England, about the middle of November.

A correspondent writes :—"With reference to a paragraph which appeared in the *Army and Navy Gazette* of July 26, under the head of 'Royal Artillery' news, giving the rules by which officers can now join the Ordnance Store Department, and setting forth some of its advantages, I think it only fair to intending candidates to say a word on the other side. It is stated in the paper referred to that the terms of foreign service are, as a rule, five years in the Mediterranean and three years in the Colonies. Officers of the Department are given to understand that these are the periods of foreign service; but reliefs are hardly ever carried out punctually, as in other departments of the Army, owing to the paucity of officers. Extra pay is granted for special duties, but an officer very seldom has an opportunity of obtaining it; should he, however, be so fortunate, the advantage is, as a rule, only enjoyed for a very limited period. It is most difficult to obtain leave, as, in a large number of cases, there is only one officer of the Department at a station, and even if any officer can be found to take over his duties during his absence, he has a large quantity of valuable stores for which he is held personally responsible, which he has to leave in charge of someone who may be quite ignorant of the work of the department. The consequence is that leave is generally taken at a great risk, or is out of the question, except when an officer returns from a tour of foreign service, when a month or six weeks is grudgingly granted to him. With the present number of officers in the Department, it is, no doubt, impossible to carry out reliefs punctually abroad, or to grant leave, but so long as this state of things exists it is hardly probable that there will be many candidates who wish to be transferred from the Royal Artillery when vacancies occur."

ROYAL ENGINEERS.

Major-Gen. J. G. Medley, late Consulting Engineer to the Government of India for Guaranteed Railways, Lahore, died on the 12th inst., suddenly, at Port Said, on board the P. and O. steamship Ravenna, while on his homeward voyage. The deceased, who was in his 56th year, entered the service in 1847. He became first lieut. in 1854, capt. in 1858, and col. in 1881. He served in the Indian Mutiny campaign, throughout the siege of Delhi, and was severely wounded while conducting the storming party at the assault of the Cashmere breach. He served also with Seaton's Column at the actions of Gungeeree, Puttialee, and Mynpoory, and was also engaged in the siege and capture of Lucknow.

GRENADIER GUARDS. The 1st Batn. left London on Thursday, *en route* to Dublin. The 2nd Batn. has moved from Aldershot to the Tower of London, and the 3rd Batn. from Pirbright Camp to Windsor. Lieut. St. Aubyn, who acted as aide-de-camp to Sir Redvers Buller in the late Soudan campaign, has been selected for service with the Expeditionary Force to Khartoum.

Coldstream Guards. The 2nd Batn. has moved from Windsor to Chelsea.

3rd Buffs (East Kent Regiment.) The *Standard* says:—"Capt. D. Lewis has been selected for the appointment of A.D.C. to Sir G. Bevan, Governor and Commander-in-Chief of Hong Kong and its dependencies. Capt. Lewis has been temporarily holding that position since April last."

11th Devonshire Regiment. Lieut. Gurdon, 2nd Batn., is a candidate for the Indian S.C., and has been appointed to the 14th Bengal N.I.

12th Suffolk Regiment. Lieut. McAndrew, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 25th Bengal N.I. on probation.

13th Somersetshire Light Infantry. Capt. and Adjt. Walsh and Lieut. Snow left England on Wednesday for Egypt, for duty with the Mounted Infantry.

15th East Yorkshire Regiment. Brevet Lieut.-Col. Grove, D.A.A.G. at head-quarters, accompanies Lord Wolseley to Egypt.

18th Royal Irish Regiment. The 1st Batn. left Bombay in the hired transport Hankow on Thursday, for Egypt. The 2nd Batn., on arrival in India from Malta, is to be stationed at Subathu and Jutogh. Lieut. Ryall, 1st Batn., is a candidate for the Indian S.C., and has been appointed to the 4th Goorkhas, on probation.

19th Yorkshire Regiment. A correspondent writes from Egypt:—"Protests have been several times made against regiments being quartered in Ramleh Barracks, where the sick-list of the Duke of Cornwall's L.I. and 60th Rifles both reached over 15 per cent. The Yorkshire Regt. is now installed there, and I desire to record the fact that their first return is 11 men sick out of 682. We shall see the result." Capt. Spottiswood, Lieuts. Molony and Handcock, and 155 men will embark at Queenstown about the 2nd prox. on board the transport Poonah, for conveyance to Egypt.

21st Royal Scots Fusiliers. Lieut.-Col. Bainbridge, 2nd Batn., succeeds Col. Gildea in command of the 1st Batn., Major Jackson becoming 2nd lieut.-col. Lieut. Stanuell, 1st Batn., left England on Wednesday for Egypt, for duty with the Mounted Infantry.

23rd Royal Welsh Fusiliers. Major Creek, 2nd Batn., will act as D.A.A.G. at head-quarters during the absence of Lieut.-Col. Grove in Egypt.

31st East Surrey Regiment, on arrival in India from Gibraltar, will go to Ranikhet. The *Gibraltar Chronicle* says:—"We hear with regret from England of the death of Capt. H. Butler, at Plymouth, of typhoid fever. Capt. Butler only left this garrison on leave on June 20, and at the time was suffering from acute rheumatism, against which he bravely struggled. Where he got typhoid is yet unknown, perhaps the seeds of it were sown before he left the Rock; anyhow, we hear that the P. and O. Company's officers were obliged to land him at Plymouth, where he died. The late Capt. Butler was born in Oct. 1850, and joined the 31st Foot in May, 1868; he became instructor of musketry in Oct. 1874, and was appointed adjutant in May, 1878, gaining his promotion to captain in March, 1880. He was greatly esteemed by all, and was a general favourite."

35th Royal Sussex Regiment. Two further detachments of the regiment arrived at Wady Halfa on Thursday. The regimental transport is marching back.

40th South Lancashire Regiment will leave Bombay for Aden on Nov. 1, in H.M.S. Crocodile.

42nd Black Watch (Royal Highlanders). Capt. Stevenson and 103 men left for Egypt on Wednesday in the troopship Goorkha.

44th Essex Regiment will leave Aden in H.M.S. Crocodile about the middle of November. Major Ventris has proceeded to Egypt to join the 56th, on promotion.

46th Duke of Cornwall's Light Infantry. The promotion of Major Forster to a brevet lieutenant-colonelcy for service in the Soudan Campaign is well deserved, he having been severely wounded during the Egyptian Campaign, and having strong claims on account of his general zeal and devotion to duty. The "Fighting 46th" scarcely received their fair share of honours for the Egyptian business. No regiment suffered more severely or conducted itself more admirably under all circumstances.

49th Berkshire Regiment. The *Gibraltar Chronicle* of the 19th inst. says:—"His Excellency the Governor, accompanied by Major-Gen. Mark Walker, Col. Hackett, and the several officers of the head-quarter and brigade staffs, proceeded at 9 o'clock this morning to the South Barracks to make a farewell inspection of the 1st Batn. Berkshire Regt. The battalion was drawn up in column, and after his Excellency had walked down the ranks of the several companies, the battalion was closed on its central companies, and his Excellency made the following speech to the regiment:—'Col. Huyshe, officers, non-commissioned officers, and men of the Berkshire,—I have come this morning with Gen. Walker, who commands the Infantry Brigade, and Col. Hackett, the Adjt.-Gen., to see you on parade for the last time before you leave Gibraltar; and I am sure that I am expressing the feelings of those officers as well as my own, in saying that we are sorry that you are about to pass from under our command. It so happens that Gen. Walker, Col. Hackett, and myself had an opportunity many years ago of taking part in a great war in company with this battalion. That was in the Crimean War. It was a good regiment then; it is a good regiment now. Col. Huyshe, I think that you and the officers and men of this battalion have had a great compliment paid you in being selected for a second time to serve in Egypt. There are many officers and many regiments in the service who would be very glad to take your place. I need hardly say that Egypt is always a country of the highest interest, and never more so than on the present occasion; and you may feel assured that not only your own friends and fellow-countrymen in England, but the whole of Europe, are now carefully watching the movements and deeds of the British Army in that country. I feel sure that you will do all that lies in your power to maintain the honour of the regiment and of the Army. I will not say good-bye to you now, as the other officers and myself will come to see you when you are embarked; but I was desirous of seeing you on parade, and of wishing you all health and prosperity.' Lieut.-Col. Huyshe then replied as follows:—'Your Excellency,—On behalf of myself and the gallant regiment I have the honour to command, I beg to return you our heart-felt thanks for the kind words you have just spoken to us. Praise from a General, especially from one so experienced as yourself, is always highly prized by any regiment, and we are therefore very grateful for the manner in which you have spoken of us, and to myself personally it is a matter of great satisfaction to feel that some praise is not undeserved. I do not like, as a rule, to ask any favours, but there is one favour that I would wish, for myself and for the sake of my battalion, to ask you. We are returning to Egypt, and there is no knowing what work there may be to do, but if there is any fighting in progress I do trust you will put in a good word for us, and get us pushed on to the front if possible, and to give us an opportunity of proving that the Berkshire Regt. is as true and loyal as the old 49th has ever been.' The parade was then dismissed and his Excellency and suite returned to the town. We desire now to record our own farewell to this gallant corps, which first joined this garrison from Dover in March, 1881, did duty here till ordered to Egypt for the war on July 7, 1882, again rejoined on May 21, 1883, and now for the second time is ordered to Egypt, probably for active service; although the cloud of mystery still hangs over the question of an expedition. We speak for the public generally, when we say that this battalion has obtained for itself 'golden opinions' during its stay on the Rock. On the parade-ground, in the hunting-field, and before the wickets, the old 49th have brought credit to the service in general and to this garrison in particular. Many familiar faces will be missed when the hounds again draw the surrounding country, the master will lose one of his whips in Lieut. Turner, and the hounds will lose many a good rider from amongst Lieut.-Col. Huyshe and the officers of his regiment. As his Excellency the Governor remarked in his speech of this morning, the regiment 'was a very good regiment in the Crimean days, and is so now,' to which we may be pardoned if we add 'and must be in the future,' if the present *esprit de corps* is maintained, and the grand old principle of 'good-will to all' is the ruling motto of the regiment. In the men, we lose a very fine body of willing and steady soldiers, who we, without hesitation, assert will do full justice to the regiment, should they be called upon to face the foe. In conclusion, we beg Lieut.-Col. Huyshe, the officers, non-commissioned officers, and men of the Berkshire Regt. to receive our very best wishes for their future welfare, hoping that they will also occasionally look back with pleasure to the days they spent on the Old Rock, in spite of its many drawbacks and numerous guards."

54th Dorsetshire Regiment will, it is expected, proceed from India to Aden next year, with a view to its returning to England in 1885-6.

60th King's Royal Rifle Corps. Lieut. Fortescue, A.D.C. to Gen. Sir F. Stephenson, commanding the troops in Egypt, has been appointed Deputy-Assist.-Adjt.-Gen. of the Army of Occupation during the absence of Major Sandwith in Upper Egypt on special service. The *Morning Post* says:—"Major Hutton has just arrived in England from Egypt, where his health has suffered owing to his arduous exertions in completing the organisation of the Mounted Infantry in that country. In consequence, to a great extent, of Major Hutton's unremitting efforts in this direction, which have been specially brought under the notice of Gen. Stephenson, that force is now in a highly efficient condition." Capt. Fetherstonhaugh and Lieut. Campbell left England on Wednesday in the troopship Goorkha for Egypt.

63rd Manchester Regiment left the Tower of London on Thursday for Shorncliffe. This corps has twice occupied the Tower since its return from India and Egypt, in November, 1882. The Queen has accepted a copy of the history of the old 63rd (West Suffolk) Regiment from the officers, non-commissioned officers, and men of the Manchester Regiment.

70th East Surrey Regiment will leave Bombay in H.M.S. Himalaya on the 6th prox. for Egypt.

72nd Seaforth Highlanders. Lieut.-Col. Stockwell, C.B., had the honour of showing to the Queen, on Tuesday, four pieces of plate presented to the regiment, consisting of a centre-piece presented by his late Royal Highness Prince Leopold, Duke of Albany, and the nobility and gentry of Stirlingshire, Dumbartonshire, Clackmannanshire, and Kinross-shire; and also a loving-cup to the serjeants' mess, a silver clock from the officers of the Highland Borderers Light Infantry Militia, and a regimental challenge shield, presented to the non-commissioned officers and men of the regiment by the non-commissioned officers and men of the 5th Ghoorkas, who were brigaded with the regiment during the two years' campaign in Afghanistan. A correspondent, signing himself "Ross-shire," writes to the *Standard*:—"Being in Scotland lately, I made some inquiries into the allegations made as to the present recruiting for the Seaforth Highlanders, with whom I formerly served, and find, as your correspondent, Mr. Cameron, stated the other day, that it is mostly English recruits that are now joining the depôt. This seems to me, as a Scotchman, a great pity; but, on the other hand, I am perfectly aware that the strength of the regiment must be kept up; and if Scotch recruits cannot be got, then it is necessary to take English or Irish. I believe, however, that more Highland recruits might be got if the authorities went the proper way to work about it. The Highland regiments as complete corps, with their bands, pipers, and colours, are never seen in the Highlands. This may seem strange, but so it is. There is generally a battalion in Glasgow and another in Edinburgh Castle, and depôts at Fort George, Stirling, and Perth. But whoever saw a Highland regiment with its bands and pipers marching through any of the northern towns of Scotland? Take the Seaforth Highlanders, for instance. Ever since the return of the 1st Batn. from Egypt, more than 18 months ago, it has been quartered in the Isle of Wight, the most remote part of the kingdom from Scotland! I believe if this famous battalion—nearly all the men wearing, as they did on their return, four medals for Afghanistan and Egypt—had been sent to Scotland, and during last summer had been encamped, say, at Inverness, and its bands and pipers had attended the various fairs and gatherings of the adjacent counties, enough Highland recruits of the right sort would have been forthcoming to fill up its ranks."

74th Highland Light Infantry. On arrival in India from England, the regiment will be stationed at Dugshai.

80th South Staffordshire Regiment. Two officers and 50 men of the 2nd Batn. leave Lichfield this morning for Portsmouth, there to embark in the s.s. Poonah, for Egypt.

82nd South Lancashire Regiment. A telegram from the Cape announces that the regiment has been ordered up to Etshowe.

86th Royal Irish Rifles. Lieut. Welman, a probationer, officiating wing officer, 13th N.I., is about to be admitted to the Bombay N.I. from Oct. 16, 1882.

88th Connaught Rangers. A correspondent writes from India:—"The reliefs for British Infantry have already been modified. It has been found that the 1st Durham Light Infantry (68th), at Allahabad, are too weak for Aden, so the 1st South Lancashire (40th), from Peshawur, are to go instead. This affects the Connaught Rangers (88th), who were to have gone to Allahabad in relief of the 1st Durham Light Infantry, and who will now go to Jullundur in place of the 1st South Lancashire. The Connaught Rangers will thus return over their previous march, they having been stationed originally at Mooltan. It is, however, quite possible that they will not go to Jullundur after all, as some further modifications are being considered."

94th Connaught Rangers. Lieut. Carden left England on Wednesday in the Goorkha, for Egypt, for service with the Mounted Infantry.

97th Queen's Own (Royal West Kent Regiment). Lieut. Alderson left England on Wednesday in the troopship Goorkha, for service with the Mounted Infantry.

106th Durham Light Infantry. Lieut.-Col. Coker succeeds Col. Girardot in command of the regiment.

107th Royal Sussex Regiment. Lieut. Woodhurst, having resigned his probationary appointment for the Bombay S.C., has been ordered to join the regiment at Malta.

Rifle Brigade. Lieuts. Sherston and the Hon. H. C. Hardinge left for Egypt on Wednesday in the troopship Goorkha, to join the Mounted Infantry.

Commissariat and Transport Staff. Assist.-Comy.-Gen. Nugent, C.B., Deputy-Assist.-Commissaries-Gen. Edwards and Lea, and Acting Deputy-Assist.-Commissaries-Gen. Leach, Capper, Leonard, and Firman, and Qrmrs. Crumplinn and Brooks, and 114 men, left for Egypt on Wednesday in the troopship Goorkha.

Pay Department. Capt. H. H. Gilbert is under orders of readiness for foreign service, if required.

The Auxiliary Forces.

MILITIA.

Manchester Regiment. New colours were presented to the 3rd and 4th Batns. during the recent training on Fairfield Common. The officers present were Col. Wray, Majors Garland-Matthews and Powell, Capt. and Adjt. Hind, Capts. Taylor, Woodhouse, Foley, and Dunlop; Lieuts. Leyden, Langton, Balguy, Morton, and Daniell; and Qrmr. Lofts. Col. Wray called upon Mrs. Copley Wray to present the colours, a request to which the lady acceded by handing to Lieut. Leyden the Queen's colour, and to Lieut. Langton the regimental colour. Mrs. Wray said:—"Col. Wray, officers, non-commissioned officers, and men of the 4th Batn. the Manchester Regiment,—I have the honour to be deputed to present these beautiful colours to you. It gives me great pleasure to do so, since my husband has been in the regiment for so many years, and has had its interests so much at heart. I feel sure that the honour and welfare of these colours will be secure in the hands of every officer, non-commissioned officer, and man of this battalion, and of the entire regiment. I wish you all God's speed." Col. Wray, addressing Mrs. Wray, said that in the name of the officers, non-commissioned officers, and men of his battalion, he thanked her for the honour she had done them in coming there that day, in presenting the colours, and for the kind and generous manner in which she had presented them. It was a matter of peculiar gratification to him that she should have performed the ceremony, as he was present with the regiment when it was first raised, and had been in it ever since. The Colonel then addressed the officers, non-commissioned officers, and men of the 4th Batn., saying they had that day received colours for the first time since they had been formed as a separate battalion, and they had accepted a certain responsibility. He was old enough to remember the Crimean war, and how soon at that time the Militia were called upon to furnish garrisons for the Mediterranean, and seven Militia battalions volunteered for service in the field. The regiment to which they belonged—then the 6th Lancashire Militia—was amongst that number. It stood on parade upwards of a thousand men, with a full complement of officers and non-commissioned officers; and every officer, non-commissioned officer, and man volunteered for active service in the field. The war came, however, to an abrupt conclusion, and their services were not required. He felt certain that the officers and men of that battalion would volunteer in case of a national emergency and in defence of their Queen and country. In such a case, these colours they had received might at some future time bear the name of actions in which they had taken an honourable part, and they would emulate the gallant deeds of the old 63rd and 96th Regiments—the two regiments with which they were connected, and which formed the 1st and 2nd Batns. of the Manchester Regt. Another interesting ceremony was witnessed during the day, when Mrs. Copley Wray, wife of Col. Copley Wray, was presented with an address, beautifully engrossed upon vellum, emblazoned on the one side with the badge of the Sphinx, and on the other with a second badge—that of the Manchester Regt. Major Garland-Matthews said he had a most pleasing duty to perform in presenting the address on vellum, which read as follows:—"Manchester Regt., 4th Batn. To Mrs. Copley Wray,—We, the undersigned officers, non-commissioned officers, and men of the 4th Batn. the Manchester Regt., on our own behalf and on that of our comrades, desire to acknowledge the honour, and record our sincere thanks for the kindness shown us, in the presentation to this newly-formed battalion of its first colours, whilst under the command of your husband, its first lieutenant-colonel. We trust the event we record may ever remain a pleasing recollection to you, and that your connection with the regiment may long remain unsevered.—Camp, Buxton, Aug. 15, 1884." Then follow the signatures.

GORDON HIGHLANDERS. The Prince and Princess of Wales, accompanied by Princes Albert Victor and George, and the Princesses Louise, Victoria, and Maud, paid a visit to Aberdeen on Thursday to present new colours to the 3rd Batn. The regiment thus honoured was formed at the opening of the French revolutionary wars, when the invasion of this country was feared. It was then known as the Aberdeenshire, or 6th North British Militia. In 1801 the regiment formed part of the field covering force for the protection of Edinburgh. In 1802 the Peace of Amiens was concluded, and on April 20 of that year the regiment was disbanded. In 1805 it was again deputed to assist in the defence of the Scottish capital, and in 1814 it formed part of the garrison at the Tower of London. Having returned to its head-quarters, it was again disbanded on Sept. 23, but after the lapse of ten months was again embodied. At that time, however, its services were not required and on Feb. 24 of the following year, 1816, it was disbanded. On Feb. 20, 1855, however, the men were again under arms, and on this occasion the regiment was designated the 89th Royal Aberdeenshire Militia. New colours were then presented by Lady Saltoun. These colours, which were superseded to-day, will remain with the original ones in the custody of the regiment. Since 1858 the history of the regiment has been one of steady progress. It was honoured by being chosen to take part in the great Autumn Manœuvres at Aldershot, and it was at this time that the honorary colonelcy of the regiment was accepted by the Prince of Wales. In 1882 the regiment was attached to the 92nd Highlanders and became its 3rd Batn. The Prince wore the uniform of the regiment. He also wore the insignia of the Order of the Thistle. The Lord Provost having been introduced to the Prince, presented an address of welcome to his Royal Highness. In the Town Hall the Prince and Princess were entertained at luncheon by the officers of the regiment. Col. Turner occupied the chair, and proposed the loyal toasts. In reply, the Prince, who was received with enthusiastic cheering, said:—"My Lords, Ladies, and Gentlemen,—I beg, in the name of the Princess and in my own name, to tender to Col. Turner for the kind way in which he has proposed this toast, and for the manner in which you have received it, our most sincere thanks. I appear before you this day in a twofold capacity—as a burgess of your town and as colonel of this distinguished regiment. The Princess and I are very glad to have this opportunity of coming here to-day, and the Princess especially, for the purpose of taking part in an interesting ceremony—that of presenting new colours to the 3rd Batn. Gordon Highlanders. It is now twelve years since I have seen the regiment, when they took part in the Salisbury manœuvres, and I know how much struck I then was with their discipline and efficiency. I feel no doubt that they will show to-day on parade that they have kept up the good name which they then bore, and which, indeed, they have always borne. This regiment is an old one, which was embodied at the end of the last century. Although it went through many vicissitudes, of disbandment and re-enrolment, and though it has not had an opportunity of seeing active service, still it has done good garrison duty, not only in Scotland, but also in England and in Ireland. I feel convinced that if the day should come when their services will be required for the defence of their country, and for the honour of their flag, they would not be wanting in their duty. I beg now to give a toast which I feel sure you will drink most heartily. It is the health of Col. Turner, who so ably commands the regiment, and the Regiment of Royal Aberdeenshire Highlanders cannot regret, I am sure, being affiliated with the Gordon Highlanders. They serve under the same flag, and are connected with the same county. I myself feel it a great compliment to be associated as hon. colonel with a regiment connected with a county which I have known for so many years, and which has so many dear ties to me. I beg to propose 'The Health of Col. Turner and the 3rd Batn. Gordon Highlanders.'" The toast was very heartily responded to. Col. Turner returned thanks. After the banquet the visitors left the hall. The ceremony of trooping the colours was carried out after prayer had been offered. The battalion received the command to shoulder arms, and, the Princess having indicated her readiness to perform the ceremony of presenting the colours, the Queen's colour was handed to her Royal Highness by Lieut.-Col. Keen. The Princess received the flag, and gracefully presented it to Lieut. Kenrick, who accepted it, as senior lieutenant, on behalf of the regiment. The regimental colour was, in like manner, handed to the Princess by Major Leith Hay, and her Royal Highness gave it to the charge of Lieut. Gordon, the second senior lieutenant. Col. Turner acknowledged the presentation on behalf of his regiment. The procession was then reformed, and the Royal party returned to the station, being loudly cheered at all points. The special train left for Ballater at 5.40. While the party were *en route* to the station the weather cleared, and for the first time there was a glimpse of sunshine. All the Volunteers and others who took part in the ceremony were wet through. In the evening the city was illuminated.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

Where not otherwise stated, the foregoing commissions and announcements bear date August 27, and the current year must be understood.

THE LATE CHAPLAIN-GENERAL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Permit me to correct an error in the paragraph in your issue of Aug. 23, in which the services of Bishop Claughton as Chaplain-General are noticed. The long and earnest exertions of G. R. Gleig seem to be utterly forgotten, and a severe reflection cast upon the clergy who have during the past half-century ministered to soldiers. "Bishop Claughton was the first to introduce the rite of confirmation into the Army." I entered the service in 1845, and from that time to the present moment confirmations for soldiers have been held every year all over the world. I have more than once seen Bishop Wilberforce confirm upwards of 150 soldiers and sailors in the garrison church at Portsmouth, and wherever our troops were stationed at home or abroad there confirmations were held. The Bishop of Gibraltar held a confirmation even during active war in Scutari Barracks. In the life of James Skinner, recently published, you will find how wonderfully his labours were felt as a Chaplain to the Forces in Corfu, 1846-1850, and that the fruit of those labours was specially shown by the large number of soldiers who presented themselves for confirmation. For the last forty years instructing soldiers and their families for confirmation, and presenting them to the Bishop for God's blessing, has been deemed a season of revival. Bishop Wilberforce always said a garrison confirmation was one of special reverence.—I am, &c.,

AN OLD OFFICER.

Major-Gen. the Hon. W. H. A. Feilding, commanding the 3rd Infantry Brigade at Aldershot, has been selected to attend the forthcoming manœuvres of the French Army, to be held at Agen, in the department of Lot et Garonne, in September, in the place of Major-Gen. Sir R. Buller, who has proceeded to Egypt. The officers selected to accompany Gen. Fielding are Lieut.-Col. W. H. Macnaughten, 13th Bengal Lancers, now in this country, and Major V. Cowan, R.H.A.

The *Morning Post* states that,—"Col. Utterson, 1st Batn. Leicestershire Regt., and Lieut.-Col. Gream, 1st Batn. Wiltshire Regt., have been appointed members of the Committee on the Dress of the Army."

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, AUGUST 30, 1884.

WITH reference to our article in a late issue on the examination for promotion introduced for Senior Surgeons-Major by the Circular of August 1 last, our attention has been drawn to the recommendations of Lord Morley's Committee on this subject. On page 35, paragraph 208, of the Committee's Report, it will be observed that it is recommended to reinstitute the examination for Surgeons of from three to seven years' service, and it is also recommended that facilities be given to medical officers to study in civil and military hospitals in London or in foreign capitals. We fail to find a single word regarding the examination of medical officers once they reach "field rank," much less to examine them after they have held this rank for from eight to fourteen years. We would much like to know by whose authority this was done; and if it has not been with the sanction of the Secretary of State for War and H.R.H. the Commander-in-Chief, we trust this obnoxious order will be speedily rescinded. One point that has been prominently noticed is the fact that every medical officer is entitled to claim to be examined immediately after he has completed twenty years' full-pay service; but before he goes to all the trouble of working up for the examination in question, it will be only equitable that he should be informed if he has been favourably reported on, as, if not, he cannot be promoted, even if he pass the examination. This, then, will have to be communicated to each officer as soon as he completes twenty years' service. the question of the examination being optional seems to be an extraordinary condition. If an officer either declines to present himself before, or fails to satisfy the examiners, say, in discipline, interior economy, medicine, and surgery, is he to be permitted to remain in the service, doing executive duty, *i.e.*, in charge of large station hospitals, telling off prisoners, which he is officially proved to be unfit for; and is he to continue to practice his profession on the "corpore vili" of Thomas Atkins, the pronounced to be ignorant of surgery and practice of medicine? By a parity of reasoning, if a Surgeon-Major is ignorant of such subjects, he is certainly not a fit man to put in medical charge of her Majesty's troops at home or abroad. As a logical sequence of this examination, Medical officers found either unable or unwilling to qualify will have to be treated exactly as combatant officers would be under similar circumstances,—viz., be gazetted out on the gratuity or pension they may have earned. These points all go to prove how hasty and unconsidered this Circular has been. Crude in conception, and promulgated in indecent haste to serve some purpose not yet apparent, we understand this Circular was sent out to India some weeks before it was published in this country, so as nominally to allow it to appear in both countries at the same time; but it looks rather as if its appearance at home was delayed till after the rising of Parliament, for obvious reasons. It is greatly to be regretted that so irritating a document should have been permitted to have seen the light just as the Army Medical Department has emerged from the dark days of the past, when Medical officers were settling down to the present inevitable state of things, and when a good supply of eligible candidates were coming forward. Will the Government never take warning? If this objectionable step is not revoked or modified, it will certainly be followed by an outburst of discontent in the Department, which will be followed by agitation in the medical schools and colleges, the result of which the country knows to its cost.

Up to last night, though the appointments to Lord Wolseley's Staff had been made, official etiquette prevented their being made public, as certain formalities have to be gone through before the list can be regarded as finally settled. It has simply been a rearrangement of the old familiar names, and the service knows so well who the favoured ones will be, that when the details appear they will create little interest, except to those within the charmed circle.

The constitution of the proposed expedition will be decided upon on Lord Wolseley's arrival in Egypt. As far as possible those regiments will be chosen for service who are most acclimatised, as Lord Wolseley, although professing a great belief in the principle of short service, is one of those who regard the young soldier element as a fruitful source of danger on service, and he will, therefore, take care, should a force require to be dispatched up the Nile, to eliminate, as far as possible, all men but those whose physical development is such as to give promise that they will be able to stand the fatigues and privations of campaigning.

The appointments of Lieutenant-Colonel Swaine as Military Secretary, and that of Lieutenant-Colonel Furse as Director of Transports, will have given satisfaction to the service; for, unlike some other officers, they are both known to be men who have the courage of their convictions, and have never been, or professed to be, in favour of the system upon which the British Army is at present organised and administered.

Brevet Lieutenant-Colonel Yeatman-Biggs has been appointed Brigade-Major R.A. at Aldershot, vice Lieutenant-Colonel Alleyne.

It has been finally decided that there shall be no British Cavalry reliefs in India during the season 1884-85 beyond the departure of the 13th Hussars, and the arrival of the 3rd Dragoon Guards from England. The 3rd take the place of the 13th at Mhow.

It is notified that the troops who garrisoned Fort Baker during the battle of Teb, and those who occupied the advanced zeriba during the battle of Tamai, will receive the clasps for the respective actions. This is right; but surely those who took part in the affair at Kassassin are as much entitled to the clasp for Tel-el-Kebir. It is at least as strong a case.

The non-commissioned officers and men from various Infantry battalions who were concentrated at Aldershot last week to form a draft of Mounted Infantry, to reinforce that arm in Egypt, were not all volunteers for this service. A sufficient number of men not having presented themselves in some battalions, the deficiency was made up by detailing them, in the ordinary way, though great pains were taken to select old and tried soldiers, and, if possible, those who had already gained some experience in campaigning. The universal opinion at the Camp is that a more soldier-like and serviceable-looking body of men never left Aldershot for service beyond the seas. As they marched off on Wednesday morning last, 224 strong, to the strains of "Auld Lang Syne," many of them with the medals and stars for Afghanistan, the Cape, and Egypt on their breasts, their comrades of all ranks and arms, who stood on the general parade-ground, were convinced they would give a good account of themselves in whatever circumstances of peril, by flood and field, in which they might be placed.

We hear that colours will not be taken by the corps going up the Nile.

Captain W. Peacocke, R.E., who lately passed from the Staff College, is, we believe, to join the Afghan Boundary Commission, as Second Intelligence Officer.

The strength of the regiments *en route* for Wady Halfa, or under orders for that station, is, we understand, as follows:—

	Officers.		Men.
35th Regiment....................	7	...	762
56th Regiment....................	16	...	694
46th Regiment....................	15	...	599
38th Regiment....................	14	...	652
Squadron 19th Hussars	2	...	84
Mounted Infantry	10	...	226
Total.........	64	...	3,017

Four Chief Paymasters will shortly retire—Lieutenant-Colonels H. Leigh, J. George, and T. Bryson, in September, and J. Nowlan in November. We understand that the following Staff-Paymasters are under orders, if required, for service abroad:—Majors F. W. Dundee, G. L. Cuming, J. W. Minchin, and T. W. Drage, and two Paymasters, Major H. C. Dawson and Captain G. Dewar.

The total force in Egypt by latest returns was 10,128 officers and men, of which 601 were on the sick list.

We understand that the authorities were most anxious to secure the services of Major Graves, 20th Hussars, for another year as Adjutant of the Staffordshire Yeomanry, a petition having been signed in the regiment urging them to allow the Major to retain his appointment, but there was no precedent in the cavalry for the extension of an officer's period of service as Adjutant, and it was feared that difficulties might arise if one was established, notwithstanding the exceptional nature of the case.

In marked contrast to the prim and soldierly appearance on parade at Aldershot, on the morning of Wednesday last, of the detachments of the Mounted Infantry, Army Service Corps, and Army Hospital Corps for service in the Soudan, was the draft from the kilted regiment in the South Camp for the Black Watch in Egypt. These young fellows, good enough looking specimens of Scotland's youth, had evidently been having their "mornin'," and that pretty freely, and they seemed to make no effort to hide the fact. Here at once was seen the difference between young and old soldiers, in this respect; the other detachments, composed of men of considerable service, were firm as a rock on parade, and marched off with the steady swing of men who knew what they were about. Not a sign of drink was to be observed amongst them, although they, on the eve of leaving their native land, perhaps for ever, like the "Highland laddies," had not parted from their friends in camp without a "*doch-an-dorrach.*"

Lieutenant-General Sir Gerald Graham could scarcely have expected to be passed over after the manner in which Lord Wolseley, the Duke of Cambridge, and Lord Hartington spoke of his services. He was offered a baronetcy, and refused it, thinking it certain that he would have further chances of distinction and service. It seems that the Government were afraid of their followers in the House being troublesome if they proposed a Vote of Thanks to the officers and men of both services engaged near Suakim, and that they did not like to disgust the country by resisting the Vote of Thanks brought forward by others, and so contrived matters that the question was never submitted to Parliament.

It is very wonderful if General Stephenson has expressed the opinion attributed to him, that the Nile route is impossible, and more wonderful still if General Lord Wolseley goes to Cairo on that account. Colonel Ardagh, who sailed this week, could give as good an opinion on the route as any one. It is not likely Lord Wolseley will stay boxed up at Cairo.

It is rather trying to Stephenson and Earle to be "out of it," but the General-in-Chief will give them any chance he can. The latter was his chief of base, &c., in the last Expedition. There are so many Generals in Egypt, some must be overlaid. Sir E. Wood cannot well be kept back from the front, but his Egyptians have been so vilipended that it will not be difficult to find reasons for preventing their being too forward. One or two of his battalions, especially the Negro or Berber Regiment, will certainly march and fight well if they have a chance. When Sir Redvers Buller was sent out, it was a foregone conclusion that the rumours prevailing since May that Lord Wolseley would command the possible Expedition would be justified.

The advocates of the route from Suakim to Berber across the Desert died hard. They had not a euthanasia. For a moment before death their spirits revived and their strength returned when they heard the Nile was falling, and they rejoiced over the dangers of the cataracts; but now all is over! However, when the British power is established in the Soudan, and an English mudirieh arises out of the rich growth of circumstances over which the Government of Downing Street has no control, there will necessarily be a railway made from the Nile to the Red Sea and Berber. Suakim appears to be the best line that can be adopted. Before that comes we shall have to deal with the marauding and murderous Abyssinians, who have been let loose under the unscrupulous Ras Aloula, on the unfortunate subjects of the Khedive, whom we are bound to protect, and have handed over to fire and sword.

The attention of one who was casually glancing through the officially-printed copies of the "Papers of Examination set last January for Military Promotions," was rivetted by the following astounding statements. At the top of page 13, under the heading "Examination for Promotion—Captains," he read, "1. A scale to an English map is marked with the representative fraction $\frac{1}{63360}$. Construct a comparative scale of Russian versts:—1 verst = 500 sagènes, 1 sagène = 3 archines, 1 archine = 28 English miles." According to the words quoted, a sagène must be 84 miles, and a verst 42,000 miles! But Russian soldiers often march more than 20 versts a day, that would be more than 840,000 miles. The writer of the paper may possibly have written *miles* when he meant *inches*; or the printer, in the exercise of his discretion, may have *corrected* the inches into miles. But surely some one, or more than one, ought to have read the proofs before they were passed as correct. What is the value of the supervision which allows so glaring an error to escape detection?

Neither Gordon nor Wolseley are teetotallers. The latter, indeed, has expressed strong opinions in favour of temperance in the Army, but practically, in the field, Lord Wolseley follows the example of the great Frederick whose silver plate now takes the field with the German Emperor in war time, and thinks, very rightly, that a glass of "shammy" is a very wholesome stimulant in hot climates, and never out of place among the head-quarters mess accompaniments. They both smoke tobacco—Gordon in all kinds, pipes, cigarettes, cigars—Wolseley the latter, and the best that can be had. Both are temperate in food and of incessant activity, but Gordon is often meditative—*un peu rêveur*. Wolseley thinks profoundly, but it is of work. He has no taste for abstract speculation, and does not interest himself in determining the exact locality which the Evil One favours with his bodily presence, having quite enough to do in dealing with the tangible enemy in front of him.

The Zhob Valley expedition is a settled fact, and the political officers have begun to collect the necessary supplies for next September.

The question of the increase of the daily regulation allowance of food for our young soldiers is a very pressing one. It has been recommended by experienced officers, who are thoroughly acquainted with the subject and have reason to know that the present allowance does not satisfy growing lads who have plenty of exercise, that the daily meat ration should be increased by ¼ lb., and the bread ration by ½ lb.; but the expense involved in such a step is so great that the authorities hesitate to ask Parliament for the necessary funds. In the meantime, "our boys" supplement their meagre meals at their own expense as far as possible, and they may be often seen after these unsatisfactory dinners appeasing their appetites in the canteen on bread and cheese and beer.

In every German Army Corps there will be divisional manœuvres this year, and in some corps, in addition, corps manœuvres. The following are the detailed arrangements for the Imperial manœuvres of the 7th and 8th Corps near Düsseldorf, on the Rhine, at which his Majesty the Emperor, the Crown Prince, and several distinguished foreign officers will be present:—

7TH CORPS.	
From 1st—9th Sept.	Exercises of Detachments.
11th ,,	Divisional Manœuvres 13th Division, between Neuss and Krefeld.
11th ,,	Divisional Manœuvres 14th Division, at Odenkirchen.
12th and 13th ,,	Field Manœuvres, 13th against 14th Division, Grerenbroich.
15th, 16th, & 17th ,,	Field Manœuvres of the 7th against the 8th Corps at Bedburg, on the Erft.
18th ,,	No exercises.
19th ,,	Grand Parade of the 7th Corps before the Emperor, at Wevelinghoven.
20th ,,	Corps Manœuvres, ditto.
8TH CORPS.	
1st—4th Sept.	Exercises of Detachments.
5th ,,	Divisional Manœuvres, 15th Division, at Oberemdt and Neideremdt.
8th ,,	Divisional Manœuvres, 16th Division, between Rheinbach and Euskirchen.
9th ,,	Field Manœuvres of the 15th against the 16th Division, between Euskirchen and Jülich.

On the 15th this corps manœuvres against the 7th, as above, and on September 23, the last day of the manœuvres, the whole of the 8th Corps manœuvres before the Emperor.

The Navy.

WHITEHALL, August 25, 1884.

The Queen has been pleased to grant unto W. S. Brown, of Southsea, in the county of Southampton, Rear-Admiral in her Majesty's Fleet, her Royal licence and authority that he and his issue may, in compliance with the last will and testament of the late Jane Brown-Grieve (formerly Jane Elliott-Grieve), henceforth take and use the surname of Grieve only, and bear the arms of Grieve; such arms being first duly exemplified according to the laws of arms, and recorded in the College of Arms, otherwise the said Royal licence and permission to be void and of none effect: and to command that the said Royal concession and declaration be recorded in her Majesty's said College of Arms.

ADMIRALTY, Aug. 22, 1884.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and April 30, 1877, Chief Engineer W. D. Beaton has been placed on the Retired List, with permission to assume the rank and title of Retired Inspector of Machinery (Aug. 22).

ADMIRALTY, Aug. 23, 1884.

The following qualified candidates for the Naval Medical Service have been appointed to be Surgeons in her Majesty's Fleet (dated Aug. 21):—Edward Waldemar Von Tunzelmann, M.B., Edward Bridges Townsend, Alexander Gascoigne Wildey, Patrick Brodie Handyside, M.B., Harold Rochester Osborne, James Macdonald Rogers, Charworth Louis Nolan, M.B., Harold Frederic Dale Stephens, M.B., Francis Harvey Julyan, Edward Copley Ward, M.D., William Robert Minching Young, George Lowbridge Baker, Herbert William Gibbs Doyne, Alexander Brown Murdoch, M.B., Thomas Dunlop, M.B., Samuel Johnson, M.B., George Albert Dreaper, William Henry O'Meara, William Wall Jacobs, Alexander Fleming Harper, Hubert William Austin Burke, Edward Robert Drummond Fasken, James Charles Francis Whicher, Alexander Gordon Andrews, Arthur Stanley Nance, and Evan St. Maur Nepean.

APPOINTMENTS.

Captain—Hon. Edmund Robert Fremantle, C.B., to the Duke of Wellington, additional, for service in the Dreadnought.

Lieutenants—Frederick O. Pike, to the Harrier; George Huntingford, to the Alexandra, additional; Julian C. A. Wilkinson, to the Malabar.

Sub-Lieutenant—Julian Charles Gaisford, to the Minotaur.

Midshipmen—Hugh R. Tilly, to the Northumberland; William Wynton, to the Garnet.

Chaplain—Rev. John Milford Morton, B.A., to the Euryalus.

Chief Engineers—William Barclay, to the Asia, for the Dreadnought; Robert J. Barker, to the Canada; Henry D. Garwood, to the Hector; John Yeo, to the President, additional, for service at the Royal Naval College at Greenwich.

Surgeons—Edward W. Von Tunzelmann, M.B., Edward B. Townsend, Alex. G. Wildey, Patrick B. Handyside, M.B., Harold R. Osborne, James M. Rogers, Charworth L. Nolan, M.B., Harold F. D. Stephens, Francis H. Julyan, Edward C. Ward, M.B., Wm. R. Minching Young, George L. Baker, Herbert W. G. Doyne, Alexander B. Murdoch, M.B., Thomas Dunlop, M.B., Samuel Johnson, M.B., George A. Dreaper, and Wm. H. O'Meara, to the Duke of Wellington; Wm. W. Jacobs, Hubert W. A. Burke, and E. R. D. Fasken, to the Royal Adelaide; James C. F. Whicher, to the Impregnable; Alex. G. Andrews, to the Asia; Arthur S. Nance, to the Indus; Evan St. M. Nepean, to the Pembroke; Charles Anderson, to the Sultan.

Engineers—Robert Browne Priston, to the Pembroke, additional, for service in the Rodney; George White, to the Pembroke, additional, for service in the Rambler; George Weight, to the Serapis; John Lake Michell, to the Duncan, additional, for service in the Hydra; John Hughes, to the Asia, additional, for service with the Training School for Engineer Students; Henry Thomas Hammond, to the Asia, additional, for service in the Dreadnought; George E. Bench, to the Malabar.

Assistant-Engineers—Henry P. Vining, to the Malabar; Josiah H. Hunt, to the Asia, for the Devastation; Samuel A. Screech, to the Serapis.

Carpenters—William J. Pink, to the Asia, for the Devastation; Henry Cribb, to the Asia, for the Edinburgh; Isaac Finch, to the Asia, for the Collingwood; Wm. Hardy, to the Asia, for the Cyclops.

Clerks—Francis William Black Barnes, to the Malabar; Edward Henry Innes, additional, to the Hercules.

Gunner—John Swanson, to the Achilles.

COASTGUARD.

Chief Officer—George H. Robertson, to the Valiant, additional.

Commissioned Boatmen—George Shane, Boyne, to be chief boatman, Hove, vice Wakely, pensioned; John Danaher, Cromer, to be chief boatman, Lynn, vice Dench, promoted.

ALEXANDRA, Capt. Harry Rawson, flagship of Admiral Lord John Hay, was at Jaffa on Aug. 24.

ARAB, Com. Stopford, was at Aden on Aug. 24.

ASSISTANCE, Capt. St. Clair, arrived at Queenstown on Tuesday last, with the 11th Hussars from Liverpool for Ballincollig. Having embarked the 20th Lancers, she sailed on Thursday afternoon for Portsmouth.

AUDACIOUS, Capt. Hugh Pearson, flagship of Vice-Admiral Sir William M. Dowell, was with cruising squadron, consisting of the Sapphire, Curacoa, Midge, Albatross, Cockchafer, and Espoir, at Chefoo up to July 6. The Commander-in-Chief has since arrived at Foochow. The Espoir proceeded to Tientsin on July 6, and was to rejoin the flag at Taku on Aug. 14. The Vigilant is attached to the cruising squadron; she would be sent to Hong Kong to pay off and recommission. The Cleopatra was at Shanghai on July 1, and would remain at Shanghai as senior officer's ship. The Fly, in Yangtse River; was at Hankow on June 18; was ordered to remain until first or second week in July, and then proceed to Chinkiang. The Champion was at Amoy on June 16, and remains. The Daring was at Canton on June 23, and remains. The Linnet was at Hong Kong on June 26; has since been ordered to Singapore. The Zephyr, in Gulf of Tonquin, is alternately visiting Hoihow and Pakhoi. The Foxhound, at Hong Kong on June 7, has left for Singapore, calling at North Borneo ports and Labuan, and was expected to reach Singapore during first week in July. The Merlin, at Foochow on June 11, was to leave for Formosan ports, returning to Foochow about the end of June. The Swift left Woosung on June 25 for Hong Kong, to prepare for recommission. The Pegasus, in Straits of Malacca, was at Singapore on June 6. The Flying Fish was at Chefoo on July 6 for coals and provisions; about to return to Corea.

AVON, Lieut. and Com. Thompson, has been cruising since Aug. 2 between Portsmouth and Plymouth, embarking every fortnight a fresh detachment of 50 men of the Naval Artillery Volunteers, who entirely worked the ship, and are said to have done uncommonly well. The cruise ends on Sept. 1.

BOADICEA, Capt. Church, flagship of Rear-Admiral Nowell Salmon, V.C. was at Simon's Town up to Aug. 26. The Frolic was at Simon's Town; would leave on Sept. 1 for Angra Pequena and St. Helena. The Opal was at Brass River up to July 26; if no contrary orders were received by mail at Anno Bom, she will proceed south, and act according to programme. The Flirt, in the Bights of Biafra, conveying H.M.'s Consul to ports in the Oil Rivers. The Goshawk, in the Bights of Biafra, under orders of Com. Craigie, of the Flirt; she will shortly proceed south. The Forward, on passage to Anno Bom; on the Opal meeting the Forward with mails at Anno Bom, the Forward will be ordered back to the Bights of Biafra, under orders of Com. Craigie, of the Flirt. The Alecto, in the Bights of Benin. The Stork, on the south coast.

BRITON, Capt. Lloyd, was at Aden on Aug. 28.

CANADA, Capt. Durant, has been ordered to be ready for sea by Sept. 9, to reinforce the China Squadron.

EURYALUS, Capt. Hastings, C.B., flagship of Vice-Admiral Sir William Hewett, V.C., was at Mauritius up to Aug. 5, having arrived there on July 11. The Osprey arrived at Mauritius on July 16. The Tourmaline arrived at Mauritius on June 25. The Ranger would shortly proceed to Colombo and Trincomalee, unless required at Aden. The Commander-in-Chief, with Euryalus, Tourmaline, and Osprey, would leave after arrival of the mail due on the 21st inst. for Zanzibar. The Tourmaline, on relief by the Turquoise, will proceed to England, *viâ* the Suez Canal, and the Osprey would call at Tamatave, *en route* to Zanzibar.

IRIS, Capt. Rice, arrived at Trieste on Aug. 24.

KINGFISHER, Com. Algernon Evan Thomas (acting), arrived at Devonport on Aug. 28 from the Pacific station, and left the same day for Sheerness, to pay off.

MINOTAUR, Capt. Britten, flagship of Vice-Admiral H.R.H. the Duke of Edinburgh, with the ships of the Channel Squadron in company, left Lough Foyle and Lough Swilly for Dublin Bay on Aug. 26.

NELSON, Comdre. J. E. Erskine, A.D.C., was at Sydney up to July 14, and would remain. The Diamond was at Santa Maria Banks Island on June 3, as senior officer's ship in New Guinea and adjacent islands, and has since arrived at Cooktown. The Espiègle was at Levuka on June 13, and left for Samoa and Tonga; will return to Sydney *viâ* Fiji. The Miranda was at Nouméa on May 28, and left on May 29 for New Hebrides. The Dart was at Suva on June 7, and then left for Rotumah, Gilbert, and Ellice Groups, and New Britain. The Lark was at Solomon Islands, surveying. The Raven left Brisbane for Fiji *viâ* Ugi on June 18, and would return to Sydney. The Swinger was at the Solomon Islands. The Undine was at Sydney on July 14, and was about to leave for New Hebrides. The Harrier left Sydney on July 10 for Cooktown, and will wait there for orders.

NORTHAMPTON, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., was at Halifax up to Aug. 15, and would leave on Aug. 28 for Newport, Rhode Island, and St. John, N.B., returning to Halifax the middle of September. The Garnet was at Halifax on Aug. 15, and would visit Quebec during August. The Tenedos was on coasts of Newfoundland on July 19. The Dido was on passage to assume duties as senior officer of Barbadoes division, and left Halifax on July 12. The Griffon was at Barbadoes on July 2, and was ordered to Halifax to replace the Fantôme on the Newfoundland fisheries. The Fantôme was on coasts of Newfoundland on Aug. 5, and was ordered to Halifax in consequence of having grounded and sustained damage; will afterwards proceed to Bermuda to be docked, &c. The Mallard was on coasts of Newfoundland on July 19. The Flamingo left Port Royal on Aug. 4 to relieve the Bullfrog at Nassau, New Providence, and on arrival of the Express would be ordered to Bermuda and Devonport. The Bullfrog was ordered to Port Royal from Nassau.

ORONTES, Capt. Andoe, arrived at Gibraltar on Aug. 25, and would leave next day.

RANGER, Com. Pipon, was at Berberah on Aug. 12.

SPHINX, Com. Caffin, flying the broad pendant of Com. Molyneux, was at Suakim up to Aug. 6, with the Briton, Tyne, Myrmidon, Condor, and Albacore. The Woodlark was *en route* from Aden to Suakim. The Humber was at Suez.

TURQUOISE, Capt. Woodward, left Aden for Zanzibar on Aug. 9.

WANDERER, Com. Churchill, arrived at Aden on Aug. 28, and would leave on Sept. 1 for Colombo. We regret to hear that matters are not as they should be on board this sloop, but hope that, now that attention has been called to the fact, things will in every way improve on board.

WYE, Staff Com. Miller, arrived at Madeira on Aug. 25, and would leave next day.

From St. Petersburg we learn that the Russian naval manœuvres at Cronstadt and Bjorkesund have been followed with intense interest. In naval circles a very favourable opinion was formed of the capacity of the fleet as displayed in the various evolutions performed by the men-of-war. The actual sham fight took place on the 23rd inst., and as the wind was blowing from the right quarter, namely, the north-west, the thunder of the guns was heard distinctly at St. Petersburg. Vice-Admiral Pelikine, with the Afrique, Baïan, Svetlana, Jemtchong, and Ichardeika blocked, by means of torpedo-boats, the Toulboukhine Pass. The fire against the forts commenced at eight in the morning,

London Amusements.

DRURY LANE THEATRE, now undergoing extensive repairs and being thoroughly re-embellished, will open for the season on Thursday, September 11, with a revival of "The World."

At the HAYMARKET, Mr. Wilford Morgan has taken the place of Mr. Herbert Reeves as the representative of Tom Tug in "The Waterman."

At the LYCEUM has been reproduced "The Bells" and "Louis XI." for the last nights of the season, which terminated on Thursday night with a representation of "Richelieu." Miss Mary Anderson commences her season on Saturday, September 6, with "Pygmalion and Galatea" and "Comedy and Tragedy."

The PRINCESS's opens this (Saturday) evening with "Claudian," to be followed for a short period by "Chatterton," Mr. Wilson Barrett resuming in both pieces his original impersonations.

The COMEDY THEATRE will be reopened with "Rip Van Winkle" on Saturday, September 6. A special performance of the comic opera of "Falka," about to be taken on tour, is announced as a "full-dress rehearsal" for this morning (Saturday).

The CRITERION is closed for a fortnight, in consequence of the carriage-way in Piccadilly being under repair, and the theatre being thus rendered unapproachable by conveyances.

With this week the New York company of comedians terminate their short season at TOOLE'S THEATRE, their latest performances being an American adaptation from a German farcical play, here called "Needles and Pins," and the old comedy, "She Would and She Would Not." On Tuesday, September 9, the theatre will be reopened with the burlesque of "The Babes, or Whines from the Wood," under the management of Messrs. Willie Edouin and Lionel Brough.

Messrs. George Conquest and Paul Meritt commenced their fourth year of management at the SURREY THEATRE on Monday evening, with a new drama by Mr. Julian Cross, entitled "The Outcast Poor."

The COVENT GARDEN Promenade Concerts continue to be fully attended. On Wednesday evening, "the classical night," the vocalists were Miss Annie Marriott and Mr. Joseph Maas, whose enthusiastic reception is always a significant proof of the high estimation in which he is held by the audience.

James Connor, chief boatman, John Davie, commissioned boatman, William Clarke, chief boatman-in-charge, and Ernest Fippin, boatman, of the Coastguard; Thomas Baker, quartermaster, of the Pembroke; William Henry Lang, quartermaster, and William Trick, captain of the forecastle, of the Cambridge; John Tozer, leading stoker, of the Indus; James Turner, gunner's mate, of the Champion; Henry Houghton, stoker, of the Asia; Alexander Kippen, boatswain's mate, of the Excellent; Thomas Lane, coxswain, first-class, of the Boadicea; Hurley W. Jones, sick-berth steward, of the Flora (tender); Frank Bessent, acting chief captain of the forecastle, of the Alexander; Samuel J. Pain, second captain of the forecastle, of the Albacore; Henry N. Trotman, ship's corporal, first-class, of the Neptune; Alfred G. Ellis, corporal, R.M.L.I., of the Sultan; Thomas Chavill, leading stoker, of the Minotaur; Charles Tozer, leading stoker, and William Tozer Towell, gunner's mate, of the Britomart; Francis J. Bamsey, leading stoker, of the Tenedos; William Rendle, colour-serjeant, R.M.L.I., of the Dido; William Ward, captain's steward, of the Sylvia; George W. Pitt, ship's corporal, first-class, of the Constance; and Richard H. Pearce, second captain of the foretop, of the Mutine, have been awarded the long-service and good-conduct medal.

The Admiralty have ordered four new torpedo-boats of the first class, with engines of 750 horse-power, to be built forthwith. The order has been divided between Messrs. Thornycroft and Messrs. Yarrow.

The Caroline has been ordered to try her new breach-loading armament prior to being brought forward for commission.

The Russian Press criticises very severely the captain of the frigate Vladimir Monomarchus for his daring exploits in the Baltic. It is pointed out, however, by a Naval officer in the *Cronstadt Vestnik*, that the entire affair was probably due to a misconception. He mentions the existence of a report that the captain of the frigate was entrusted with despatches to the admiral commanding the enemy's fleet. These he ought to have delivered by means of a *parlementaire*. Instead of which he steamed into the midst of the fleet with simply the signal flying, "I have orders," and the fleet, ignoring it, opened fire upon him almost simultaneously with 50 guns, ranging in calibre from 6 to 11 inches, while torpedoes were exploded on every side. Angry at being rendered *hors de combat* in this unexpected manner, the more so since the engagement was the first Naval operation in which the Vladimir Monomarchus—the newest vessel of the Russian fleet—had been engaged, the captain refused to capitulate, and steamed on to Sveaborg. A court of inquiry has been appointed to investigate the affair.

Next week a new Swedish-built gunboat, intended for the Russian Siberian flotilla, will arrive at Cronstadt, and, after receiving her armament aboard, will proceed to the Pacific. The vessel is 187½ ft. long, 35 ft. broad, 10 ft. deep, and has a displacement of 900 tons. The armament comprises one 9-in. gun at the bow, one 6 in. astern, six 9-pounders, and two Hotchkiss machine-guns. The vessel will be brig-rigged, and carry a crew of 160 men. Her name will be the Sivootch.

Some rare good men and true have been trained for the world at the Royal Naval School, New Cross:—Major Dowell—"Victoria Cross Dowell"; Richards of Inkerman; Murray of the Engineers, who died in the Redan; G. Vivian Poore, whilom private medical attendant to two princes, the Prince of Wales and Albany; Major Strong, killed at Tel-el-Kebir; and Sir G. S. Nares, of arctic expedition fame, were all New Cross school-boys; and one might add to these a good score of "celebrities."

DEATH.

McCormick.—On the 24th inst., at Ridgway Place, Wimbledon, after long years of suffering, Louisa McCormick, in her eighty-first year, daughter of the late Robert McCormick, Esq., Surgeon, R.N., and sister of Deputy Inspector-General McCormick, R.N.

Advertisements.

THE CHURCH IN THE ARMY.

THE ARMY GUILD of the HOLY STANDARD offers a PRIZE of £20, open to all comers, and a PRIZE of £5, open to Warrant or Non-Commissioned Officers or Soldiers, for the best Essay on the following subject:—"How can the Church best Promote the Cause of Religion in the Army?"

The Essays should be written on one side of the paper only, not exceeding 10 pages of foolscap, 34 lines on each page, and be signed with a Motto. They must be accompanied in each case by a sealed envelope bearing outside the same Motto as at the foot of the Paper, and inside the name and postal address of the writer. These envelopes will not be opened until the PRIZE has been adjudged. The Essays will become the property of the Guild.

The Judges are Lieutenant-General J. E. T. Nicolls, Major-General H. L. Balfour, and the Rev. R. A. Corbett, C.F. The Essays must be sent in—Home Stations by November 1, 1884; Foreign Stations by January 1, 1885.

YACHTING.—A VOYAGE in SUMMER SEAS.—Ladies and Gentlemen wishing to cheat the winter, cruising in southern latitudes and summer seas, are invited to view the magnificent yacht, 'Tyburnia,' 1,012 tons register, lying in the West India Dock, and leaving England the end of September, returning April next. A fine sailing yacht is chosen in preference to a steamer to avoid coaling and the wearying thump, thump of the propeller. The ports of call will include Gibraltar, Barbadoes, and Jamaica, and the gay city of New Orleans, for the Grand Exhibition, and other interesting ports and islands, all chosen for their salubrity of climate and bright summer weather. Unrivalled accommodation and cuisine. Steam launch for fishing and shooting, and table wine found. Terms, 120 to 150 guineas. Several large family cabins at special rates.—Apply Captain J. KENNERLY, on board, or 11 Southampton Row, London, W.C. N.B.—'Tyburnia' visits none but ports under the British Flag, New Orleans excepted.

UNIVERSAL PASSENGER AGENCY,—Messrs. WM. HOOLEY and CO. having peculiar facilities for engaging passages to New Zealand, India, Australia, United States, Canada, West Indies, Brazil, the Cape, and all parts of the world, are prepared to do so at the lowest possible rates, either by steamers or sailing vessels. Fullest information given on application to 128 Leadenhall Street, London, E.C.; or 2 Oriental Place, Southampton. N.B.—No commission is charged to passengers for engaging passages.

COMMERCIAL ENTERPRISE.—To RETIRED OFFICERS, CAPITALISTS, and OTHERS. An opportunity occurs for a Gentleman with £2,000, to co-operate, so as to extend an already formed trading expedition, visiting various parts of the world, for a voyage extending over about eight months, and starting at an early date. The ship is purchased, and security would be given. This advertisement will apply to gentlemen with this amount of capital, desirous of enjoying a pleasant trip, combined with profits, as arrangements would be made for free passage (thus supervising the control of the money), and a very liberal share of the profits would be given.—Principals or their solicitors need only apply in first place to "BONO," 40 Burton Road, Brixton, London.

TO INVESTORS.—A CITY FIRM having large financial transactions, and whose profits average 35 per cent, are prepared to RECEIVE DEPOSITS for INVESTMENT in sums from £25 to £100. Guaranteed interest at the rate of 20 per cent. per annum. Deposits at 12½ per cent. also received at seven days' notice. Principals only.—Address, in first instance, "INVESTOR," care of Mr. J. F. Bennet, Stationer, 82 Queen Street, Cheapside.

PARTNERSHIP.—To OFFICERS and Others desirous of Travelling, combining Occupation, Pleasure, and Business.—An OPPORTUNITY occurs for a GENTLEMAN with £1,000 or £2,000 to JOIN in a Trading Expedition shortly starting on an extended voyage, for about eight months, to various parts of the world, in a splendid clipper ship carrying passengers for pleasure only; the undertaking is formed, but with increase of capital the operations will be greatly extended; lucrative and absolute security, and money under own control.—Principals only, or their solicitors, need apply to "ENTERPRIZE," care of Mr. Bland, 75 Blackfriars Road.

PEARS' SOAP.

A SPECIALITY FOR THE COMPLEXION.

Miss MARY ANDERSON, our beautiful American Cousin, writes:—"I have used **Pears' Soap** for two years with the greatest satisfaction, for I find it the very best."

Pears' Soap has obtained Fifteen International Awards as a Complexion Soap.

EVERYBODY SELLS IT.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Sole Manufacturer,

HOLLOWAY'S PILLS.—TEACHINGS OF EXPERIENCE.—The united testimony of thousands, extending over more than forty years, most strongly recommends these Pills as the best purifiers, the mildest aperients, and the surest restoratives. They never prove delusive, or give merely temporary relief, but attack all ailments of the stomach, lungs, heart, head, and bowels in the only safe and legitimate way, by depurating the blood and so eradicating those impurities which are the source and constituent of almost every disease. Their medicinal efficacy is wonderful in renovating enfeebled constitutions. Their action embraces all that is desirable in a household medicine. They expel every noxious and effete matter, and thus the strength is nurtured and the energies stimulated.

FINAL MILITARY COMPETITIVE.

MILITIA OFFICERS prepared for the above at THE ABBEY, ABINGDON, BERKS.

NEXT TERM commences OCTOBER 11.

For particulars see above.

NEWTON COLLEGE, SOUTH DEVON.

President of Council—The EARL of DEVON.
Head Master—Rev. G. TOWNSEND WARNER, M.A., Trin. Coll., Camb. (assisted by twelve Resident Graduates).

This School now offers a first-class education to the sons of the clergy, officers, professional men, &c., on moderate terms.

The system is arranged so as to embrace every kind of Education necessary for the Universities, Army and Navy, Civil Services, Commercial Life, Colonial Life, &c. There are Classical and Modern sides, quite distinct, with all appliances for a Modern Education separate from that required for the Universities and learned Professions.

The success of the School has been undoubtedly due to the large staff of Masters, and the individual attention which can thus be given to boys of different calibre. The New School Buildings also are a great advantage, and teaching is carried on with facility in the large, airy rooms.

After nearly ten years of work at improvements, the Council feel that they can now offer educational advantages, unrivalled in two Western Counties.

There is a School Chapel, large swimming bath, gymnasium, carpenter's shop, eight racquet and fives courts, 20 acres of beautifully situated playing fields, &c., and as a proof of the favour extended to the School under the present regime.

The NUMBERS have RISEN from 22 to OVER 150.

A special feature of the work is that of Preparing Boys in a Junior School for the larger Public Schools.

Since 1882, Six Scholarships have been won at Winchester and Marlborough by Newton Boys, and the work in the Examination all round has been quite up to this standard. Owing to its situation, the College has been able to render great assistance to delicate boys, and the highest references can be given on these points. Special Classes for Woolwich and Sandhurst.

A list of honours for the year (including a first-class at Oxford) will be sent on application to the HEAD MASTER. £400 given yearly to Scholarships.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde.

Officers prepared for Examinations. Correct Idiom guaranteed. Also Persian, Arabic, and Sanscrit.—PUNDIT, 7 Beechholme Road, Clapton, E.

MR. J. DALLIN PAUL (for 7 years Naval Instructor H.M.S. BRITANNIA),

prepares a Limited Number of Candidates for NAVAL CADETSHIPS.—Address, Southfield Mount, Paignton, South Devon.

TO MILITARY OFFICERS.—

WANTED, in an old-established and very successful Army College, near London, an INSTRUCTOR, to take CHARGE of the MILITIA COMPETITIVE DEPARTMENT now about to be formed. Tuition in all of the military subjects necessary. Liberal terms offered, in addition to capitation fees.—Apply, in the first instance, to Messrs. ARKIN, GABBITAS, and KILLIK, 38 Sackville Street, London, W.

A LADY, having a large house and grounds

in a healthy locality a few miles from London, wishes for the CHARGE of some CHILDREN, Indian or otherwise, to whom she would devote personal attention.—Address, "M. T.," 51 Lamb's Conduit Street, W.C.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; also special Classes for the STAFF COLLEGE and Promotion Examinations. Eighty-three successes in 1882.

ONE HUNDRED and FIFTY-ONE in 1883, viz.:—

SANDHURST:—Twenty-seven.

WOOLWICH:—Five.

MILITIA COMPETITIVE:—Thirty-four Commissions obtained by Pupils.

MILITIA LITERARY:—Eleven.

SANDHURST PRELIMINARY:—Nineteen.

STAFF COLLEGE:—Twelve.

PROMOTION EXAMINATIONS:—Forty-two.

COOPER'S HILL:—The only one sent up.

Details of the above have already been advertised.

1884.

MILITIA COMPETITIVE, March:—Thirty-six, viz.:—3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. Being all sent up. There has been no failure in this examination since April, 1881.

SANDHURST	32nd	Verschoyle	6462
"	43rd	Scott	6353
"	5th	*M'Mahon	5969
"	79th	Williams	5948
"	86th	Tomkin	5840
"	13th	*Portal	5634
"	15th	*Edwards	5515
"	—	†Warren	3994

* Cavalry Cadets. † Hon. Queen's Cadet.

PROMOTION.—Twenty-five Officers have passed this year.

PRELIMINARY.—Twenty-five have passed this year.

INDIAN CIVIL SERVICE.—A Special Class, limited to eight.

FOREIGN OFFICE and DIPLOMATIC.—A Special Class, limited to six.

MILITIA COMPETITIVE.—

Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST and WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomas), Major LENDY continues to RECEIVE Candidates. He has already passed 1,300 Pupils, and of the last twenty he sent up to compete fifteen were successful. Sunbury-on-Thames.

ARMY EXAMINATIONS.—From 15 to 20 Pupils

are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

MILITIA CANDIDATES for the LINE.

—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

JERSEY LADIES' COLLEGE.

UNIVERSITY DISTINCTIONS.—Honours have been taken by the Pupils in the London and Cambridge University Examinations, and in those for the Brevet de Capacité (Paris).

Fifteen Resident Mistresses, Members of Newnham Hall, Cambridge, the London University, or Diplomées of the Académie de Paris and Conservatoire de Stuttgart.

School Fees:—Three to five guineas per term; boarding fees, eleven guineas per term. Reduction for sisters and Clergyman's daughters. No charge for Books and Stationery.

For particulars apply to the LADY PRINCIPAL, Ladies' College, Jersey.

MILITARY EDUCATION, GERMANY.

—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE CANDIDATES were sent up, and SIX CADETSHIPS obtained (one Woolwich, five Sandhurst). Mr. H. D. Radcliffe took SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks.

The general score now amounts to ONE HUNDRED SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL, SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.

—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS.

—Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS,

St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

ARMY EXAMINATIONS.—PREPARATION for WOOLWICH and SANDHURST

in the Modern Side of Derby School. Fees £70. Sons of Officers £60. Lists of successes and of Scholarships tenable at School can be obtained from the Rev. WALTER CLARK, B.D., the School, Derby.

FRENCH and GERMAN on the CONTINENT.

New Army Examination Scheme, 1885.

Mr. GIBSON, M.A., Author of Sandhurst "Further" and "Preliminary" Guides and other Educational Works, will open on September 1, at COBLENZ-ON-RHINE, a Modern Language Department, in direct communication with his Establishment at Bromley, Kent.

THE GROVE COLLEGE, ADDLESTONE, SURREY.

A School of the first-class for the Sons of Gentlemen, particularly of Military and Naval Officers.

A Special Class in which boys are prepared for Service Cadetships, according to the Admiralty Regulations for the Britannia candidates. Success guaranteed in ordinary cases. Inclusive terms for this class, eighty guineas a year.

Only forty-five minutes from London.

Prospectuses and References as to standing and success from Principal, Rev. SAMUEL T. EALES, M.A. D.C.L

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—

Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.

—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A.,

Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS,

28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.

—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

ARMY and NAVY SCHOOL, BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

HARTLEY INSTITUTION, SOUTHAMPTON.

In the Departments of General Literature, Science and Engineering, and Preliminary Medical Education, CANDIDATES are SPECIALLY PREPARED by an experienced and highly qualified Teaching Staff for Woolwich, Sandhurst, Indian and Colonial Appointments, and for Open Scholarships in Science and Mathematics at the Universities, &c.

T. W. SHORE,
Executive Officer.

INDIA CIVIL SERVICE.—The 22nd successful Candidate

in the recent India Civil Service Examination passed direct from TRINITY COLLEGE SCHOOL, STRATFORD-ON-AVON. Preparation for all Competitive Examinations, Classical and Modern sides. Preparatory Department for young boys. Large staff of Masters. Fine buildings, with latest sanitary improvements. Inclusive terms, 60 and 70 guineas.—Apply to the HEAD MASTER.

LIEUTENANT-COLONEL T. J. R. MALLOCK,

late Royal Fusiliers, and Garrison Instructor of the Southern District for the last six years, RECEIVES a Limited Number of MILITIA SUBALTERNS as Resident Pupils, to PREPARE them for their MILITARY COMPETITIVE EXAMINATION.

Terms, &c., on application. The NEXT COURSE will commence on OCTOBER 1.

Address—Pinewood, Bagshot, Surrey.

MILITARY COLLEGE, NORTHCOURT, ABINGDON, BERKS.

SANDHURST and MILITIA, Preliminary and Further. A small number (limited to 12) prepared for the above examinations.

Successes this year—Sandhurst—
H. W. U. Coates, 4454 (1st trial).
Robert A. Simpson, 6,151 (2nd trial).

A Militia Officer also passed his Literary.

Special terms for Officers' and Clergymen's Sons.

NEXT TERM begins SEPTEMBER 5.

Principal.—J. L. HASLEHAM, Esq.

SOUTH COAST.—PREPARATORY SCHOOL.

—Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

CAPTAIN F. H. FAWKES (retired Royal Engineers) prepares quickly and successfully for ARMY, CIVIL SERVICE, &c.

Good house accommodation; excellent staff of Tutors; and all arrangements made with a view to secure in everything as high a standard as possible. Five years' successful experience. References to Masters at Eton and Harrow, and other Public Schools.

Recent Sandhurst successes:—
- Places—7th, 12th, 20th, 27th, 34th, &c.
- Mathematics—FIRST and SECOND places consecutively.
- English—FIRST, SECOND, and FOURTH places consecutively.
- Geology—95 per cent. twice consecutively.

Sandhurst and Woolwich Preliminaries, 21 out of 27.

JULY. { SANDHURST—4 out of 5; and PRELIMINARY—2 out of 3.

Address—UPTON PARK, SLOUGH, BUCKS.

RAMSGATE COLLEGE.

Established as Chatham House, 1809; Rebuilt, 1878 to 1882.

WARDEN AND CHAIRMAN OF THE COUNCIL,
The Rev. E. GRIPPER BANKS, M.A. Oxon.
HEAD MASTER,
E. C. MUSSON, Esq., M.A., Camb., F.G.S.
(Late Head Master of the Grammar School, Ashford.)

The College, standing in 17 acres of enclosed park, has unsurpassed Grounds and School Buildings, including a Private Chapel, Chemical Laboratory, Workshops, Gymnasium, Bath-rooms, Isolated Infirmary, Cubicles, Private Studies. The sanitary arrangements have been pronounced, by eminent engineers, perfect.

GENERAL SCHEME.—To provide for Sons of Gentlemen, in a climate especially suitable, a first-class education at a moderate cost. School system framed to combine the advantages of a Public School with the individual attention of a private tutor, so that all the boys—and not only the more clever—are made to work.

COURSE of INSTRUCTION.—To prepare Pupils for the Universities, the Services, the Professions, Mercantile Pursuits, and specially for Scholarships, at the Universities and the Hospitals, the India and Home Civil Service, entrance to the Legal and Medical Professions, Matriculation, and the further Examinations at the London University.

GREAT SUCCESS has been obtained for Woolwich and Sandhurst. The Head Master, who has had long and most successful experience, receives into his house a limited number of pupils who need special aid and attention.

HONOURS GAINED are many and varied, and include in the present year 1st Class in Lit. Hum. at Oxford, a high Wranglership at Cambridge, entrance to Cooper's Hill, Associateship at the R. School of Mines. Sandhurst entrance direct.

MODERN DEPARTMENT.—Great importance is attached to Science, and to Modern Languages, which are taught colloquially as well as grammatically, and by foreigners.

JUNIOR BRANCH, for BOYS, from seven upwards, in separate wing and with special supervision, such as is necessary for boys leaving home for first time.

The NEXT TERM will BEGIN September 20.

For Prospectus, &c., apply to the SECRETARY of the GOVERNORS of the PROPRIETARY COLLEGE at RAMSGATE (Limited).

LONDON INTERNATIONAL COLLEGE,

Spring Grove, Middlesex, W.

Founded under the auspices of the late Richard Cobden.

French and German taught to every Boy.

Among the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased from a Special Fund in the case of those requiring it.

Three restricted to Sons of Officers with an additional reduction; also LEAVING SCHOLARSHIPS, tenable at SANDHURST, WOOLWICH, &c.

The NEXT TERM BEGINS THURSDAY, September 18.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

WIMBLEDON COLLEGE,

Under the Management of a Board of Officers and Gentlemen.

Head Master—The Rev. CHARLES J. WYNNE, M.A., assisted by an Experienced and very Efficient Staff of Masters.

Thorough Preparation for the Universities and professional life generally. Also for the Naval as well as Military and other Competitive Examinations.

At the last Examination for Woolwich four educated at this School were successful in taking the 18th, 22nd, 25th, and 46th places, three of them being under 17 years of age.

Swimming bath, gymnasium, cricket, lawn-tennis, &c.

For further particulars, apply to the HEAD MASTER.

ARMY and UNIVERSITY EXAMINATIONS.—Mr. R. C. DAVIES, M.A., the Wood House, New Southgate, N., has VACANCIES. Three candidates were sent up for the July Sandhurst Competitive, and all were successful, two of them having twice failed previously, and now passing 40th and 41st. Large grounds and cricket-field. Average number of pupils, ten.

THE GRANGE, COWES.

HEAD MASTER—Rev. ARTHUR WATSON, M.A., Graduate in Honours, Cambridge; assisted by two resident Graduates, and other Masters.

Pupils receive individual attention in the necessary subjects of their Examinations.

In July, a Candidate, just 16, was successful for Woolwich.

For Naval Cadetships, 1st, 3rd (three times), 4th, 5th, &c., places have been gained.

THE WIDOW of a GENERAL OFFICER wishes highly to recommend a delightful HOME on the Coast of France for INDIAN CHILDREN in which several of her family have been well managed, kindly dealt with, and very happy during a long course of years. Liberal terms, highest references exchanged.—Address, "O. R." 55 Parliament Street.

THE MANOR HOUSE, LEE, S.E.—SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following FIFTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

THE MANOR HOUSE, LEE.

AUTUMN TERM COMMENCES AUGUST 25.

NAUTICAL TRAINING COLLEGE.

THE THAMES NAUTICAL TRAINING COLLEGE, H.M.S. Worcester, moored off Greenhithe, Kent, is managed by a Committee of London Shipowners, Merchants, and Captains. Chairman, Sir G. Chambers, 4 Mincing Lane, E.C. Youths from 11 to 15½ years of age, intended for the sea, are received on board and specially educated for a seafaring life. The annual terms in the Upper School, for cadets from 13 to 15½, are 50 guineas; and in the Lower School, for cadets from 11 to 13, 45 guineas, with a charge to each of 10 guineas for uniforms, medical attendance, washing, &c. The Board of Trade allow that two years passed on board this ship shall count as one year's sea service. The Admiralty annually give sea cadetships in the Royal Naval Reserve. The College will re-open September 20, after Midsummer vacation.—Forms and Prospectuses may be obtained on application to

W. M. BULLIVANT,
Hon. Secretary.

72 Mark Lane, London.

ARMY EXAMINATIONS.—PREPARATIONS in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON (18sh Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil, Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

For Prospectus, &c., address 16 Brixton Rise, London.

ARMY EXAMINATIONS, 1884.

Dr. CHETWODE CRAWLEY'S LIST:—
SANDHURST, July, 1884.

	Marks.		Marks.
Walpole (1st)	8348	MacGusty	6355
King	6191	Hamilton-Jones	6153
MacDonnell	6057	Crosbie	6021
Wilson	5819	Ford-Hutchinson	5772

Humphrey (I. Cadet)... 5349

Woolwich, July, 1884.		Mil. Officers, April, 1884.	
Crosbie (6th)	6107	Annesley	2019

*** Walpole's score is by far the highest ever made for Sandhurst. Three times within three years first place at Woolwich and Sandhurst Examinations has fallen to Dr. Chetwode Crawley's pupils.

In previous Academical year, 17 passed for Woolwich, Sandhurst, &c; 7 for Class I, &c.; 18 for Royal Irish Constabulary cadetships, besides 42 miscellaneous Examinations.

W. J. CHETWODE CRAWLEY,

This day is published.

A HANDY TEXT-BOOK ON MILITARY LAW.

Compiled chiefly to assist Officers preparing for Examination; also for all Officers of the Regular and Auxiliary Forces.

Specially arranged according to the Syllabus of Subjects of Examination for Promotion, Queen's Regulations, 1883.

Comprising also a Synopsis of part of the Army Act.

By Major F. COCHRAN,
Hampshire Regiment; Garrison Instructor,
North British District.

Crown 8vo, 7s 6d.

"Mainly compiled with a view of assisting officers who are qualifying for promotion, this manual of military law is admirably adapted for that purpose, because the author has succeeded in presenting a clear and systematic exposition of all the subjects embraced in the military law examination. So complete, indeed, is the work, that reference to other books is unnecessary."—*Naval and Military Gazette.*

"Officers qualifying for promotion when preparing for the examination in military law will find this an invaluable text-book."—*Broad Arrow.*

"Major Cochran's task has been performed with care, and the manual may be safely recommended to officers and others having occasion to consult the military code."—*Saturday Review.*

"Major Cochran has a positive genius for lucid condensation."—*Pall Mall Gazette.*

"The book forms a thoroughly practical and comprehensive manual on a difficult subject, with reference to which it is essential that military officers should be well informed."—*Scotsman.*

"It presents an admirably clear, straightforward, and systematic exposition of the subject, to which it is the best introduction we know. It is a compact synopsis of the military law as it at present stands."—*Overland Mail.*

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig Company's Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

The Finest Meat-Flavouring Ingredient.
Invaluable and efficient Tonic for Invalids.

Ask for the Liebig COMPANY'S Extract, and see that no other is substituted for it.

ANNUAL SALE OVER HALF A MILLION.

McCALL'S PAYSANDU OX TONGUES.
IN TINS, SOLD BY ALL GROCERS,
IN VARIOUS SIZES, 1½ TO 3½ LBS.

DELICIOUS for BREAKFASTS, LUNCHEONS, and SUPPERS.

TO SMOKERS.—IMPORTANT.

INDIAN TRICHINOPOLY
CIGARS AND CHEROOTS (Dawson's Muster),

BEWLAY AND CO.

22s 6d per 100,
CARRIAGE PAID.

25, as Sample, 6s.

Of Extraordinarily Fine Quality and Flavour, gained the Gold Medal at the Calcutta Exhibition, 1884; Anglo-Indians and all who have smoked them say they are delightful, and better than the best Havannah Cigars.

INDIAN TRICHINOPOLY CIGARS AND CHEROOTS (Dawson's Muster), Sold by

BEWLAY AND CO.,
Cigar Importers to the Royal Family,
49 WEST STRAND, and 143 CHEAPSIDE, LONDON.
Established 100 Years.

Price List of Indian and Havannah Cigars at Wholesale Prices, post free.

E. & E. EMANUEL,
3 THE HARD (3 DOORS FROM H.M.'s DOCKYARD), PORTSEA.
WATCH AND CLOCK MAKERS, GOLDSMITHS, SILVERSMITHS, and JEWELLERS

THE SOUDAN MEDAL & STAR.
Miniature Copies of all Medals and Decorations.
Regimental, Prize, and Presentation Plate.
Electro-Plate. Table Cutlery.
Rare China, Antique Plate, Bronzes, and Curios.
Collections valued and purchased.
Old Plate, Jewels, and Epaulettes bought.
Foreign Money exchanged.
Race, Field, and Opera Glasses. Nautical Instruments.
English and Foreign Watches & Clocks.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179 of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactorily."

Sole Address—3 THE HARD, PORTSEA.

J. AND W. TOLLEY'S
EXPRESS RIFLES.
ELEPHANT RIFLES.
OUTFITS FOR BIG-GAME EXPEDITIONS.

BORED ON OUR NON-FOULING RIFLING SYSTEM, GIVING THE FLATTEST TRAJECTORY AND THE GREATEST ACCURACY YET OBTAINED, AS PROVED BY AUTHENTICATED TRIAL, REPORT OF WHICH MAY BE HAD ON APPLICATION.

EXPRESS DOUBLE RIFLES
·360, ·400, ·450, ·500, ·577, £25.

BALL GUNS, SMOOTH-BORE, for BIG GAME.

TOLLEY'S £13 13s C.F. GUNS.
Hammer or Hammerless—Choke-Bore or Cylinder—Top or Under Lever.

These Guns, though plainly finished, are thoroughly sound, serviceable, hard-shooting Guns. A shooting label accompanies each Gun, giving its actual performance at the target, which is guaranteed.

NEW SEASON'S LISTS NOW READY, AND FORWARDED ON APPLICATION.

J. AND W. TOLLEY,
1 CONDUIT STREET, REGENT STREET, LONDON;
and PIONEER WORKS, BIRMINGHAM.

J. HOARE and CO.,
MILITARY TAILORS,
(For many years with Messrs. Hill Brothers),
16 JERMYN STREET, S.W.
Three doors West of Regent Street.

Exceptionally Qualified Cutters.
UNIFORMS—CIVIL, NAVAL, and MILITARY.

C. MAHILLON AND CO.,
MANUFACTURERS of MUSICAL INSTRUMENTS, and BAND MUSIC PUBLISHERS,
42 Leicester Square, London, W.C.
GOLD MEDAL, PARIS, 1878.
FIRST SPECIAL PRIZE OF MERIT, SYDNEY, 1879.

C. Mahillon and Co.'s Musical Instruments (ebonite, wood, and brass) have a world-wide reputation; THEY ARE SPECIALLY ADAPTED FOR MILITARY PURPOSES.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

OUR Naval strength, or rather want of strength, in China is attracting a good deal of notice at the present moment. A paragraph has gone the round of the Press to the effect that,—"There is an unusually large number of vessels at the various dockyards at disposal, but it is understood that the Admiralty prefer to despatch corvettes and composite sloops in preference to the ironclads, the former being much more useful for the purposes of protecting British interests off the coast of China, &c." Now, we will not accuse the Admiralty of having actually originated that paragraph, for it is our duty to state plainly that every word in it is untrue. In the first place, there is not an unusually large number of men-of-war, that is to say, efficient war ships, at the disposal of the Admiralty at any of her Majesty's dockyards. That the Admiralty should prefer to despatch corvettes and composite sloops in preference to protected ships, to meet the ironclads and heavily armed cruisers of France on the China station or elsewhere, is absurd. And how, we ask, can it be assumed that such craft are more useful for the purpose of protecting British interests against the ravages of the armoured, more heavily armed, and swifter vessels of France? Such a statement is entirely beyond our comprehension. Hence, we can only assume that the paragraph above quoted was penned to throw dust in the eyes of the public, to whom it would indeed be a surprise to know that, in the first place, the Admiralty have not a single vessel completed that they could send out through the Suez Canal, able to sustain the attack of the weakest French armour-clad attached to the flag of Admiral Courbet. Secondly, that even supposing their Lordships had the ships, they have not the men to man them, without calling out the Reserves, or forcing the crews of other ships serving on foreign stations to remain abroad much longer than the three years laid down by the rules and customs of the service. And, thirdly, that England is at present in a position of such entire and utter Naval collapse, that it will take years to overcome it, and once more place the Navy on the footing it was in of yore, when it swept the combined Fleets of the most powerful maritime nations of Europe from off the high seas. We do not desire to make matters appear worse than they are, for, in our opinion, it requires at the present moment but very slight tact or statesmanship to avert war, and remain at peace with all our neighbours for many years to come. Nevertheless, there is danger ahead. Are we prepared to meet it? What ironclads do we possess able to go through the Suez Canal? The only ones of sufficiently light draught to do so are the Iron Duke and Triumph, besides the Audacious, now acting as flagship to the Admiral Commanding-in-Chief on the China station. But of what use are these obsolete craft, with their light muzzle-loading guns, when opposed to the far heavier breech-loading ordnance of the French ships? These ships carry a similar armament, so to speak, to the Shah, when that ship failed to make the slightest impression on the thin 4-in. armour of the Huascar. What would such guns do against the far thicker armour of the French armour-clads now under the command of Admiral Courbet? The Naval strength of France in Chinese waters is great, and is being materially increased. Admiral Courbet flies his flag on board La Victorieuse, a wooden armoured ship carrying a central battery. She has a displacement of 4,504 tons, draws 22 ft. 3 in. aft, and steams 12·75 knots. Her armour is 6 in. thick on 26 in. of backing at the water line, and 4¾ in. over the battery. Her armament consists of four 9½ in. 15½-ton breech-loading guns in the central battery; two similar guns in the barbette towers, one 7¾-ton gun in the bows under the top-gallant forecastle, together with six 5½ in. and 4½ in. guns on the spar deck, besides Hotchkiss revolving cannon and torpedo gear. She is manned by 367 officers and men. La Galissonnière and La Triomphante are sister-ships to La Victorieuse, and are similarly armed. Their complements are respectively 346 and 367 men. Le Bayard is a still more powerful ship. She carries main-deck guns, supplemented by four barbette towers. Her compound armour is 10 in. thick amidships, 7 in. forward, and 6¼ in. aft, on a backing of timber 15 in. thick. The barbette towers carry 8 in. of armour, and are armed with four 9½-in. breech-loading guns. She also carries one 7½-in. gun under the forecastle, six 5½-in. guns on the deck, and revolving cannon round her bulwarks. Her speed is 14½ knots. Her ship's company numbers 450 officers and men. Le Duguay-Tronin is an unarmoured cruiser steaming 15¼ knots, manned by 311 officers and men, and carrying five 7½-in. and five 5½-in. breech-loading guns, besides machine-guns. She has a ram bow. Le Villars is a barbette cruiser, steaming 14 knots. She is armed with 15 5½-in. breech-loading guns and machine-guns, and is manned by 263 officers and men. Le D'Estaing is a similar class of vessel. Le Volta, Kersaint, and Hamelin are é'claireurs d'escadre, steaming 12½ knots, carrying six 5½-in. breech-loading guns with machine-guns, and each manned by 159 officers and men. Le Lutin, Lynx, Aspic, and Vipère are canonnières de station, armed with two 5½-in. and two 4-in. breech-loading guns, each manned by 78 officers and men, and steaming 10¼ knots. Le Fanfare and Léopard are wooden canonnières de station, armed with one 5½-in. and one 4-in. breech-loading gun, steaming 9 knots, and manned by 70 officers and men. La Surprise is a second-class wooden gunboat, steaming 8½ knots, armed with two 5½-in. breech-loading guns and a 1½-in. Hotchkiss; crew, 61. La Tramée, Le Yatagan, La Javeline, Le Hache, La Carabine, La Massue, Le Pluvier, L'Alouette, L'Eclair, and La Trombe are smaller gunboats for river service principally, while Le Parseval is a wooden gunboat which steams 12½ knots, carries four 5½-in. breech-loading guns, and a crew of 114 all told. In addition, considerable reinforcements are being sent out to Admiral Courbet, who is said to have received *carte blanche* as far as his future naval movements are concerned. The following is the list of vessels either on their way to Chinese waters or preparing for the voyage:—The Rigault de Genouilly, eight guns and 195 men; the cruiser *à barbette* the Champlain, 10 guns, 203 men; ditto, the Nielly, 15 guns, 264 men; and the Eclaireur, eight guns and 195 men. It appears probable that Admiral Courbet will keep his intentions secret, and that we shall hear nothing of further operations at Canton, or elsewhere, until the blow has been struck. There seems to be a growing feeling in France that Admiral Courbet has gone far enough, and that M. Jules Ferry and his colleagues should be satisfied with what has already been acquired. The fact is, that the French find that they have already gone much further than they intended, and are getting afraid of being lured on still farther and having to mobilise one or two Army corps, which would be the case if it became necessary to march on Pekin. Nevertheless, there is no telling what may happen, and, under these circumstances, it may be as well to compare our own Naval strength in Chinese waters with that of France. First, then, we have the Audacious, flagship of Vice-Admiral Sir William Dowell, carrying 14 muzzle-loading guns, steaming less than 12 knots, and manned by 490 officers and men. She is thinly armoured, and no match for the French flagship, although of 6,010 tons. The Albatross is a sloop of 940 tons, manned by a crew of 125 officers and men, steaming about nine knots, and carrying four light guns. The Champion is a corvette of 2,380 tons, carrying 14 guns, manned by a crew of 265, all told, and steaming about 11 knots. The Cleopatra, Curacoa, and Sapphire are also corvettes. The Daring is a sloop of 940 tons, with a complement of 123 officers and men, armed with four guns, and steaming about nine knots. The Flying Fish is a surveying vessel, and therefore not to be counted. The Cockchafer, Espoir, Firebrand, Fly, Linnet, Merlin, Midge, Swift, and Zephyr are all small gunboats of approximately the same size, viz., of 465 tons, with a complement of 60 officers and men. They carry four guns, and steam about 8½ knots. The Wanderer is slightly larger, carrying three new breech-loading guns. The Pegasus is a sloop carrying six guns, and a crew of 139 officers and men, and the Vigilant is a small despatch-vessel. That constitutes the whole Naval force at the disposal of Sir William Dowell, excepting a sister-ship to the Hecate—the Wivern, a turret-ship laid up at Hong Kong; together with the gunboats Tweed and Esk, for which Admiral Dowell would have to find crews. The disparity between the strength of the two Naval forces of France and England in the China Seas is so glaring, that no remarks of ours are required to demonstrate the fact, or to prove that, even were the ships now serving in the East Indies ordered to reinforce the China Squadron, still Sir William Dowell would but be in a position to meet the French Fleet in case events rendered his so doing necessary. And what have we left in our Dockyards to oppose the French heavily-armed and well-protected ships now in China? Absolutely nothing. The Iron Duke and the Triumph are the only two ironclads we possess of sufficiently light draught to get through the Suez Canal. The Raleigh, the Shah, the Bacchante, the Active, the Arethusa, the Leander, the Blanche, the Calliope, the Calypso, the Caroline, the Conquest the Cordelia, the Comus, the Eclipse, the Emerald, the Encounter, the Inconstant, the Mercury, the Phæton, the Pylades, the Rover, the Royalist, the Ruby, and the Volage are the cruisers and corvettes the Admiralty have in reserve. They are all unarmoured, and therefore useless against ironclads. Should Sir William Dowell require to be reinforced, and his squadron with its obsolete ships and guns is certainly no match at present for the well-armed French ironclads under the command of Admiral Courbet, where are the men to come from to man the ships it would be necessary to commission? We have neither seamen, nor Marines, nor yet Stokers, in numbers sufficient to enable us to do so. At present, the Comus, the Inconstant, and the Ruby are undergoing repairs. The Caroline and the Raleigh are ready to be commissioned. The armour-clads Iron Duke, Triumph, Devastation, and Rupert, with the despatch-vessels Mercury and Cordelia, and the corvettes Active and Volage, would have to be manned. But how? Where are the men? And if it would be an almost impossible task to man these few ships all at once, in what position would England be if the emergency required every available ship in the *Navy List* to be forthwith commissioned?

THERE seems to be some danger lest in the excitement of debating the subject of the relative strength of our ironclad ships, as compared with those of foreign Powers, the equally important question of who is to fight the ironclads should be overlooked. "Manning the Navy," in case of real war, would be as much a problem as it ever was. So, leaving for the present the consideration of the seaman *personnel*, let us see what is the condition of the stoker element. It is a fact that every Naval man who knows or cares anything about the matter, looks forward with dread to the possibility of war with another Naval Power, if only on account of the wretched scarcity and incapacity of the rank and file of our boiler-rooms. Not for five-and-twenty years has the condition of the lower grades of the engine-room staff been so eminently weak and untrustworthy as it is now. We have spoken above of two distinct evils that require remedy,—scarcity and incapacity. With regard to the former, it is probably not too much to say that it would be impossible, for want of stokers, to commission six first-rate ironclads at a week's notice without almost entirely denuding of their meagre complements the ships of the First Reserve. And when this had been done, a large proportion of the drafts would consist of raw, weedy lads, utterly unfit for the severe labour of stoking and coal-trimming, liable to be prostrated by sea-sickness in the first gale of wind, and worse than useless considered as part of a fighting crew. Does it not seem marvellous that, while we really do take pains to ensure that our young seamen are carefully instructed, before they embark in a fighting-ship, in all the details of crossing royal yards, shifting topsails and jib-booms, and all the drills considered necessary to the smartness of the crews of our sailing-ships half a century ago, we are content to pitchfork a half-starved lad from the slums of some big town into the same fighting-ship, and call him a stoker? The men of the old sort, who came from the lime-kiln, the bakery, and often from the river steamer, come no more,—they can get better wages elsewhere. And worse than this; the old type of leading stoker, who would have licked even the unpromising raw material we get now into something like shape, is well-nigh extinct. The old petty officer, who could be trusted to sling heavy weights, make a big red-lead joint, or keep steam under difficulties, is a thing of the past. His versatility and handiness were often due to the fact that he had been an A.B. before "taking on" as a stoker. But this is now forbidden; and the leading stoker, who is up to his work, after ten years' service goes ashore to a better billet. To remedy this state of things it is manifest that the first necessity is to attract more and more able-bodied men by the offer of higher pay; and next, that no man should be sent to sea as part of the fighting complement of a man-of-war's stokehold till he has been somewhat inured to the hardships thereof by training in tugs and similar coast-going vessels. Further, it would undoubtedly be expedient to allow a certain number of seamen and Marines to qualify as assistant-stokers, fit to serve on an emergency, with a small extra rate of daily pay. The dangerous inefficiency of the present system is an immediate crying evil.

The Queen left Osborne on September 1, and having embarked at Cowes on board the Royal yacht *Alberta*, crossed over to Clarence Yard, and proceeded thence to Balmoral.

The Admiralty have issued orders for the ships of the Channel Squadron to have their defects made good at Portsmouth and Plymouth forthwith, and to be ready for sea in a month's time.

Admiral the Lord John Hay arrived at Alexandria on September 4, with the Mediterranean Cruising Squadron, to assist in organising the Nile Expedition by landing a strong Naval Brigade, and the rifle-calibre machine-guns of the Fleet. The *Falcon* has been ordered to Alexandria, together with the *Temeraire* and *Coquette*, to strengthen the Squadron.

The appointment of Captain Lord Charles Beresford, R.N., to the Staff of General Lord Wolseley has been received with great satisfaction throughout the Naval service. Lord Wolseley has selected a most able and energetic officer to carry out work in connection with the Nile Expedition, work that will necessitate the possession of qualities such as Lord Charles Beresford has already given ample proof of. The haulage of 600 heavily laden boats over the Cataracts and against the stream to Khartoum will require constant supervision. Lord Wolseley knows full well, however, that work confided to Lord Charles Beresford will be sure to be properly carried out, even though the task be arduous and the self-sacrifice great in bringing it to a successful issue.

We regret to hear that Mr. Fegan, Paymaster-in-Chief, who has been for several years past employed at the Admiralty in connection with the compilation of the Queen's Regulations and Orders for the Government of the Navy, is so seriously indisposed as to prevent his continuance at his present post.

A correspondent assures us that one of the most pressing requirements of the day is "A Naval Executive Officer, of great influence and high moral courage, to undertake a crusade against the barbarous practice of holystoning decks at 4 a.m., and to endeavour to persuade the Admiralty that it is a species of refined torture—to those sleeping, or rather awaking, beneath or upon those decks—unsuited to the culture and requirements of the latter end of the nineteenth century, and a practice which should long since have been relegated to the 'dead-and-gone' limbo of the cat-o'-nine-tails and officers' rum." Can no other mode of cleaning and bleaching decks be resorted to than that of grinding the planks down with sand and stones?

A Committee is sitting at the Admiralty to consider the report of Lord Ravensworth's Committee on shipbuilding and repairing, which recommend that the construction of ships in Royal Dockyards should be discontinued, a reform we hope never to see adopted.

Considering that the Germans have ordered a fine healthy corvette, the *Bismarck*, to the West Coast of Africa, it is very weak policy on the part of the Admiralty to select such a "cramped-up" craft as the *Rapid* to replace the *Opal*, when there are more suitable vessels available. The matter is much to be regretted at the present time, when British interests in those waters demand special attention, and the presence of effective vessels is more than ever necessary.

The continuance of naval officers in home appointments is generally refused by the Admiralty, and even when conceded, is looked upon as an injustice to others, excepting when there are special circumstances in connection therewith. For what reason a navigating officer has been appointed for service with naval cadets in the *Britannia*, which he will hold for five years, when he has been indulged in Coastguard ships since 1877, is one of those matters which even a Naval Lord could hardly explain, especially when there are other officers equally, if not more deserving and better qualified for the post.

We have received the following particulars from Russia with reference to the formation of a Naval flotilla for the River Oxus. Recently the successful despatch of troops to Khiva has demonstrated that the best route to Turkestan runs from Mertvi Kultuk Bay, opposite the mouth of the Volga, to the town of Kungrad, situated in the delta of the Oxus. This discovery has practically led to the abolition of the military route to Central Asia *viâ* Orenburg, and for the future troops will be despatched to Tashkent by way of the Kultuk-Kungrad route, the River Oxus, and Bokhara. An essential feature in organising this new route is the formation of a flotilla of steamers to navigate the River Oxus from Kungrad to Ustik, in Bokhara, where the new line of communication turns off from the Oxus towards Samarcand and Tashkent. To float down the Oxus rfom Ustik to Kungrad occupies from five to seven days, but three weeks or more are required to haul the flat-bottomed boats of the Oxus up the stream. Hence, to put the communications on a satisfactory footing, the Russian Government has invited Gromoff, a well-known Turkestan contractor, who took a prominent part in Skobeleff's campaign, to form a subsidised company with a capital of £350,000. This company will place armed transports on the river, erect wharves, build barracks for troops in transit, and establish factories at Kungrad and Ustik. The relations between the Government and the company will be under the control of the Minister of Marine. Some idea of the advantages of the new route, which the company will co-operate in establishing, may be gathered from the circumstance that in the case of Khiva alone there is a saving of more than a month's hard marching in reaching the oasis from Russia.

The engines of the *Wild Swan* were originally specified to develop 900 horse-power, but as this was never reached, Mr. G. H. Beaton, Chief Engineer of Devonport Yard, suggested, after the ship was paid off, the advisability of compounding the engines on her being next brought forward for commission. This has now been done, and it is the first time that such work has been taken in hand at Keyham, and has been attended with very successful results, as shown by the following report of the six hours' full-power trial at sea on Friday, August 29. The length of stroke of the pistons remains as at first; but the diameters of the cylinders, originally 45 in., have been altered to 38 in. high and 66 in. low. The boilers have been thoroughly repaired, with all new internal parts. The draught of water on the trial was 11 ft. 8 in. forward, 15 ft. 9 in. aft. Pressure of steam in boilers, 62 7 lb. Vacuum in condenser, 26·8 in. Revolutions per minute, 95·3. Mean pressure in cylinders, high, 28 in.; low, 12·9 lb. per square inch. The horse-power of the high cylinder was 456, and of the low 638, making a total of 1,094; the speed of the vessel was 11·5 knots, and the consumption of coal per horse-power per hour was 2·7 lb. The improvement suggested and so successfully carried out by Mr. Beaton at Keyham has given the ship an increase in power of 300 horses, and $1\frac{1}{4}$ knots in speed above the results obtained when originally fitted in 1876 by Messrs. Hawthorn, of Newcastle. The Admiralty, we hear, are extremely well pleased with this result, which has, were it possible to do so, added fresh laurels to those already so deservedly won by Mr. Beaton as an engineer. It will be remembered that it was through the fertility of resource of this officer that the shipwrecked crew of the *Driver* were saved from dying of thirst on the barren isle of Mariguana, one of the Bahamas.

Rear-Admiral Sir Walter Hunt-Grubbe is likely to succeed Rear-Admiral C. T. Curme, as Admiral-Superintendent of Devonport Dockyard, in February next.

Lieutenant Archibald B. Milne, R.N., has been promoted to the rank of Commander after only eight years' service in his rank. True, this young officer was lent to the *Osborne* for a short time. No doubt there are many lieutenants senior to Commander Milne in the service and in their rank who wish they also had interest enough at the Admiralty to secure their being allowed take a similar short cut to promotion.

Admiral Courbet has proceeded in search of the ships and gunboats of the Chinese Fleet with a view to destroying them. A report is current that at Kelung the French landed, but were repulsed by the Chinese.

Some doubts having been expressed as to the sanitary condition of the College at Portsmouth, the Admiralty have directed Fleet Surgeon W. Reid, of Haslar Hospital, in conjunction with the Superintending Engineer of the Dockyard and his Staff, to make a thorough investigation of the matter. The drainage of the building was overhauled and rearranged some four years since, but it appears to be doubtful whether the old system—if system it could be called—was uprooted and destroyed, as it certainly should have been. The foundations of many Government buildings are, as has been proved, completely honeycombed with old drains and sewers, varied by an occasional cesspit.

The *Turquoise* is, after all, not to proceed to the coast of Madagascar, but is to take up the duties of suppressing the slave-trade on the Zanzibar coast, formerly discharged by the boats of the *London*.

Notwithstanding that for eighteen months past it has been compulsory for every Acting Sub-Lieutenant to go through a course of instruction in pilotage, the attainment of a certain standard in this branch of navigation forming one of the conditions of receiving a Lieutenant's commission, it is somewhat remarkable that it should not have been considered necessary to appoint an officer specially to give instruction in this subject. At present, this duty is carried out by the Staff Commander of the flagship at Portsmouth, who has also to correct the charts in store, and swing ships for the adjustment of compasses, besides having, it is presumed, certain duties and responsibilities in connection with the stores on board the flagship and some of her tenders. The result of this piece of economy is that the officers who are studying pilotage are not unfrequently left to their own devices for the whole or part of a day. It is certainly very necessary that some practical knowledge of the art of navigation in narrow waters should be more common in the Navy than it has hitherto been; but the importance of such knowledge is not likely to be realised by young officers when the authorities leave them to pick it up almost at haphazard. At the present moment there are, we are given to understand, some twenty officers preparing for their examination in a pilotage; with half, or, at a liberal computation, three-fourths of a man to assist them!

A German-built torpedo-boat has been tried at Kiel against one purchased from Messrs. Thornycroft and Co., with the result that, according to the German papers, the *Stettin* beat the English-built boat in speed by nearly two knots an hour.

Some of the principal actions which have taken place in the month of September are as follows, viz.:

NAVAL.

September 13, 1799.—Dutch ships, Draak and Gier, captured, near Harlingen, by British sloops Arrow and Wolverine.

September 4, 1800.—Surrender of Malta, when French 64-gun ships, Athénien and Dégo, were captured.

September 28, 1801.—British sloop Sylph (18) had successful action with French frigate Artémise (44) off Cape Pinas.

September 18, 1804.—British frigate Centurion (50) beat off French ship Marengo (74), and two consorts, in Vizagapatam Roads.

September 25, 1806.—Capture off Rochefort, by Commodore Sir Samuel Hood, with British squadron, of French 40-gun frigates Armide, Gloire, Infatigable, and Minerve.

September, 1807.—Completion of surrender of Fleet and Forts, at Copenhagen, to British Fleet under Lord Gambier, and troops under Lord Cathcart. Ships captured enumerated last month.

September 11, 1809.—British brig Diana (10) captured Dutch 14-gun brig Zephyr.

September 20, 1809.—Capture of St. Paul, Isle de Bourbon, and French frigate Caroline (40), by Commodore Rowley, in conjunction with troops under Colonel Keating. Ships employed—the Raisonable (64), Boadicea (38), Nereida (36), Sirius (36), Otter (18), and the schooner Wasp.

September 13, 1810.—The Boadicea, Staunch, and Otter in action with two French frigates off Isle de Bourbon; capture of French frigate Venus, and recapture of British prize frigate Africaine.

September 1 and 18, 1811.—Completion of capture of Island of Java by combined naval and military force, under Admiral Hon. R. Stopford and General Sir Samuel Auchmuty.

September, 1813.—San Sebastian. Fleet under Sir George R. Collier; troops under General Graham.

MILITARY OPERATIONS.

September 20, 1809—Isle de Bourbon. September 25 to 27, 1810—Busaco. September 25 and 27, 1811—El Bodon and Aldea de Ponte. September 19, 1812—Fort St. Michael, near Burgos. September 20 to 30—Burgos Castle. September 1 to 8, 1813—San Sebastian. September 12 and 13—Ordall. September 12, 1814—Baltimore.

That nondescript suit known as the new khaki clothing, the joint invention of the Aldershot Active-Service Dress Committee and the Adjutant-General to the Forces, is rapidly becoming a very old garment indeed, and those who are clothed in it present the appearance of convicts very much the worse for wear. There is an agreement of opinion among all ranks against it. Those who have seen active service in the field aver that it would go to pieces in a month on a campaign. Certain it is that although these are very peaceful times at Aldershot, with very few field-days to cause extra wear-and-tear, and very ordinary duties to perform, the 17th and 39th Regiments just now present the appearance, as far as the "mud" clothing is concerned, of having undergone recent arduous active service. Stained, greasy, threadbare, ill-fitting, generally shabby, and altogether ugly, this unhappy garment is the last instance of the mistaken zeal of those who, in their efforts to give us an active-service dress for the British Army, have given us that which is a laughing-stock throughout the service.

The French papers having no correspondents at Foochow, have taken it into their heads to revile England in consequence of the despatches forwarded to the *Times* from the scene of action. The *Times* having blamed the French for having continued their fire after all resistance had ceased, we are accused of having done the same at Alexandria, and of having bribed the mob to set fire to the city to burn the French out. The *Liberté* says that Nelson in 1801 did to the Danes at Copenhagen just what Admiral Courbet did to the Chinese the other day, and that he was made an Earl for so doing! According to the *Liberté* it was humanity which induced Sir Hyde Parker to make his signal to discontinue firing; but Nelson, putting his glass to his blind eye, pretended that he could not see the signal, and went on with the bombardment after the Danes had struck their flags. This is historically wrong; for the incident of Nelson's *declining* to see Sir Hyde Parker's signal occurred before the bombardment began. The *Liberté* naturally suppresses the letter which the British Admiral wrote to the Crown Prince of Denmark, saying, "Lord Nelson has been commanded to spare Denmark when she no longer resists. The line of defence which covered her shores has struck to the British flag, but if the firing is continued on the part of Denmark, he must set on fire all the prizes he has taken without any possibility of saving the men who so nobly defended them. The brave Danes are the brothers, and never should be the enemies, of the English." A truce ensued. Did Admiral Courbet send in such a letter to the Chinese Commander at Foochow?

The French Army, in its reorganised state, evidently does not resemble the Nasmyth hammer, which can crack a nut or weld a huge mass of iron. It is well calculated to furnish a million of men, but not a small force. The other day, says a French military writer, a reinforcement of 2,800 men was despatched to Tonquin. It might be supposed that a nation which can place 1,200,000 men in the field would think nothing of such a fleabite; but it suffices to be acquainted with the mechanism of the Army to be aware that 2,800 men drawn from the regiments means the immobilisation of five army corps and the disorganisation of the Continental forces. Let us see what happens in a regiment of Infantry. In time of peace, the effective of a company is 75 men; in time of war 250. Whence do the 175 new men come? From the reserves, when they are incorporated. What is the duty of the 75 men forming the company in time of peace? To act as a *cadre* for the reservists. Remove these 75 men, and the company can figure only in the second line. A man taken from the active Army is worth four. To deprive the active Army of a company is as if you deprived it of four, and so on. It matters little whether they take men from the 4th Battalions or the three others, in order to form an Expeditionary Corps. The 4th Battalions are in the plan of mobilisation as well as the others. Up to the present time Tonquin has absorbed twelve 4th Battalions. That is to say, twelve regiments have been disorganised, and, consequently, three divisions. The defensive forces of the country, too, have been again meddled with by attaching to the Expeditionary Corps a division of Marine infantry, whose proper place is on the frontier. The consequence is that, in the event of a Continental war, we shall find ourselves short by two army corps. And if China should now refuse to come to terms, it will evidently be necessary to send out more troops to occupy Formosa, to defend Tonquin, and to preserve order at Hué. It is already a question of sending out eight squadrons of cavalry, and this leads to the belief that the expeditionary force will be increased by two divisions. Two divisions taken without a partial mobilisation means three army corps deprived of their troops of the first line. It is thus by skinning our Continental forces that, in order to constitute a sufficiently strong expeditionary corps, the military authorities will have succeeded in immobilising five army corps. The French military critic to whom we are indebted for the above observations concludes his remarks by saying that this question deserves serious attention, as it concerns the security of the country. However, now that our neighbours are on such good terms with Germany, they have little to fear.

Nadar, in a sketch of military ballooning, furnishes us with the following interesting information:—Experiments in this art were first ordered to take place at Meudon by the "Committee of Public Safety," and a company of *aérostiers militaires* was created. Five weeks afterwards the company went to Maubeuge, which was besieged by the Austrians, and there Captain Coutelle and his men rendered signal service in the "Entreprenant" by watching every movement made by the enemy, upon whom the balloon created a great moral effect. The "Entreprenant" was next used at the battle of Fleurus, and "remained in observation for eight hours, in spite of the projectiles of the enemy." After the battle the "Entreprenant" got disabled by catching in a tree. The Committee of Public Safety raised another company of *aérostiers*, and replaced the "Entreprenant" by the "Céleste," the "Hercule," and the "Intrépide," which did good service on the Rhine, &c. At Wurtzburg, however, in year VI., a balloon and a company fell into the clutches of the enemy. Neither Hoche nor Jourdan took to "inflated silk," and nothing more was heard of the balloon in a military way until Carnot used one when he was besieged at Antwerp in 1815. In 1826, in consequence of an article by a M. Ferry, in the *Spectateur Militaire*, a Committee was appointed to report on balloons. It reported in favour of them, and was pigeon-holed. In 1830, when Algeria was annexed, a balloon accompanied the expedition, but it was never unpacked. In 1874, some experiments were made at Vincennes for letting projectiles fall from a balloon, but they ended in nothing.

CAVALRY IN MODERN WAR.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—"X. X.," writing on the above subject in your issue of the 23rd, states that "no one would doubt that the improvements effected in firearms ...... have rendered cavalry, as at present constituted, useless as a fighting arm." With all due respect to the opinion of "X. X.," I beg most humbly to take the place of a doubter on this point. Had "X. X." been present at the discussion on "The Functions of Cavalry in Modern War," at the Royal United Service Institution on July 9, he would have heard some of the general and other senior officers in the service express opinions on this point that would have proved to him that there are very many more doubters in existence, men of great military experience. It is, doubtless, quite true that cavalry does not affect the issue of a battle in the way it did in days gone by. It is quite true that commanders do not rely upon cavalry as their chief and most important factor, in the sense that Hannibal, Scipio, and William I. did; but it is as true that even on the battle-field cavalry does still exercise a great influence, and the exercise of that influence being a matter of opportunity, a far greater degree of intelligence, tactical knowledge, and judgment is required of cavalry leaders than formerly. "X. X." speaks of "no groups of men and horses are exposed as targets for the enemy," referring to the happy conditions of a system he advocates. This would lead one to believe that groups of men and horses exposed as targets was the present rule. This really requires no serious contradiction, any more than does his "hold his own horse and fire" principle require serious consideration.—I am, &c.,

FRANK GRAVES, Major, 20th Hussars.

Lichfield Club, Lichfield.

An Admiralty order was posted at Portsmouth on Saturday last stating that petty officers and non-commissioned officers of Royal Marines pensioned, who are thoroughly competent for writerships in Dockyard and Victualling Yards at home, and are of good character, are eligible for such appointments. The scale of pay is 5s. and 7s. a day for six days in the week, in addition to pension. The limit of age at the date of appointment is 45. Candidates will be examined by the Civil Service Commissioners in handwriting, orthography, copying manuscript, figures, tabular statements, and elementary arithmetic (including vulgar and decimal fractions).

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

THE CHANNEL SQUADRON.

The cruise of the Channel Squadron round the Irish coast has been eminently successful, having evoked a spontaneous burst of loyal enthusiasm from the inhabitants of the Emerald Isle, hardly deemed possible by the supporters of Mr. Parnell. Both officers and men were the objects of the most hearty hospitality during the stay of the Squadron in the various ports. The ships were also crowded with visitors from Londonderry, Buncrana, and the Lough Swilly District. On Wednesday, Aug. 27, the two divisions united off Innishowen, and proceeded to Kingstown, where it was joined by the Starling, sent by the Admiralty to act in lieu of a despatch-vessel. Considering the dismal failure of the Forward, a similar class of gunboat, last year, their Lordships might have chosen a better and more suitable vessel to replace the Seahorse. The Duke of Edinburgh may be expected to arrive at Plymouth with the Channel Squadron early next week, when some stay will be made in the Channel ports. The Ajax is to be commissioned to replace the Achilles, and the Minotaur will be paid off in December, when it is said that Rear-Admiral Richards will hoist his flag on board the Black Prince, the Duke of Edinburgh going to the Mediterranean. Previous to so doing the Duke will visit Chatham with the Duchess of Edinburgh early in October to be present at the launch of the Rodney, which ship will be christened by the Duchess. During the visit of the Channel Squadron to the Irish coast, the Duke of Edinburgh received addresses from the Mayor and Corporation of Derry and from the chairman and members of the Honourable Irish Society. His Royal Highness also visited Downhill as the guest of Sir Hervey Bruce. The Royal party also paid a visit to the Giant's Causeway, lunching at Portrush. Large crowds assembled at the railway stations to cheer the Duke of Edinburgh and young Prince Alfred. The Earl of Leitrim, who served as midshipman on board the Hector in 1869, entertained Rear-Admiral Whyte and the officers of the Lee Division at Manor Vaughan, while the weather division was in Lough Foyle. The Derry ball was attended by Rear-Admiral Whyte and some seventy officers of the squadron; the Duke of Edinburgh, being in mourning, was unable to be present. The Court-house was crowded on the occasion, and among the guests were the Earl and Countess of Leitrim, the Earl and Countess of Belmore, Sir John and Lady Ellis, Sir F. W. Heygate, and others. During the stay of the squadron in Dublin Bay, the Mayor of Cork visited the flagship to invite the officers to a ball got up in their honour by the good citizens of Cork. The Duke of Edinburgh fixed Wednesday, September 3, as the date most convenient. On landing, his Royal Highness created a very good impression by resolutely declining all police protection, and by moving fearlessly among the crowd, the people at once most respectfully making way, and in every possible manner giving evidence of their loyalty,—cheering loudly whenever he appeared. The Lord-Lieutenant, accompanied by Gen. Sir Thomas Steele, Lord Clarina, and an escort, met the Duke of Edinburgh at the Dublin Terminus, and conducted him to the Viceregal Lodge for lunch. In the afternoon the Royal party visited the National Horse Show. On Friday, Sir Thomas Steele and Sir T. Baker, with their Staffs, lunched on board the flagship. On Sept. 1, the Squadron reached Queenstown, and on Wednesday last the officers attended the ball given in their honour.

Queenstown, Sept. 3.

The Channel Squadron arrived off Queenstown Harbour about 9 a.m. on the 1st inst., and anchored till high-water. At 1.30, the Squadron entered,—the First Division, consisting of the Minotaur, Sultan, and Neptune, proceeded to the inner anchorage; while the Second Division, consisting of the Agincourt, Achilles, and Northumberland, anchored in the outer man-of-war roads. The Seahorse and Starling arrived early in the morning. The usual salutes were exchanged, and immediately on the Minotaur taking up her moorings, Admiral Lethbridge, commanding the Irish station, waited on H.R.H. the Duke of Edinburgh. Shortly afterwards, the Mayor and High Sheriff of Cork waited on his Royal Highness. The Mayor, in the name of the citizens, welcomed his Royal Highness to Cork Harbour, and assured him of the pleasure with which they regarded the visit of his Royal Highness and the splendid ships under his command. The Mayor added that the only regret they felt was that his Royal Highness and the other members of the Royal Family did not oftener visit this country, as it would enable them to form a more correct estimate of the feelings of the people toward Royalty than was conveyed by the contents of some of the public journals. The High Sheriff concurred in what the Mayor had said. His Royal Highness thanked the Mayor for his kind expressions of welcome, and for the sentiments which he had uttered on the part of the citizens; and assured him that he was deeply sensible of the kindness with which he and the officers of his Squadron had been received everywhere they had gone on the Irish coast. The Mayor having asked his Royal Highness whether it would be possible for him to delay the departure of the Fleet from the harbour over Sunday, the Vice-Admiral replied that his orders were to return at once to Devonport, where the ships will undergo a thorough overhaul after their lengthened cruise. After the Mayor withdrew, his Royal Highness went on shore to return Admiral Lethbridge's visit. On landing, he was received with great enthusiasm by a crowd of people who had collected in hopes of seeing him. During their stay here, all the ships are open to the public, and the opportunity of seeing them is fully appreciated, visitors in hundreds have been pouring on board. A public ball is to be given to-night to the Squadron by the Mayor and citizens of Cork, but great disappointment is felt in consequence of his Royal Highness having declined to be present. He went to Lord Shannon's residence yesterday morning, and will not return till to-morrow night or Friday morning. The transport Poonah arrived yesterday morning from Portsmouth, and embarked 120 men of the King's Royal Rifles, and a draft of the 1st Batn. Yorkshire Regt. She left at 3 p.m. for Malta and Alexandria, amidst loud cheers from the various ships in the harbour.

THE RELIEF EXPEDITION.

The Earl of Northbrook and Lord Wolseley left England on Sunday evening last by the mail steamer from Dover for Calais *en route* to Egypt, *viâ* Vienna and Trieste. On Saturday the noble lords took leave of her Majesty at Osborne prior to their departure. They arrived in Vienna on Tuesday, and proceeded to Trieste on Wednesday *en route* to Alexandria, whither they are being conveyed by H.M.'s ship Iris. Lord Wolseley has telegraphed his acceptance of the Kasr Nussha Palace as his residence.

The steamship Shelley left the Royal Albert Docks on Wednesday to fetch a batch of 400 Kroomen from the Coast of Africa. The British India steamship Rewa also sailed on Wednesday with several of the Nile troop boats. Lieut. Peel, 2nd Life Guards, has been appointed to take charge of the boats, and deliver them on the Nile to Col. Butler, A.D.C., and Col. Groves, A.A.G., who will have general superintendence of the whole. The following arrangements have been completed for the conveyance of the boats forming the first part of the Expedition:—The President Garfield to take 21 boats from Surrey Commercial Dock and 65 from Portsmouth, and sail when ready. The Aston Hall to take 80 boats from Albert Docks, and sail on Sept. 15. The Pelican to take 30 from Albert Docks, and sail on Sept. 8. The Naranja to take 25 boats from Woolwich on the 10th and 41 from Portsmouth on the 15th, and sail on Sept. 17. The Magdala to take 44 boats from Liverpool between Sept. 5 and 15, and sail on the 17th. The Frutera to take 93 boats at Queen's Dock, Glasgow, between Sept. 8 and 15, and sail on the 18th. The 93 boats for the Frutera will be the largest freight taken by one ship, and will comprise all the boats built on the Clyde. Although the final selection of regiments for the Expedition will be made conjointly at Cairo by Lord Wolseley and Lieut.-Gen. Stephenson, the general principle on which they will be selected will be that those corps which have been stationed in Egypt for some time, and are acclimatised, will go to Khartoum. The corps from the Mediterranean garrisons, including the Yorkshire and Berkshire Regiments, will, in all probability, in concert with the Royal Irish and East Surrey Regiments, assist in garrisoning Lower Egypt. The two latter, from India, are considerably below regulation strength, and these, with the Royal Scots (Lothian Regt.), from Barbadoes, are expected to be detailed at Alexandria and Cairo. Unless special circumstances intervene, the following Infantry corps will see active service:—Duke of Cornwall's Light Infantry (Col. Richardson), Essex Regt. (Col. White), Black Watch (Col. Green), Gordon Highlanders (Col. Hammill), Sussex Regt. (Col. Vandeleur), Cameron Highlanders (Col. Leith). Five of these served in the 1882 campaign. As illustrating the climatic difficulties of the expedition, it may be mentioned that the Duke of Cornwall's Light Infantry have since their arrival at Keneh lost no fewer than four men in quick succession through sunstroke."

Gen. Buller and Cols. Fitzgerald, Hughes, and Alleyne arrived at Cairo on Thursday.

The following officers have proceeded to Egypt on special service in connection with the Expedition up the Nile:—Cols. Sir C. Wilson, head of Intelligence Department; H. Brackenbury, R.A.; Harrison, R.E; Sir H. Steward; Henderson, King's Royal Rifles; Lieut.-Col. Maurice, R.A.; and Capt. Lord Airlie, 10th Hussars.

It is authoritatively stated at Cairo that Gen. Stephenson's objections to the plan of campaign for the relief of Khartoum were directed against the Nile route.

The *Times*' correspondent at Wady Halfa, Sept. 2, telegraphs:—"The results of Gen. Wood's inspection of the Sarras and Semneh route yesterday will probably be the construction of a small tramway to turn the upper gate of the Semneh Cataract, and the adoption of the river route from Sarras, trains to Semneh being used for heavy stores. The Mudir of Dongola telegraphs, begging that the first steamer crossing the cataract may be sent to him at Merawi, as Major Kitchener is employing his steamer, which, moreover, is out of order. An attempt will be made to-morrow to haul the steamer Nassif Kheir up the Lower Cataract. It is apparently still intended to send two steamers only above the cataract. This seems a dangerous mistake. To ensure the success of the Expedition, as many steamers as can be got across in time should be sent. The opportunity once missed will be lost for another year. Two steamers can do little but act as river police, while an accident to one would materially impede the operations. The steamer Nassif Kheir has successfully passed the lower gates of the Wady Halfa Cataracts, but the manœuvre was much more difficult than was expected. Seven hours of toil were required to achieve the result attained. Com. Hammill, Mr. Poole, Mr. Delisle, Mr. Piggott, Mr. Hardy, and the Vakeel of Dongola were on board. At 9 o'clock (on the 3rd inst.) she reached the base of the broken water, where some 6,000 labourers were waiting. A portion of these were divided into parties and placed on either side of the channel, being superintended by members of the Naval Brigade, brought from Ap-car for the purpose. The channel is narrow and tortuous, with little depth of water over the rocks, the river not being now at its highest. A fortnight ago the task would have been infinitely easier, but nothing was then ready. The labourers, though willing, are new to the work. At last, by dint of much struggling and shouting by Com. Hammill and Mr. Poore, of the Naval Brigade, the steamer was brought into easy water with the loss of a few floats from the paddles and with one leak. A third of the difficulty is now conquered. There are three more gates to pass before the Great Gate is reached. It has been stated from Cairo that Gen. Stephenson has declared the Nile expedition impracticable. Without any special reference to the General, I am able to declare that the statement is utterly unfounded. That he should have regretted the extraordinary delay, or that he should have doubted the advisability of certain details, is extremely probable, though the matter is not within my personal knowledge. But that he ever declared the achievement to be impracticable I positively deny."

A Board of Inspection, consisting of Surg.-Major Rudd, A.M.D., Assist.-Comy. Rudd, and Qrmr. Steele, yesterday made a thorough examination of all kinds of the food supplies prepared for the Nile Expedition, and tested very many samples. In every instance the result was quite satisfactory, and the Board have certified that, in their opinion, the whole of the provisions are of excellent quality. Yesterday 18,000 cases of these commissariat stores left Woolwich in the steam transport Dunluce, whose berth at the Royal Arsenal was taken by H.M.S. Wye, from the West Coast of Africa and Ascension. The total number of cases prepared for the Expedition is 54,000, and most of these are fur-lined, and contain several canisters, all of which have to be replaced in the Government warehouses. Yesterday 100 of the medical chests, which are to be carried one in each boat on the Nile, were taken on board the Pelican in the Albert Docks. Special precautions are adopted in packing and closing these chests, on account of the value and nature of their contents, which include several bottles of wine and spirits and other luxuries. Only confidential workmen are allowed to touch them, and the list of contents inside the lid has to be signed by the packer and his foreman. After this the box is locked, the key secured in a pocket outside, the lid wired down and sealed, and two iron bands fastened over all. Two hundred and fifty of the vats enclosing stores and utensils for the boats were also sent to the Pelican, which will finish loading to-day and sail on Monday. In the experimental loading of a boat at Woolwich Dockyard on Thursday, the ease with which all these stores were distributed about the sides and ends of the craft and between the chests of cargo created some surprise, but it is intended to have another trial next week, under more exact conditions of actual service, in which the stipulated stores will be supplemented by the ten soldiers and sailors who are to form the crew, with their full equipment. In the trial on Thursday the full weight in equivalents was put on board, representing 5,164 lbs. of meat, biscuit, and other provisions; 550 lbs. of ammunition, a tent of 100 lbs., and the boat's gear, 200 lbs. Twelve men and their accoutrements will weigh about 2,000 lbs. more, but 16 men were put into the boat by way of experiment, and thus fully loaded the little cutter floated buoyantly, with a freeboard of 16½ inches. It is, however, thought that the goods may be more closely and comfortably packed, and that the best positions for the ammunition and articles liable to damage ought to be selected and arranged by official authority. Pieces of oiled canvas will be served out for covering the rifles and cartridge-boxes, and every canister of provisions and stores has been closed at the joints with canvas and shellac so securely that they have been kept 24 hours under water without damage. A water-proof bag is also provided for each man's kit, and, in addition to the boat-awning, a thick canvas cloth of tarpaulin material, but untarred, will shelter the whole in case of wet weather. These and other stores for the second 400 boats are now in course of delivery by contract; and Mr. Barrett, Inspector to the Ordnance Store Department, is daily employed in making new purchases. Five hundred sets of equipments for Mounted Infantry and trace-harness for 100 mules are being received, and there are many other indications of land operations, including water-carts, both of the barrel and tank pattern, the latter being furnished with seven taps for filling the soldiers' water-bottles. Serge clothing of a special pattern, adapted to the African climate, has been prepared for the whole force at the Government factory, Pimlico, and has been sent on to Cairo, where the troops will take it over in exchange for their ordinary regimental uniform.

The *St. James's Gazette* has the following:—"In the early part of 1857 the good ship Transit left Spithead with the head-quarters of the 59th Foot, and four companies of of the 90th Light Infantry, destined to form a portion of the China expeditionary force. The troops were under the command of Lieut.-Col. F. A. Stephenson, of the Fusilier Guards, an officer who had held high staff appointments in the Crimean War, had been nominated Adjutant-General of the Forces in the Crimea, and was justly considered one of the most rising men in the service. On the Transit, commanding a company of the 90th, was one Garnet Joseph Wolseley, a young officer of five years' service, who had already gone through two campaigns, and received three severe wounds. The Transit was wrecked in the Straits of Sunda; and on being rescued Stephenson went on to Canton, Wolseley, with the 90th, to Calcutta. In the ensuing China War Stephenson and Wolseley again met; the former going through the campaign as Deputy-Adjutant-General of the Forces, and emerging from it a full colonel and C.B. Wolseley, having gained a brevet lieutenant-colonelcy for the Mutiny, served in the Quartermaster-General's Department, receiving a substantive majority in the old 90th as his reward. And the whirligig of time has once more brought these two officers into juxtaposition on service—Lord Wolseley at Cairo as Commander-in-Chief; Gen. Stephenson as second-in-command. Of the many shipwrecked officers who spent that dismal fortnight together on the island of Banda, few would have ventured to predict that Capt. Wolseley would have outstripped Col. Stephenson in the race of life."

The officers and men who were landed to take part in the military operations in the Soudan, under Admiral Sir W. Hewett and Gen. Graham, are to have gratuities granted them according to their rank. The ships' companies included belong to vessels as under, and the dates for which payment will be made are as follows:—The Arab, from March 18 to 26; the Briton, from Feb. 28 to March 26; the Decoy, from Feb. 19 to March 26; the Euryalus, from Feb. 19 to March 26; the Humber, from Feb. 21 to March 26; the Jumna, from Feb. 19 to March 26; the Orontes, from Feb. 19 to March 26; the Ranger, from Feb. 19 to March 26; the Serapis, from Feb. 25 to March 1; and the Sphinx, from Feb. 19 to March 26.

The period of service for which Mr. G. H. Beaton was appointed as Chief Engineer of Devonport Dockyard expires in December next. We hear that his successor will be Mr. Robb, at present Chief Engineer at Malta Dockyard.

NAVAL NOTES.

Two courts-martial assembled on Sept. 3, on board the Victory, in Portsmouth Harbour. The courts were composed of the following officers:—Capts. Curtis, Canada, president; Harris, Malabar; Stewart, Hecla; Douglas, Serapis; Com. Drury, Excellent. Mr. G. P. Martin was the Deputy-Judge-Advocate. The first court was for the trial of Wm. Gough, stoker, second-class, of the Jumna, charged with desertion. Capt. Singleton, of the Jumna, prosecuted. The circumstantial letter showed that the prisoner was seen on the mess-deck of the ship by the master-at-arms at 6.45 on the 2nd ult., but on the men being mustered at 8 p.m. the same evening he was absent. His description was sent to the police, and at 11 p.m. on the 18th ult. he was arrested by P.C. Taylor, in White's Row. Prisoner pleaded guilty, and threw himself on the mercy of the Court. He added that having broken out of ship he did not like to return. His parchment certificate showed that he joined the Navy in 1880, and had borne an indifferent character during the greater part of his service. The Court adjudged him to be imprisoned for six months with hard labour, and to be then dismissed from her Majesty's service. The second court was for the trial of Pte. Cassidy, R.M.L.I., serving on board the Asia, on two charges—first, stealing a pair of trousers, the property of Pte. Beach, R.M., serving on the same ship, on Aug. 17; and the second for stealing a pair of trousers the property of Pte. Newman, also serving in the Asia. Capt. Nicholson, of the Asia, prosecuted. The circumstantial letter showed that on the day in question Beach placed a pair of trousers in a pigeon-hole on the orlop deck, where the prisoner was doing duty as sentry. He subsequently missed the trousers, and saw the prisoner cutting a pair into pieces for mat making. Prisoner denied that the trousers belonged to Beach. Some evidence as to the identity of the trousers having been given, the Court adjourned and resumed on Thursday, and having heard further evidence, as also the prisoner's defence, the Court considered both charges proved, and sentenced the prisoner to six months' imprisonment with hard labour.

A Fleet Circular, issued last week, directs that each seaman's kit is to contain two white cap covers made of white cotton drill; white cap-covers are to be worn when the men are dressed in white frocks and trousers, excepting when straw hats are ordered to be worn. When white cap-covers are ordered for the men, they are also to be worn by the officers.

The Admiralty have approved of the payment of certain gratuities to the officers, non-commissioned officers, and men of the Royal Marines who were engaged in the operations in the Soudan, and who served in the Arab, Briton, Carysfort, Decoy, Dryad, Euryalus, Hecla, Humber, Jumna, Orontes, Ranger, Serapis, and Sphinx.

The September *Navy List*:—Officers whose deaths have been reported since July 20, 1884.—Paymaster—Edward H. Whyte. Gunner—George Manley. Officers removed from the Active List since July 20, 1884.—Chaplain and Acting Naval Instructor—Rev. William E. Jackson, M.A. (resigned). Chief Gunner—Samuel Rogers (pensioned).

Capt. Francis Durrant, R.N., Governor to his Royal Highness Prince George of Wales, who has been nominated a Companion of the Order of St. Michael and St. George, is the second son of the late Mr. Bosville Durrant, of Southover, Sussex, by his marriage with Frances, second daughter of Mr. John Hubbard, of Stratford Grove, Essex, and was born in 1837. He entered the Navy in 1851, became a lieutenant in 1859, and was promoted to the rank of commander in 1869, and captain in 1876. He was appointed to the command of the Canada, having his Royal Highness Prince George of Wales on board as a midshipman, in May, 1883, and has since then served on the North American and West Indies station. Capt. Durrant married, in 1877, Jessie, eldest daughter of Mr. William Liddiard, of Inverness Terrace, Kensington. His brother, Major Durrant, is well known from the prominent part he took in the political agitation of 1878, in support of Lord Beaconsfield's foreign policy.

John Johnson, cooper, of the Flora; Alfred A. Ford, caulker, of the Sapphire; John M. Chappell, plumber, of the Inflexible; Henry Hawker, captain of the main top, of the Hector; and James McCurniskay, gunner, R.M.A., of the Duke of Wellington, have been awarded the medal for long-service and good-conduct.

The Admiralty have directed the Captains of the Steam Reserve to visit the gunwharf once each quarter for the purpose of ascertaining that the guns, carriages, and slides are appropriated to the ships in his charge and marked with their names. The senior ordnance store officer will then inform him if the whole of the ammunition and general stores are ready for issue to the ships, and should this not be the case will furnish him with a list specifying the description and quantities of stores required to complete the establishment of any ship. Full information as to the nature of the guns, &c., which are not ready for the ships of the first and second divisions, is to be given in this report. A report of the guns, gun-mountings, and other gunnery fittings deficient for any ships preparing for commission, whose date for completion is within six months of the date of the report, is also to be forwarded so as to arrive at the Admiralty on the 14th and 28th of each month.

An experimental armour-plate was tried on Tuesday on board the Nettle in Portsmouth Harbour. The plate was manufactured by Messrs. John Brown and Co., and was on the compound system, but differed from the ordinary make in having a steel plate on the back as well as on the front. It was 8 ft. long by 6 ft. wide, and 10⅜ in. thick, rather more than half the thickness being steel. The gun used was the 10-in. 18-ton muzzle, loaded with 70 lb. of powder, and a chilled iron shot, weighing about 400 lb. The plate was not fixed in a frame, but put on the target with ten bolts. Three shots were fired, the first two making indents about 4 in. deep, and the third remaining in the plate. No advantage was found to arise from the steel back plate, as the shots produced several extensive cracks, and the plate was not considered to have stood so well as an ordinary Cammell compound plate.

Reviews.

SOME MAGAZINES FOR SEPTEMBER.

[SECOND NOTICE.]

In the September number of *Blackwood* there appears an article of sixteen pages in length, entitled, "The People and the Army," in which the writer criticises two "essays" on "Discontent in the Army" that were recently published in the columns of the *Times*. These "essays," it is contended, show clearly that the object of the *Times*' contributor was not to give any news whatsoever, but only to show to the officers of the Army that the complaints which they indulge in have no foundation in fact. Furthermore, that it is a mistake to suppose that recent changes have in any degree interfered mischievously with the condition or prospects of the officers. With respect to the "abolition of Purchase," it should be regarded as a positive advantage to them, even though one of the consequences of this experiment is that a captain who has reached his fortieth year becomes *ipso facto* compulsorily retired, with the solitary consolation of a pension of £200 a year. It may be argued, however, that it is "infinitely better for him, whether he sees it or not, than that he should be allowed to spend a fortune in bringing himself forward." Starting from this point, the essayist goes on to argue that lesser grievances, of which he enumerates seven, are all of them imaginary. Shortly after the publication of this essay a supplemental paper is published, in which the grievances of the rank and file are considered and discussed. Unfortunately, a great body of the officers shelved and not shelved refused to be convinced by this reasoning, and letters constantly appeared flatly contradicting both the premisses and conclusions of the essayist. Having thus cleared the ground, the contributor to *Blackwood* applies himself with considerable energy to bring all points connected with the people and the Army before his readers. The question has recently attracted very much public attention, but at the same time its vital importance to the country cannot be gainsaid, and no opportunity should be lost in giving it publicity. In the same periodical we find an interesting article entitled "Three Young Novelists,"—Mr. Anstey, Mr. Marion Crawford and Mr. Fargus. One of these three young writers made his debût in a "striking and powerful romance," another by "a curious and clever farce," and the third by a "piece of melodrama." The sketches are carefully prepared, and written without the least appearance of bias. Mr. Anstey, in "The Giant's Robe," suffers most under the pen of the reviewer; but it cannot be denied that his book deserves it. However, it would seem that the public formed a different opinion, as it ran quickly into a second, and it may be a third edition.

The *Army and Navy Magazine* for this month is up to the average. "What's in a Name," by Lieut. Esmé Forbes, tells of "Mounted Infantry," a subject which has been over and over again made the subject of discussion both at home and abroad, but which does not appear to make progress. The author has done his best to lend it some vigour, and with this view has given as concisely as possible the opinion of those who urge the formation of "mounted infantry" as a permanent branch of the service, and has also quoted extracts from well-known standard works, which go to prove that the duties which it is proposed to perform by mounted infantry are those which every efficient cavalry considers its own province, and carries out to the best of its power. "The Essential Properties of Naval Machine-guns" opens up a question of very great importance, and is ably advocated by Lieut. Sleeman. The subject of "Cramming and Schooling" rages as violently as ever. The article on it in this number is by H. G. Keene, C.I.E. There are some other subjects discussed quite worthy of comment.

Among the several cleverly-written articles which appear in the *United Service* (Hamersley and Co., Philadelphia) is one which will, no doubt, attract a fair portion of attention. The title of the article referred to is "Our Little Navy," and the article itself is contributed by "An Unpensioned Volunteer." From him, whoever he may be, we learn some particulars as to the present and probable future of the American Navy. The object of the article is to tell the country how, thirty years ago, her flag was respected and her men-of-war were invincible,—whereas now, the world laughs at the notion. In referring to the discussion going on in Congress as to the necessity of building up the Navy, an old and experienced officer draws a few lively pictures of the style in which the American Navy was conducted when the nation possessed one which was regarded as the most efficient for its size in the world. No doubt Theodorus Bailey carried matters with a high hand during the time of "the Fifties." When the American Navy was handled by him and other officers of a like stamp, his course of action was always sharp, short, and decisive. If a tithe of what we learn from this article be true, it behoves the American nation to look after her national defences.

In the *Illustrated Naval and Military Magazine* for the current month, the consideration of the momentous subject of "Our Future Naval Battles, and How to Fight Them" is continued by Admiral Sir G. Elliot and Capt. H. Berkeley, R.N. These writers put their views as to the Naval battles of the future before us very clearly. Still, we cannot banish the reflection that actual experience alone can decide the vexed question of the advantages of "end-on" attack as compared with broadside fighting, or can show the condition to which iron ships, steaming at full speed, will be reduced by collision. The instances of accidental collisions, of which we have had too many, between our own ships, have been more costly than instructive. Mr. Melton Prior relates so graphically some amusing incidents from his personal experiences in the Ashantee War, that we hardly miss his facile pencil. Col. the Hon. A. Parnell treats the several aspects of "Gibraltar and its Value to Great Britain" so logically and forcibly as to convince any reader but the most unreasonable advocate of peace-at-any-price, of the immense contingent value of "the Rock" in the event of a European war, and of the folly of resigning to Spain a commanding position so daringly won and so stoutly defended. "Army Society—in Two Plunges," by J. S. Winter, agreeably diversifies the serious aspect of the number. The editor continues his carefully-written and amply-illustrated descriptions of "Army Magazine Rifles." Col. C. B. Brackenbury's third article on "Tactics" relates to the employment of infantry in battle. So much has been written on this subject during the last ten years, that it has become difficult to write anything original or instructive. We must await the stern test of actual war to show us the worth of the latest phases of theoretical infantry fighting. Capt. E. O'Callaghan contributes some most interesting details of British victories, which are very carefully compiled, and show a thorough knowledge of the subject. It would be hard to praise too highly the very numerous and admirable illustrations by Messrs. Overend, Caton-Woodville, Prater, and Rudolf Blind. In this particular the magazine is improving, though improvement was little needed, and hardly to be expected. There are so many articles of interest that we are reluctantly obliged to pass some of them without that notice which their merits may fairly claim.

Messrs. Kegan Paul and Co. have published some interesting observations respecting the origin, progress, and development of Hospital Sunday and Hospital Saturday. The entire question is fully discussed in a pamphlet on *The Origin and Scope of the Metropolitan Hospital Sunday and Saturday Funds*, which has been prepared by Mr. H. C. Burdett, who recently considerably enlarged its scope. We may say that the entire question is exhausted in this interesting pamphlet.

London Amusements.

After a brief recess, which has been turned to advantage by a redecoration of the theatre, the Princess's has been reopened for the season with "Claudian" and "Chatterton," reproduced with their original cast.

The Haymarket has added to its programme a three-act comedy called "Bachelors," already familiar to American audiences. The slight plot illustrates the conversion of three single gentlemen resolved on perpetual celibacy to a conviction of the superior happiness of the marriage state. Miss Julia Gwynne, Miss M. A. Victor, Mr. Stewart Dawson, Mr. H. B. Conway, and Mr. Brookfield, as an eccentric musical professor, capitally sustain the prominent characters, while a couple of amorous domestics find amusing representatives in Mr. C. Coote and Miss Mary Marden. The present version is adapted from the German by Messrs. Hermann Vezin and Robert Buchanan.

The Olympic programme has been strengthened by the production of a one-act drama, by Mr. W. F. Broughton, called "Written in Sand," which has the merit of telling a simple story in a lively fashion.

Under the title of "Daybreak," Mr. James Willing has supplied the redecorated Standard Theatre with an elaborate sensational drama.

On this (Saturday) evening Miss Mary Anderson commences her season at the Lyceum with "Pygmalion and Galatea" and "Comedy and Tragedy." On the same night the Comedy Theatre is reopened with the three-act opera comique of "Rip Van Winkle."

The season at the St. James's Theatre will begin on Monday, the 29th inst., with the drama of "The Ironmaster."

Toole's Theatre will be reopened on Tuesday next, under the management of Messrs. Willie Edouin and Lionel Brough, with the burlesque extravaganza of "The Babes; or, Whines from the Wood," written by Mr. Harry Paulton, with music arranged by Mr. W. C. Levey.

The Novelty Theatre will be opened about the middle of the month with a new comic opera, called "Polly," written by Mr. James Mortimer and composed by Mr. Edward Solomon.

"Called Back," at the Prince's Theatre, will reach its hundredth consecutive representation on Monday next, and seems likely to run on for another month or two.

On Monday evening next the 100th representation of the revival of the late H. J. Byron's comedy of "Our Boys," with Mr. David James in his original character of Perkyn Middlewick, will take place at the Strand Theatre. The occasion will also be the 1,486th performance of the play in London.

Large audiences continue to attend the Promenade Concerts at Covent Garden Theatre.

The greater St. James's Hall is now occupied by Mr. Harry H. Hamilton's "Pansteorama of Passing Events," illustrating by pictorial views, embellished with dioramic effects, incidents in the last Egyptian campaign, and the scenery of the Nile and the Soudan. Mr. William Jones, late of the 24th, and decorated with the Victoria Cross, describes from personal knowledge the heroic defence of Rorke's Drift.

At a court-martial held on board the Constance, Ptes. James Paxton and James Scott, Plymouth Division, Royal Marines, belonging to the Mutine, have been found guilty on four charges of theft and one of attempting to desert, and were sentenced, Paxton to be imprisoned with hard labour for 12 months and Scott for two years.

Com. A. Carpenter, R.N., who has held the command of her Majesty's ship Myrmidon since December last, has been appointed to the charge of the Indian Marine Survey, in succession to Com. Dawson, whose retirement was recorded by us recently. Com. R. F. Hoskyn has been directed to take over the command of the Myrmidon.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

Indian Notes.

The *Times* says:—"It is finally settled that the Zhob Valley Expedition shall consist of—One squadron from each of the following three regiments, the 1st Bombay Lancers, the 10th Bengal Lancers, and the 5th Punjaub Cavalry; of No. 9 Baty. Northern Division, R.A., half of No. 1 Mountain Baty., the 4th and 10th Companies Bengal Sappers, the 2nd Batn. of the North Staffordshire Regt., the 2nd and 3rd Bombay N.I., the 1st and 45th Bengal N.I., and the 4th Punjaub Infantry. The force will march from Quetta, *viâ* the Kawas Valley and Swalan, to Duki, where it will rendezvous on Sept. 30. Anambar, on the river of the same name, 35 miles to the north-east of Duki, and at the south-eastern entrance to the Zhob Valley, will be the base for the collection of supplies after the troops have entered the valley."

The following is the full list of the officers going from India with the Afghan Boundary Commission:—Assist.-Commissioner Lieut.-Col. Ridgeway; Attachés, Capts. Durand Yate, and De Lassoe, Merk, of the Bengal Civil Service, Ressaldar-Major Mahomed Hossein Khan, 7th Bengal Cavalry; Ressaldar-Major Bahawaldin Khan, Central India Horse; Subadar-Major Hossein Khan, 2nd Sikhs; Sirdar Mahomed Aslam Khan, Sirdar Shere Ahmed Khan, Mirza Gholam Ahmed Khan, and Baba Khan; Medical Officer, Surg. C. W. Owen, C.I.E.; Commissariat and Transport officer, Major Rind; Naturalist, Surg.-Major Aitchison; Geologist, Mr. Griesbach; Survey officers, Major Hill, Capt. Gore, and Lieut. Talbot; Intelligence officers, Capts. Maitland and Peacocke; officers of the escort, Major Bax, Capt. Heath, and Lieut. Drummond.

The *Standard* correspondent telegraphs from Calcutta:—"It has now been decided that the escort to accompany the Frontier Commission shall consist of 302 of the 11th Bengal Lancers and 249 of the 20th Bengal N.I., Col. Prinsep commanding. As already announced, however, the final arrangements will only be made on the arrival of the Commission at Nushki, where it will depend on the condition of the Desert whether only the cavalry, or a mixed force of infantry and cavalry, shall be allowed to proceed. The transport will consist of 1,400 camels and 600 mules."

Obituary.

Gen. F. B. Corfield, Bengal Infantry, died on Tuesday at Knowle House, Church Road, Upper Norwood, at the age of 81. The deceased, who was born in 1803, entered the H.E.I.C.'s service as an ensign in the 15th Bengal N.I. in Dec. 1821, and, receiving his lieut.'s commission in Feb. 1823, took part in the siege and storm of Bhurtpore in 1825-26 (medal). Advanced to the rank of capt. in July, 1832, he was employed in the Cole country in 1836-37, and in 1830-40 served with the Army of the Indus, present at the storm and capture of Khelat. Subsequently, in 1843-44, he took part in the Gwalior Campaign, including the battle of Maharajpore (bronze star). Advanced to the rank of major in Feb. 1845, he commanded his regiment, the 31st Bengal N.I., throughout the Punjab Campaign, including the actions of Sadoolapore, Chillianwallah, and Goojerat, and in the subsequent pursuit of the Sikhs and Afghans to Peshawur (medal with two clasps and brevet of lieut.-col.). He became a col. in Nov. 1854, major-gen. in Jan. 1861, lieut.-gen. in June, 1870, and gen. in Oct. 1877, being placed on the Retired List in the following year.

The death is announced of Com. J. McNeil Boyd, who served as naval cadet in the Baltic expedition, 1854-55; was actively employed at the bombardment of Sveaborg, in the Snapper, and was present in the Edinburgh's launch during the night attack by rocket boats (Baltic medal); midshipman and mate in China, 1857-60, was present in the Actæon at capture of Canton, and was landed as captain's aide-de-camp; was in the Inflexible's cutter (rocket-boat) at the capture of the Peiho forts (China medal, Canton and Tuak clasp.)

The Medical Department of the Prussian War Ministry, assisted by the Medical Department of the Bavarian and Wurtemberg War Ministries, and the Saxon Sanitary Board, are now bringing out a sanitary report of the German armies in the Franco-German war of 1870-71. The first and fourth volumes have just appeared, and, by the end of the year, the remaining six are expected to be published. The whole work is copiously supplied with maps, illustrations, drawings, and photographs. The eight volumes are divided into five parts—administrative, statistic, chirurgic, medical, bibliography, and registers. At the outbreak of the war, the army of the North German Confederation had, exclusive of Saxony, 3,679 doctors at its disposal, 1,083 of whom were civilians; of these 3,679, the mobile army received 2,767, the immobile 912. All of these had appointments connected with the army. In the hospitals for the reserve and for the prisoners of war, 1,779 civilians were employed as assistants; thus making a total of 5,458. Besides these, 347 foreign doctors volunteered their services, amongst whom were 39 English, 57 North Americans, 84 Dutch, 69 Swiss, 49 Russians, 22 Austrians, 15 Belgians, 2 Greeks, 2 Spaniards, 2 Italians, 1 Norwegian, 1 Swede, 1 Turk, 1 Roumanian, 1 Mexican, and 1 Servian. To these must be added 478 field-apothecaries, 6,918 hospital-assistants, 5,811 bearers (exclusive of 5,000 assistant-bearers). Including the rest of the sanitary personnel, there were in all 35,662 persons employed in the Sanitary Service of Prussia and the other States of the North German Confederation; Saxony supplied 500, Hesse 97, Bavaria 615, Wurtemberg 126, Baden 159 doctors. On an average, there was one doctor for every 170 men. The losses suffered amongst the doctors were as follows:—11 died before the enemy or from wounds received, 55 from diseases, 66 were wounded. Besides these, 352 German doctors became invalids. Amongst the immobile troops, 19 doctors died from the exertions imposed upon them. There are no complete statistics of the losses suffered by the other sections of the sanitary personnel.—*British Medical Journal.*

The Army.

2nd Life Guards. Lieut. Peel has been selected to take out the Nile boats to Egypt, and hand them over to Col. Butler.

3rd Dragoon Guards. Major Wardrop has accompanied Lord Wolseley to Egypt, as A.D.C.

18th Hussars. Capt. and Adjt. Morrison, who recently passed an examination in Subjects C and D for promotion, has been recorded as being distinguished in fortification.

21st Hussars. Lieut. Matthews has been appointed an extra A.D.C. to the Lord-Lieutenant of Ireland, vice Lieut. Dease, Royal Fusiliers.

ROYAL ARTILLERY.

Col. W. J. Williams, R.H.A., will complete his five years' tenure of command on the 10th inst., and be placed on the Retired Full-Pay List under the provisions of the Royal Warrant of 1884.

"D.A.C.G." writes :—"Allow me to endorse the opinion expressed by a correspondent in your issue of the 30th ult. as to the non-advisability of Artillery officers joining the Ordnance Store Department. The Department at the present moment is in a most unsatisfactory state ; it is under-officered and under-manned. The present officers are over-worked, and their just complaints are taken no notice of by the authorities. And, worst of all, the Department is really ruled by a few War-Office officials who pretend to know more about the wants and requirements of stations and districts than the officers themselves. Until the Ordnance Store Department, which is a most important one, is properly represented at the War Office and placed on a better footing, and until its officers are recognised by the Military authorities as something more than mere 'clerks,' I should certainly advise Artillery officers to stick to their regiment."

ROYAL ENGINEERS.

Qrmr. A. Hills has taken over the duties of Assist.-Superintendent of Records.

The 23rd and 27th Submarine Mining Companies are ordered to return to Chatham from Gosport, where they have been employed for some time past in submarine mining operations.

The following changes of stations have been carried out:—Col. T. A. L. Murray, commanding Royal Engineers, Malta, ordered home ; Brevet Col. W. C. Phillpotts, Cyprus, to be Commanding R.E. at Malta ; Major R. Y. Armstrong, appointed Inspector of Submarine Defences, War Office, vice Col. Malcolm, C.B. ; Brevet Lieut.-Col. R. J. Bond, from Aldershot to Chatham ; Capt. D. C. Courtney, from London to Egypt ; Capt. J. F. Garwood, from Chatham to Bengal ; Capt. R. N. Barklie, from Chatham to Egypt ; Capt. H. W. Renny-Tailyour, from Woolwich to Chatham ; Capt. H. H. Hart, from Chatham to Devonport ; Capt. R. L. Hippisley, from Enniskillen to Aldershot ; Capt. T. Digby, from leave to Chatham ; Lieut. W. J. Mackenzie, from Cork to Chatham ; Lieut. S. D. Cleeve, from Chatham to the Royal Military Academy, Woolwich ; Lieuts. C. E. Haynes, W. C. Hussey, and A. E. Sandbach, from Aldershot to Chatham ; Lieut. W. F. H. Kincaid, from Lydd to Egypt ; Lieuts. A. W. Roper, C. A. Leahy, and W. Du C. Luard, from Chatham to Egypt.

Grenadier Guards. The following officers arrived with the 1st Batn. in Dublin :—Col. Davies (in command), Lieut.-Col. R. Leeke, Capt. Craufurd, Lieuts. Anderton, Goulburn, Kinloch, Nicholson, Count A. Gleichen, M'Mahon, Fergusson, Wentworth, Roberts, Marshall, Capt. and Adjt. Ricardo, and Surg. Stuart.

Scots Guards. Lieut. Stracey has been confirmed in his appointment as A.D.C. to Major-Gen. Gipps, commanding the Home District.

1st, or Royal Scots. The 1st Batn. will embark at Barbadoes *en route* to Egypt, on the arrival of the 64th Regt. as relief.

5th Northumberland Fusiliers. Lieut. Keith-Falconer, 1st Batn., has been awarded a special certificate in consequence of the high standard of proficiency evinced by him at his recent examination for promotion.

7th Royal Fusiliers. Capt. Dease, 1st Batn., has vacated his appointment as extra A.D.C. to the Lord-Lieutenant of Ireland.

17th Leicestershire Regiment. Lieut. Tarry, 1st Batn., is a probationer for the Commissariat and Transport Staff.

26th Cameronians (Scottish Rifles). The detachment which remained behind at Aldershot on the departure of the battalion last month, left the Camp on Tuesday last, *en route* to Glasgow, to rejoin head-quarters.

32nd Duke of Cornwall's Light Infantry. Lieut. Teale is a probationer for the Commissariat and Transport Staff.

38th South Staffordshire Regiment has been pushed forward to Wady Halfa, to replace the 35th Regt., ordered to Dongola.

46th Duke of Cornwall's Light Infantry. Brevet Lieut.-Col. Grieve, who has been on special reconnoitring duty to Kosseir, has returned to Keneh, and resumed duty with his regiment. Col. Grieve, who was mentioned in despatches and promoted for his service in the Egyptian campaign of 1882, has been ordered to proceed to Wady Halfa, and on arrival there will be employed on special service. Brevet Lieut.-Col. Forster has left England for Egypt to rejoin head-quarters, in anticipation of further active service.

ROYAL MARINES.

The Admiralty have approved of Lieut. White, of the Plymouth Division, R.M.L.I., and son of Major White, retired quartermaster R.M., of Chatham, beginning a course of study at Greenwich Royal Naval College, on the 1st prox. It will be remembered that this young officer behaved with such splendid gallantry in the Soudan campaign that his then commanding officer, Col. Tuson, R.M.A., specially mentioned his name in despatches to the Admiralty. Lieut. White had also the honour of a summons to Court, being present at Osborne when the Queen decorated three men of his regiment last week for bravery in the field.

The following promotions have taken place in the R.M.L.I. :—Lieut.-Col. S. J. Graham, C.B. (Plymouth Division), to be Col., dated Aug. 16, 1884 ; Lieut.-Col. J. C. Hore, retired (Chatham Division), to have the honorary rank of Col., dated July 19, 1884.

"Y." writes :—"The British public are ever ready to cry out lustily in the cause of humanity,—the very word 'slavery' stinks in their nostrils. Should a few rascally Egyptians get a well-deserved flogging, or should a few soldiers belonging to her Majesty's land forces fall out from the effects of heat while on active service during the cooler months in the Red Sea, how great is the outcry, how rigid and searching are the questions put in the House, and to what extremities are unfortunate officials driven ! Where was the ice ? Where the medical comforts ? What are the doctors about ? Why were not precautions taken ? &c. But directly the sailors and Marines only are concerned, how great the difference, how little the interest shown ! What do a few sailors and Marines more or less matter ? They are of the species 'Salamander,' and, whatever the discomforts, must make the best of them. The above reflections will, I think, naturally occur to any one who has had the felicity of making the acquaintance of our sailors and Marines at that paradise, according to the authorities, 'Suakim.' Perhaps a plain statement as regards this place may be of some interest to your readers :—A dirty, tumble-down town on an island ; a dirtier Arab town on the main land, connected with each other by a causeway ; Quarantine Island, low and flat, covered with tents ; a narrow arm of the sea, fringed with coral reefs, called the Harbour, in which lie some half-dozen of her Majesty's ships ; an English burial-ground (alas ! rapidly increasing in size) on one side, an Arab on the other, the whole surrounded by detached mud forts, all situated in and on a desert of burning sand,—such is Suakim, compared with which Aden is Paradise and Suez Elysium. It is here in the burning desert—for what purpose who can tell ?—that our sailors and Marines keep weary watch for weeks during the hottest season of the year when the thermometer at night is 97 deg., and in the day in the kindest of shades 104 deg. Part of the time is a deadly calm, part the burning blast from the Desert ; metal in the shade so hot as to be almost painful to the touch, wood heated as if in an oven, the very clothes when put on feel as if they had been held before a roaring fire, and the water itself is lukewarm. Can it be wondered at that both officers and men succumb to such a climate,—120 sent to Suez sick (some since dead) within the last three weeks, and the ensigns half-mast nearly every day testify to its dire effects ; yet what does it matter, they are only sailors and Marines ? But to quote finally one instance. A corvette having, after a stay of some months, to lift her anchor and proceed to sea, placed 60 men on the sick-list in three days, which, I think, will show practically the effects of living in such a climatic Hades."

50th Queen's Own (Royal West Kent Regiment). The head-quarters embarked at Limasol on Tuesday in H.M.S. Orontes for conveyance to Egypt.

55th Border Regiment. Lieut. Pelly, 2nd Batn., who recently passed an examination for promotion, has been awarded a special certificate in consequence of his having attained a high standard of proficiency.

60th King's Royal Rifle Corps. The head-quarters of the 3rd Batn. landed at Limasol, Cyprus, from H.M.S. Orontes, on Monday. The *Morning Post* says:—"The health of Major Hutton will, it is hoped, be sufficiently restored to enable him to proceed to Egypt at the end of the present month to resume the command of the Mounted Infantry in that country in readiness for the departure of the main body of the expedition from Wady Halfa. For the present, Majors Gough and Barrow are respectively acting as commandant and second-in-command of that force."

64th North Staffordshire Regiment, at Manchester, is under orders to embark early in October for the West Indies, to relieve the 1st Batn. Royal Scots. Lieut. Higginson is a probationer for the Commissariat and Transport Staff.

70th East Surrey Regiment. The head-quarters and service companies leave Bombay to-day in H.M.S. Himalaya for Egypt.

75th Gordon Highlanders. Lieut. Payne has been appointed to the command of a company of the Mounted Infantry in Egypt.

79th Cameron Highlanders. A correspondent addresses to us what he terms "The Lament of the Cameron Highlanders." He says :—"The Queen's Own Cameron Highlanders (old 79th) has now been in Egypt two years, having sailed from Gibraltar on Aug. 7, 1882, to take part in the Egyptian campaign of that year. In that campaign it had its full share of work, being in the first line of attack on the lines at Tel-el-Kebir, &c. Its behaviour was marked not only for gallantry in action, but for strict discipline, zeal, and almost complete absence of any kind of crime during the whole campaign. Since then, at the various general inspections, &c., it has invariably been highly complimented on its smart and soldierlike appearance and thorough efficiency generally. Yet, notwithstanding that the battalion was all that could be desired in point of efficiency, its numbers had been steadily and rapidly diminishing. On April 1, 1883, it was placed on the home establishment, viz., 581 of all ranks, its strength then being 675, although at that time not only serving abroad, but being in occupation of a foreign country. Recruiting was stopped from July 1, 1883, till Jan. 1, 1884, by order, and the battalion soon became a skeleton. The Suakim Expedition was the next important event, and orders were sent out for three battalions to proceed to the front from Cairo. Three did so, but the Cameron Highlanders, owing to numerical weakness, remained behind, while the Black Watch and Gordon Highlanders, the two other battalions forming the Highland Brigade in Egypt, marched gaily out. That a regiment of the old and famous Highland Brigade should sit quietly in Cairo when there was work to be done, was an event which had never been anticipated by any of its members, and bitter was the feeling against the treatment which had brought it to such a pass. Non-commissioned officers and men bought their discharges, and time-expired ones refused to extend their period of service with the colours. In fact, everyone felt that the battalion had received very rough usage indeed, and that these were evil days. There had been continual talk of our coming home, but nothing came of it, except a few contradictory orders, having no other effect than to unsettle everyone and leave things as before. On April 1, 1884, came an order raising the battalion to the 'colonial establishment,' on paper at least. It really looked as if we were being made April fools of, for, owing to recruiting having been stopped for so long, there were no men to send out. And so it has gone on till at the present moment, being actually on the spot, with a campaign imminent, instead of being 899 strong, all ranks—the total strength of the battalion is 487, being 412 below establishment. The result will be that, in place of the old 79th, with a long list of battles on its colours that any double battalion might be proud of, still more so a single one, taking its accustomed place in the van, officers and men doing their share of work and reaping their reward, it will again be left to do garrison duty and police work. Is this a fitting reward for long, faithful, and brilliant service? and is it to be wondered at that a feeling of bitter disappointment and dejection pervades all ranks ? But yet another blow was struck, as undeserved as it was humiliating,—news came that arrangements had been made by the authorities for the Cameron Highlanders to proceed at once to Ceylon to relieve the 1st Batn. Royal Dublin Fusiliers, by which arrangement an additional 300 men or so would be brought to the front. Orders to proceed to the front have ever been hailed with joy by the Camerons. But actually to be ordered off the scene—shunted like an old and useless machine—the only reason being because two or three hundred more men were required in Egypt, *c'était trop fort.* Can it be true that, with the great system of which we have heard so much lately, the only manner of procuring a few men is by dealing a bitter affront to an old and honoured corps? Cannot men be found at home to reinforce us?' If not, surely it is a state of affairs which requires thorough investigation and reform. Hard as it is at present to obtain recruits, and to induce a sufficient number of non-commissioned officers and men to extend their period of service, so as to retain an efficient body of non-commissioned officers, where shall we for the future find men willing to engage in a regiment which, owing to the impotence of the present system, is either left behind to do garrison and police duty, or actually ordered off the sphere of active operations altogether ? Is there no remedy, or are the authorities so regardless of the feelings and pride of a regiment as willingly to wound them, when a little consideration would have avoided so doing, by giving to that regiment its proper place in the field, when once again we shall march forth to the familiar air of our old regimental song ?—

'How proudly they walk, though each Cameron knows,
He may on his heather no more,
But gladly they follow their chief to the field
Where the laurels were gathered before.

I hear the pibroch sounding, sounding
O'er mountain and o'er glen,
Whilst light, springing footsteps are trampling the heath—
'Tis the march of the Cameron men!'"

83rd Royal Irish Rifles. Four bandsmen of the Royal Irish Rifles, who hired a boat at Guernsey on Aug. 19, have been missing ever since. When last seen they were outside the harbour, apparently skylarking.

94th Connaught Rangers. Lieut. Campbell is a probationer for the Commissariat and Transport Staff.

98th North Staffordshire Regiment. Dr. J. Collis Browne, formerly of the regiment, died at Ramsgate on the 30th ult., aged 64 years. The deceased during his regimental service was a great favourite.

105th King's Own Light Infantry. Lieut. Baskerville is a probationer for the Commissariat and Transport Staff.

Pay Department. By latest advices the officers of the Pay Department serving in Egypt are distributed as follows: —Chief Pymr.—Col. Olivey, C.B., at Cairo. Staff Pymr. —Major Thornhill, 42nd Regt., Cairo. Pymrs.—Majors Woodall, with 30th Regt., up country ; Kneller, at Chief Pymr.'s office, Cairo ; Brown, with 79th Regt. ; Orange, with 3-60th Regt. ; Dowdall, with 35th Regt., Wady Halfa ; Mansergh, 56th Regt., Assouan ; Webster, 19th Hussars, at Abbasseyeh ; Small, 75th Regt., Cairo ; Capts. Lloyd, 1-19th Regt., and Ternan, 50th Regt., Chief Pymr.'s Office ; Long, ordered home, sick ; Sawyer, 32nd Regt., up country. At Suakim, D.A.C.G. of Ordnance E. Houghton is acting pay officer.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, Sept. 2, 1884.

5th Dragoon Guards—Capts. W. H. Atherton to be Major, vice F. A. Cracroft-Amcotts, retired (April 16) ; A. Baldrey to be Major, vice F. W. Hemming, seconded (April 21).

The Northumberland Fusiliers—The name of "Lieut. Thomas Graves Lowry Herbert Armstrong" is as now and not as hitherto stated.

The Royal Fusiliers (City of London Regiment)—Capt. C. L. Mortimer has been seconded for service on the Staff (Aug. 31).

The Prince of Wales's Own (West Yorkshire Regiment)—Capt. S. J. Butler to be Major, vice H. McL. Hutchison, seconded (April 2).

The Leicestershire Regiment—Lieut. E. R. Scott, Adjt., to be Capt., to complete establishment (March 26); Lieut. M. R. Hyslop to be Capt., vice M. W. Brock, promoted Major on half-pay (Aug. 9).

The Princess of Wales's Own (Yorkshire Regiment)—Major B. J. A. Monsell, from half-pay, to be Major, vice H. L. Gipps, retired.

The Cheshire Regiment—Capt. and Brevet Major R. C. Hare to be Major, vice W. S. Cooke, seconded for service on the Staff; Lieut. J. P. Gethin to be Capt., vice Brevet Major R. C. Hare (both dated Aug. 13).

The Gloucestershire Regiment—Lieut. J. E. M. Pilkington has been seconded for service as a probationer for the Army Pay Department (Aug. 23).

The Duke of Wellington's (West Riding Regiment)—Lieut. E. C. H. Price to be Capt., vice P. T. Rivett-Carnac, seconded (July 29).

The South Staffordshire Regiment—Capt. J. Emeris to be Major, vice T. J. Chamberlain, seconded; Lieut. J. F. C. Hamilton to be Capt., vice J. Emeris (both dated July 9).

The Prince of Wales's Volunteers (South Lancashire Regiment)—Capt. W. Capel to be Major, vice C. Carstairs, retired on temporary half-pay (Aug. 6); Lieut. E. H. M. Elliot to be Capt., vice D. P. Chapman, seconded (June 4).

The Essex Regiment—Lieut. H. S. Fleming to be Capt., vice J. E. Acland-Troyte, seconded (July 30).

The Sherwood Foresters (Derbyshire Regiment)—Major J. H. S. Seagram retires on retired pay, with the hon. rank of Lieut.-Col.

The Northamptonshire Regiment—Capt. F. E. Power to be Major, vice R. Anson-Cartwright, retired; Lieut. J. Collinson to be Capt., vice F. E. Power (both dated Aug. 20).

Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. C. M. Edwards to be Capt., vice W. A. Collings, promoted (June 28).

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut. L. Dorling, Adjt., to be Capt., vice G. E. Lloyd, seconded (May 28).

The King's (Shropshire Light Infantry)—Major R. G. T. Cotton, from half-pay, to be Major, vice Brevet Lieut.-Col. T. B. Hitchcock, seconded, from May 15, for service on the Staff; Capt. B. McClintock has been placed on retired pay, with the hon. rank of Major (Aug. 27).

Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. S. MacDougall to be Capt., vice J. D. Fetherstonhaugh, promoted (May 28).

The Rifle Brigade (the Prince Consort's Own)—Capt. W. W. Hammond to be Major, vice A. Borthwick, retired on half-pay (Aug. 20).

1st West India Regiment—Lieut. P. O'Brien has been seconded for service as a probationer for the Army Pay Department (Aug. 20).

Staff—Lieut. J. B. Stracey, Scots Guards, to be Aide-de-Camp to Major-Gen. R. Gipps, commanding the Troops, Home District (April 1).

Royal Military Academy—Major and Col. A. Harness, C.B., R.A., from Capt. of a Company of Gentlemen Cadets, to be Secretary and Treasurer, vice Lieut.-Col. and Col. W. D. Marsh, R.E., whose period of Staff service is about to expire; Major H. J. O. Walker, R.A., to be Capt. of a Company of Gentlemen Cadets, vice Col. A. Harness, C.B. (both dated Sept. 20).

Commissariat and Transport Staff—Deputy-Comy.-Gen. A. W. Pigott has been placed on retired pay, with the hon. rank of Comy.-Gen. (Aug. 24).

Medical Department—Deputy-Surg.-Gen. F. Holden, M.B., retires on temporary half-pay. The date of appointment as Surgs. of the Surgs. on probation named in the *Gazette* of Aug. 26, 1884, is Aug. 2, 1884, and not as therein stated.

Ordnance Store Department—Assist.-Comy.-Gen. of Ordnance H. Morgan to have the local and temporary rank of Deputy-Comy.-Gen. of Ordnance whilst acting as Senior Ordnance Store Officer in Egypt (Aug. 26).

MEMORANDA.

Lieut.-Col. C. M. Stockwell, C.B., Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's), to be Col. (Sept. 2); Major and Hon. Col. J. Geddes, retired pay, retires from the service, receiving the value of his commission; Capt. O. de B. Carey, half-pay, retires on retired pay; Lieut. E. Bacon, half-pay, resigns his commission; Surg.-Major J. Bourke, late Medical Department, has been permitted to commute his retired pay (Aug. 12). The under-mentioned Deputy-Comys. and Hon. Capts. of the Bengal Establishment to have the hon. rank of Major:—J. Brown (May 20) and R. Monks (June 12). The hon. rank of Lieut. conferred on Deputy-Assist.-Comy. P. J. Ryan is dated Jan. 10, 1883, and not Jan. 11, 1883, as stated in the *Gazette* of July 13, 1883.

INDIA OFFICE, Sept. 2, 1884.

The Queen has approved of the following admissions to the Staff Corps made by the Governments of India:—

BENGAL STAFF CORPS.

To be Lieutenants:—Lieuts. E. F. H. MacSwiney, from the South Lancashire Regt. (dated July 6, 1882, but to rank from Oct. 2, 1879); L. H. Reid, from the Manchester Regt. (dated Feb, 28, 1883, but to rank from Dec. 4, 1879); T. H. Smith, from the North Lancashire Regt. (dated Aug. 22, 1882, but to rank from Feb. 2, 1881); J. A. Brown, from the Seaforth Highlanders (dated Feb. 21, 1883, but to rank from July 1, 1881); A. R. Browning, from the Worcestershire Regt. (dated Feb. 16, 1882, but to rank from July 1, 1881); E. W. Codrington, from the Manchester Regt. (dated Nov. 23, 1882, but to rank from July 1, 1881); D. J. T. O'Brien, from the Manchester Regt. (dated Nov. 20, 1882, but to rank from July 1, 1881); P. E. Dun, from the South Lancashire Regt. (dated March 26, 1882, but to rank from July 1, 1881); J. O. S. Fayrer, from the Suffolk Regt. (dated Aug. 2, 1882, but to rank from July 1, 1881); F. O. Anderson, from the Cheshire Regt. (dated Sept. 8, 1882, but to rank from July 1, 1881).

BOMBAY STAFF CORPS.

To be Lieutenants:—G. E. Staveley, from the East Yorkshire (dated March 10, 1883, but to rank from Feb. 20, 1879); C. H. Macdonald, from the R.M.L.I. (dated March 3, 1883, but to rank from Sept. 1, 1880); C. I. Fry, from the Royal Irish Fusiliers (dated Feb. 13, 1883, but to rank from Dec. 1, 1880); E. O. Owen, from the Royal Highlanders (dated Feb. 27, 1882, but to rank from July 1, 1881); H. T. Kenny, from the Royal Munster Fusiliers (dated June 21, 1882, but to rank from July 1, 1881); C. H. Brackenbury, from the Lancashire Fusiliers (dated March 20, 1883, but to rank from Oct. 22, 1881).

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 3, and the current year must be understood.

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Sept. 5, 1884.

ROYAL ARTILLERY.

Lieut.-Col. W. Kemmiss retires on retired pay, with the hon. rank of Col. Major A. H. J. Des Barres retires on retired pay, with the hon. rank of Lieut.-Col. Major and Brevet Lieut.-Col. W. W. Murdoch to be Lieut.-Col., vice Col. Sir W. F. de Winton, K.C.M.G., seconded (Aug. 27). The promotion of Capt. J. P. Freeth to the rank of Major, notified in the *Gazette* of Aug. 19, is cancelled. Capt. J. P. Freeth to be Major upon the Seconded List, with seniority next below Major F. N. Innes (Jan. 9). Major C. S. Graham, from the Seconded List, to be Major, vice Brevet Lieut.-Col. E. R. Cottingham, promoted Lieut.-Col. on half-pay (Aug. 11).

The under-mentioned Capts. to be Majors:—A. H. Armytage, vice Brevet Lieut.-Col. C. S. Kyle, retired (Aug. 17); J. F. Harman, upon the Seconded List; A. E. Duthy, vice V. Wing, retired (both dated Aug. 20); C. M. H. Downing, vice A. W. Anstruther, seconded for service in the Department of the Director of Artillery and Stores (Aug. 26); R. S. Watson, upon the Seconded List; Hon. F. W. J. Shore, upon the Seconded List; W. N. Jervis, vice Brevet Lieut.-Col. W. W. Murdoch, promoted (all three dated Aug. 27).

The under-mentioned Lieuts. to be Capts.:—E. A. Lambart, vice A. H. Armytage, promoted (Aug. 17); C. E. Maturin, vice A. E. Duthy, promoted (Aug. 20); K. S. Davison, upon the Seconded List R. M. Crofton, vice C. M. H. Downing, promoted (both dated Aug.; 26); C. H. Blount, vice W. N. Jervis, promoted (Aug. 27); G. N. H. Barlow, vice W. N. Lockyer, seconded for service in the Royal Small Arms Factories, Enfield; G. M. Boothby, vice A. P. Penton, seconded for service as an Instructor in the Royal Gun Factories (Sept. 1).

Lieuts. R. W. E. Carnegy to be Lieut. upon the Seconded List, on appointment to the Staff (Aug. 16); H. L. Murray-Dunlop to be Lieut. upon the Seconded List, on appointment as an Adjt. of Auxiliary Artillery (Sept. 1). The first Christian name of Lieut. Dickinson is "Thomas," and not as stated in the *Gazette* of July 15.

Royal Engineers—Capt. H. R. G. Georges to be Major, under the provisions of Article 10 (*b*) of the Royal Warrant of June 19, 1884. Capt. J. H. Fox is placed upon half-pay.

MEMORANDA.

Major-Gen. J. G. Medley, Royal (late Bengal) Engineers, has retired upon a pension and extra annuity, with the hon. rank of Lieut.-Gen. (July 20).

Col. T. N. Harward, Royal (late Bengal) Artillery, to be Major-Gen., vice E. M. Playfair, Royal (late Madras) Artillery, placed upon the Unemployed Supernumerary List (Aug. 1).

Lieut.-Cols. J. T. Leishman, Royal (late Bombay) Artillery, to be Col. (Aug. 17); S. Penny, Royal (late Madras) Artillery, to be Col. (Sept. 1).

MILITIA.

WAR OFFICE, PALL MALL, Sept. 5, 1884.

ROYAL ARTILLERY.

3rd Brigade, North Irish Division—Lieut. J. G. Griffith to be Capt.

2nd Brigade, South Irish Division—The under-mentioned Lieuts. to be Capts.:—R. A. Gray and L. A. de V. Maunsell.

INFANTRY.

2nd Sussex—Lieut. A. R. Bostock resigns his commission.

1st Tower Hamlets (the Tower Hamlets Rifle Volunteer Brigade)—Vickers Dunfee, gent., to be Lieut.

MEMORANDUM.

Hon. Major H. B. Phipps, late Adjt. 3rd Monmouthshire R.V.C., is permitted to commute his retired allowance (Aug. 7).

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 6, and the current year must be understood.

THE CHAPLAIN-GENERAL.

"Another Old Officer" writes:—"Doubtless, there is a well-formed opinion throughout the Army that the Chaplain-General should for all good reasons be selected from the higher rank of Chaplains now actually serving on full pay. Military precedent should be followed, except, perhaps, not necessarily on one point: the selection should not necessarily have reference to combatant service. Chaplains have usually volunteered for such service, all credit to them; but they may not, therefore, be the most likely to be devoted to their more spiritual and important work. The Chaplain-General should be selected for his devoted but unobtrusive work amongst officers and men. He should on no account be a man of party bias; but rather of known wisdom in keeping together the uneasy stragglers of his flock. He should, of course, be a perfect gentleman, and if possible invested with the prestige so generally conferred at Oxford or Cambridge."

THE KHARTOUM EXPEDITION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Ample provision having now been made for the widows and orphans of our soldiers and sailors who may be killed or die of their wounds in war, I venture to think that more in future might be done on behalf of the officers and men themselves. It is well known that besides the hardships which have of necessity to be undergone in almost every campaign, much unnecessary discomfort has to be endured when the hospital or transport is reached. During the late wars I endeavoured, with the liberal aid of many kind friends, to supply our soldiers and sailors with a good assortment of readable matter, which on the present occasion I propose to supplement with such extra comforts as jackets, loose trousers, stockings, smoking-caps, cigars, tobacco, or indeed anything short of actual necessaries which may be entrusted to my care. I must ask, as on previous occasions, that all contributions be delivered at my address here *free;* and I shall be glad at the same time to receive donations to defray the expenses of packing and transit, which are very considerable.—I am, &c.,

JAMES GILDEA, Major,
4th Batn. Royal Warwickshire Regt.

20 Phillimore Gardens, Kensington, W., Aug. 30.

A DELICIOUS COOLING DRINK is supplied in ROSE'S LIME JUICE CORDIAL in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order ROSE'S CORDIAL. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

BOOKS, Etc., RECEIVED FOR REVIEW.

How we Educate our Officers (W. H. Allen and Co.)—Transactions of the Institution of Naval Architects, Vol. XXV. (H. Sotheran and Co.)—Magazines for September:—Colburn's United Service Magazine (Simpkin, Marshall, and Co.); The Nineteenth Century (Kegan Paul, Trench, and Co.); The United Service (Philadelphia, L. R. Hamersley and Co.); The Army and Navy Magazine (W. H. Allen and Co.); Baily's Monthly Magazine (A. H. Baily and Co.).

NOTICES TO CORRESPONDENTS.

Many interesting communications, reviews and letters, &c., are unavoidably omitted, owing to want of space, this week.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira;* in addition to all the home and colonial professional periodicals and journals.

THE STRENGTH OF THE ARMY.

It is understood (says the *Times*) that during the eight months of the year terminating on the 31st ult., upwards of 22,000 recruits have been enlisted for the Regular Forces. This rate is almost precisely the same as that for the year 1883, during which a little over 33,000 joined the colours. It was the largest yield on record in times of peace, and it is, of course, satisfactory to find that the proportion is still steadily maintained. The number, although nearly sufficient to supply the vacancies ordinarily arising, is not adequate to make up the deficiency caused two years ago by the age and other restrictions then instituted for the first time, and the Army remains short of its establishment by about 9,000 men, of whom, speaking roughly, 5,000 men are required upon the Home and Colonial, and about 4,000 on the Indian establishment. The gap in the latter exists almost wholly in the Infantry of the Line, the Cavalry and Artillery being up to their establishment, and it is calculated that by the end of the trooping season, which commences next month, the drafts available for India will bring the infantry regiments in that country quite up to their strength. At home, however, the deficiency, though being somewhat lessened each month, does not seem likely to cease for some time, and having regard to the unusual demand caused by events in Egypt, the authorities lately announced their readiness to allow certain Army Reserve men to rejoin the colours so as to complete their full period of 12 years, offering them as an inducement a grant of deferred pay in respect of the whole of the time since their original transfer to the Reserve, and up to the date of their final discharge. This would be, as a rule, £18. In some districts it is understood that the offer has been eagerly accepted by many men fulfilling the required conditions, while in others hardly a man has come forward. The demand for work incidental to harvest operations has doubtless had its influence in keeping down the supply; but in a few weeks it is expected that as many men will be obtained as suits the purposes of the Military authorities. It is to be borne in mind, however, that this addition to the active Army is obtained at the expense of the Army Reserve, now mustering just 40,000 men, which if allowed to increase in the ordinary way would be about 4,000 above that number by the close of the year. The permission thus given tends, however, to impart to the soldier's calling more of that elasticity which has been so strongly advocated. It will enable the Reserve man either to remain in private life, subject only to the liability of being recalled to service in the event of war, or of again leading the life of a soldier, and if he pleases in his old regiment, for the men who are now invited to rejoin are to be allowed to select the corps in which they desire to serve, and most of them may be expected to resume their military career in the regiment in which their former service was passed. Several important changes in the Army Pay Department are impending. Four chief paymasters, Lieut.-Cols. Nolan (Dublin), Leigh (Devonport), George (Colchester), and Bryson (Portsmouth), are about to take retirement, and their places will be filled by selection from among the staff paymasters. Col. Nolan retires in November, and Cols. Leigh, George, and Bryson next month. Majors and Staff Paymasters Dundee, Cuming, Minchin, and Drage are ordered to hold themselves in readiness for foreign service should they be required. Since the new regulations, which permit an officer to resume duty as a combatant if he desires it at the end of five years, many captains and lieutenants have come forward as candidates for the Department, and it is expected that all the vacancies will soon be filled.

The officers of the Kronprinz'en Regiment have forwarded a letter of thanks to Gent. Cadet Claude de Montmorency Franklyn, of the Royal Military Academy, Woolwich, for translating (they state) in most correct and military German Gen. Graham's despatches on the late battles in the Soudan, and illustrated with his plans of formation. Mr. Franklyn received his German education at Herr Fahrland's School, Aachen, where the Crown Prince's Regiment of the Rhine has been stationed at the post of honour for years ("Die Wacht am Rhein"), and was the one which performed that almost incredible march of modern times,—57 miles on Metz without a halt, and without food or water.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 69 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

The Committee earnestly appeal for funds to meet the current expenses.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

THE NILE EXPEDITION.

STANFORD'S MAP of the NILE from the Equatorial Lakes to the Mediterranean, embracing the EGYPTIAN SOUDAN (Kordofan, Darfur, &c), and ABYSSINIA. Scale, 94 miles to an inch. Size, 27 by 22 inches.

Price, 4s in sheet, coloured; post free, on roller, per parcel post, 4s 6d; mounted, in cloth case, 6s 6d; post free, 6s 9d.

London: EDWARD STANFORD, 55 Charing Cross, S.W.

FRANCE AND CHINA.

STANFORD'S MAP of SOUTH-EASTERN ASIA, from Pekin to Singapore, including Tongking, Cochin China, Siam, and the British Possessions of Burmah, the Straits Settlements, Hong Kong, Labuan, and British North Borneo; with an Enlarged Plan of the Environs of Hanoi, on the Red River. Scale, 110 miles to one inch. Size, 22 by 26 inches.

Price, in sheet, coloured, 4s; post free, on roller, 4s 6d; mounted to fold in cloth case, 6s 6d; post free, 6s 9d.

London: EDWARD STANFORD, 55 Charing Cross, S.W.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

No **EXTRA PREMIUM** for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

Army & Navy Gazette.
LONDON, SATURDAY, SEPTEMBER 6, 1884.

THE physical condition of our soldiers has become a question of such pressing importance just now, when the Army is only saved, by a succession of disingenuous devices, from vanishing under the empiric treatment of reformers, that no excuse is needed for noticing a pamphlet, entitled, "The Break-down of Young Soldiers under Training Explained," by Surgeon-Major Davy, M.D., though it was published last year. Dr. Davy's pamphlet consists of several papers written by him at different times from 1876 to 1881. The sole aim of these papers, which fill fifty-two pages, is to show that our system of setting-up drill is useless and injurious, instead of being, as it is generally considered, salutary and advantageous. He maintains that the expansion of the chest, which is a usual result of recruits' drill, actually lessens the breathing power, though it increases the external dimensions; that it induces hypertrophy of the elastic parenchyma of the lungs, partial obliteration of the pulmonary capillaries, functional disturbance, and later, organic disease of the heart; and that, in many men with whom a certain disease has become constitutional, it excites a morbid condition of the aorta likely to prove quickly fatal. He further condemns the position of "attention" as strained, unnatural, and hurtful; and he describes the attempt to touch the ground without bending the knees as almost deadly! "Is not," he says, "a gasping recruit with a purple face sufficient, or must we wait for vertigo or apoplexy before applying that dread remedy—common-sense?" The alarm which Dr. Davy's statements and opinions are calculated to arouse is allayed on turning to the last Army Medical Department Report, that for 1882, from which we learn that the total number of deaths of British soldiers in that year, from all diseases of the respiratory and circulatory systems together, amounted to only 291, or almost exactly one in 600 of the average strength, and less than a seventh of the whole mortality. We derive some consolation from the condition and appearance of the Metropolitan Police and the Royal Irish Constabulary. The former are as well set-up as the "Regulars," and the Irish Constabulary are so effectually drilled, during a long course of training at the depôt in the Phœnix Park, that they never become slouching in their many years of service. Yet we do not hear of the prevalence of chest diseases among these bodies of men, though they have much night duty, and long periods of exposure and fatigue. The plain truth—the unpalatable truth to some—is that a large proportion of the recruits we get now break down, not because they are excessively or injudiciously drilled, but because they are physically unequal to the ordinary work of soldiers. Though we cannot help regarding the grave charges that Dr. Davy brings against drill and setting-up as enormously exaggerated, if not altogether fanciful, still some of his statements deserve serious consideration. There must surely be, because he states it positively, some drill-serjeants in some regiments who make recruits, when at "attention," hold in their breath till they are gasping, and lean forward till they nearly tumble, and who use blows with the pace-stick on the abdomen to keep men in what they think the correct position. If this be so, such pernicious foolery should be exposed and prohibited.

Colonel Sir Howard Elphinstone, V.C., commanding the Royal Engineers at Aldershot, has been appointed Military Attaché at Berlin.

A series of exhaustive trials of the Dœcker experimental felt tent-huts have been recently carried out at Aldershot by a Committee of officers, of which Lieutenant-Colonel Sartorius, D.A.Q.M.G., is president. These tent-huts are intended to supersede the present service bell-tent, and are formed of patent felt on wooden frames, with canvas ends, or doors. They have been thoroughly tested, under all conditions, during fair and foul weather, and will shortly be finally reported on. Under certain circumstances, these temporary structures would be useful during a campaign; but it is not probable that they will ever be adopted as a substitute for the old-fashioned bell-tent, which, if not a roomy temporary dwelling, has, at least, the merit of portability, and can be pitched or struck quickly and with little trouble.

It does not often occur in the service that a Brigade-Major finds himself, in the absence of his Brigadier, the senior officer of the brigade, and in command. Yet such is the case at Aldershot at the present time. Major-General Feilding having proceeded to France to attend the manœuvres of the French Army, Colonel Nicholl, 3rd Battalion, Rifle Brigade, has been appointed temporarily to the command of the 3rd Infantry Brigade; but pending the return of Colonel Nicholl from leave of absence, the command has devolved on Brevet Lieutenant-Colonel Molyneux, 22nd Cheshire Regiment, Brigade-Major. Brigadier Molyneux's command consists at present of two peace battalions, and a dismounted squadron of the 2nd Life Guards.

Major T. Huddlestone, Staff Paymaster, Royal Engineers, is about to be appointed Chief Paymaster, and will proceed to Colchester for duty.

We referred lately to the very natural indignation that exists amongst the officers of the Army Pay Department that no successor has been appointed to the vacancy caused by the retirement of Lieutenant-Colonel Lukin, Chief Paymaster, on April 16 last. We now hear that the authorities consider the post practically filled up by the special promotion, on May 21, of Lieutenant-Colonel Farwell, for services in the Soudan; and we find that, in order to disguise the injustice from ordinary readers of the *Gazette*, three Paymasters, in the *Gazette* of June 3, were promoted *en bloc* to be Staff Paymasters, without it being mentioned, as is the usual custom, whose steps they obtained. The first of these, Major Nott, was antedated to April 16, the day on which Lieutenant-Colonel Lukin retired! In reality, if properly announced, Nott was promoted vice Farwell, and Farwell vice Lukin. As matters now stand, however, we are confronted with the extraordinary fact, that Lieutenant-Colonel Farwell, an officer specially promoted for service in the Field, loses seniority, and the higher pay, and allowances from April 16 to May 21, merely for the barren honour of appearing in the Soudan *Gazette*. As announced last week, four Chief Paymasters are retiring during this month and next, and we trust the authorities in Pall Mall will evince a due regard for the interests and services of the senior officers of the Pay Department, by antedating Lieutenant-Colonel Farwell's step, and by promoting the Staff Paymasters selected for the higher grade, within a few days of the *Gazette* announcing their predecessors' retirements.

The Favret house-tent, the invention of an officer in the French service, has been sent to Aldershot for trial and report, and may now be seen near the office of the Assistant-Quartermaster-General, at the Headquarters of the Division. This tent, which provides accommodation for 80, or more, men, cannot be put up or taken down very quickly. It consists of an extensive wooden framework, complicated with screws, nuts, bolts, &c, very liable to damage if roughly used, the whole being covered with strong canvas, having windows at either end. A loft, or upper story, can be improvised, and hammocks slung among the framework. A number of these house-tents are said to be at present on service in China and Madagascar. The tent was visited on Wednesday by Lieutenant-General Sir Archibald Alison and the Head-quarter Staff. It will be subjected to experimental trials during the ensuing week.

It is rumoured that Colonel R. Harrison, who proceeded on Tuesday last to Egypt on special service, is not likely to resume his appointment at Aldershot, and will probably be succeeded by Colonel Gildea, who recently relinquished the command of the 1st Battalion, 21st Royal Scots Fusiliers. A better selection for this onerous appointment could not be made. The A.Q.M.G. at Aldershot is President of the Permanent Committees on Clothing, Equipment, &c., and Colonel Gildea, who has been till lately a valuable member of these Committees, is admirably fitted to fill the post vacated by Colonel Harrison, and would be the right man in the right place.

Major J. T. Coke, 25th King's Own Borderers, has been appointed to the Intelligence Branch of the Quartermaster-General's Department at the War Office.

Some rather interesting remarks of a confidential nature on recent divisional operations of opposing forces have been circulated to all concerned by the Lieutenant-General Commanding the Aldershot Division. It is easy to understand why these remarks, formerly distributed freely that all might read, have during the past two years become very private documents indeed. By making them confidential, publicity is, of course, avoided, and the susceptibilities of the most thin-skinned are spared. How different was the case not so many years ago at the Camp, when the weekly "Remarks" were written by a well-known officer then on the Staff, whose criticisms were scathing and unsparing. No solicitude was then shown for those who were hauled over the coals; they just had to grin and bear it, for was it not set forth largely at the foot of these lucubrations, distributed by hundreds, that "these remarks, based on the reports of the umpires, and the observation of the umpire-in-chief, may not be absolutely correct, but they are to be considered as final." Now, in these enlightened times, when the remarks on Aldershot field-days and operations are written by one who is a master in the art of spiriting gently, it is to be regretted, in the interests of the service, that all ranks are not allowed to read, learn, and inwardly digest the valuable lessons contained in Sir Archibald Alison's observations.

It has been arranged that for the present Lieutenant-General Sir Arthur Herbert, Quartermaster-General shall also fulfil the duties of Adjutant-General to the Forces, which post is temporarily vacant during the absence of Lord Wolseley with the Nile Expedition.

Calling out the Army Reserve is either an act of war or self-defence. The Army Reserve were called out by the War Office Circular of August 20, under the pretence,—"That a *limited* number of Reservemen, unmarried, and not over nine years' service, would be accepted, and allowed to extend their service with the colours for three years." The "limited number" will cover all at present required, and will gradually include all that can be induced to rejoin the colours for the bribe of £18 deferred pay, as it is now called—it used to be called bounty—which was given on enlistment. Deferred back pay is given at the end of the service, a better arrangement, but not one which will blind the Reservemen.

Several French papers speak of the probable resignation of the French War Minister, General Campenon, who finds it morally impossible to forward reinforcements to Tonquin, in consequence of some formal declarations which he made in Parliament on this matter. In fact, in the month of December, 1883, the French Chamber felt alarmed at the expenses which were being incurred, and also lest the number of men sent to Tonquin should compromise the mobilisation. The War Minister was examined before a Parliamentary Committee, and in reply to the question,—How many men can you detach from the Continental Army without in any way compromising the mobilisation? answered, "Six thousand men, not one more; and if that figure were exceeded, I would not remain War Minister." Already this number has been greatly exceeded, and though it is hard to believe all that opposition journals say, we are assured that 15,000 men have already been detached from the Continental Army. This, we repeat, is probably an exaggeration; but that figure will certainly be reached in a very short time, seeing the numerous posts which the French intend occupying, and the necessity of filling up vacancies caused by sickness.

We have an assurance from an unimpeachable quarter, and from the very best authority, that the paragraph in our issue of the 23rd respecting the failure of one of the new 43-ton guns at Woolwich was not correct, and that the statement only represented "the empty chatter of irresponsible frivolity," which was assumed to be the outcome of careful inquiries. We have taken steps to prevent the reappearance of such statements.

The experimental field-firing by companies has been brought to a conclusion at Aldershot this week. The result of these practices has been, on the whole, good, and would warrant a continuation of the system. Battalion field-firing will be commenced next week, under the supervision of Brigadiers, at the termination of which the troops will be exercised by brigades in attacking entrenched positions occupied by dummy artillery and infantry.

The friends of General Millot find it very curious that two days after telegraphing that he had adopted measures to protect Tonquin from a rumoured invasion by the Chinese forces, he should have asked to be relieved of his command on the score of ill-health. Henri Rochefort roundly declares that General Millot has been basely treated by M. Jules Ferry, and that on his return to France he ought to pull the Premier's ears off. In military circles it is represented that the General asked to be recalled because his advice was disregarded. He demanded reinforcements because 25 per cent. of the expeditionary force under his command were in hospital, and instead of having his hands strengthened he was ordered to send away 2,000 men to operate under Admiral Courbet. It is also complained that the Government should not have printed the report of Colonel Dugenne, who commanded the Bac Lé column, in the official journal, and merely extracts of the report of General Millot unofficially. However, from his own showing the Colonel acted with inconceivable rashness. It is difficult to believe that, although in telegraphic communication with the General in command, he did not ask for instructions when he found the Chinese resisting his march on Langson. The probability is that the Colonel wished to reap a crop of laurels all for himself, which crop escaped him.

From recent statistics, it would appear that Mr. Stansfeld's disease is on the increase in the Army, and is assuming a more malignant form. Many men conceal their condition, and only seek admission to hospital when in a very bad condition indeed. There seems to be a necessity for closer and more frequent medical inspection. Recently, in a departmental corps at a large station, a considerable falling-off in the working power of some of the men was observed. Inquiry was made and a number of men were found to be suffering from a malady more to be dreaded than Asiatic cholera, because of its dire after-effects on the human race.

It is not easy to understand why the course of cooking at the Aldershot Instructional Kitchen for training master-cooks should last well-nigh six months. It is certainly necessary that regimental serjeant-cooks should, on appointment, have some practical knowledge of plain cooking; nothing more is required of them, and certainly nothing more is ever obtained. It seems strange, therefore, that when courses of instruction of an infinitely more complicated nature than the cooking of a soldier's "plain statement," are successfully carried out in a month or six weeks, this waste of the valuable time of non-commissioned officers, in these days of short service, should be permitted. With the large staff of instructors at the instructional kitchen, it should be quite possible to complete the course of Army cooking in six weeks at the outside. This is a matter which would bear to be inquired into.

The Navy.

ADMIRALTY, Aug. 29, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surg. W. S. Fisher, B.A., M.B., has been placed on the Retired List, with permission to assume the rank and title of Retired Deputy-Inspector-Gen. of Hospitals and Fleets (Aug. 22).

ADMIRALTY, Aug. 30, 1884.

Staff Surg. J. Buckley has been promoted to the rank of Fleet Surg. in her Majesty's Fleet (Aug. 27).

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer E. Price has been placed on the Retired List of his rank (Aug. 26).

The under-mentioned Assist.-Engineers have been promoted to the rank of Engineer in her Majesty's Fleet, viz.:—A. Kerr, J. A. H. Hicks, S. Aston, H. J. Oram, J. H. W. H. Ellis, E. K. Odam, J. H. Pill, W. J. Featherstone, W. F. Stewart, and J. H. Slade (Sept. 1).

ADMIRALTY, Sept. 1, 1884.

Engineer E. R. Vine has been promoted to the rank of Chief Engineer in her Majesty's Fleet (Aug. 23).

ADMIRALTY, Sept. 2, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surg. A. McDonald, M.D., has been placed on the Retired List of his rank (Sept. 2).

The Rev. John Evans, B.A., has been appointed Chaplain in her Majesty's Fleet (Aug. 28).

In accordance with the provisions of her Majesty's Orders in Council of July 25, 1861, and May 17, 1867, Naval Instructor J. D. Paul has been placed on the Retired List (Sept. 6).

ADMIRALTY, Sept. 4, 1884.

The following promotions have been made:—Lieut. A. B. Milne to be Com. in her Majesty's Fleet (Sept. 3). Sub-Lieuts. E. C. T. Troubridge, A. L. Duff, and E. M. C. Key to be Lieuts. in her Majesty's Fleet (all dated Sept. 3).

APPOINTMENTS.

Rear-Admiral—John K. E. Baird, to be Commander-in-Chief on the Pacific station, vice Lyons.

Captains—Henry J. F. Campbell, C.B., to the Rapid; Samuel Long, to the Agamemnon; Lord Charles Beresford, to the Hibernia, additional.

Commanders—A. Carpenter, to the Euryalus, additional, for charge of Marine Survey of India; R. F. Hoskyn, to the Myrmidon; Samuel A. Johnson, to the Hector; Samuel L. Osborne, to the Fantome.

Staff Commanders—Hugh H. Hannay, to the Britannia; Heaver Sugden, to the Hector; Thurston Stringer, to the Agamemnon.

Lieutenants—Archibald G. H. W. Moore, to the Northumberland; Robert C. Evershed, to the Defence; Hon. Stanley C. J. Colville, to the Alexandra; William H. L. Gale, Henry W. Steele, and Charles McCrea, to the Rapid; G. N. A. Pollard, to the Belleisle; W. C. Atherton, to the Hercules; Robert B. Abdy and Edmund M. C. Key, to the Alexandra, additional; William H. Chamberlain, to the Canada; Barrington H. Chevallier, to the Duke of Wellington, additional, for the Dreadnought; Thomas F. Abbott, to the Victoria and Albert; Frank A. Garford, to the Swiftsure, as flag lieut.; Henry A. Ogle, Arthur T. S. Carter, Charles E. F. C. Graham, Ernest C. T. Troubridge, and Alex. L. Duff, to the Agamemnon.

Sub-Lieutenant—John de M. Hutchison, to the Canada.

Midshipman—Robert W. Johnson, to the Opal.

Chaplains—Rev. Charles E. Painter, M.A., to the Inflexible; Rev. Charles J. Todd, to the Lord Warden.

Chief Engineers—G. T. Craddock, to the Rapid; Robert Bacon, to the Victoria and Albert; David Wilson, to the Osborne; George E. M. Keey, to the Indus, for the Hecate; John E. Turner, to the Agamemnon.

Surgeons—Charles W. Hamilton and Henry Harris, to the Alexandra; Edward Fergusson, to the Rapid; John Ottley, to the Vernon; William H. O'Meara, to the Repulse; G. W. Low, to the Alexandra, additional; George A. Draper, to the Duke of Wellington, additional.

Paymasters—John P. McP. King, to the Rapid; Henry Dawson, to the Penelope; Frederick A. Keogh, to the Agamemnon; Henry P. Brenan, to the Swiftsure, as secretary.

Assistant-Paymasters—Alfred E. Bourchier, to the Agamemnon; John H. G. Chappell, to the Duke of Wellington; Charles R. Smith, to the Swiftsure.

Engineers—Wm. Sharp, Nicholas Meaden, and Edwin K. Adam, to the Agamemnon; Joseph Bamford, to the Triton.

Assistant-Engineers—Robert St. John Raper, to the Alexandra, additional; Charles W. Gregory and Henry L. Manning, to the Agamemnon.

Clerk—Wingfield Walton, to the Rapid.

Gunners—James C. Rockett, to the President, for service at Admiralty; Alfred H. Churchill, to the Rapid; Richard Hutson, to the Agamemnon.

Boatswains—George Vosper, to the Rapid; John Allen, to the Agamemnon.

Carpenters—Edward Percy, to the Rapid; William Hanson, to the Agamemnon.

COASTGUARD.

Surgeon and Agents—Mr. A. P. Wells, at Douglas, Isle of Man; Mr. J. Claque, at Castletown, Isle of Man.

Agamemnon, Capt. Long, will, it is said, replace the Duncan as guardship at the Nore.

Alecto, Lieut. and Com. Harston, was paid off on July 28 at Cape Coast Castle, and was recommissioned the next day.

Alexandra, Capt. Harry Rawson, flying the flag of Admiral the Lord John Hay, with the Inflexible, Superb, and Monarch, arrived at Alexandria on Sept. 2 from Cyprus.

Amethyst, Capt. Brent, senior Naval officer on the South-East Coast of America, was at Rio de Janeiro up to Aug. 10 with the Rifleman, Algerine, and Wrangler, and would proceed on Aug. 12 in continuation of her cruise.

Arab, Com. Stopford, was at Aden up to Aug. 19, and would leave the same day for Zeyla. The Ranger was stationed at Berberah.

Belleisle, Capt. Loftus E. Jones, was at Devonport on Sept. 3, when Mr. Charles Pritchard, carpenter of the Belleisle, was sentenced by a naval court-martial to be dismissed his ship and lose 12 months' seniority, for neglect of duty and absence without leave from his ship. The prisoner was sent on the morning of June 10 to the dockyard respecting boats for harbour service, and did not return to his ship until the following evening. He pleaded guilty. His certificates were good.

Bittern, Com. W. F. S. Mann, having been relieved by the Imogene at Constantinople, has proceeded to Suakim.

Canada, Capt. A. C. Curtis, is ordered to be ready for sea by Sept. 10.

Coquette, Lieut. and Com. Crowe, would leave Malta on Sept. 3 to relieve the Falcon at Patras. The Falcon was ordered to join the flag at Alexandria.

Defence, Capt. A. J. Kennedy, left Plymouth for Holyhead on Friday last.

Dreadnought, Capt. the Hon. E. Fremantle, will proceed to the Mediterranean.

Dryad, Com. Hulton, arrived at Aden on Sept. 3, on passage home, *viâ* Suez Canal.

Euryalus, Capt. Hastings, flagship of Vice-Admiral Sir William Hewett, with the Tourmaline, has arrived at Zanzibar, and found the Turquoise there. The Tourmaline and the Decoy would leave for Aden on Sept. 4. The Osprey was expected from Madagascar. Two courts-martial have been held on board the Tourmaline at Mauritius for the trial of two men of the Euryalus, flagship of Vice-Admiral Sir William Hewett, charged with theft. The first case was that of Allan Mann, able seaman, who was charged with stealing three rupees from Edward C. Bould, an able seaman of the same ship. The Court consisted of Capt. R. H. Boyle, of the Tourmaline, president; Capt. A. P. Hastings, Euryalus; Com. H. W. Dowding and Lieut. F. R. Pelly, Osprey; and Lieut. H. H. Hayes, Tourmaline. Mr. W. C. S. Hayne officiated as deputy-judge-advocate. Prisoner admitted having taken the three rupees, but denied that he had any felonious intent. The Court, however, considered the charge proved, but prisoner, in consideration of his previous good character, was sentenced to six months' imprisonment only. The next case was that of J. H. Gray, stoker, of the Euryalus, who was charged with stealing £3 16s. from George New, stoker of the same ship. The evidence, which was entirely circumstantial, was deemed conclusive by the Court, and Gray was sentenced to 18 months' imprisonment, and to be dismissed from her Majesty's service.

Express, Lieut. and Com. Vesey Knox, left Gibraltar on Sept. 4 for the West Indies.

Kingfisher, Com. Algernon Evan-Thomas (act.), was officially inspected in Sheerness Harbour on Monday by Capt. James A. Poland, on behalf of Vice-Admiral E. Rice, Commander-in-Chief at the Nore, on her return from the Pacific Station, after four years' service. The crew of the vessel were put through various evolutions, including gun-drill, all of which were executed in a very creditable manner. The men also assembled at fire quarters with considerable alacrity. Capt. Poland subsequently inspected the interior arrangements of the vessel, and found everything clean and shipshape, great praise being due to Com. Heber Thornton, who unfortunately was unable to bring his ship home through ill-health, for the high state of efficiency of the crew and cleanliness of the ship. An order has been received at Sheerness from the Admiralty directing only the perishable stores of the Kingfisher to be removed. She will be placed in the First Division of the Medway Steam Reserve, in readiness for immediate service if required.

Linnet, Com. G. W. Hill, was at Oleleh on Aug. 29.

Minotaur, Capt. Britten, flagship of Vice-Admiral H.R.H. the Duke of Edinburgh, with the remaining ships of the Channel Squadron, left Dublin Bay on Aug. 31 for Queenstown, and arrived there on Sept. 1.

Nelson, Comdre. J. E. Erskine, A.D.C., was at Sydney on Sept. 3.

Orontes, Capt. Andoe, arrived at Limasol on Sept. 1, and would proceed next day to Alexandria.

Sphinx, Com. Caffin, flying the broad pendant of Comdre. Molyneux, was at Suakim up to Aug. 15 with the Carysfort, Tyne, Woodlark, Condor, and Albacore. The Briton left Suakim on Aug. 15 for Aden to remain on the East Indian station. The Humber would leave Suakin on Aug. 16 for Suez, to continue the Lochard's programme. The Myrmidon was on surveying duties, and would arrive at Suez by the end of August.

Swiftsure, Capt. Aitchison, flagship of Rear-Admiral Lyons, was at Esquimault on Sept. 3.

Temeraire, Capt. Domvile, will leave Malta to join the flag at Alexandria on Sept. 8.

Tenedos, Capt. Drummond, senior officer on the Newfoundland coast, arrived on Aug. 12 at Sydney, Cape Breton Island, from Hawke Bay. The Fantôme arrived at Forteau on Aug. 2. The Mallard arrived at Hawke Bay on Aug. 8, and left same day for St. John's.

Watchful, Lieut. and Com. James E. C. Goodrich, was to sail yesterday for the West Coast of Africa.

The command of the Royal Adelaide will fall vacant in July owing to the compulsory retirement, through age, of Capt. Richard Carter. Instead of the old practice of the admiral nominating his own flag-captain, the Admiralty have the right of appointment now, and it is rumoured that the post will be conferred on Capt. Alexander Buller, C.B., A.D.C., formerly commanding the Cambridge and now captain of the Achilles.

The Admiralty have placed at their disposal by the death of Capt. Edmund Wilson, R.N., a naval pension of £65 per annum, available for Retired Commanders.

BIRTH.

White.—On the 12th ult., at Nassau, N.P., Bahamas, the wife of Lieutenant William Shearburn White, R.N., H.M.S. Sparrowhawk, of a son.

MARRIAGE.

Crawford—Saunders.—On the 4th inst., in Winchester College Chapel, by the Rev. the Warden, and the Rev. William Andrew Crawford, Rector of Shalden, Alexander de Castro Crawford, R.N. (Retired), to Isabel Priaulx, widow of the late C. H. Saunders, Esq.

BANDMASTER WANTED for the ROTHERHAM DETACHMENT, 2nd VOLUNTEER BATTALION, YORK and LANCASTER REGIMENT.—Apply by letter, stating age, terms, and experience, &c., to Captain HIRST, Moorgate Hall, Rotherham.

COOK WANTED.—Required for the Mess, 1st Battalion the Queen's, a good COOK.—Application to be made to the MESS PRESIDENT, enclosing terms and certificates.
Tralee, August 31, 1884.

MIDSHIPMEN.—WANTED, TWO or THREE well-educated gentlemanly BOYS on board a fine clipper ship leaving shortly on a twelvemonths' voyage. Practical seamanship and navigation taught; uniforms worn; separate cabin (small premium).—Apply to the CAPTAIN, "Tyburnia," West India Docks, London, E.

THE CHURCH IN THE ARMY.
THE ARMY GUILD of the HOLY STANDARD offers a PRIZE of £20, open to all comers, and a PRIZE of £5, open to Warrant or Non-Commissioned Officers or Soldiers, for the best Essay on the following subject:—"How can the Church best Promote the Cause of Religion in the Army?"

The Essays should be written on one side of the paper only, not exceeding 10 pages of foolscap, 34 lines on each page, and be signed with a Motto. They must be accompanied in each case by a sealed envelope bearing outside the same Motto as at the foot of the Paper, and inside the name and postal address of the writer. These envelopes will not be opened until the PRIZE has been adjudged. The Essays will become the property of the Guild.

The Judges are Lieutenant-General J. E. T. Nicolls, Major-General H. L. Balfour, and the Rev. R. A. Corbett, C.F. The Essays must be sent in—Home Stations by November 1, 1884; Foreign Stations by January 1, 1885.

G. E. WYNDHAM MALET,
Secretary-General G.H.S.
Ardeley, Stevenage, August 1, 1884.

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

ARMY RUBBER CO.

HOLLOWAY'S PILLS.—Though good health is preferable to high honour, how regardless people often are of the former—how covetous of the latter? Many suffer their strength to drain away ere maturity is reached, through ignorance of the facility afforded by these incomparable Pills of checking the first untoward symptoms of derangement, and reinstating order without interfering in the least with their pleasure or pursuits. To the young especially it is important to maintain the highest digestive efficiency, without which the growth is stunted, the muscles become lax, the frame feeble, and the mind slothful. The removal of indigestion by these Pills is so easy that none save the most thoughtless would permit it to sap the springs of life.

ARMY EXAMINATIONS.— Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill:—

Captain Fleming, R.A.,
Major Creagh, R.A.,
Captain Hippisley, 2nd Dragoons, and
Major Churchill, Northumberland Regiment,

were successful.

Captain Grieve, R.A., qualified.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E, F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.

By Order,
G. W. FORSTER, Secretary.

LEAVE SEASON.

OFFICERS' PROMOTION.

FINAL MILITARY COMPETITIVE.

MILITIA OFFICERS prepared for the above at

THE ABBEY, ABINGDON, BERKS.

NEXT TERM commences OCTOBER 11.

For particulars see above.

NEWTON COLLEGE, SOUTH DEVON.

President of Council—The EARL of DEVON.
Head Master—Rev. G. TOWNSEND WARNER, M.A., Trin. Coll., Camb. (assisted by twelve Resident Graduates).

This School now offers a first-class education to the sons of the clergy, officers, professional men, &c., on moderate terms.

The system is arranged so as to embrace every kind of Education necessary for the Universities, Army and Navy, Civil Services, Commercial Life, Colonial Life, &c. There are Classical and Modern sides, quite distinct, with all appliances for a Modern Education separate from that required for the Universities and learned Professions.

The success of the School has been undoubtedly due to the large staff of Masters, and the individual attention which can thus be given to boys of different calibre. The New School Buildings also are a great advantage, and teaching is carried on with facility in the large, airy rooms.

After nearly ten years of work at improvements, the Council feel that they can now offer educational advantages, unrivalled in two Western Counties.

There is a School Chapel, large swimming bath, gymnasium, carpenter's shop, eight racquet and fives courts, 20 acres of beautifully situated playing fields, &c., and as a proof of the favour extended to the School under the present regime.

The NUMBERS have RISEN from 22 to OVER 150.

A special feature of the work is that of Preparing Boys in a Junior School for the larger Public Schools.

Since 1882, Six Scholarships have been won at Winchester and Marlborough by Newton Boys, and the work in the Examination all round has been quite up to this standard. Owing to its situation, the College has been able to render great assistance to delicate boys, and the highest references can be given on these points. Special Classes for Woolwich and Sandhurst.

A list of honours for the year (including a first-class at Oxford) will be sent on application to the HEAD MASTER. £400 given yearly to Scholarships.

MR. J. DALLIN PAUL (for 7 years Naval Instructor H.M.S. BRITANNIA), prepares a Limited Number of Candidates for NAVAL CADETSHIPS. — Address, Southfield Mount, Paignton, South Devon.

CLIFTON HIGH SCHOOL for GIRLS, BRISTOL.

PRESIDENT OF THE COUNCIL.
The Very Rev. The DEAN of BRISTOL.
VICE-PRESIDENT.
The Rev. J. M. WILSON, M.A.,
Head Master of Clifton College.
HEAD MISTRESS—Miss WOODS.

The THIRD TERM of 1884 will begin on SATURDAY, September 20.

Application for admission may be made to the Secretary, at the School, or the Hon. Secretary, G. H. WOLLASTON, Esq., 24 College Road, Clifton, Bristol, from either of whom information as to Boarding Houses may be obtained.

CIVIL SERVICE and ARMY EXAMINATIONS.

Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA; also special Classes for the STAFF COLLEGE and Promotion Examinations. EIGHTY-THREE successes in 1882.

ONE HUNDRED and FIFTY-ONE in 1883, viz.:—

SANDHURST:—Twenty-seven.

WOOLWICH:—Five.

MILITIA COMPETITIVE:—Thirty-four Commissions obtained by Pupils.

MILITIA LITERARY:—Eleven.

SANDHURST PRELIMINARY:—Nineteen.

STAFF COLLEGE:—Twelve.

PROMOTION EXAMINATIONS:—Forty-two.

COOPER'S HILL:—The only one sent up.

Details of the above have already been advertised.

1884.

MILITIA COMPETITIVE, March:—Thirty-six, viz.:—3rd, 5th, 6th, 9th, 10th, 15th, 16th, 18th, 19th, 22nd, 27th, 28th, 34th, 35th, 36th, 39th 41st, 42nd, 43rd, 45th, 47th, 48th, 52nd, 55th, 57th, 58th, 59th, 60th, 61st, 65th, 66th, 69th, 71st; and Cavalry, 2nd, 4th, and 9th.

MILITIA LITERARY, April:—FIRST, 3rd, 4th, 22nd, 29th, 32nd. Being all sent up. There has been no failure in this examination since April, 1881.

JULY.

33.	Major M. Churchill, 2nd Northampton Regt.	2045*
35.	Capt. E. R. Evans, 1st Batn. Royal Welsh Fusiliers	2008*

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST and WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomas), Major LENDY continues to RECEIVE Candidates. He has already passed 1,300 Pupils, and of the last twenty he sent up to compete fifteen were successful. Sunbury-on-Thames.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

JERSEY LADIES' COLLEGE.

UNIVERSITY DISTINCTIONS. — Honours have been taken by the Pupils in the London and Cambridge University Examinations, and in those for the Brevet de Capacité (Paris).

Fifteen Resident Mistresses, Members of Newnham Hall, Cambridge, the London University, or Diplomées of the Académie de Paris and Conservatoire de Stuttgart.

School Fees:—Three to five guineas per term; boarding fees, eleven guineas per term. Reduction for sisters and Clergyman's daughters. No charge for Books and Stationery.

For particulars apply to the LADY PRINCIPAL, Ladies' College, Jersey.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and SEVEN CADETSHIPS were obtained (one Woolwich, six Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of NINE successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful.

The general score now amounts to ONE HUNDRED AND FIVE SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS HOPE HOUSE SCHOOL, SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS. — Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

ARMY EXAMINATIONS.—PREPARATION for WOOLWICH and SANDHURST in the Modern Side of Derby School. Fees £70. Sons of Officers £60. Lists of successes and of Scholarships tenable at School can be obtained from the Rev. WALTER CLARK, B.D., the School, Derby.

THE GROVE COLLEGE, ADDLESTONE, SURREY.

A School of the first-class for the Sons of Gentlemen, particularly of Military and Naval Officers.

A Special Class in which boys are prepared for Service Cadetships, according to the Admiralty Regulations for the Britannia candidates. Success guaranteed in ordinary cases. Inclusive terms for this class, eighty guineas a year.

Only forty-five minutes from London.

Prospectuses and References as to standing and success from Principal, Rev. SAMUEL T. EALES, M.A. D.C.L

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations

---

3rd.	Fred Theobald	3546
December, for Woolwich, all four Candidates, viz.:—		
11th.	H. Harvest	6098
48th.	C. Hill	4175
58th.	N. Pritchard	3739
59th.	F. Ravenhill	3697
December, for Sandhurst, with seven Candidates.		
2nd.	(University) A. Robeson	6205
11th.	(Cavalry) W. Basevi	4225
94th.	Henry Were	4436
March Competition, with three Candidates.		
26th.	J. Wetherall	1854
April Competition, again all four Candidates, viz.:—		
5th.	F. Logan	3248
9th.	F. La Terriere	3061
25th.	E. Rawlins	2376
34th.	A. Barrett	1900
July, for Woolwich, with two Candidates to "qualify" only.		
65th.	J. Fife	3509
July, for Sandhurst (published August 15, 1884), with seven Candidates.		
35th.	R. Cockerill	6429
81st.	R. D'Aeth	5928
97th.	A. Housden	5780

Eight "Preliminary" Candidates passed.

For fuller particulars as to the encouraging scores of the few unsuccessful candidates, &c., address Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

Station and Telegraph Office, Twyford, Berks.

LONDON INTERNATIONAL COLLEGE,

Spring Grove, Middlesex, W.

Founded under the auspices of the late Richard Cobden.

French and German taught to every Boy.

Among the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased from a Special Fund in the case of those requiring it.

Three restricted to Sons of Officers with an additional reduction; also LEAVING SCHOLARSHIPS, tenable at SANDHURST, WOOLWICH, &c.

The NEXT TERM BEGINS THURSDAY, September 18.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

ARMY and UNIVERSITY EXAMINATIONS.—Mr. R. C. DAVIES, M.A., the Wood House, New Southgate, N., has VACANCIES. Three candidates were sent up for the July Sandhurst Competitive, and all were successful, two of them having twice failed previously, and now passing 40th and 41st. Large grounds and cricket-field. Average number of pupils, ten.

THE GRANGE, COWES.

HEAD MASTER—Rev. ARTHUR WATSON, M.A., Graduate in Honours, Cambridge; assisted by two resident Graduates, and other Masters.

Pupils receive individual attention in the necessary subjects of their Examinations.

In July, a Candidate, just 16, was successful for Woolwich.

For Naval Cadetships, 1st, 3rd (three times), 4th, 5th, &c., places have been gained.

THE WIDOW of a GENERAL OFFICER wishes highly to recommend a delightful HOME on the Coast of France for INDIAN CHILDREN in which several of her family have been well managed, kindly dealt with, and very happy during a long course of years. Liberal terms, highest references exchanged.—Address, "O. R.' 55 Parliament Street.

ARMY EXAMINATIONS.—PREPARATION in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

DOVER COLLEGE.—SEVEN ANNUAL ENTRANCE SCHOLARSHIPS worth from £40 to £10 10s. a year. There are also Scholarships of £50, tenable at the Universities. NEXT TERM will COMMENCE September 17th. Board, £40. Tuition Fees and College Dues from 24 to 30 guineas.—For particulars apply to Rev. W. BELL, M.A., Head Master; or, W. KNOCKER, Esq., Hon. Sec.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

THE MANOR HOUSE, LEE, S.E.—SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following SIXTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

Name.	Total No. of Marks.	Examination.	No. in Order of Merit.

THE MANOR HOUSE, LEE.

AUTUMN TERM COMMENCES AUGUST 25. The NEXT TERM for MILITIA OFFICERS reading for the MILITARY COMPETITIVE COMMENCES OCTOBER 14, 1884.

ARMY EXAMINATIONS, 1884.

Dr. CHETWODE CRAWLEY'S LIST:—

SANDHURST, July, 1884.

	Marks.		Marks.
Walpole (1st)	8348	MacGusty	6355
King	6191	Hamilton-Jones	6153
MacDonnell	6057	Crosbie	6021
Wilson	5819	Ford-Hutchinson	5772

Humphrey (I. Cadet)... 5349

Woolwich, July, 1884.		Mil. Officers, April, 1884.	
Crosbie (6th)	6107	Annesley	2019

*** Walpole's score is by far the highest ever made for Sandhurst. Three times within three years first place at Woolwich and Sandhurst Examinations has fallen to Dr. Chetwode Crawley's pupils.

In previous Academical year, 17 passed for Woolwich, Sandhurst, &c; 7 for Class I, &c.; 18 for Royal Irish Constabulary cadetships, besides 42 miscellaneous Examinations.

W. J. CHETWODE CRAWLEY,
LL.D., F.R.G.S., F.G.S., &c.,
Queen's Service Academy, Ely Place, Dublin.

ESTABLISHED 1852.—Over 1,000 Pupils successful.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second.—PUNDIT, 21 Beechholme Road, Clapton, London.

RAMSGATE COLLEGE.

Established as Chatham House, 1809; Rebuilt, 1878 to 1882.

WARDEN AND CHAIRMAN OF THE COUNCIL,
The Rev. E. GRIPPER BANKS, M.A. Oxon.
HEAD MASTER,
E. C. MUSSON, Esq., M.A., Camb., F.G.S.
(Late Head Master of the Grammar School, Ashford.)

The College, standing in 17 acres of enclosed park, has unsurpassed Grounds and School Buildings, including a Private Chapel, Chemical Laboratory, Workshops, Gymnasium, Bath-rooms, Isolated Infirmary, Cubicles, Private Studies. The sanitary arrangements have been pronounced, by eminent engineers, perfect.

GENERAL SCHEME.—To provide for Sons of Gentlemen, in a climate especially suitable, a first-class education at a moderate cost. School system framed to combine the advantages of a Public School with the individual attention of a private tutor, so that all the boys—and not only the more clever—are made to work.

COURSE of INSTRUCTION.—To prepare Pupils for the Universities, the Services, the Professions, Mercantile Pursuits, and specially for Scholarships, at the Universities and the Hospitals, the India and Home Civil Service, entrance to the Legal and Medical Professions, Matriculation, and the further Examinations at the London University.

GREAT SUCCESS has been obtained for Woolwich and Sandhurst. The Head Master, who has had long and most successful experience, receives into his house a limited number of pupils who need special aid and attention.

HONOURS GAINED are many and varied, and include in the present year 1st Class in Lit. Hum. at Oxford, a high Wranglership at Cambridge, entrance to Cooper's Hill, Associateship at the R. School of Mines. Sandhurst entrance direct.

MODERN DEPARTMENT.—Great importance is attached to Science, and to Modern Languages, which are taught colloquially as well as grammatically, and by foreigners.

JUNIOR BRANCH, for BOYS, from seven upwards, in separate wing and with special supervision, such as is necessary for boys leaving home for first time.

The NEXT TERM will BEGIN September 20.

For Prospectus, &c., apply to the SECRETARY of the GOVERNORS of the PROPRIETARY COLLEGE at RAMSGATE (Limited).

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

Foreign Money exchanged
Race, Field, and Opera Glasses. Nautical Instruments.
English and Foreign Watches & Clocks.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179 of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactorily."

Sole Address—3 THE HARD, PORTSEA.

J. HOARE and CO.,

MILITARY TAILORS,
(For many years with Messrs. Hill Brothers),
16 JERMYN STREET, S.W.
Three doors West of Regent Street.

Exceptionally Qualified Cutters.
UNIFORMS—CIVIL, NAVAL, and MILITARY.

"IT SAVED MY LIFE,"

"For the Fever had obtained a strong hold on me. In a few days I was quite well."—*Extract from letter of C. Fitzgerald, Esq.*, when Correspondent of the *Manchester Guardian* in Albania, referring to

LAMPLOUGH'S
PYRETIC SALINE.

THE BEST REMEDY FOR NUMEROUS COMMON AND OTHER COMPLAINTS. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them, it being a preventive and cure of Cholera and preventive of Dysentery.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, September 6, 1884. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

CORRECTED UP TO SEPTEMBER 6.]

STATIONS OF THE BRITISH ARMY.

[Where two places are mentioned, the last-named is that at which the Depot is stationed.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* not *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, payable in advance, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE question of "Army Reform" has occupied the public mind for a very lengthened period, but still no favourable results seem to have followed. According to the assurances of those in authority, who make themselves heard on the occasions of City banquets, &c., the British Army is at the present moment in a high state of efficiency; but among the working units of the military machine, within the Army itself, a wide-spread and general opinion exists that there are grave reasons for doubt as to whether any material benefit has resulted to the service consequent on the numerous attempts that have been made during the past fifteen years to improve its organisation. Among a crowd of Magazine articles and pamphlets that have been published on this subject, we find no difficulty in recommending the perusal of the latest.* It is evidently written by one who thoroughly understands his subject, and still more evidently by one who, while speaking openly and without reservation, marshals an array of facts in support of his theory which can scarcely fail to startle the most uncompromising champion of the so-called "Army Reform." Having rapidly glanced at the political events bearing on that question from the period of the General Election which took place in 1868, the writer of the pamphlet under notice refers to the vast number of "ponderous volumes" which were issued from the War Office, under the titles of "Revised Army Regulations" and "Army Circulars," and which may be taken at an average of 220 per annum. When speaking on the question of "Short Service" he thus mentions an incident which will always be regarded with interest:—

> "Short service, however, received an unexpected and very damaging blow, which it was not in the power of the reformers to conceal,—in a public speech made by Sir Frederick Roberts at the Mansion House early in 1881. The high authority of the speaker, and the account which he gave of the short-service regiments which he had commanded in the Afghan campaign, produced an effect on the public mind but little to the tastes of the War Office apostles of the system, the most prominent of whom, Sir Garnet, now Lord, Wolseley, thought it necessary to take up the cudgels in its defence in an article published in the *Nineteenth Century*. In this enterprise, however, as most people competent to judge thought at the time, he had very indifferent success; indeed, he did himself and his cause much more harm than good."

In concluding some remarks on the Airey Committee, "An Officer" refers to the question whether the new system could be modified and adapted to the very peculiar purposes for which a large part of the British Regular Army is required, and observes that the Duke of Cambridge seems to have struck the key-note with regard to this, when, at the close of his evidence, he made the following statement:—

> "In answering questions put to me, I have spoken on matters of fact, and not of opinion; but I feel that although I accepted the necessity for the introduction of the short-service system at the time it was brought into operation, it was impossible to know exactly how it would work; and as we now find various difficulties arising out of it, I have stated them, because any system must be considered as tentative until it is found to succeed."

"An Officer" continues:—

> "From the year 1870 to the year 1883 it was a tentative system. Up till the last-named date, it had certainly not been 'found to succeed;' on the contrary, it had proved itself, beyond all question, a failure. It has now been materially modified; or, to speak more correctly, it has been withdrawn as the sole system; while the old system of Long Service, with pensions, has been reverted to concurrently with it. It may be hoped that this combination may at last begin to show some symptoms of being 'found to succeed.' Some such arrangement, it must be allowed, would seem to be the most promising in the case of an Army of which more than half is continually on service in distant parts of the globe. But what is to be particularly noted is that the system must still 'be considered as tentative,' and that it is yet a great deal too soon for Lord Wolseley and the other reformers to go forth proclaiming it to the world as one which has actually proved successful. Meanwhile, does the history of Short Service, since its institution in 1870, afford proof of the wisdom of those reformers, or does it not? Was it a sign of wisdom, simply because short service had been seen to succeed in Germany, where there is a conscription and no foreign service, to rush incontinently into that system, and apply it as a hard-and-fast measure to an army whose circumstances are so totally different from those of Germany—its adoption involving, moreover, as we are told it did, the introduction of various other 'schemes' of unsettlement wholly repugnant to the traditions of our service? Was it, or can it ever be, a proof of wisdom to throw over entirely an old-established system in favour of a new one, when, as the Duke of Cambridge puts it, 'it was impossible to know' how the new one would work? But a sufficient, and perhaps the most effectual possible, proof that in this the reformers were not wise, but unwise, is the fact that, at the end of fourteen years, they have been absolutely compelled to go back again, to a great extent, to the old system of long service with pensions. In the face of this fact, it must be allowed that those of them who would endeavour to persuade the public that short service has been a success—whatever is to be said of their wisdom—are certainly not lacking in the quality of effrontery."

In considering the question of "Measures Consequent on Abolition of Purchase," "An Officer" points out how the second great step in Army Reform, taken by Mr. Gladstone's first Administration, was the abolition of Purchase; and observes how seldom it is that a question of State policy of such considerable importance has ripened so rapidly as this did. The question was allowed to lie dormant for a considerable time till 1870," when Mr. Trevelyan awoke, and "went on the stump" in the provinces with the Purchase Question; his mission, however, came to an untimely end, when on February 16, 1871, Lord Cardwell sprung a mine by announcing his intention to include the abolition of Purchase in the programme of Army Reforms. The history of this measure and its hard struggle for existence are too well known to require comment; but the great question is, What is to be the outcome of all this, so far as the British officer of the future is concerned? This question is, to a great extent, answered by the following observations:—

> "What we have been dealing in is history—the history of some fourteen or fifteen recent years. Throughout that period, less or more, the British officer has been kept in perpetual hot water. We have seen how those who have had his destinies in their hands, when they abolished the old order of things, were simply taking a leap in the dark, having no clear idea as to what should replace it. Calling in the aid of Committees and Royal Commissions, they proceeded to experiment, now in this direction and then in another—to settle, unsettle, and resettle everything. While on the one hand the sums of public money they expended have been enormous, on the other hand they have at times gone near to establishing among the officers of the Army something akin to a Reign of Terror, it being seen that they did not hesitate, in the supposed "interests of the Service," to set aside the rules of fair dealing between man and man. Now, are the results achieved, looking to the present as compared with the former state of things, commensurate with all this expenditure and turmoil? Must their proceedings during these fifteen years past be accepted as proof of the unerring wisdom and sagacity of our administrators and organisers? Do those proceedings afford ground for unswerving confidence in their administration for the future? The reformers themselves, as a matter of course, would answer all these inquiries with a ready affirmative. Never has any one of their measures lacked, on its first appearance, either the cocksure promises of boastful advocates, or applause of its wonder-working properties in inspired *Times* articles. When the measure has collapsed, the short memory of the public as to such matters called for little else than the maintenance of a discreet silence, so far as that public was concerned; but the collapses have been so frequent that the faith of closer observers in the skill of those practitioners who have charged themselves with the cure of the diseases they have been so ready to discover in the constitution of the British Army, has somehow or other been seriously shaken."

Before closing this notice, we must refer to the author's observations on the "Territorial Scheme," which no doubt will be considered interesting and pertinent. He thus writes:—

> "Now, as to this Territorial Scheme, even the small clique of opinionated men who foisted it upon the Army would themselves have admitted that nothing could justify it except the achievement of some great and important result. Three years have passed, and is there any such result to be seen, either accomplished or apparently probable? Most assuredly not. We have not observed that even its authors have as yet ventured to claim for it any really important success as an accomplished fact. There has been, indeed, some occasional cackling over an increase, here and there, in the number of Militiamen who have volunteered into their affiliated Line battalions, doubtless a very good object, so far as it goes, but one as to which it is sufficient to say that it might have been fully accomplished without any such drastic measure as the formation of territorial regiments. But the measure as a whole—like so many other War Office measures which went before it—is beyond all question a hopeless failure; and, being such, it was not merely useless, but most pernicious. That it produced intense irritation, as well as confusion, nobody has denied, while there has been no compensating advantage to show."

And again:—

> "The 'Territorial regiment,' as such, is in most cases, and will ever remain, an absolute sham and delusion, as can easily be shown. Take the Scotch regiments, which have been already referred to, for instance. Surely if any regiments are to be Territorial, these, with their separate nationality and distinctive dress, ought to be. As a matter of fact, they are now rapidly going to utter ruin, so far as—not merely their Territorial, but—their national character is concerned, for they have to be recruited by drafts from the South of England, or wherever else throughout the Empire men can be raised; and it may be confidently predicted that the time is near at hand when, again, 'something must be done' to prevent these 'Highland' regiments becoming too entirely ridiculous illustrations of the *lucus a non lucendo* principle. One of them may even now be selected as a specimen of the 'Territorial regiment' which seems to reach the acme of grotesque absurdity. Its Line battalions were formerly famous as the 91st and 93rd, but it has now got for a 'Territorial title' (in which Lord Wolseley expects it to take infinitely more pride than in the old numbers) 'The Princess Louise's Argyllshire and Sutherlandshire Highlanders.' From Argyllshire and Sutherland it is safe to say that it does not draw half-a-dozen recruits in the year, and perhaps this may be the reason for its Territorial head-quarters being placed at Stirling, some hundred miles from either of those counties; while the Militia battalions of this regiment of 'Highlanders' are those of the purely Lowland counties of Renfrew and Stirling, which, like Argyll and Sutherland, are separated from each other by a considerable distance. . . . . . But, after all, these overt proofs of failure in some of its most vital points were not required to condemn this Territorial Scheme. Even if it had succeeded better than it has done, or is ever likely to do—unless it could have been shown to be absolutely necessary in the first place, as well as successful—it would stand condemned as a wanton removing of the ancient landmarks. Nothing could better express this condemnation than the words of H.R.H. the Duke of Cambridge, already quoted, and with which we take leave of the 'scheme'—'It is not necessary. All that is required can be done without it, and therefore, if that is the case, why do it?'"

---

* *Fifteen Years of Army Reform.* By an Officer. London: Wm. Blackwood and Sons.

And in summing up his case against the "reformers," he writes as follows:—

> "Such, then, have been the inadequate, unsatisfactory, and even baneful results which are nearly all that some fifteen years of incessant innovation are now able to show. Be it understood that it is not pretended that, when the period in question began, there was no need of 'Reform' of any kind, or that the authorities properly charged with the administration of the Army ought to or could have sat still and done nothing. What is maintained, and is believed to have been proved, is that Reform, having fallen into the hands of a small clique of opinionated men, mostly *doctrinaires*, has been in some cases too violent and sweeping, and in others has gone in wholly wrong directions,—wantonly breaking up cherished traditions, creating a vast deal of unnecessary disturbance and discontent, and doing more harm than good. For, while these eager innovators have been wasting their energies upon things which profited not, but had far better been left alone—such as the territorial regiment chimera and the mobilisation vagary—other matters of practical importance and real urgency, wherein regulation and reform would be eminently beneficial, have been almost entirely neglected. Of these we shall only specify the drill and tactics of the army; the armament and equipment of artillery, cavalry, and infantry; the training the troops in the use of their arms; and the system of supply and transport in the field,—all of which remain at this day in an unsettled and unsatisfactory state. But, it will be asked, Of what use, after all, can it be thus to chronicle by chapter and verse the history of fifteen years of failure and fiasco? Why not let it sink into the speediest possible oblivion, as doubtless the authors and abettors of those fiascos would themselves desire? Certainly, if the only object were to discredit the school of army reformers as a set of bungling busybodies, any record of their doings would not be worth the trouble. But there are much more adequate reasons to offer. The state of the Army is a consideration of the most vital importance; the very salvation of the country may be said to be involved in it. Now, we are told that public opinion is for the future to be a main factor in the management of the Army; if so, it is clearly desirable that this should be an enlightened opinion based upon knowledge, and not a bogus public opinion, manufactured by interested parties to suit their own purposes. If the Army is hereafter to be a people's army, the sooner the people come to have some real understanding of how it is administered the better. It may, indeed, be permissible to doubt whether the Army of a democracy is ever, in the nature of the case, likely to be as perfect and efficient a weapon as that which is under the control of more despotic forms of government; but in any case, it is manifest that everything will depend on the soundness or otherwise of the system of army administration which is established. Now, the present state of affairs in England is this: that at the end of fifteen years' administration of a certain sort, notwithstanding the annual expenditure of about sixteen millions of money, the country finds itself without anything like an efficient army after all. It seems high time, therefore, that the country were beginning seriously to inquire whether the system of administration which has been pursued is the proper one or not, and whether, all the while the War Office has been so busy in reorganising the Army, what stood by far the most in need of reorganisation may not have been the War Office itself."

In closing this ably written pamphlet, we have no difficulty in stating that it deserves attentive perusal. While exposing in a masterly manner the humiliating position which the British Army occupies at the present time, it points out in forcible language how its highly-prized traditions have one by one been destroyed altogether or cruelly mutilated. Whoever it is that writes under the title of "An Officer," may regard the effort he has thus made to awaken attention to the present position of our Army with no small amount of gratification. The task was an invidious one; but it has been performed, no doubt, with satisfaction to himself and with advantage to his readers.

THE Royal Marines have been employed so often of late years to fight our battles on shore, that it is not astonishing to find them now ordered to take part in the Nile Expedition. No service can boast of possessing a finer body of men, or one in which every man can so readily adapt himself to the requirements of war both *per mare* and *per terram*. Reinforcements are being sent out to the battalion in Egypt from the various Divisions, but, as yet, no General Officer of Marines has been appointed to command what will shortly be a brigade of Marines as strong as any Infantry brigade the War Office can put into the field. It is not as yet by any means clear, however, what the work is that the Government intend the Marines now in Egypt to perform; but, be that work what it may, either in Egypt or the Soudan, it is bound to be purely of a Military character, and the Marines should, consequently, be under the command of one of their own Brigadiers. We may also rest assured that however arduous the task imposed on the Marines, it will be thoroughly well carried out. That the Marines are, now-a-days, employed on every opportunity side by side with the Infantry of the Line is the best tribute that could be paid by the authorities to their efficiency. They are always the first to be selected and the first to start when any sudden emergency necessitates the presence of an English armed force abroad. This is due to the splendid organisation of the corps, which enables it to embark a strong battalion of seasoned soldiers within a few hours of its being ordered off. Hence, whenever difficulties have arisen, the first thing done of late years has been to send abroad a battalion of Marines. But if the Marines are to be thus employed at all times in our small wars, it is surely time that steps were taken to increase the strength of the corps. The Marines, as a matter of fact, are the only corps which are constantly kept up to their full strength, and whose ranks are filled by veteran, able-bodied soldiers of long service. Hence they can at a moment's notice supply a battalion of thoroughly trained, seasoned, well-drilled, and disciplined troops. The Marines, from their gallant Adjutant-General to the youngest recruit, have no other desire than to be employed on active service, and are not of a disposition to grumble at the honourable position assigned to them in the van of our military expeditions, occupying at all times as they do the post of danger. Our desire is not that they should be less employed, but that the nation should learn their real value, and fully appreciate it. When this is the case, the public will not fail to insist on the Marines receiving proper recognition and rewards for their gallant services in the field. Hitherto, as is well known in Naval circles, they have occupied an unsatisfactory and most anomalous position,—something between the Navy and the Army. Their interests have never been fairly protected. They are nearly always under the absolute command of Naval officers, who generally, though unconsciously, are somewhat prejudiced against them. When on active service they are never commanded by one of their own General Officers, being at all times brigaded with Regulars. Here reform is absolutely necessary, but until a General Officer of Marines is given a seat at the Board of Admiralty, we fear that nothing will be altered. The pressure of public opinion is required to bring about the only change that can possibly be of any benefit to the Marines. It is to be hoped, therefore, that both Lord Sidmouth and Mr. Hopwood will renew their efforts in the House of Commons, when we sincerely trust that they will meet with more support from Members of Parliament than they did last Session. A fair discussion of the disadvantages under which the Marines labour is required, both in Parliament and in the provinces; and when this does take place, we may hope at no distant date thereafter to see justice done to the Marines. The circumstances under which the Marines were first sent out to Egypt should not be forgotten. It is of itself an example of the disadvantages they suffer under. They were not sent out originally as a battalion, but in the same manner that they were sent abroad in 1882, ostensibly to reinforce the detachments serving on board the ships of the Mediterranean Fleet. For months past, however, they have been hulked at Suakim, doing duty at Suez, or quartered at Port Said; and now that hostile operations have been decided upon on a scale of some magnitude, and troops have been assembled to march to the relief of General Gordon under Lord Wolseley, it is to be feared that the Marines will again be brigaded with other corps under an officer of the Army, while many a gallant Marine officer is left chafing in idleness at home. This was what happened in Zululand and in the last Egyptian Campaign; and while all the world resounded with praises of the gallant deeds of the Marines, they were not allowed to be led by one of their own Generals, and their actual commanding officers had to be carefully selected with reference to seniority to avoid their being able to take precedence of some Naval or Military officer in the field. Surely it is high time that such a state of things should cease to exist, and that the position of the Marine as a soldier should be fully recognised!

THE Memorandum setting forth the new system of Infantry Attack, to which we called attention recently, is in every respect so remarkable a document, and, if finally adopted, will effect such drastic changes in Infantry tactics, that we feel under no necessity to apologise to our readers for asking their further consideration to a subject of such enormous importance. It cannot be too clearly understood that the new system is no half-measure of reform, but is a complete departure from the path which we have hitherto been following. The vexed question of strong, as opposed to weak, companies is at last settled. The soundness of the Continental system of Infantry tactics is at length recognised; the weakness of our own is admitted. The division of the battalion into double-company columns, which are to find their own skirmishers, supports, and reserves, which are to be self-supporting throughout the attack, and which, in short, are to be tactically independent bodies, working under separate leaders; what is this but the German system pure and simple, disguised, it may be, under English forms, but none the less followed to the very letter in all its essential characteristics? We are not questioning the expediency of the change; on the contrary, our only regret is that it was not made long ago. We claim to have been among the first to recognise the altered conditions of modern battles. Formerly the battalion was the tactical unit, as it still remains the administrative unit. It was brought up to the enemy as a compact and integral body, working under the direct command of its leader. This is no longer possible. The commander who seeks to direct his battalion with his own voice and hand after it has been let loose for the attack against trained troops armed with breech-loaders, finds himself engaged in a hopeless task. We must have smaller units. The rôle of the battalion leader is quite as important as ever; but he works in a different way. In place of directly commanding an integer, he must seek to indirectly control the several fractions into which the integral body becomes divided. It will be by instruction and training during peace, almost more than by actual command during the fight, that his leadership must be exercised. He must endeavour to train up an efficient body of officers and non-commissioned officers, each one having his own definite place and work in the chain of responsibility, which extends from the battalion chief down to the section leader. He is no longer a mere drill-master; he has become the instructor, the trainer, the organiser of his battalion. This is what we meant when we said that organisation must now be substituted for drill. We say we must have smaller units. What should be their size? By some it is thought that the English company of 100 men is the proper fighting unit. Lord Wolseley certainly held this opinion up to a very recent date; and his views must have undergone a rather sudden change, if, as is reported, he now actively supports proposals which, in a speech delivered at the United Service Institution in May, 1883, he described as "wild" and "mad." It would, it is true, be quite possible to apply the principle involved in General Newdigate's Memorandum, and at the same time preserve the individuality of the existing company. Instead of having four columns of attack, each column being composed of two companies, we might have eight columns of attack, each column being composed of one company (in column of sections). The first section would be extended as skirmishers, the second section would be in support, the third and fourth sections in reserve. This system of attack has often been tried, but is not generally recommended. It carries the principle of decentralisation to an inconvenient length. The orders of the battalion commander would require to be distributed by him directly among too many subordinates. The eight small columns of attack, working together co-equally, would be handy, no doubt, as far as their own commanders are concerned, but would be wanting in cohesion and unity of aim, and there would be the risk of their losing touch of the battalion leader at the most critical period of the fight. For these reasons the double company of 200 men is thought to be the more efficient tactical unit. Lord Wolseley has apparently been won over to this view by General Newdigate, who has made a special study of Infantry tactics, and who has long been an advocate of the strong company organisation, which every great military Power has adopted with the exception of England. His lordship has always founded his objections to the strong company on the ground of the difficulty which the commander would experience in controlling it. As a matter of fact, however, under the system proposed in General Newdigate's Memorandum, it will be easier to control a strong company of 200 men, working in deep formation on a narrow front, than it now is to control a weak company of 100 men, working (according to the system laid down in our drill-book) on a broad front. Here is the testimony of a regimental officer to the truth of this assertion. Colonel Crichton, of the Grenadier Guards, wrote as follows in 1879, when the controversy as to the respective merits of the strong and weak company was at its height. "As a commander of a company, my company is as a rule extended to cover the front of the half-battalion, about 120 yards. I have very strong lungs, I have very smart non-commissioned officers, but I have never been able to control that front properly as a captain. In the larger company, let me extend a quarter of it, and I will control it. Let me reinforce it by my own men, and I will control them. Let me reinforce it by the rear half-company (which I would have commanded by a second captain to my company), and I would control that too. I would not reduce the officers—we want officers and non-commissioned officers in the same proportion to the numbers as now; but if with such officers I had command of a company of, say, 200 men, as a captain in time of peace, I believe I should be able to command them thoroughly well on active service." We have dwelt at some length with this question, because it would be unwise to minimise the effect which this new system can hardly fail to have. It is, we repeat, simply the German system under another name. The proposal is at present tentative, but if finally adopted it will be necessary to carry out the change to its natural conclusion by placing the double-company under one head, both in barracks and in the field. It is a principle of modern military organisation that the administrative and tactical unit should be identical. The fundamental conception of the new system is that the leader of each of the columns of attack should know his men, and accustom them to work under his command, and under that of his subordinate officers. It will be impossible for this to be the case unless his men are taught to follow his leadership,—not merely occasionally at drill, but at all times, both in and out of doors. There would be no difficulty about adapting the new proposal to existing circumstances. We should have each of the four Majors of the battalion commanding a strong company of 200 men, with a Captain as second-in-command, and with four Lieutenants—each in charge of a section of fifty men. A company of this size would be strong enough for separate instructional parades under its own officers, and we should cease to hear of those complaints, which are now so true and so common, that the present companies of 100 men are too weak for independent tactical training. We must now conclude our remarks, and while we congratulate the authors of the new system of attack upon the success of their efforts, we venture to remind them that tactics and organisation go hand in hand together, and that changes in the one demand corresponding changes in the other, even though such changes may necessitate the complete remodelling of existing institutions.

The Duke of Edinburgh struck his flag on board the *Minotaur*, at Spithead, on Monday morning, and proceeded to London on a month's leave.

The Channel Squadron returned to the home ports on Sunday, the weather division, under the Duke of Edinburgh, proceeding to Portsmouth, the lee division, under Rear-Admiral Whyte, to Plymouth. The ships will be given a month in which to refit, but as the engines of the *Minotaur* are to be compounded, that ship will be replaced by another ironclad.

Vice-Admiral Sir William Dowell was to leave Foochow on Tuesday for Hong Kong. From this fact it may be inferred that the French Squadron, under Admiral Courbet, is not expected to again visit the Min River.

From Devonport the report reaches us that a rumour is there current to the effect that Sir W. Houston Stewart will shortly relieve Sir A. C. Key as First Naval Lord.

After lying in a corner of the large basin in Portsmouth Dockyard, and nominally ready for sea for some five or six years, the *Dreadnought*, on being required, is suddenly discovered to be deficient in some arrangements for working her coal-bunkers. It is a pity that, with all our elaborate "Steam Reserve" machinery, we cannot manage to keep a single vessel ready at a week's notice. The *Devastation*, *Rupert*, *Bacchante*, *Volage*, and *Cordelia*, in the same basin, are all supposed to be ready for the pendant; but are they?

The Earl of Northbrook and Lord Wolseley arrived at Alexandria in the *Iris* on September 9, and proceeded to Cairo, where Lord Northbrook was received in audience by the Khedive.

It would surely be an improvement if officers who are placed on full pay for the special purpose of going through a course of instruction were to be exempted, unless specially ordered, from sitting on courts-martial, instead of being compelled to have recourse to the stratagem—necessarily winked at by the Port Admiral—of applying for one day's leave whenever the court-martial signal is hoisted.

We hear that the "Old Russian" movement is spreading to the Russian Navy. It is only a short time ago that the uniform of the Army was changed to the old Russian style, and rendered totally distinct from the types of Western Europe. It is now proposed to effect a similar alteration in the fleet, the seamen being provided with a short *kaftan*, fastened with hooks instead of buttons. The Russian press warmly approves of the proposed reform. In its opinion the present dress of Russian seamen is too similar to that of Western Europe. "It is the first essential," says one Moscow paper, "that our seamen should look like Russians; it is a secondary consideration that they should look like seamen. There is no reason to believe that the present dress worn by European seamen is the best that could be devised, and we are persuaded that an alteration could be effected assimilating it with the Russian national costume, without interfering with the comfort and efficiency of the wearers."

Lord Walter T. Kerr, whose period of service in command of the Medway Steam Reserve expires in November, will, it is said, be given the command of the *Conqueror*, which will be ready for the pendant about that time.

Commander R. B. Maconochie has passed a most creditable examination at the Royal Naval College, Greenwich, winning two prizes; but the rules of the service debarring an officer from taking more than one prize, he was forced to resign that for foreign languages to Captain Skipwith, R.M.L.I., who came second on the list with some 50 marks less than Commander Maconochie.

The Admiralty have decided, we hear, to appoint Vice-Admiral John Corbett, C.B., Chief at the Nore.

Rear-Admirals Sir Walter Hunt-Grubbe, Edge, and Graham are spoken of at Devonport as competitors for the Admiral Superintendentship of that dockyard, on Rear-Admiral Curme vacating the appointment in February.

We learn from the Admiralty that a telegram has been received from Vice-Admiral Dowell, at Foochow, reporting that two shells were fired at H.M.'s gunboat *Zephyr*, on the 6th inst., when coming up the Min River from the Chinese forts, under a misapprehension. A further telegram, dated September 8, reports that the Chinese authorities have offered an apology and reparation. Navigating - Lieutenant Godfrey G. Hubbard, and a seaman whose name has not transpired, were wounded; both are doing well.

Major T. E. Hungerford and Quartermaster E. A. Syms, of the Plymouth Division, R.M.L.I., have been ordered to proceed to Egypt for duty with the Royal Marine Battalion. There are two quartermasters attached to this battalion, one with the Head-quarters at Suakim, and the other with the companies quartered at Suez.

Surgeon George J. Gray, R.N., son of Colonel T. B. Gray, R.M.L.I., was drowned while bathing at Stonehouse on Monday last. Mr. Gray was on the Retired List of his rank.

With regard to the four ironclads of the heaviest type that have been ordered for the Russian Black Sea fleet, we learn from Sebastopol that the *Tchesmé*, which is being constructed there, is a quarter finished, and the *Catharine the Second*, at Nicolaeff, one-third. The latter will be half finished by January next. As regards the third, the *Sinope*, commenced a short time ago at Sebastopol, about 400 tons of steel have, to use the Russian expression, "been put into position." The fourth ironclad is only now being taken in hand.

A committee has been sitting at the Royal Marine Artillery Barracks, Eastney, and the Royal Marine Light Infantry Barracks, Forton, to examine the forms and periodical returns in the several offices, with a view to a reduction of clerical labour, by recommending the abolition of what may be deemed unnecessary.

The respective advocates of the turret and barbette systems have now a good opportunity of comparing the points of their "particular vanities" in the matter of fighting-ships. The most recent vessel of each class—viz., the *Colossus* and *Collingwood*—are lying amicably "cheek by jowl" in the basin at Portsmouth; and though the turret-ship is, of course, in a far more advanced condition than her neighbour, the *Collingwood* has her gun-carriages placed in the foremost barbette, and a very good idea can be formed of the probable aspect of the whole structure when the guns are in position. There is a prevailing idea that the barbette system must necessarily entail considerable exposure of the gun's crews to the fire of small-arms. As a matter of fact, however, in the *Admiral* class they will be very fairly protected, both when loading and aiming; and only the "captain of the barbette"—if we may be permitted to coin such a rating in anticipation—will be exposed to any great extent, a drawback which is considered by many to be more than counterbalanced by the all-round view which he will command of the fight while others are suffocating below, in blissful ignorance of what is going on. It must be admitted that the *Collingwood* commends herself to the casual visitor as a fighting-ship in a more favourable light than the *Colossus*. There is a massive and formidable air about her, and a striking absence of "gingerbread" work, and her upper deck bids fair to be a far more roomy and satisfactory platform than the tortuous and sadly lumbered "flying deck" of the turret-ship, racked and shaken as it must not unfrequently be by the tremendous concussion of the huge guns almost beneath it. It appears doubtful whether a heavy shot striking close to the top of the barbette tower might not dent it so as effectually to "lock" the revolving-gun platform within, the clearance being something under a foot.

The regimental officers who have proceeded on Staff or regimental service to Egypt, for the Nile Expedition, will not be seconded.

Should the Duke of Connaught return to England in March next, giving up the command of the Meerut Division, Major-General Sir Herbert Macpherson will, it is believed, be transferred to Meerut from Allahabad, leaving the Allahabad Division open for the Duke's successor on the divisional staff, who will be of the British service. It is reported from India that considerable friction has arisen from the haste which led to matters of seniority and precedence being overlooked when appointments were made at home.

New rules have been published in India regarding the appointment of officers of the Indian Army and Staff Corps on the general and departmental staff of the Army. The following appointments are limited in tenure to five years:—Secretary and Deputy-Secretary, Military Department, Government of India, ditto for local Governments; also Accountant-General, Military Department, Controllers of Military Accounts, Commissaries-General of Bombay, Madras, and Calcutta, Judge-Advocates-General, ditto, Superintendent of Horse-breeding Operations, and Director of Army Remounts. The following offices must be vacated on promotion to the rank of general officer:—Deputy-Judge-Advocate of Bengal, Deputy-Commissaries-General of the three Presidencies, Military Secretary of the Punjab, and others. Officers of the Commissariat, Military Accounts Branch, and Judge-Advocate-General's Department will vacate on (1), succession to colonels' allowance, (2) promotion to major-general, or (3) attainment of 52 years of age; but these three last conditions do not take effect until January, 1887.

Captain Clough Taylor, 23rd Royal Welsh Fusiliers, has resigned his appointment as A.D.C. to the Marquis of Ripon in India.

The following is a list of officers still serving regimentally who were present at the first of our great victories over the armies of Russia in the Crimea on September 20, 1854, exactly thirty years ago:—

Cavalry.—Veterinary-Surgeon Harpley, Royal Horse Guards; Quartermaster Heffron, 8th Hussars.

Yeomanry Cavalry.—Lieutenant-Colonel Morrison, Denbighshire Hussars.

Infantry.—Colonel FitzRoy, Coldstream Guards; Major (Quartermaster) McBlain, Scots Guards; Colonels Harkness and Pocklington, 5th Foot; Luke O'Connor, V.C., 23rd Foot; Captain (Quartermaster) Nettles, 39th Foot; Lieutenant-Colonel Tucker, 68th Foot; Captain (Quartermaster) Lamb, Rifle Brigade.

Militia.—Lieutenant-Colonel Gordon, Lothian Regiment; Quartermaster Anderson, East Kent (the Buffs) Regiment; Lieutenant-Colonel Cooper, Royal Irish Regiment; Captain (Quartermaster) McLeod, Scottish Rifles; Colonel Aldridge, Sussex Regiment; Captain (Quartermaster) Reid, Derbyshire Regiment.

An official statement has been published in India showing the number of troops located in the hills in the Bengal Presidency during the present summer. In the hill depôts—which include Darjeeling, Naini Tal, Landour, Kasauli, Dalhousie, Murree, Clifden, and Pachmaree—there is a total of 2,652 men, 253 women, and 578 children; to which Kasauli contributes 827. Murree and Clifden, with a total of 744, come next; and the rest follow pretty much in the order in which they are written. Under the next heading, hill stations, Darjeeling, Ranikhet, Chakrata, Dagshai, Subathu, and Jutogh are included; with a total of 3,688 men, 232 women, and 445 children. Here Dagshai is the largest contributor, with a total of 1,186; but it is closely followed by Ranikhet, with 1,158. Besides the depôts and stations, there are also the temporary localities, which are too numerous to detail, but which provide summer residences for some 3,115 men, women, and children. From the year 1870, we find, the number of troops in the hills gradually rose from 6,107 to 11,855 in 1878. In 1879, there is a large decrease, accounted for by the Afghan war. The total then fell to 7,725; it increased again in 1880 to 9,389, and has steadily continued to do so since. The largest total since 1870 was in 1877, when it reached 12,284; but in that year the proportion of women and children was much greater than in the past or ensuing years.

"Alpha" writes:—"On July 8 an examination for promotion took place at all stations. The result as regards officers examined at home stations has been made known for some weeks, whereas those who were examined at Mediterranean stations are informed, on application at Winchester House, that the result will not be known for about a fortnight from this date. Now the papers from Malta and Gibraltar must have been received within five days of those from English stations. Can you account for this unreasonable delay in looking them over? The promotion of some officers is deferred, owing to the result of examination not being known."

THE BOXER FUSE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In my letter of the 21st inst. I mention the circumstance that the prevailing opinion appears to be that the operations of setting and fixing the fuze at the gun cannot be safely and conveniently performed with the Boxer system of fuze; also that the adoption of a fuze similar in principle to the one known as the Armstrong E time-fuze, is necessary to the attainment of this object. I venture to think that I have sufficiently exposed the fallacy of the first proposition, and it might seem unnecessary, therefore, further to discuss the subject in relation to the second; nor would I do so, were it not for the circumstance that a serious mistake (at least, what I regard as a serious mistake) has been lately made, by the adoption of the Elswick pattern fuze for the new breech-loading guns. This construction of fuze (which is of German origin) is a very ingenious contrivance, particularly as modified by Sir W. Armstrong, and is extremely likely to find favour with those who do not sufficiently consider the circumstances in which it would be employed in war. It was used in the service with the Armstrong segment shell, during a period of seven years (1860-67). The results were unsatisfactory from the first, and after many attempts to improve it were made, it was condemned (but it now appears, not finally) in 1867, when my system of shrapnel shells and fuzes was adopted for all rifle-guns. In these circumstances, and considering the fact that this construction of time-fuze has inherent defects which render its use dangerous to friends on a field of battle, I am naturally surprised that it should again be brought into the service to replace a fuze the efficiency of which has been established by the unerring test of thirty-three years' experience, under every sort of condition, as regards safety-keeping qualities in various climates and use in war. As this metal time-fuze has, I believe, been adopted principally because "the Navy wish to be able to alter the setting of the fuze at the latest moment before loading," I presume that the shell is to be brought up to the gun with the fuze fixed. To set the fuze for any particular range, the shell must, therefore, be placed in a convenient position at the gun to perform this operation (I fail to see how this can be done with the heavy shells now supplied to the Navy). A screw-nut at the head of the fuze has then to be loosened, and a moveable ring set to a mark on a circular surface, and held there until the nut is screwed up tightly. If the circumstances attending an action be duly considered, it appears to me evident that the chance of success with such arrangements is rather remote. My principal objection, however, to this form of fuze is, that if this vent, which secures the moveable ring, be not screwed up firmly (and this may often happen in the heat of action), a premature burst at or near the muzzle of the gun will probably take place. It is almost unnecessary for me to point out that, unless there be perfect security against "premature burst," shells could not be used with safety in a great variety of circumstances which occur in warfare. By far the most valuable feature of my systems of shells and fuzes, which were adopted more than 30 years ago, is that by which this fatal defect of "premature bursts," which belonged to the old system, was completely remedied. This was illustrated in a remarkable way at the siege of Sebastopol, when mortar-shells and fuzes belonging to both systems were employed. I have a letter, written from the Crimea, in my possession from the late Sir Edward Warde, who commanded the English artillery in the attacking batteries, describing the many failures of premature burst which occurred when the old-pattern fuzes were used, and how the lives of our own troops were thereby endangered; and how completely this defect was remedied by the application of my system. I find that the further observations I desire to make upon the important question of fuzes will occupy more space than I can now reasonably ask you to afford me; but perhaps you will allow me to make the following additional remarks upon the subject of my letter of the 21st inst.:—1. I stated that the 15-sec. time-fuze which was adopted in 1878 had four powder channels, I should have said six. 2. With the heavy muzzle-loading guns with which our ships are now armed, the proper time for removing the fuze-hole plug, and fixing the fuze, is when the shell is in the safest and most convenient position for performing these operations, namely, just inside the bore of the gun. 3. In the Boxer wood time-fuze for rifle ordnance, which was introduced into the service in January, 1864, for use with the larger natures of Armstrong breech-loading guns, special provision was made to insure the fuze being correctly and easily bored with a simple bradawl by comparatively unskilled gunners. The arrangements for effecting this object, which I regard as, perhaps, the most important improvement upon my original construction of fuze, have not been carried out in this 15-sec. fuze; not only so, but the dots which are made to indicate the positions of the side holes, as a guide to the gunner in boring the fuze, do not (at least in the samples I have seen) exactly correspond with these side holes, and are indistinctly marked. The consequence is that a "hook-borer" is required to set the fuze, instead of a simple bradawl; the operation is a comparatively tedious and difficult one, and not likely to be correctly performed on service, and, moreover, the bit or other tool used for setting the fuze is extremely likely to be broken in the operation of boring, if performed in a hurry. I mention these circumstances because when I wrote to the War Office on the subject, I was not aware of these particular defects in the construction of this 15-sec. fuze, and therefore omitted to draw attention to them.—I am, &c.,

Upton, near Ryde, Aug. 27. E. M. Boxer.

LATE BATTLES AND MODERN TACTICS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In *Blackwood's Magazine* for May last appears an article upon "The late Battles in the Soudan and Modern Tactics," upon which I desire to offer a few remarks, as it is in some respects misleading, and also seems to reflect upon "our officers." In the first place, the writer institutes comparisons between the line (against column) formations of old wars and late savage warfare in which a square formation was adopted; but he altogether omits any consideration of the nature of the ground on which the engagements he mentions took place, and which makes just all the difference. The broken country, dense patches of bush, &c., in the Soudan had a good deal to do with the necessity for keeping the troops in a condensed formation; and there can be no fair comparison between formations suitable for such a country with a mobile foe in great force, hidden in every hollow and patch of scrub, and those suitable for an open country with a fairly-known enemy. Nor can I agree with the writer of the article that, when arms of precision came into use, it was concluded "that breech-loading fire had increased the chances of the attack and diminished those of the defence in battle;" nor, judging by my own experience, could "our officers" have been "accordingly taught by the drill-book to believe" that the modern attack formation gave a superiority to attack over defence, even "although the enemy's fire was fourfold more powerful." On the contrary, it was at once realised that, although the attack formation was a step in the right direction, the confusion caused by mixing up companies at the crisis of the struggle was a distinct element of danger, and gave an additional chance to the defence, which had already gained by the introduction of arms of precision. Then the writer in *Blackwood* says:—"This sort of teaching had its natural result in the disaster of Isandhlwana, where the officer in command left his ground to advance in a thin skirmishing line, with flanks unprotected, against savages outnumbering him by five to one." Now, this rather passes the bounds of argument, as not one of the statements here made is correct. The force at Isandhlwana fought upon its own selected ground, which was "a sort of ravelin sticking out, and was admirably adapted for a rallying-place." The formation was practically "line," utilising the cover afforded by boulders. Both flanks were covered, the left by a company of infantry with supports, the right by the mounted troops. And the force was outflanked and surrounded by "the savages," who outnumbered it by about twenty to one. Again, because it was thought advisable in Ashantee, at Ulundi, and in the Soudan to adopt a square formation under peculiar circumstances, what soldier dreams of imagining that this is "a system of tactics" to which we have committed ourselves? But, leaving these questions, there are some remarks upon "skirmishers" and their great value in attack, which are well worthy of perusal, although the writer seems to favour an attack formation of a "closed line," covered by a cloud of skirmishers. The best attack formation probably is,—skirmishers, advanced fighting-line, supports to feed fighting-line, and reserve. Each company (not double company) should be strong enough to form the whole depth of the formation, commanded by a Major (mounted), and be the real tactical unit (four such companies forming the battalion). And lastly, in one paragraph the writer in *Blackwood* forcibly depicts the present condition of the Army,—that the "satisfactory composition" of "battalions serving abroad" is "effected by the entire sacrifice of efficiency in the battalions serving at home, whose condition is a reproach both to the Government and to the country at large." Shall we never learn the connection between "the strong man armed" and "peace?"—I am, &c.,

An Old Adjutant.

The *Volunteer Service Review* says:—"Considerable dissatisfaction is expressed in many circles with regard to the proposed transfer of Chelsea Hospital from the hands of the Commissioners to those of the War Office authorities. It is contended that it is an independent institution, founded by, and paid for, out of the resources of the Army itself, and that therefore it belongs to the soldier and not to the nation. We are perfectly aware that we live in an age of revolution, when contracts are no longer respected, and when the position of neither officer nor soldier can be considered secure from day to day. At the same time, care must be observed, in taking possession of Chelsea Hospital and its revenues, that the Government of the day does not commit any wrong, legal or moral. We are perfectly aware that one Government is just as bad as another in dealing with military matters, and we know also that it is not within the province, or even the power, of any of those interested to successfully resist a move from Pall Mall of this nature. It behoves those who take any interest in the subject to narrowly watch the proposed transfer of Chelsea Hospital, its funds and resources, into the hands of an irresponsible Government department."

The use of war-rockets is to be discontinued for land and sea service, except when required for special purposes by her Majesty's ships at the following stations, viz.:—Australia, Cape of Good Hope, and West Coast of Africa, China, and East Indies. When services requiring the use of war-rockets are ordered to be carried out, issues thereof will be made on special demands approved by the senior Naval officer, and for this purpose 24-pounder rockets, rocket-machines, and the necessary stores appertaining thereto in approved proportions will be maintained at the following stations to meet the services alluded to, viz.:—Sydney, Simon's Town, Ascension, Hong Kong, Bombay, Trincomalee. All 9-pounder rockets are to be condemned. Orders have been issued by the Admiralty for the return into store from her Majesty's ships of all war-rockets and their appurtenances.

A general order issued from the Horse Guards announces that after the examination of December, 1885, the study of mathematics will cease at the Staff College. The following regulations are to be substituted for those at present in force:—Mathematics limited to arithmetic, algebra, as far as quadratic equations inclusive; geometry, as far as the sixth book of Euclid inclusive; plane trigonometry, as far as the solution of triangles inclusive; 400 marks. The following is also substituted in Par. 5:—Mathematics—a *minimum* of 250 marks must be obtained for qualification. This alteration is to be in force at the next ensuing entrance examination.

THE ROYAL MARINES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—However slightingly the Marines may be represented to the public, although their recent behaviour has been pronounced admirable, it seems unfair that when so much is being done for the Army, no effort whatever is made by the authorities to enhance the comfort of Marines. This is all the more provoking since, when taken into comparison with their coadjutors, the Blue-jackets, who are paid in proportion to the clothing, &c., they require, the pay of Marines seems exceptionally inadequate, as they have to provide themselves with nearly half the uniform which they are expected to wear. I refer particularly to the white clothing Marines wear in tropical climates, for which no allowance is made. On leaving barracks for a foreign station a Marine has to provide himself with white clothing, for which he is charged 16s. 11d., but when he arrives in the tropics and takes them into wear, what with painting, scraping iron, blackening, iron rust, &c., he soon discovers that to appear at all decent, and avoid punishment in many aggravating forms, he requires much more white clothing than was considered necessary for his use on board; and when, also, it is remembered that it has to be renewed several times, it will be understood that the personal expenditure of a Marine during a commission is considerable. A Blue-jacket is in many respects better off than a Marine; his clothing is cheaper, more serviceable, and being serge, upon which sea-water has no deteriorating effect, lasts longer than a Marine's, whose red coat the slightest spray entirely ruins. And the white clothing of a Marine is simply ridiculous; it is made of the frailest material procurable, and fit only for parading before an admiral and for Sunday wear, for which occasions two suits of the present pattern would be sufficient during a commission; the remainder of a Marine's white clothing might be made of "duck" for working purposes. The question now arises, Would a Marine, if paid like a Blue-jacket, find himself heavier in funds at the end of the year than at present? Nobody can deny that he would; and the only remedy for the above seems either to raise the pay of Marines in proportion to the clothing they have to pay for, or provide them with the whole, and not half, of their uniform only, as at present.—I am, &c.,

R.M.L.I.

MILITARY STAFF CLERKS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The advantages of the Army were brought somewhat prominently forward in the Committee of Supply in the House of Commons recently, when Mr. Causton, M.P., referred to an intelligent body of men, viz., the Military Staff Clerks of the general staff. In accordance with the existing Regulations, a non-commissioned officer or soldier with not less than two years' service may be recommended, provided that he is of exemplary character, for the appointment of military staff clerk. This appointment is looked upon as an important one at the time a candidate registers his name, and may be rightly so, as a man with any superior attainments—and there are many such—who, with a view of letting his superiors see what he is made of, joins the staff, naturally is of opinion that he will have a good opportunity of advancing himself in the service, and so he has up to a certain point. The pay is immediately an increase on that of a non-commissioned officer's regimental pay, and he can look forward to additional pay and rank after each three years' service, till he obtains the highest granted by the Royal Warrant. Here he is at a standstill. The establishment of staff clerks of the general staff is somewhere about 130, of which 80 hold the rank of quartermaster-serjeant and 12 that of warrant officer; there are as many quartermaster-serjeants as there are in the maximum establishment of 27 Infantry battalions, or the real strength in that rank of the whole of the Cavalry of the Line, and this without the prospect of a single commission. There are as many warrant officers as 12 battalions similarly without prospect. The candidates for staff clerkships are numerous; and although a man on enlisting is not cognisant that there are such openings for a fairly well educated man, yet the value of the appointment is shown by the numbers who avail themselves of the privilege of registering their names. It would be very advisable on the part of the authorities, when the promised inquiry is made, to provide some means to reward the senior staff clerks of the general staff in the same manner that warrant officers and non-commissioned officers of all other branches of the service are cared for, in the shape of a commission, for which they are not now eligible.—I am, &c., A Staff Clerk.

A Royal Warrant has been issued amending the provisions of the Warrant of June 10, 1884, relating to the nursing staff of the Army. The new Warrant directs that Art. 298, as regards the pay of lady superintendent of nurses, shall stand amended as follows:—Lady superintendent of nurses, £150, increasing by £10 yearly to £200 a year, with an additional allowance of £50 a year to the lady superintendent of the Royal Victoria Hospital, Netley, for training the nursing staffs and carrying out such duties as the Director-General of the Army Medical Department may from time to time direct. The following is to be added after Art. 776:—A senior nurse acting as superintendent shall receive pay at the rate of £20 a year, in addition to her wages. The pay of the woman servant appointed to attend on the nurses at each hospital shall be at such rate (not exceeding £25 annually) as the Secretary of State shall determine. The following is to be added to Art. 982:—The lady superintendents at the Royal Victoria Hospital, Netley, and at the Herbert Hospital, Woolwich, retired pay at the the rate of 20 per cent. of the salaries, after ten years' service, rising by 2 per cent. for each additional year of service, up to a maximum of 50 per cent. An acting superintendent or nurse retiring without having previously obtained permission to do so shall forfeit all claim to pension.

ADMIRAL COURBET'S OPERATIONS.

We insert the letter below these lines with pleasure, admitting the justice of some of the writer's criticisms and the grounds he had for his strictures on the inconsistency between the general remarks on the practice of lecturing our neighbours in one article and another article in the *Army and Navy Gazette*. *Humanum est errare.* An editor is only a man, and as the Provost of Dumfries said that "he felt obliged with pain to confess that even he himself might be mistaken," so we are compelled to admit, in our editorial capacity, that a paragraph may slip in of which we do not approve, as was the case in the article to which our correspondent adverts.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—A French reader of your most interesting *Gazette* has, of course, no right whatever to interfere with the judgments you may bear on French or other foreign affairs. Be so kind, however, as to allow me to tell you my surprise when, having read in your last number (Aug. 30, p. 634), a few lines blaming your English contemporaries for "lecturing their neighbours," I found at the following page another article "lecturing" Admiral Courbet's fleet with no little acrimony. At page 634 you point out the impropriety of a correspondent "who never saw such a rare spectacle" being "horrified by ships blazing," &c., and despatching emotional telegrams to the *Times*, and causing a general outcry in the Press. You then acknowledge with praiseworthy impartiality that the French loss was heavier at Foochow than the English one was at Alexandria, and that the Chinese made a stout resistance; you praise Admiral Courbet's skill and courage, and declare you must await further details before you can join your contemporaries in criticising the operations. How is it, then, that at the following page you charge that same Admiral Courbet with having entered the river Min and passed the forts and obstructions therein in time of peace with hostile intentions in his mind? Were not the Chinese fully aware of what his intentions could be, should they not comply with our requests? Were they not authorised, at all events, to prevent him from so doing without fighting it out, when they knew perfectly well what for Admiral Courbet had left the Tonquin shores for the Min? Did they not like to see him "put his head in the lion's jaw?" How is it, again, that you only mention the small Chinese gunboats, junks, and transports, omitting the larger ships, one of which was sunk by a torpedo-boat, which was struck and disabled by a shot when doing so; which looks very much as if that ship had not "ran up the French colours in sign of submission" before the torpedo-boat gave her the *coup de grâce*. Only one torpedo-boat was lost, you say, in what you call a "realistic experiment carried out at little or no risk;" but there were no more than two torpedo-boats in the French Fleet, and one out of two is a quorum, I suppose. As to Chinese crews left to sink and swim, but for the help rightly and kindly afforded them by English men-of-war, can any one really expect to see ships engaged in real fight lowering their boats, and sending their guns' crews to the rescue of drowning enemies,—nay, of drowning friends? I am afraid I have already too much encroached on your valuable space, and must leave the final appreciation of the Foochow affair to your impartial readers, if you are so kind, Sir, as to let them know these comments, in an incorrect language, of

A FRENCH NAVAL OFFICER.

THE GERMAN GUARD CORPS.

[FROM A CORRESPONDENT.]

As a military spectacle, nothing can compare with the grand parade of the Guards Corps in Berlin. The review this year before the Emperor was in every way a brilliant success. The whole of the splendid Guard Corps was on the ground, with the exception of the 4th Queen's Grenadiers Regiment, at Coblentz. The Tempelhof Field was the rendezvous. There Staff officers met the various columns, pointing out to each body of troops the exact place it was to occupy. Each commanding officer had also been furnished with a diagram, showing the exact position of his corps and of the neighbouring ones, so each took up its ground without fuss, or worry, or subsequent shifting, and with admirable quiet precision. We commend the above plan to our military authorities, which we noticed with pleasure was followed at the Volunteer field-day at Dover on Easter Monday last with the best results. Among the foreign officers who witnessed the review was General Prince Dolgorouki, and twelve stolid-looking, but keen-eyed, Japanese officers attracted particular notice. The trooping of the colours, performed with even more than usual solemnity, as befitting so great an occasion, was witnessed with much attention by many critical eyes; but no more critical or competent a judge could be desired than the Imperial Monarch himself, who surveyed the ceremony from a window above. The Crown Prince was present in full General's uniform, and his two sons, Prince Henry in Naval uniform, while Prince William commanded his battalion, the 1st of the 1st Regiment of the Guard. The Emperor looked remarkably well, and was, as usual, received with the greatest enthusiasm, and when he afterwards mounted his horse and rode towards the troops, which were drawn up in two lines, deafening cheers rose on all sides. A Royal salute is given, and as he approaches each battalion the noble old soldier says cheerily, "Good morning, my children!" Immediately the whole battalion answers as with one voice, in loud tones, "Good morning, your Majesty!" the rifles still at the present. The effect of this is very striking. The marching-past was excellent, and all agreed that the appearance of these splendid troops left nothing to be desired. The precision and singular quietness with which everything is done is a sign of the perfect training of all ranks. You never hear, as you do sometimes at our reviews, in stage-whispers that can be heard from one end of the parade to another, "Now then, there, close up!" "Will you look to your front, Jones!" All that is done at home at their private parades (of which, of course, they get plenty). Here nothing but the actual words of command were heard, and these given with a smartness and clearness which some of our commanding officers would do well to imitate.

Reviews.

Robert the Bruce. By Alexander D. M. Clark Kennedy. Illustrated by James Faed, Jun. (Kegan Paul, Trench, and Co.)

IT is a matter of considerable difficulty to do more than offer an opinion as to the measure of success which may attend the publication of this historical and romantic poem. That it deserves at the lowest a *success d'estime*, is beyond question. That it will not receive greater is quite possible; a halo of aristocracy, one even of royalty, hangs round this volume, which has been brought before the public in a highly attractive form. It is easy to conceive the amount of interest in Scotland and elsewhere which has been aroused by its publication, but it is also just to the author to point to the skill and patience with which he performed his task and the dramatic force with which he pictures some of the most pathetic passages. We learn from "Fordun and Hearne" the terrible sufferings, both bodily and mental, which were endured by Robert the Bruce, and we cannot but feel that works such as Mr. Kennedy's unpretending volume may serve to engender feelings of loyalty that cannot fail to strengthen the prosperity of the Scottish nation.

Prairie Experiences in Handling Cattle and Sheep. By Major D. Shepherd, R.E. (Sampson Low and Co.)—Major Shepherd ushers in his prairie experiences by some simple and yet interesting observations as to what the traveller will undergo in Wyoming, Montana, Washington Territory, California, Nevada, and Idaho. Major Shepherd is of opinion that time spent east of the Missouri is time wasted. This useful and entertaining volume is written with vigour. The illustrations, taken from sketches by the author, will prove of considerable assistance to the reader.

Foreign Literature.

Deutsche Heeres-Zeitung, No. 66.—"New Ships for the Russian Navy."—Although the Russian Navy possesses a great numerical strength, and although the construction of the existing material has swallowed vast sums—which, by the way, very frequently have been employed for other purposes than those for which they were intended—its constitution leaves much to be desired. To meet the want of really seaworthy vessels, of which the Russian Navy has but very few, a large number of ships are now building which fulfil the requirements of the time. At the present moment, no fewer than twelve large powerful battle-ships are constructing, of which seven are on the stocks at St. Petersburg and five in Nicolaieff and Sebastopol, and this month (August) the keels of two other huge vessels, the Alexander III. and the Catharina II., which will have a burthen of 10,000 tons each, have been laid down in the Baltic wharf. Improvements in torpedo-vessels are also on the point of being introduced. Russia has nominally 100 torpedo-boats, but most of them are entirely useless, which is especially true of the 50 submarine boats (Chetvetski's system), which have cost together 900,000 roubles. These vessels cause such a noise that they betray their presence at long distances. As they are moved by hand-power, their speed is so little that they have been declared utterly useless. Besides these boats, there are several other systems of torpedo-vessels in the Russian Navy. Several boats have been constructed on Alexandrovski's system, in which the motive-power is compressed air. A vessel has likewise been constructed by a naval officer, Tverskoi, worked by an engine of novel construction. The Emperor is taking great personal interest in this system, and has granted to the inventor 3,500 roubles, besides placing a vessel at his disposal for making experiments. Unfortunately, the engineering works where the models were ordered failed, and the undertaking has received a temporary check. Another engineer, M. Kriminski, has constructed another submarine boat, which resembles the Fleischer hydromotor both in construction and mode of propulsion. The boat, however, has the disadvantage of running only half a mile (!) in the hour. It may finally be mentioned that the Russian Government has ordered a large floating dock in England, which is intended for the central station of the Russian Pacific Squadron at Vladivostock.

There is considerable activity in the constructive department, as well as in the steam reserve, at Chatham at the present time, in consequence of the orders from the Admiralty for two of the large armoured ships now in the steam basin to be hastened forward for commission. These are the Ajax and the Conqueror, neither of which has yet hoisted the pennant.

ARMY EXAMINATIONS.

At the competition for the Royal Military Academy, Woolwich, to be held in April, 1885, at the competitions for the Royal Military College, Sandhurst, and for the Royal Military Academy, Woolwich, to be held in July, 1885, and at the examination to be held in April, 1885, of Lieutenants of Militia who are candidates for commissions in the Regular Army, the examination in English literature will be limited to the following authors:—Chaucer, Prologue to Canterbury Tales; Shakespeare, King Lear, Henry VIII.; Pope, Essay on Man, Satires (with Prologue), and Epistles; Bacon, Essays XXIII. to LVIII., inclusive; Johnson, Life of Milton, Life of Gray, and Life of Pope. The examination in English history will be limited, at the candidate's choice, either to the period A.D. 1760 to 1790 (inclusive), or to the period A.D. 1790 to 1820 (inclusive). The candidate's reading on the period selected should include that part of Bright's History which treats of it.

At the examinations to be held in October, 1885, of Lieutenants of Militia who are candidates for commissions in the Regular Army, and at the competition to be held in December, 1885, for the Royal Military Academy, Woolwich, the examination in English literature will be limited to the following authors:—Chaucer; Spenser, Faery Queen, Book II.; Shakespeare, King Lear, Henry VIII.; Pope, Essay on Man, Satires (with Prologue), and Epistles; Bacon, Essays XXIII. to LVIII., inclusive; Johnson, Life of Milton, Life of Gray, and Life of Pope. The examination in English history will be limited, at the candidate's choice, either to the period A.D. 1760 to 1790 (inclusive), or to the period A.D. 1790 to 1820 (inclusive). The candidate's reading on the period selected should include that part of Bright's History which treats of it.

At the competition for the Royal Military College, Sandhurst, to be held in December, 1885, the examination in English history will include (1) a general paper on English history, and (2) a paper on the special period from 1727 to 1760 (the reign of George II.). The candidate's reading on the period prescribed should include that part of Bright's History which treats of it.

Civil Service Commission, August, 1884.

THE TRAINING OF RECRUITS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The evil effects attributed in Dr. Davy's pamphlet to the "extension motions" are so wonderfully exaggerated (if one can apply that term to what does not exist at all) that it seems absurd to notice them seriously, or to believe that they are intended to be taken so. If the stamina of our recruits is such that half an hour occasionally of such exercise brings on such an array of maladies, the sooner we cry "Capivi,"[*] vacate our place amongst nations, and join the Peace Society, Quakers, or any non-combatant association, the better. Stooping down with straight knees I admit to be useless, and may be hurtful; but at the worst it only lasts a few seconds. All the rest of the motions are not only completely harmless, but calculated to have good results. When our training is contrasted with that to which most foreign nations subject their soldiers, our national physique must be most wretched, if our men cannot go through it without injury. How do our rowing-men, pedestrians, navvies, coalheavers, &c., manage? It is the degenerated race of recruits which, as a rule, we now take into the ranks which accounts for the failing in physique. I have had very long service as a regimental officer, and am old enough to recollect the Grenadiers and light-company men being picked out of the raw material before they had tasted the Queen's rations—fine athletic fellows. I further say that in the whole of my service, and having been in many large garrisons where there was any amount of recruit drill, I never saw a blow of any sort struck; and I question if Dr. Davy can state that he himself saw what could be called a blow given, which could hurt or injure a man in the slightest degree.—I am, &c.,

SENEX.

[*] We suppose our correspondent meant to write "Peccavi."—ED. *A. & N. G.*

THE HIGHLAND REGIMENTS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have read your correspondent's letter on the old 79th with much regret, and hope yet to hear of them at the front; but, at the same time, I feel sure that many good men could be got in the North and in the Isles for the Highland regiments, if the authorities would quarter these battalions in the different Scotch towns during their tour of home service. At present, there are six Highland corps serving at home, distributed as follows:—71st Highland L.I., Dublin; 72nd Duke of Albany's Own Highlanders, Parkhurst, I.W.; 73rd Perthshire, Aldershot; 74th Highlanders, Devonport; 92nd Gordon Highlanders, Devonport; 93rd Sutherland Highlanders, Portsmouth. And this while Inverness, Fort George, Aberdeen, Perth, Dundee, and Stirling all have garrison accommodation; and outlying detachments from these stations, regimental recruiting parties sent into the country districts, and the occasional route march of a Highland corps from station to station, would do much to bring in the right sort of men, real Highlanders. Your correspondent "Ross-shire," in a recent letter on the 72nd, made some valuable suggestions on this question. Had the 92nd or 93rd been lying in Aberdeen during the Prince of Wales's recent visit there, to present colours to the Aberdeenshire Highlanders Militia, many fine lads would have joined, and there is no doubt many could be secured in the North, when the Militia trainings terminate, were one of the "country" regiments in garrison alongside.—I am, &c.,

SCOTUS.

Albert Poynter, coxswain, 1st class, of the Northumberland; Henry Edward Tew, ship's corporal, of the Hercules; Alexander McBean, ship's corporal, 1st class, of the St. Vincent; William James Stewart, Peter Selbie, William Halleran, John Fitzgerald, commissioned boatmen, and William T. Vernon, boatman, of the Coastguard, have been awarded medals for long service and good conduct.

The Army.

3rd Dragoon Guards. The head-quarters and service troops embark at Portsmouth on the 9th prox. in the Jumna for conveyance to India. Capt. McClellan, on examination for the rank of major in July last, attained the higher standard of proficiency, entitling him to a special certificate, and was recorded as "distinguished" in military law.

5th Dragoon Guards. The head-quarters, under command of Lieut.-Col. Kenyon-Stow, marched from York on Thursday morning, *en route* to Manchester, *viâ* Leeds, Halifax, and Rochdale. They arrived in Manchester on Monday.

7th Dragoon Guards. Lieut.-Col. Chapman has leave from India to England for six months, on medical certificate.

9th Lancers. By latest accounts from India, Col. Bushman had gone to the Straits Settlements on two months' leave.

12th Lancers. The death is announced of Capt. C. Armstrong, quartermaster on the Retired List. The deceased, who was in his 85th year, was awarded a good-service pension in 1880. He was the oldest Line quartermaster in the service, and had enlisted in the Army as far back as 1816, serving for upwards of 42 years in the 12th Lancers, which he joined at the close of the Waterloo Campaign, accompanying the regiment in the now almost forgotten expedition to Portugal in 1827, and afterwards filling the duties of quartermaster from 1837 to 1859.

15th Hussars. Before leaving Aldershot for Hounslow, the regiment was inspected by Major-Gen. Fraser, who addressed it as follows:—"Col. Field and 15th King's Hussars,—Lieut.-Gen. Sir Archibald Alison desires me to express his approbation at the smart appearance and work of the regiment, and also to express his regret at losing the regiment from his district. And I, old 15th, as Inspector-General of Cavalry, shall have great pleasure in reporting very highly of the regiment, and am very sorry to lose you from the Cavalry Brigade at Aldershot. I wish you luck from the bottom of my heart, wherever you may go."

19th Hussars. Lieut.-Col. Barrow succeeds to the command, vice Lieut.-Col. Webster, retired, Major Blackett becoming second lieut.-col.

ROYAL ARTILLERY.

Col. Harness, C.B., will take up the appointment of Secretary and Treasurer of the Royal Military Academy at Woolwich on the 20th inst., in succession to Col. Marsh, R.E., who has held the appointment for the last seven years. Major H. J. O. Walker has been appointed captain of a company of gentleman cadets at the Academy, vice Harness.

ROYAL ENGINEERS.

Major C. Strahan, Capt. St. G. C. Gore, and Lieut. the Hon. M. S. Talbot have, it is said, been appointed to accompany the Perso-Afghan Delimitation Commission as surveyors.

Lieut. H. P. Leach has been selected for service with the Commissariat and Transport Staff in Egypt.

1st, or Royal Scots. Lieut. Acheson, 1st Batn., joins the Commissariat and Transport Staff, on probation.

6th Royal Warwickshire Regiment. Major Gibbs, 2nd Batn., is about to retire on pension.

8th King's (Liverpool Regiment). In weather far from auspicious, the annual athletic sports of "The King's" came off on the Race-course, Cork, on Saturday, Sept. 6, when, notwithstanding the elements, a goodly crowd assembled to witness the various contests. Pte. Perryman, F Company, again came to the fore, carrying off the chief events. With more training and judgment, he will make an excellent athlete. The mounted race for officers was not the least amusing event of the day, each warrior having himself to saddle and bridle his horse, to light a cigar, and carry an open umbrella when mounted. The race was about a quarter of a mile out and in round a post, and was successfully carried off by Lieut. Custance, 32nd L.I., Capt. Mellor, of "The King's," being a good second. By kind permission of the colonel and officers, the band of the 32nd L.I. played for the visitors inside the enclosure, and the nigger minstrels of the regiment amused the general public outside. Refreshments were served inside the Grand Stand to all comers. Col. Williams obtains the command of the 1st Batn. at the end of January on the retirement of Col. Tanner, Major Dawson becoming the second lieut.-col. Col. Le Mesurier obtains command of the 2nd Batn. in Nov. next, vice Col. Cochrane, Major Crawley becoming second lieut.-col. 1st Batn. The anticipated early move of the 1st Batn. to the Curragh has hitherto been postponed. Capt. Beresford, 1st Batn. has successfully passed the recent entrance examination to the Staff College, and proceeds there to join in February next.

9th Norfolk Regiment. Lieut.-Col. Massey remains with the 1st Batn., on promotion. Lieut.-Col. Stockley is posted to the 1st Batn., on promotion from Staff employ. Lieut. Comins, a probationer, officiating wing-officer, 27th Bengal N.I., is about to be admitted to the Bengal S.C. from July 21, 1883.

12th Suffolk Regiment. Lieut. Grey, a probationer, wing-officer 38th N.I., is about to be admitted to the Bengal S.C. from June 21, 1883.

21st Royal Scots Fusiliers. Capt. Lambart has leave from India to England for six months.

23rd Royal Welsh Fusiliers. Lieut. Firman, 2nd Batn., has been selected for service with the Commissariat and Transport Staff in Egypt.

30th East Lancashire Regiment. On July 29, in the Red Sea, a boy named Jones, a stowaway on board the steamer Nubia, from Liverpool, fell overboard. The engines were promptly stopped and reversed, and Major Goodwyn, who was a passenger by the steamer, without waiting to divest himself of any clothing, plunged into the sea, and swam in the direction in which the boy was last seen. On the ship's boat reaching and taking on board the major, who by this time had been about 20 minutes in the water, exposed bareheaded to a mid-day sun, he expressed regret that he had found no trace of the lad. When the accident occurred, the vessel was running at the rate of 11 knots an hour, with all canvas set; and as the Red Sea is well known to be infested with sharks, too high praise cannot be bestowed upon Major Goodwyn for his gallant conduct.

34th Border Regiment. Lieut.-Col. Hill has completed his period of service as commandant of the hill depôt of Nynee Tal, and returns to regimental duty.

41st Welsh Regiment. Lieut.-Col. Haydock has arrived home from Natal, on leave on medical certificate.

44th Essex Regiment. The *Bombay Gazette* says:—"Capt. Ventris, who has just been promoted major from Dec., 1883, dates his first commission from Feb. 11, 1875. He thus obtains his majority with less than nine years' service, and passes over the heads of 300 officers of the Bengal S.C., 55 of the Madras S.C., and 105 of the Bombay S.C., or a total of 460 officers of the Indian Army." Capt. Powell, who enters the Pay Department, has been posted to the 2nd Batn., 24th, as paymaster. Lieut.-Col. F. W. Gregory, late of the regiment, died at Southwold, Suffolk, on the 7th inst., suddenly of disease of the liver.

46th Duke of Cornwall's Light Infantry. Lieut. Holland, a probationer, officiating wing-officer 5th N.I., is about to be admitted to the Bombay S.C., from May 2, 1883.

47th North Lancashire Regiment. Lieut.-Col. Cleather, from the Gymnastic Staff at Aldershot, succeeds to the command, vice Col. Straton, retired.

48th Northamptonshire Regiment. Major Power has been selected for duty with the depôt.

ROYAL MARINES.

Major Hungerford, Plymouth Division, R.M.L.I., will embark on the 15th inst. at Portsmouth for passage to join the Royal Marine battalion at Suakim, replacing Major Rose, lately invalided home.

The Deputy-Adjutant-General of the Royal Marines has notified that officers, non-commissioned officers, and men who embarked in Coastguard and harbour ships, as part of the autumnal relief, between Oct. 1, 1882, and Jan. 11, 1883, who had previously served afloat in Egypt and the Mediterranean, will be relieved on the 30th inst. with those who have completed the usual term of two years' service in those ships. Major and Brevet Lieut.-Col. Joseph Phillips, C.B. (Plymouth Division), serving on board the Indus, will, in consideration of similar previous service in Egypt and the Mediterranean, be also disembarked on that date, as a special case.

The retirement of Captain J. C. R. Scott, R.M.L.I., Garrison Adjutant at Cork, promotes Henry C. Eagles to his company at the Plymouth Division, subject to his passing the required examination.

A further contingent has been ordered to proceed to the Red Sea for duty with the Royal Marine battalion under Col. Ozzard, viz., Major H. Morris, from Chatham, and Lieut. B. C. Couchman, from Plymouth, with three serjeants, three corporals, one bugler, and 65 privates. Passage will be taken in the transport Bulimba from Plymouth on Sept. 16.

59th East Lancashire Regiment. Capt. Leonard has been selected for duty with the Commissariat and Transport Staff in Egypt.

70th East Surrey Regiment. The regiment is due in Egypt about the 20th inst., and, though considerably under the regulation strength, the regiment is composed of a body of men of superior physique. Both this and the Royal Irish Regiment, from India, will be accompanied by their Indian followers, and carry with them their camp equipage and a month's supplies.

74th Highland Light Infantry. The head-quarters and service companies embark at Portsmouth on the 30th inst. in H.M.S. Serapis, for India.

77th Middlesex Regiment. Lieut. Cox, a probationer, officiating wing-officer 5th Bombay N.I., is about to be admitted to the Bombay S.C., from July 2, 1883. Lieut. Burton resigns his probationary appointment for the Bengal S.C. Lieut. Law is attached to the Ordnance Store Department at Woolwich.

85th King's (Shropshire Light Infantry). Capt. Capper has been selected for service with the Commissariat and Transport Staff in Egypt.

86th Royal Irish Rifles. Lieut. Welman has been appointed to do duty with the Commissariat and Transport Staff in Egypt.

87th Royal Irish Fusiliers. Lieut. E. H. Mulock died at Murree on the 31st ult., from an accident, aged 22 years.

88th Connaught Rangers. Lieut.-Col. Penton has been appointed commandant of the hill depôt of Nynee Tal.

97th Queen's Own (Royal West Kent Regiment). Col. Browne, to the great regret of all ranks, is about to be placed on half-pay on the completion of his term of service in command. He will be much missed, for he was devoted to his regiment and his profession. Lieut.-Col. Safford succeeds to the command, Major Murray becoming second lieut.-col.

100th Leinster Regiment (Royal Canadians). Lieut.-Col. Stewart has been appointed commandant of the Kasauli Convalescent Depôt. Capt. P. Hicks, late of the regiment, died on the 26th ult., at Jersey, aged 41. He was the youngest son of the late Gen. G. Hicks, C.B.

106th Durham Light Infantry. Major Reynolds has been appointed an Instructor in Tactics, &c., at the Royal Military College.

1st West India Regiment. Lieut. O'Brien has been appointed to the 11th Hussars as pymr., on appointment to the Pay Department.

Medical Department. "Surgeon-Major" writes:—"We have to thank you for the articles in your issues of the 16th and 30th ult., concerning the recent Circular of Aug. 1, intimating that all surgeons-major of 20 years' service were to be examined prior to promotion to brigade-surgeons. It states in paragraph 9 of the Circular that the examining board is to be appointed by the Director-General; on reference to the *Medical Directory*, I find that 15 of the administrative officers have only a single qualification, viz., Mackinnon, Madden, Hassard, Holton, O'Nial, W. M. Webb, J. Bylon Reade, Herbert Reade, Cattell, J. Ferguson, Meadows, Hungerford, Barnett, Corbett, and Chappell. Are these men, I would ask, who have no qualification themselves in medicine, to be appointed examiners in medicines? 'O' of paragraph 9 says,—'Questions in operative surgery and practical medicine will also form part of the examination.'"

Pay Department. During the month of August, the following changes of station, promotions, and appointments took place in the Pay Department. Changes of station:—Lieut.-Col. Bryson, to Unattached List; Major Davis, to Unattached List; Major Drage, 33rd Regtl. District, Halifax, under orders for Egypt; Major Compigné, from the 66th Regt., to 1st Regtl. District, Glencorse; Major Willoughby, to Unattached List; Major Dougherty, from the 17th Regt., to 37th Regtl. District, Winchester; Major Booth, from Egypt, *en route* home; Majors Dawson and Stokes, to the Unattached List; Capt. Pearson, District Office, Woolwich, to Barbadoes; Major Howard, to the Unattached List; Capt. Dewar, District Office, Dublin, to Egypt; Capt. J. Reid, to the Unattached List; Capt. Addis, *en route* home; Capt. Johnston, to 74th Regt.; Capt. Harward, to 2nd Batn. 6th Regt. The number of officers on probation is increased by seven. Promotions—Capts. W. C. J. Nott (July 28) and E. H. Maunsell (Aug. 26), to have the hon. rank of major in the Army. Appointment—Capt. Harward, from 6th Regt., antedated to Nov. 12, 1883. Forty-four officers are required to fill up the vacancies in three cavalry and 33 infantry regiments and eight district offices. Major H. C. Ryder having exchanged with Major T. W. Drage, the latter proceeds to Egypt at once, and will be replaced, as a temporary measure, at the 33rd Regtl. District, Halifax, by Lieut.-Col. D. Hepworth, on the Retired List. Capt. L. E. Amedroz, 105th Regt., is on probation for the Department at the 14th Regtl. District, York, and Capt. R. W. Andrews, 34th Regt., has been instructed to join the Pay Office of the 39th Regtl. District, Dorchester, also on probation for the Department.

The Auxiliary Forces.

MILITIA.

Royal Scots Fusiliers. The 3rd Batn. has this year for the second time since the institution of the match in 1881, won the Militia team prize in the Army Inter-Regimental Matches. This event, being intended to test and encourage rifle practice in the ranks of the Militia, is limited to non-commissioned officers and privates who have not previously served in the Army or the Volunteers, and it is much to be regretted that as yet it has received only very limited support from Militia battalions.

Indian Notes.

Orders for the reorganisation of the Subordinate Medical Department have been issued, giving the relative rank of captain and lieutenant to the higher grades, as in the Ordnance and Commissariat Departments. The grades of hospital-assistant and hospital-apprentice are abolished, and in their stead the grades of sub-assistant apothecary and military pupil have been created. No further promotions will be made to the rank of honorary surgeon. The staff pay for station hospitals is increased. No one under three years' service can leave without refunding the aggregate amount received up to date, including that received during college training. While on general or sick leave in India, three-fourths of pay and compensation for quarters will be given. Medical warrant officers in charge of civil stations will receive from rs. 350 to rs. 700 per mensem. Furlough allowances and pensions are much improved.

The 4th Sikh Infantry has won, with a score of 783 points, the Commander-in-Chief's Prize for Musketry, together with the cup subscribed for by Native Infantry regiments. The following, together with the scores which they have made, which have won this prize since the Native Army was armed with Snider rifles:—In 1876, the 4th Goorkhas, 460 points; 1877, 3rd Sikh Infantry, 483 points; 1878, 4th Punjab Infantry, 632 points; 1879, 40th N.I., 630 points; in 1880 there was no competition, the majority of Infantry regiments being on service; 1881, 4th Punjab Infantry, 647 points; 1882, 18th N.I., 662 points; 1883, 4th Goorkhas, 666 points; 1884, 4th Sikh Infantry, 783 points. The total number of entrances this year was 8,314; and the amount distributed in individual prizes, rs. 2,078-8.

It is believed that an exchange of commands will shortly take place between Gens. T. E. Gordon, commanding at Bareilly, and Dandridge, commanding at Peshawur.

We (Lahore paper) hear that the paymasters of several regiments are declining to pay the extra rs. 100 a month to majors who have served their three years in that rank. This is causing a good deal of dissatisfaction; as, to everyone but the paymasters, the Warrant seems perfectly clear upon this point.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Sept. 9, 1884.

3rd Dragoon Guards—Lieuts. H. Gillon has been seconded for service as a probationer for the Army Pay Department (Aug. 26); A. A. G. Anderson, from the 5th Dragoon Guards, to be Lieut., on augmentation.

4th Dragoon Guards—Capt. N. H. Bacon resigns his commission.

5th Dragoon Guards—Lieut. C. H. Paynter, from the 21st Hussars, to be Lieut., vice T. G. Peacocke, transferred to the Worcestershire Regt.

8th Hussars—Capt. E. J. Fell to be Major, vice E. E. Lushington, promoted (April 1).

19th Hussars—Lieut.-Col. A. G. Webster, C.B., retires on half-pay.

Royal Engineers—The following Lieuts. to be Capts., under the provisions of Article 7 (*b*) of the Royal Warrant of June 10 (dated Sept. 12):—H. D. Love, J. W. Sill, K. Mackean, A. H. Bagnold, H. B. Willock, W. V. Constable, R. Jennings, C. H. Darling, J. Jervois, H. E. Rawson, E. F. Rhodes, W. J. Mackenzie, H. S. Andrews-Speed, P. T. Buston, J. C. Tyler, and G. H. Sim.

Coldstream Guards—Major and Lieut.-Col. and Col. Lord W. F. E. Seymour, Assist. Military Secretary at Head-quarters, has been placed on half-pay (Sept. 5).

Scots Guards—Supernumerary Capt. and Lieut.-Col. A. Broadwood to be Capt. and Lieut.-Col., vice H. Fludyer, promoted (June 11).

The King's Own (Royal Lancaster Regiment)—Lieut. C. M. H. Merriman has been appointed a probationer for the Indian S.C. (July 5).

The Norfolk Regiment—Lieut.-Col. W. J. Massy to command a battalion; Major C. M. Stockley to be Lieut.-Col., vice Col. H. C. Vibart, retired (both dated Aug. 20); Capt. D. K. Robertson to be Major, vice A. H. Longfield, retired (June 28).

The Prince Albert's (Somersetshire Light Infantry)—Lieut. W. G. Gifford has been placed temporarily on the Half-pay List on account of ill-health (July 22).

The Bedfordshire Regiment—Lieut. C. C. Tennant has been appointed a probationer for the Indian S.C. (May 25).

The Lancashire Fusiliers—The name of the Gent. Cadet from the Royal Military College, appointed to a Lieutenancy in the *Gazette* of Aug. 22, is Lionel *de* Rosen Jervis, and not as stated in that *Gazette*.

The Cheshire Regiment—Capt. D. W. Rogers resigns his commission.

The Royal Welsh Fusiliers—Capt. L. Griffiths retires from the service, receiving a gratuity; Supernumerary Capt. G. C. E. Rowley to be Capt., vice S. B. Blyth, appointed Adjt. 4th Batn. (Sept. 1); Lieut. L. de R. Jervis, from the Lancashire Fusiliers, to be Lieut., vice F. Morris, promoted.

The Royal Inniskilling Fusiliers—Lieut. R. H. Cholmondeley is seconded for service on the Staff.

The Gloucestershire Regiment—Lieut. R. J. B. Parkinson has been seconded for service as a probationer for the Army Pay Department (Aug. 30).

The Worcestershire Regiment—Lieut. G. T. Peacocke, from the 5th Dragoon Guards, to be Lieut., vice T. E. Hickman, seconded.

The Duke of Wellington's (West Riding Regiment)—Supernumerary Major C. W. Gore to be Major, vice A. J. Preston, seconded from June 28, for service as an Adjt. of Auxiliary Forces.

The Border Regiment—Capt. R. W. Andrews has been seconded for service as a probationer for the Army Pay Department (Sept. 5).

The Hampshire Regiment—Lieut. R. F. C. Gordon, from the 18th Hussars, to be Lieut., vice W. H. Johnson, appointed a probationer for the Indian S.C.; Lieut. M. de Montmorency, from the Royal Irish Regt., to be Lieut., on augmentation.

The Oxfordshire Light Infantry—Lieut. W. A. Oswald has been appointed a probationer for the Indian S.C. (June 17).

The Loyal North Lancashire Regiment—Lieut.-Col. and Col. J. M. Straton retires on retired pay, with the hon. rank of Major-Gen.

The Northamptonshire Regiment—Gent. Cadet William Osborne Smith, from the Royal Military College, Kingston, Canada, to be Lieut., vice M. W. Baugh, transferred to the Lancashire Fusiliers.

The Queen's Own (Royal West Kent Regiment)—Capt. A. P. Cronyn has been seconded for service as a probationer for the Army Pay Department (Aug. 24).

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut. J. S. Cave-Brown-Cave to be Capt., to complete establishment (May 28).

The Royal Dublin Fusiliers—Lieut. P. A. Rowe is removed from the Army, her Majesty having no further occasion for his services.

The Rifle Brigade (Prince Consort's Own)—Major R. H. L. Anstruther retires on half-pay; Capt. C. D. Sherston has been seconded as an Adjt. of Auxiliary Forces; Capt. A. H. W. Hervey has been seconded for service as an Adjt. of Auxiliary Forces (both dated Aug. 1).

2nd West India Regiment—The dates of promotion to the rank of Capt. of the under-mentioned officers are altered as stated against their names:—Capt. C. E. A. Coleman (Oct. 3, 1883), and Capt. F. E. S. Claridge (Nov. 7, 1883).

STAFF.

Her Majesty has been pleased to approve of the following appointments on the Staff of the Army in Egypt:—

Gen. the Right Hon. Garnet Joseph. Lord Wolseley, G.C.B., G.C.M.G., to be General Officer Commanding-in-Chief the Forces in Egypt (Sept. 1).

To be Military Secretary:—Major and Brevet Lieut.-Col. L. V. Swaine, C.B., the Rifle Brigade (the Prince Consort's Own) (Sept. 1).

To be Aides-de-Camp:—Major F. M. Wardrop, 3rd Dragoon Guards; Capt. and Brevet Major A. G. Creagh, R.A.; Lieut. E. S. E. Childers, R.E.; Lieut. J. Adye, R.A. (all four dated Sept. 1).

To be a Major-General on the Staff:—Major-Gen. Sir R. H. Buller, V.C., K.C.M.G., as Chief of the Staff (Aug. 26).

To be Aide-de-Camp:—Lieut. Lord W. Fitzgerald, the King's Royal Rifle Corps (Aug. 26).

To be Assistant-Adjutant and Quartermaster-Generals:—Lieut.-Col. and Col. W. F. Butler, C.B., half-pay, from Assist.-Adjt. and Qrmr.-Gen., Western District (Sept. 1), and Lieut.-Col. G. A. Furse, half-pay (Aug. 18).

To be Deputy-Assistant-Adjutant and Quartermaster-General:—Major and Brevet Lieut.-Col. J. Alleyne, R.A. (Aug. 26).

Lieut.-Col. and Col. W. C. Phillpotts, R.E., to be a Col. on the Staff to command the Royal Engineers at Malta, vice Col. T. A. L. Murray, R.E., whose period of service in that appointment has expired (Aug. 18).

Major and Brevet Lieut.-Col. A. G. Yeatman-Biggs, R.A., to be a Brigade-Major for Royal Artillery, vice Major and Brevet Lieut.-Col. J. Alleyne, R.A., who has proceeded on service to Egypt (Aug. 25).

Major and Brevet Lieut.-Col. W. Salmond, R.E., to be Assist.-Adjt.-Gen., R.E., at Head-quarters, vice Lieut.-Col. E. Micklem, R.E., whose period of service in that appointment is about to expire (Oct. 1).

Lieut. L. W. Matthews, 21st Hussars, to be Extra Aide-de-Camp to his Excellency the Earl Spencer, K.G., Lieutenant-General and General-Governor of Ireland, vice Lieut. G. Dease, the Royal Fusiliers (City of London Regt.), who has resigned that appointment (Aug. 26).

Royal Military College—Major H. C. Reynolds, the Durham L.I., to be an Instructor, vice Lieut.-Col. H. M. Moorsom, half-pay, R.A., whose period of service in that appointment has expired (Sept. 1).

Commissariat and Transport Staff—Deputy-Assist.-Comy.-Gen. A. H. Langdon to be Assist.-Comy.-Gen., vice C. W. B. McKenzie, deceased (Aug. 13).

Medical Department—Deputy-Surg.-Gen. T. J. Murphy, M.D., is granted retired pay, with the hon. rank of Surg.-Gen.; Brig.-Surg. FitzG. E. Scanlan is granted retired pay, with the hon. rank of Deputy-Surg.-Gen.

Army Pay Department—Chief Pymr. and Hon. Lieut.-Col. T. Bryston retires on retired pay, with the hon. rank of Col. The promotion to the rank of Chief Pymr., with the hon. rank of Lieut.-Col., of Staff Pymr. and Hon. Major R. B. Farwell, in recognition of his services in the Soudan, is antedated to April 16. Staff Pymr. and Hon. Major W. B. Davis retires on retired pay, with the hon. rank of Lieut.-Col.; Pymr. and Hon. Capt. T. P. Lloyd to have the hon. rank of Major in the Army (Sept. 5); Capt. G. F. Pinkey, the Queen's (Royal West Surrey Regt.), to be Pymr. (Feb. 20); Capt. A. G. St. George, the Hampshire Regt., to be Pymr. (June 14).

MEMORANDA.

Major-Gen. H. H. Crealock, C.B., C.M.G., has been placed on retired pay, with the hon. rank of Lieut.-Gen. (Sept. 4).

Major-Gen. F. Marshall, C.M.G., has been placed on retired pay, with the hon. rank of Lieut.-Gen. (Sept. 5).

Lieut.-Col. F. G. Burnaby, Royal Horse Guards, to be Col. (Sept. 11).

Lieut.-Col. A. G. Webster, C.B., half-pay, retires on retired pay, with the hon. rank of Col.

RESERVE OF OFFICERS.

Capts. F. B. Browne and W. L. A. Eyre and Lieut. H. G. Armstrong resign their commissions.

Lieut. J. P. Wood, 3rd Batn. the Royal Inniskilling Fusiliers, to be Lieut.

INDIA OFFICE, Sept. 9, 1884.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenant-Colonels:—Majors M. Clementi (June 11), E. R. Conolly and C. H. Palmer (both dated June 12), Major and Brevet Lieut.-Col. H. M. Evans (June 20), Majors R. M. Clifford and G. R. Gibbs (both dated June 25), and Major and Brevet Lieut.-Col. C. L. Woodruffe (June 28).

To be Captain:—Lieut. H. M. Temple (June 8).

BENGAL CAVALRY.

To be Lieutenant-Colonels:—Majors and Brevet Lieut.-Cols. W. H. Macnaghten, C.B. (June 10), and H. Y. Murray (June 20).

MADRAS STAFF CORPS.

To be Lieutenant-Colonels:—Majors K. J. L. Mackenzie, J. W. Macdougall, J. P. James (all three dated June 11); G. H. Trevor, M. M. Bowie, D. T. Hatchell, W. G. Hughes, A. T. Woodhouse, A. S. Grove, H. C. Davies, and C. G. Watson (all eight dated June 12).

BOMBAY STAFF CORPS.

To be Lieutenant-Colonels:—Majors J. Withers (June 4), C. C. Pemberton (June 11), M. M. Carpendale, H. C. Morse, C. H. Coles (all three dated June 12), C. A. Cuningham (June 20), and Major and Brevet Col. G. F. Beville (June 27).

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 10, and the current year must be understood.

FRIDAY EVENING.

ARMY.

INDIA OFFICE, Sept. 12, 1884.

The following appointments have been made to the Personal Staff in India:—Major G. M. J. Moore, R.A., to be Military Secretary to the Governor, Madras (April 1); Lieut. R. W. E. Carnegy, R.A., to be Aide-de-Camp to Major-Gen. A. Carnegy, commanding a Division of the Bombay Army (March 19).

The following appointments to the Staff of the Bengal Army have been made by the Government of India:—Capts. E. E. Money, Bengal S.C., to be Deputy-Assist.-Qrmr.-Gen., vice Major A. Gaselee, whose tenure of appointment has expired (May 31); W. R. Routh, Suffolk Regt., to be a Brigade-Major, vice Major H. R. Young, whose tenure of appointment has expired (June 16); Lieut.-Col. M. Clementi, Bengal S.C., Deputy-Judge-Advocate, to be Deputy-Judge-Advocate-Gen., vice Col. C. Nedham, transferred to the Unemployed Supernumerary List; Capt. W. H. F. Macmullen, Bengal S.C., to be a Deputy-Judge-Advocate vice Lieut.-Col. Clementi (both dated July 1).

MILITIA.

WAR OFFICE, PALL MALL, Sept. 12, 1884.

ENGINEER.

Royal Monmouthshire—Major W. H. Wheeley is granted the hon. rank of Lieut.-Col.

1st Sussex—Edward Allfree Smithers, gent., to be Lieut.

1st (Hallamshire) Volunteer Battalion, the York and Lancaster Regiment—The under-mentioned Lieuts. to be Capts.:—D. Vickers and G. E. Branson.

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 13, and the current year must be understood.

Col. the Hon. Archibald Douglas-Pennant, second son of Lord Penrhyn, Lord-Lieutenant of Carnarvonshire, died on Tuesday morning at Lord Penrhyn's shooting-box, Dinas, near Bettws-y-Coed. He caught cold while shooting on the mountains on Friday afternoon.

THE PROPOSED RELIEF EXPEDITION.

Lords Northbrook and Wolseley arrived in Egypt on Tuesday.

The Mudir of Dongola telegraphed on the 8th inst. from Debbeh as follows:—"Thank God, good news. I have to-day met the rebel hosts from Kordofan and Berber, and obtained a complete victory over them at Kosti, near Ambukol. After the fight we found among the dead the bodies of Achmet Hlai, chief of the rebels, Mahmoud, called Emir of Dongola, and the Emirs appointed to Tripoli, Cairo, Keneh, Esneh, and Assouan. I need not mention that the rebels were in vast numbers, whereas the soldiers of the Mudirieh were few; but although our numbers are small, we have slain great numbers of the enemy. The province, and for some distance south, is now safe and tranquil, for which thanks be to God. As I have told your Excellency, Major Kitchener wished greatly to be present at the fight, but fate did not permit it. I hope to return to Oordeh in a few days." His agent at Oordeh telegraphs under the same date, and states that the Emir Mahmoud and those who came with him from Kordofan to take Dongola have been killed. Very few escaped, and many prisoners have been taken. The news has been publicly announced, and guns have been fired in honour of the event. Major Kitchener telegraphs from Oordeh under the same date:—"News has been brought to-day that the Mudir has gained a victory at Ambukol. Hlai has been killed. Mahmoud, from Kordofan, escaped. The messenger came from the Mudir. I cannot say what truth there is in the report."

The *Times*' correspondent at Wady Halfa, Sept. 11, telegraphs:—"As there is apparently no likelihood of a fresh rise of the Nile, it has been decided to make a further attempt to haul the Nassifkheir over the cataracts before another fall of the stream renders such an attempt absolutely impossible. Operations were, therefore, commenced this morning. Every precaution was taken to insure success, but the result was hardly satisfactory. The steamer passed the first gate safely, but failed at the second, where the passage is so narrow that at no time were both paddles clear. When fairly in the gate, she struck and grated continually, and at the same moment two hawsers parted, causing her to drift heavily on to the rocks. A boat bringing up a fresh hawser was wrecked, and the crew were saved with some difficulty. A moment later, when the steamer was again in motion, the port paddle was smashed against the rocks, and so wrecked as to render the engines helpless. The head hawser also parted at the same time, and the steamer swung on to the west shore, held by a small hawser only. Operations were now ended for the day, but will be continued when the paddle has been repaired. Some little progress was made. In spite of the difficulties, it seems likely that the steamer will eventually pass the cataracts, according to the opinion of authorities. Sir E. Wood was present throughout the operations, which lasted the entire day. The hawsers that parted were a six and a half inch grass and a five and a half inch hemp, which were deemed strong enough to resist any strain likely to be placed on them. Twelve nuggers are expected on the 15th at Sarras from Dongola."

A telegram dated Cairo, Thursday, says:—"The Nile at present is stationary. The natives at Wady Halfa are expecting it to rise very shortly. Gen. Earle leaves to-morrow morning for Wady Halfa. Col. Stewart, accompanied by Lord Airlie, will proceed to Dongola to take command there; and Col. Maurice has been directed to undertake the command of Assiout, for which place he leaves immediately. The Highland Brigade is under orders to proceed up the Nile. Gen. Lord Wolseley, while remaining for the present at Cairo, will take the command from to-day of all the troops above Assiout."

It has been decided by the authorities that next year there shall be no reduction in the amount claimed by Volunteer Corps for the allowances for the number of days encamped. The reduction of 20 per cent. this year of the allowances has pressed very heavily on many corps, whose numbers were estimated in accordance with the instructions contained in paragraph 903 of the Volunteer Regulations.

Officers commanding Line battalions and depôts having been called upon to give their opinion on the great-coat now in use, in almost every instance it has been suggested that the period of wear—four years—be reduced, and that a better material should be provided.

It is the opinion of the majority of commanding officers of Militia that the only means of filling up the existing vacancies in the establishment of Militia subalterns is to increase the pay and allowances, that the examination should be less difficult, and the employment more constant.

The following officers on the retired lists of the Royal Navy have been awarded the Greenwich Hospital pensions, as specified in order in Council of May 19, 1884:—Pymr.-in-Chief, W. B. Mainprise, £50; Chief Gunners R. Spry and J. Robarts, V.C., £35 each; Chief Boatswains G. Lane and W. H. Cruys, £35 each; Chief Carpenters W. Kerr and G. H. Church, £35 each; Gunners H. Warner, R. Ratcliff, T. Howels, J. Hickman, J. Woodman, C. Williams, H. A. Dewar, D. Hamm, J. Pibworth, J. Wright, R. Keen, and W. V. J. Buckle £25 each; Boatswains G. Kennedy, J. Colyer, J. Layton, J. Smith, W. Dart, J. R. Borlase, J. Cameron, W. White, R. Melling, and J. Sedgman, £25 each; and Carpenters R. Johnston, E. Bulley, J. Carter, W. Elliott, S. Moore, and J. Barnes, £25 each.

At the Royal Gun Factories in Woolwich Arsenal, the manufacture of the new steel guns, chiefly for the Navy, is said to be proceeding briskly, as at the present time upwards of 400 have been finished, almost sufficient for the armament of the smaller ships in her Majesty's service.

The Admiralty have contracted with the Palmer Shipbuilding Company, of Jarrow-on-Tyne, for the building of two twin-screw steel despatch vessels, to be named the Alacrity and Surprise, each to have a displacement of 1,400 tons, and engines of 2,000 horse-power.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 13, 1884.

THE following letter from Skobeleff has just been published in Russia:—

"*Bami, July* 19-31, 1880.

"To General Pavloff, Chief of the Staff of the Caucasus Army.

"In the work published by Marvin on last year's campaign against the Akhal Tekkés, the humanitarian author (goomanist-avtor) bestows special praise on several officers of the cavalry, protesting *by their acts* against the severe measures of their superiors, with reference to the fugitive Turcoman families, on the occasion of the assault of August 28 (O.S.), 1879. . . . . . The harsh demands of war are everywhere the same. The measures ordered by General Lomakin need no justification. The same was done before Paris in 1870-71, and by ourselves before Plevna. *In the future men will war exactly the same.* That is a matter I do not concern myself with; but I insist upon this, that a soldier on duty cannot be allowed any other opinion but the fulfilment of orders. The infraction of this is an incomprehensible phenomenon in a well-regulated army. I will, therefore, ask you, for the sake of the service and the enterprise confided to me, to send me only officers who, whether active or asleep, hold no other opinion. I am particular on this point, because should what Marvin has described be repeated again among the troops entrusted to my care, I will immediately try the offenders by court-martial. You can readily understand how disagreeable it would be to be driven to such an extremity."

The Russian troops arrived before Geok, or Dengeel Tepé, in the afternoon, and taking up a position on a hill overlooking the crowded Turcoman camp, began bombarding it. After a few rounds, the Tekkés sent out to say they would surrender. But Lomakin refused to accept the submission, and the firing continued. Subsequent offers of the Tekkés were also rejected. Prince Galitzin, the chief of the cavalry, did not approve of the turning-back of the women and children into the camp, but was compelled to obey orders. After the mob of women and children—several thousand in number—had been driven back, the cavalry retired, and the artillery played afresh. General Lomakin reported:—"During six hours, over twelve cannon kept up a continued fire on the fortified village settlement, where were collected nearly all the population of Akhal, including women and children, more than twenty thousand persons. The effect of our artillery was dreadful. The Turcoman prisoners say that several thousands of their people were killed." Of course, there are massacres and massacres, and an enormous disproportion between the killed of the two belligerents does not necessarily imply savagery on the part of the victor. In the Soudan thousands of Arabs immolated themselves on the bayonet and breechloader. The same was the case at Ulundi, and during the Afghan War. In none of these cases was the heavy slaughter premeditated, and even where, as at Tel-el-Kebir, the exigencies of the situation seemed to excuse it, the work was spoken of regretfully. From Skobeleff's point of view, Makram was a great battle; he gloated over the clever piece of strategy which took the army of the enemy on the flank and swept it clean into the river, when the soldiers "were drowned like flies." If Roberts, during the Afghan War, had remorselessly driven a mob of 20,000 Afghans into a river, after all the fighting was over, and maintained a cordon along the bank while they were drowned before his eyes, he would have been denounced by public opinion as a monster. Admitting that it was necessary for Lomakin to give the Turcomans a good thrashing, can any palliator extenuate thrusting thousands of women and children into a crowded hollow, and pounding them with grape-shot from the hills above it? The Germans were more than once harsh—exceedingly harsh, from the ultra-sentimental point of view, which forgets that war *must* be war—but public feeling in Germany criticised and condemned these severities. We nourish the conviction that Germany would be the first to indignantly repel any comparison between Lomakin's conduct at Geok Tepé and her own during the siege of Paris. When Professor Gradovsky, late of the *Golos*, ventured to deprecate Skobeleff's massacre of the 8,000 Tekkés, he was assailed as unpatriotic and a caviller on all sides. But Skobeleff's letter, in a word, is not one that civilisation and humanity can commend.

The opinions which were expressed in this journal as soon as the orders were made known for the construction of those ridiculous row-boats for the expedition on the Nile have been corroborated by the assent and concurrence of every man who has any experience of the country and the river. A more wicked waste of money was never perpetrated—a more silly quackery was never devised by any public department than that of which Lord Hartington and the Duke of Cambridge, representing the War Office and Horse Guards, have really and truly been guilty in ordering that monstrous armada of boats, an unfloatable flotilla for the Nile! Burn them for firewood! Send them to Jericho, to ply on the Palestine Canal of the future! Make matches of them—do anything with them! Put men in them, and try to send them up the Nile Cataracts—never, we beg of you! It is very fortunate after all that the wiseacres who thought of these little row-boats did not take it into their heads to order 1,000 caiques from the Bosphorus and 5,000 Ganges boatmen at the same time! Of course, it may turn out that the row-boats can be utilised, and that all these vaticinations of ours may turn to our discomfiture and to the credit of the wiseacres, and we honestly confess it would please us well if so it were. But on certain matters connected with Egypt we have proved to be true prophets, and even now it is not to be denied that the armed interference with the national Government under Arabi, which the *Army and Navy Gazette* condemned three years ago, has produced immense mischief, and has led to the deplorable results which were foreshadowed in this journal, and we venture to think that the warnings and advice which were given in our columns week after week, month after month, year after year, have been amply justified and vindicated since the Government of the Queen undertook to control by force the internal affairs of Egypt.

The selection of the Earl of Dufferin as successor to the Marquis of Ripon as Viceroy of India will be hailed with general approval. In the precarious, if not strained state of our relations with most foreign powers, it is of the utmost importance that the governors of the outlying portions of our empire, as well as our representatives at European Courts, should be men of uncommon tact, ability, and force of character. In his new position, Lord Dufferin will find ample scope for the exercise of those valuable qualifications which he possesses in an eminent degree.

Lieutenant-Colonel F. W. Ward, R.A., has been appointed to the command of the Artillery at Jersey, and Lieutenant-Colonel W. T. Bridgen at Guernsey.

Lieutenant R. H. Cholmondeley, 27th Royal Inniskilling Fusiliers, has been appointed Aide-de-Camp to the Governor of the Straits Settlements.

It is gratifying to find that the doubts we expressed respecting the truthfulness of the statement that General Stephenson had opposed the Nile route as impracticable had an excellent basis, and that there was no foundation for any assertion of the kind, though the General dissented from some details of the War Office plan. He certainly never could approve of the little row-boat regatta himself.

The President of the Aldershot Permanent Committee on Infantry Valise Equipment is at present Colonel Utterson, 1st Battalion, 17th Regiment, who has been appointed, vice Colonel Harrison, C.B., R.E., proceeded to Egypt on special service. The only thing really permanent about this Committee is its name. Not one of its original members is now serving on it. The "new" valise which this Committee has produced, after much labour and endless experiment, turns out to be merely a modification of the present regulation valise, which has been condemned by all officers who have had practical experience of it on service. This interminable valise-equipment business is exactly where it was when Sir Thomas Steele's Committee, in 1879-80, turned a cold shoulder on the Oliver equipment, and went in for invention themselves. It is not probable that the present Committee will exist much longer.

Captain C. L. Mortimer, 7th Royal Fusiliers, has taken up the appointment of Deputy-Assistant-Adjutant-General at Edinburgh from the 1st inst.

Further trials are about to be made at Aldershot of the mode of attaching the sword of the cavalry soldier to the saddle, when mounted, instead of to his body. This matter, on which there is much difference of opinion, has been under trial and discussion for some time past. It is said that the proposed system does not find much favour in the 6th Dragoon Guards and 9th Lancers, by whom it has recently been tried.

The minor operations of last week at Aldershot were so far successful, that Colonel Utterson, 17th Regiment, the commander of the force (two battalions of infantry and a troop of cavalry), for the protection of the convoy (half-a-mile long), succeeded in getting his charge safely across the canal, and *en route* to the entrenched camp at Farnborough, in spite of the determined efforts of his opponent (Lieutenant-Colonel Farrington, 73rd, with two battalions and a troop of cavalry) to cut it off. It is painful to notice the ever-recurring complaints of troops of all arms exposing themselves to fire, and not taking advantage of cover during these operations. In many instances, it is really impossible for cavalry or infantry to know that they are being fired at until informed by some good-natured umpire that such is the case, and that half their strength must be put out of action. Batteries of artillery sometimes blaze away at nothingness, while they are supposed by the umpires to be making splendid practice at the enemy somewhere. No such absurdities are possible on the real battle-field. If in an exposed position, a commander would soon learn by painful experience that such was the case. It has been said that nothing is more unlike real war than a sham-fight. The truth of this axiom is made plainly evident at Aldershot once a week during the present dull season; and it is at least open to doubt whether these operations, major and minor, are of such great value as a means of instruction in the art of war as is generally supposed.

Brevet Major E. A. Groves, 50th Queen's Own, succeeds Major St. Clair, 49th Regiment, as Garrison Instructor in Egypt.

Major J. S. Rothwell, R.A., from the Staff of the Intelligence Department, has taken up the duties vacated by Major Clarke as Professor of Staff Duties, Military Administration and Law, at the Staff College.

The appointment of Deputy-Assistant-Adjutant-General of Royal Artillery at head-quarters is vacant, Lieutenant-Colonel J. A. Tillard being about to leave for India, to take up duty as Assistant-Adjutant-General, R.A., in the Madras Presidency.

In a letter which appeared in the *Morning Post* of the 6th inst., on the "Collapse of Short Service in the Army," Major-General E. W. Bray gives expression to opinions generally held by officers of experience, including even many of those who are personally interested in the apparent success of the late military revolutions. General Bray places in strong contrast the public utterances of army reformers and their actions. He shows how, while they speak and write of the short-service system as if it were a success, their acts prove it to be a decided failure. He shows how, whenever the real work of war has to be done, even on the smallest scale, no effort is spared, no expedient left untried, to secure the services of the oldest soldiers procurable. He advocates a return to the old system of pensions—a return not announced in warrants of equivocal verbosity, but in such plain terms as may restore the confidence of soldiers and of soldiers' friends—the confidence which has been shaken, if not almost destroyed, by recent "transformation scenes." General Bray has the courage of his opinions, and claims our earnest support.

Surgeon-Major W. D. Wilson, A.M.D., has succeeded Surgeon-Major W. F. Stevenson in medical charge of the Royal Arsenal, Woolwich.

Captain J. W. Murray, R.A., has succeeded Major J. S. Rothwell as D.A.Q.M.G. on the Staff of the Intelligence Department.

The appointment of Inspector of Gymnasia at Aldershot is, it is believed, likely to fall vacant by the appointment of Lieutenant-Colonel W. B. Cleather to the command of the 47th Regiment, in which case it will, it is said, most probably be offered to Lieutenant-Colonel G. M. Onslow, half-pay, late 20th Hussars, an officer of great experience in this particular branch of military training.

We notice with considerable satisfaction that our recent paragraph animadverting on the delays and omissions in the *Gazette* announcements regarding the Army Pay Department has had a good effect, as last Tuesday's *Gazette* contained the following:—"Army Pay Department—The promotion to the rank of Chief Paymaster, with honorary rank of Lieutenant-Colonel, of Staff Paymaster and Hon. Major R. B. Farwell, in recognition of his services in the Soudan, is antedated to April 16, 1884." And we trust this attention on the part of the authorities indicates that in future the successors to vacancies will be announced with reasonable promptitude.

Deputy-Surgeon-General J. O'Nial, C.B., P.M.O., of the Northern District, has proceeded to Egypt.

Captain M. G. Neeld, 17th Lancers, has been appointed A.D.C. to Lieutenant-General Sir G. Willis at Portsmouth.

Lieutenant G. A. Shute, R.E., has been appointed an Assistant-Instructor in Fortifications at the School of Military Engineering, Chatham.

Following the lead of the Home authorities, the Indian military authorities have published new regulations for the musketry training of the Indian Native regiments. Under the existing regulations, which were introduced with the Snider about 1877, a Sepoy fires in individual practice 63 rounds, this amount being divided over nine distances. Under the proposed new system the number of distances will be reduced to six, and 10 rounds will be fired at each distance. For the cavalry, the 250 yards range is to be abolished, and 10 rounds fired at each of the other distances. Recruits will also fire 60 rounds. Other changes are contemplated, such as raising the number of points which a man must obtain to become a marksman to 120, and introducing a moving-object practice. The distance to be abolished for the infantry will be 800 yards. Alterations have also been made in the distribution, but not in the amount of the prizes. The new system will probably take effect immediately.

The Favret tent has been handed over during the week to the 7th Hussars, at Aldershot, for trial and report. A portion of this regiment is now under canvas, near the West Cavalry Barracks, while their rooms are in the hands of the Royal Engineer Department for painting purposes.

Colonel Gordon, 65th York and Lancaster Regiment, late commandant of the Military Police at Cyprus, has been offered and has accepted an appointment under the Colonial Office in Hong Kong.

We hear from New Zealand that a large meeting has been held at Christchurch, to consider the question of colonial defence. The Mayor presided, and the following resolutions were passed unanimously, and ordered to be sent to the New Zealand Government:—"1. That this meeting considers it of the greatest importance that the principal portion of the colony should be put in a state of defence forthwith by mounting and placing in position the 22 heavy guns which were purchased at a cost of between £40,000 and £50,000, and which have been lying useless for about six years. 2. That in the opinion of this meeting the time has arrived for the Volunteer Force of New Zealand to be put on a somewhat similar footing to that of the Victorian Volunteers, viz., the principle of payment for one entire day's drill in each month."

Major F. H. Maitland, who, it is believed, is the heir to the title and estates of Lauderdale, is now Political Agent at Chirkari, in Central India. Major Maitland was originally in the 8th and 4th Hussars, and joined the Staff Corps in 1869.

The batteries of Artillery and regiments proceeding to India during the next trooping season will be stationed as follows:—3rd Dragoon Guards, at Muttra; T Battery, 1st Brigade, R.A., Kirkee; U Battery, 1st Brigade, R.A., Kamptee; N-1 Battery, Eastern Division, R.A., Murree Hills; No. 1 Battery, London Division, R.A., Campbellpore; 2nd Battalion, 18th Royal Irish Regiment, at Subathu; 31st East Surrey Regiment, at Ranikhet; and the 74th Highland Light Infantry, at Dagshai.

Major-General A. B. Johnson, C.B., Bengal S.C., Military Secretary at the India Office, has succeeded to colonels' allowances from July 30, but will retain his appointment.

The Navy.

ADMIRALTY, Sept. 6, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Com. H. W. Rochfort has been placed on the Retired List of his rank (Sept. 2). The Rev. A. B. S. West has been appointed Chaplain in her Majesty's Fleet (Sept. 3).

ADMIRALTY, Sept. 8, 1884.

Gunner W. T. Willis has been promoted to the rank of Chief Gunner in her Majesty's Fleet (Sept. 2).

ADMIRALTY, Sept. 9, 1884.

Royal Marine Light Infantry.—Capt. J. C. R. Scott retires from the service, receiving a gratuity (Sept. 3).

ADMIRALTY, Sept. 11, 1884.

Royal Naval Artillery Volunteers (Bristol Brigade).—John Arkle Waring, Esq., L.R.C.P., M.R.C.S., to be Surg. (Sept. 11).

In accordance with the provisions of her Majesty's Orders in Council of June 26, 1867, and Feb. 22, 1870, Staff Capt. J. G. Dathan has been placed on the Retired List, with permission to assume the rank and title of Retired Capt. (Sept. 8).

APPOINTMENTS.

Captain—John Ingles, to the Excellent, additional.

Commanders—G. C. Langley, to the Royal Adelaide, additional, for service in the Agamemnon; Charles Lindsay, to the Cambridge; William McC. F. Castle, to the Sappho.

Staff Commander—William H. Heywood, to the Pembroke, for the Conqueror.

Lieutenants—C. A. Forlong, to the Rapid; Hon. H. A. S. Stanhope and E. F. Inglefield, to the Alexandra, additional; Henry J. Keane, to the Pembroke, for the Kingfisher; Thomas T. C. Dundas, to the Ganges, for the Sealark; Gilbert E. Harrison, to the Sultan; Ernest G. Rason, to the Hector; George A. Callaghan, to the Duncan, for the Trent; William L. Down, to the Indus, for the Mariner; Lewis F. Blackburn, to the Indus, for the Lily; Francis S. Wheeler, to the Impregnable, for the Nautilus; Herbert G. Giles, to the Serapis; James Knowles, to the Hercules.

Naval Instructor—Edward M. Tims, to the Britannia.

Fleet Surgeon—E. J. Sharood, to the Agamemnon.

Staff Surgeon—H. M. Nash, to the Rapid.

Chief Engineers—George Watson, to the Northumberland; Edward R. Vine, to the Pembroke, for the Kingfisher.

Surgeons—J. L. Bagnall-Oakeley, to the Lion; Edward Ferguson, to the Agamemnon; J. B. Clibborn, to the Plymouth Division, Royal Marines; J. E. H. Williams, to Plymouth Hospital; William W. Jacobs, to the Starling.

Paymasters—W. E. P. Saer, to the Shannon; George M. Blyth, to the Agamemnon.

Engineers—William A. Ellis, to the Sultan; Edwin Bell, to the Hercules, for the Hawk; Edward Barret, to the Indus, for the Hecate.

Assistant-Engineers—F. P. Smith, to the Indus, for the Tamar; William R. Parker, to the Canada; Charles E. Shorey, to the Agincourt.

Gunners—William Cadwallader, to the Asia; John S. Rice, to the Condor; George Long, to the Asia, for the Volage; Samuel H. E. Dawe, to the Asia, for the Calliope; William Branch, to the Indus, for the Hyacinth; Thomas L. Ellis, to the Indus, for the Mariner; W. J. Crothers, Geo. Darby, and W. J. Sivyer, to the Agamemnon, for the Mariner; Joseph W. de Matose, to the Pembroke, for the Kingfisher.

Boatswains—Samuel C. Philpot, to the Duke of Wellington; Henry Shaw, to the St. Vincent; Charles Miller, to the Agamemnon, for the Kingfisher; James Rice, to the Alexandra, for the Kingfisher; John C. Swayne, to the Superb, for the Kingfisher.

Carpenters—Henry Evans, to the Agincourt; William H. Soper, to the Belleisle; Henry S. Turner, to the Ganges.

Alecto, Lieut.-Com. Frank A. Harston,—whose crew were brought home from the West Coast of Africa in H.M.S. Wye, and discharged to the Royal Naval Barracks, Sheerness, from which they will receive the usual leave of absence granted to men returning from foreign service,—hoisted the pennant at Sheerness in April, 1883, and has been recommissioned with a new crew, it being considered undesirable, on account of the unhealthy climate, to keep men on the West Coast of Africa for more than 18 months. The Alecto is a new vessel, having been built by private contract especially for service on the Gold Coast, in the place of the Pioneer, which is at present attached to the Medway Steam Reserve.

Amethyst, Capt. H. W. Brent, arrived at Para on Tuesday last. The Ready joined the Amethyst at Fernando Noronha on Aug. 29.

Assistance, Capt. St. Clair, arrived at Spithead on Monday night from Queenstown, with the second division of the 20th Hussars, which, on landing, proceeded by route-march to Aldershot. The division consists of six officers, 215 non-commissioned officers and men, and 133 horses.

Bittern, Com. W. F. S. Mann, was at Suez on Wednesday.

Canada, Capt. A. C. Curtis, went out of harbour and anchored at Spithead on Wednesday.

Cherub, Lieut.-Com. Haszard, tender to the Penelope, is having the damage sustained in collision with the armour-plated turret-ship Hydra made good by a party of mechanics belonging to Sheerness Dockyard. The vessel has been thoroughly examined by the officials, and it has been found that her port bow anchor bollards are broken. The covering boards over the anchor ports have also been carried away. The planking under the ports is damaged, and the port lower boom is broken. The other injuries are all above water-line, and are not of a serious character. The collision was caused by the wheel-ropes of the Cherub parting just as she had arrived in Sheerness Harbour from Harwich. The Hydra, which was at anchor, escaped uninjured.

Constance, Capt. Doughty, was at Honolulu on Aug. 29. Letters to be addressed Coquimbo.

Decoy, Lieut.-Com. H. C. Bigge, left Zanzibar on Sept. 7 for Aden.

Defence, Capt. A. J. Kennedy, lost a man on Tuesday by his falling from the fore-topgallant yard on deck, death being instantaneous.

Dolphin, Com. Eardley-Wilmot, left Alexandria for Suakim on Wednesday.

Euryalus, Capt. Hastings, flagship of Vice-Admiral Sir William N. W. Hewett, arrived at Zanzibar from Tamatave, Madagascar, on the 7th inst., and intends to leave for Aden on the 13th.

Express, Lieut. and Com. Knox, left Gibraltar on the 8th inst. for the West Indies.

Falcon, Com. J. E. Pringle, arrived at Alexandria on Wednesday.

Himalaya, Capt. H. St. L. B. Palliser, arrived at Bombay on Saturday last.

Kingfisher, Com. Evan-Thomas (act.), is ordered to be paid-off all standing at Sheerness on Sept. 18, and will be shortly recommissioned.

Minotaur, Capt. Britten, after hauling down the flag of Vice-Admiral H.R.H. the Duke of Edinburgh, and discharging powder at Spithead, proceeded into Portsmouth Harbour, and was berthed in the tidal basin on Monday.

Nelson, Comdre. J. E. Erskine, A.D.C., will be paid off early in January, 1885, and recommissioned at Sydney, N.S.W. Her ship's company will be relieved by a new crew of 500 Blue-jackets and Marines, who will be selected from the Naval establishments at Sheerness and Chatham. The Nelson was commissioned on June 29, 1881, and left Sheerness early in the following August. She was the first ironclad employed on the Australian station. She will now hoist the flag of Rear-Admiral George Tryon, C.B., the Admiralty having decided, in view of the growing importance of the Australian station, to place the command in the hands of a Rear-Admiral. The new crew of the Nelson will be conveyed to Australia in the Tamar, which is at present undergoing a thorough refit, but which will be ready for sea early in October.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir J. E. Commerell, was at Halifax, N.S., on Aug. 28, and was to leave on the same day for Newport, Rhode Island, and St. John, returning to Halifax on Sept. 18. The Garnet would also leave on Aug. 28 for Quebec. The Tenedos was employed at Newfoundland as senior officer on fisheries. The Dido was at Bermuda on Aug. 12, and would assume duties of senior officer of the division. The Griffon was at Jamaica on Aug. 7, was ordered to Halifax to replace the Fantome on the Newfoundland fisheries. The Flamingo was also at Jamaica on Aug. 7; on being relieved by the Express, will proceed to England, calling in at Bermuda on her passage. The Fantome was at Newfoundland on Aug. 26, on passage to Halifax, and will proceed to Bermuda to be docked. The Mallard was at Newfoundland on Aug. 26, and the Bullfrog at Jamaica on Aug. 17.

Opal, Capt. A. T. Brook, commissioned at Sheerness on March 13, 1883, has completed the term of service for which ships are usually stationed on the West Coast of Africa, and the Admiralty have now ordered her to proceed to the Australian stations to join the squadron under the command of Comdre. James E. Erskine, to which she will be attached until the expiration of the three years' service for which she was commissioned. The Opal will relieve the Espiègle, Capt. C. A. G. Bridge, which has been employed on the Australian station since Oct., 1881. The Espiègle will return to England, to be paid out of commission. The Opal's place on the West Coast of Africa will be taken by the Rapid, which was commissioned on Tuesday by Capt. H. J. F. Campbell, C.B., with a crew of 161 men. The Rapid is a new unarmoured composite corvette of the Satellite class, and is equipped with a powerful armament of breech-loading and machine-guns.

Orontes, Capt. Andoe, arrived at Malta on Sept. 8 from Alexandria with 150 naval invalids and time-expired men, and 380 drafts from different regiments on board, and proceeded the same day to Gibraltar.

Osborne, Com. Fawkes, left Portsmouth for Port Victoria (Sheerness) on Sept. 12.

Pelican, Com. Richard Hope, arrived at Plymouth on Sept. 10, and went into harbour. She was commissioned on April 3, 1884, for the Pacific. She arrived at St. Vincent on May 14, and left the same night for her station, arriving at Monte Video on June 17, which she left on the 24th. Her sudden arrival at Plymouth is therefore somewhat surprising, but the Admiralty announcements are infallibly correct.

Rapid was commissioned at Devonport by Capt. Campbell, on Tuesday, for the Cape of Good Hope and West Coast of Africa, with a complement of 161.

Rifleman, Com. P. H. W. Mayow, sailed from the South-East Coast of America station for Devonport on Aug. 30.

Sphinx, Com. Caffin, flying the flag of Comdre. Molyneux, was at Suakim up to Aug. 22, with the Carysfort, Tyne, Woodlark, Condor, and Albacore in company. The Wanderer left Suakim on Aug. 21 for Massowah, *en route* to China. The Myrmidon was on surveying duties, and would arrive at Suez by the end of August. The Humber was carrying out "Lochard's" programme.

Sultan, Capt. Tracey, having discharged her powder at Spithead, proceeded into harbour, and was berthed in the tidal basin.

Swiftsure, Capt. the Hon. Thomas S. Brand, flagship of Rear-Admiral Lyons, was at Esquimault on Aug. 21; she will remain on the Vancouver division for the present; was at Esquimault on Sept. 3. The Constance left San Francisco on August 1 for Honolulu, Karatonga, the Hervey Group, Tahiti, and Coquimbo. The Heroine was at Calloa on Aug. 6, conducting duties of senior officer on the coasts of Peru and Chili. The Sappho was at Calloa under orders of the senior officer on the coasts of Peru and Chili. The Pelican was at Coquimbo on July 25; also under orders of the senior officer on the coasts of Peru and Chili. The Satellite left Callao on Aug. 8, on passage to Esquimault; was to call at Panama, Acapulco, and Guymas; will probably not arrive until the second week in October. The Mutine was at Esquimault; will proceed to the southern division of the station when relieved by the Satellite.

Temeraire, Capt. Domvile, left Malta on Sept. 8 for Alexandria.

Tenedos, Capt. E. C. Drummond, arrived at St. John's, Newfoundland, on Aug. 20 from Sydney, La Poile, and Great St. Lawrence, and was to leave about Aug. 30.

Tourmaline, Capt. R. H. Boyle, left Zanzibar for Aden and Devonport on Sept. 7.

Vigilant, Lieut. and Com. Maxwell, flying the flag of Vice-Admiral Sir William Dowell, was at Amoy on July 24 (has since arrived at Foochow). The Audacious was at Chefoo on July 20, and about to proceed to Amoy. The Sapphire left Chefoo on July 20 for Amoy. The Cleopatra was at Shanghai on July 24, and would remain. The Albatross was at Ningpo (and Yang-tse) on July 24. The Fly was at Chinkiang (Yang-tse) on July 19, and would remain. The Champion is *en route* to Foochow from Amoy. The Linnet left Chefoo on July 20 for Pagoda Anchorage; she will be sent to Singapore (has since reached Olehleh). The Merlin was at Foochow on July 24, and would remain. The Daring left Hong Kong on July 10 for Hainan Straits to search for disabled steamship Kremlin, and would return to her station at Canton. The Swift was at Amoy on July 24, and was to return to Hong Kong on the arrival of the Sapphire. The Cockchafer left Chefoo on July 20 for Tamsui. The Zephyr was in the Gulf of Tonquin; alternately visiting Hoihow and Pakhoi. She was at Hoihow on July 5, and has since arrived at Foochow, being fired upon by the Chinese batteries in the Min in mistake. The Curacoa was at Chefoo on July 20, and was to remain as senior officer's ship in the Gulf of Pechili. The Midge was at Chefoo on July 20, and was to visit Newchwang and return to Chefoo if all was quiet. The Espoir was at Tientsin on July 21, and remains. The Pegasus was in the Straits of Malacca; at Singapore on June 25; would leave for Acheen on June 26, and return to Penang; she was to proceed to Hong Kong on the arrival of the Wanderer from England. The Foxhound was at Singapore; left Hong Kong for Singapore on June 7, calling at North Borneo ports and Labuan; she was to reach Singapore during the first week in July. The Flying Fish was at Corea on July 24, surveying the coast and off-lying islands.

Watchful, Lieut.-Com. Goodrich, returned to Devonport on Saturday, after three days' experimental cruise in the Channel. The trial was satisfactory, the vessel making over 11 knots an hour. She left Plymouth for the West Coast of Africa on Tuesday, calling at Madeira *en route*.

A court-martial, of which Capt. Stewart was president, assembled on board the Victory at Portsmouth on Monday morning for the trial of Lieut. H. F. J. Wyatt, of the Serapis, who was charged with improperly leaving his ship on August 23. Capt. Douglas prosecuted. The troopship was in the dockyard at the time, and the prisoner was left in command as commanding officer and lieutenant for day-duty. Some time between 8 and 9 p.m. he quitted the ship in plain clothes, telling the officer of the watch he was to go on board the Malabar. He left the dockyard and did not return to the ship till a little before 11 p.m. The prisoner humbly submitted that though he left the ship for a temporary purpose, of an urgent private nature, he did not do so improperly. He did it openly and without hesitation. The prisoner's certificates were of the highest character. There was not a single record against him. The Court found the charge proved, and sentenced the prisoner to forfeit one year's seniority as lieutenant and to be severely reprimanded and dismissed the ship.

The Pylades, which has been under construction at Sheerness Yard, will be ready for being launched in the course of a few weeks, when a new unarmoured ship, to be named the Swallow, will be commenced on the same building slip.

The clipper Kreutzer, which has been re-engined this summer, and her speed thereby increased by five knots a hour, will leave Cronstadt in a few days' time for the Pacific. On her way thither she will call at Brest and deposit a crew there to take to the Black Sea a sea-going torpedo-boat, the Gagri, of the improved Batoum type, which has just been finished by a French shipbuilding firm.

The Admiralty have appointed a committee, with Capt. P. H. Colomb as president, to consider and report upon the desirability of amalgamating the victualling store departments and establishments with the several dockyards, with the view of promoting greater economy and efficiency.

The Orient Line steamship Lusitania, Capt. H. T. Slader, R.N., from Australia, *viâ* Suez, arrived in Plymouth Sound on Tuesday, and landed 42 naval and military invalids, the majority from Egypt.

Mr. James Angear, Chief Constructor of Devonport Dockyard, has joined the Technical Committee at the Admiralty, to work out the recommendations of Lord Ravensworth's Committee on dockyard *versus* contract labour. The work of the experts is likely to last several days.

The Polyphemus made a preliminary trial of her electric light machinery at Portsmouth on Wednesday. The readjustments which have been made in her underwater torpedo fittings, at the recommendation of a special committee, are almost ready for trial. The difficulty has been to launch the torpedoes from the beam at high speed. Hitherto the torpedo was impelled along a guide bar, to which it was attached by a T-piece, until it got sufficiently far from the ship not to be affected by her way. The pressure of the water, however, caused the guide, which moved from the side with the torpedo, to vibrate to such an extent under the pressure of the water as to either jam the torpedo effectually or to injure its tail at the moment of leaving the "ways." This defect has now, it is hoped, been removed by the addition of a strong and rigid gun-metal shield, which is projected from the side, and takes the pressure of the water from the guides. After the testing of the torpedo fittings, the official trial will be made of the machinery. Up to July, upwards of £248,475 had been spent upon this experimental craft, and considerable sums must have been expended upon her since.

A Delicious Cooling Drink is supplied in Rose's Lime Juice Cordial in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order Rose's Cordial. Wholesale Stores—11 Curtain Road, London; and h,N.B

THE INDIAN TROOPSHIPS.

The Malabar, Capt. Harris, opened the Indian trooping season on Wednesday. The other dates for the Malabar leaving Portsmouth for Bombay are Nov. 27 and Feb. 12. The remainder of the troopships will commence their duties on the following dates:—Crocodile, Sept. 20; Serapis, Sept. 30; and Jumna, Oct. 10. Each vessel will make three trips to and from India during the trooping season. The Euphrates is undergoing an extensive repair, and is withdrawn from the trooping service for this season.

The Admiralty have directed estimates to be sent in of the cost of refitting the Kingfisher, recently arrived from the Pacific.

The Admiralty have placed at their disposal by the death of Retired Capt. (Navigating) Edward J. P. Pearn, a Naval pension of £50 per annum. Capt. Pearn entered the Navy over half a century ago, and rose to be master of the Powerful. He served as a volunteer during the action with the Egyptian Army in Syria, and was present at the bombardment of St. Jean d'Acre in 1840.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

London Amusements.

The reopening of Drury Lane Theatre took place on Thursday night, when Mr. Augustus Harris began his new campaign with a revival of "The World," originally brought out at the end of July, 1880.

The Lyceum was reopened on Saturday night, under the management of Mr. Abbey, with Miss Mary Anderson in "Pygmalion and Galatea" and "Comedy and Tragedy." Mr. Terriss is now Pygmalion.

To the Gaiety has been brought back the burlesque-drama of "Camaralzaman," with Miss E. Farren and her many associates, while the Empire is now furnished with Mr. Robert Reece's extravaganza of "Little Robin Hood," originally produced at the Gaiety in September, 1882. The latter is a piece to be seen.

The Strand Theatre is still occupied by "Our Boys," which on Monday night here passed its one-hundredth representation, having been already represented in the Metropolis 1,486 times. The enduring vitality of the comedy holds out every hope that the present career will be prolonged for several weeks yet to come.

Passing under the direction of Messrs. Willie Edouin and Lionel Brough, Toole's Theatre is now reopened with a lively entertainment in the form of a burlesque, called "The Babes; or, Whines from the Wood," previously played with considerable success in the provinces.

At the Vaudeville, Mr. Henry A. Jones's new domestic drama will be produced in a fortnight, under the title of "Saints and Sinners," and Mr. T. Thorne will make his reappearance.

The Comedy Theatre has reopened with Planquette's lively three-act opera of "Rip Van Winkle," first produced here two years ago. Mr. Frederick Leslie repeats his spirited impersonation of the hero of Sleepy Hollow, and Mdlle. Berthe Latour, previously a member of the Carl Rosa Company, now represents Gretchen with excellent effect. Miss Coote is a pleasantly vivacious Katrina, and Mr. Harry Paulton and Mr. Henry Walsham afford valuable assistance to the revived opera now replaced on the boards with a liberal expenditure, signifying a renewed run is expected.

Vessels and boats employed on submarine mining service are in future authorised to carry the blue ensign with a badge of the following description:—Hand issuing from a mural crown and grasping a thunderbolt.

The Ajax, Agamemnon, and Dreadnought are about to be commissioned. It is to be hoped that the steering qualities of the two former have been improved, or they will prove very unsafe when in company with other ships, owing to it being impossible to place any reliance on the helm. The Arethusa is also being brought forward for commission.

"Health Exhibition."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

BIRTH.

Crookenden.—On the 11th inst., at 5 Osborn Road, Newcastle-on-Tyne, the wife of Major Crookenden, A.P.D., of a son.

THE CHURCH IN THE ARMY.

THE ARMY GUILD of the HOLY STANDARD offers a PRIZE of £20, open to all comers, and a PRIZE of £5, open to Warrant or Non-Commissioned Officers or Soldiers, for the best Essay on the following subject:—"How can the Church best Promote the Cause of Religion in the Army?"

The Essays should be written on one side of the paper only, not exceeding 10 pages of foolscap, 34 lines on each page, and be signed with a Motto. They must be accompanied in each case by a sealed envelope bearing outside the same Motto as at the foot of the Paper, and inside the name and postal address of the writer. These envelopes will not be opened until the PRIZE has been adjudged. The Essays will become the property of the Guild.

The Judges are Lieutenant-General J. E. T. Nicolls, Major-General H. L. Balfour, and the Rev. R. A. Corbett, C.F. The Essays must be sent in—Home Stations by November 1, 1884; Foreign Stations by January 1, 1885.

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig Company's Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

The Finest Meat-Flavouring Ingredient.

Invaluable and efficient Tonic for Invalids.

Ask for the Liebig COMPANY'S Extract, and see that no other is substituted for it.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

SYDNEY, MELBOURNE, ADELAIDE	From Gravesend, Thursday, 12.30 p.m. From Brindisi. Monday.
BOMBAY, EGYPT, ADEN, GIBRALTAR, MALTA	Every Wednesday.

MEDITERRANEAN, EGYPT, and BOMBAY, every Fourth Wednesday.

Offices—122 Leadenhall Street, E.C., and 25 Cockspur Street, London, S.W.; 24 Rue Lepelletier, Paris; 7 Rue Noailles, Marseilles.

HALL LINE.—LIVERPOOL to BOMBAY, *viâ* SUEZ CANAL, calling at MALTA, if sufficient inducement offers. The magnificent fast Steamship,

"SPEKE HALL,"

2,700 tons, will sail on October 1. This Steamer has been specially adapted for the East-India Trade. Her Saloon and State-rooms are spacious and well ventilated. The accommodation is unsurpassed. Only first-class passengers taken. Fare from Liverpool to Bombay, 40 Guineas. Surgeon and Stewardess carried.

Succeeding Vessels:—

Werneth Hall, 4,100 tons	Oct. 15.
Rydal Hall, 2,700 tons	Oct. 29.
Wistow Hall, 2,700 tons	Nov. 12.
Bretton Hall, 2,500 tons	To follow.
Merton Hall, 4,100 tons	To follow.
Eden Hall, 3,600 tons	To follow.

For passage, apply in London to Henry S. King and Co., 65 Cornhill, and 45A Pall Mall; or for freight or passage, to ROBERT ALEXANDER and CO., 20 Castle Street, Liverpool.

PLEASURE SAILING YACHT COMPANY.—A Cruise in Summer Seas.—Those wishing to cheat the winter, cruising in Southern latitudes, are invited to view the magnificent Yacht TYBURNIA, 1,012 tons register, lying at C Jetty, West India Dock (Fenchurch Street to W.I. Dock Station eight minutes), and leaving London October 1, Plymouth October 7, for a six months' cruise. A fine sailing yacht is chosen in preference to a steamer, to avoid coaling and the wearying thump, thump of the propellor. The ports of call will include Gibraltar, Barbadoes, and Jamaica, and the gay city of New Orleans, for the Grand Exhibition, and other interesting ports and islands, all chosen for their salubrity of climate and bright summer weather. Unrivalled accommodation and cuisine, steam launch for fishing and shooting, and table wine found. Terms, 150 guineas. Several large family cabins at special rates.—Apply to Captain J. KENNERLEY, on board; Sewell and Crowther, 18 Cockspur Street, W.; or Company's Offices, 11 Southampton Row, Holborn, W.C.

UNIVERSAL PASSENGER AGENCY,—Messrs. WM. HOOLEY and CO. having peculiar facilities for engaging passages to New Zealand, India, Australia, United States, Canada, West Indies, Brazil, the Cape, and all parts of the world, are prepared to do so at the lowest possible rates, either by steamers or sailing vessels. Fullest information given on application to 128 Leadenhall Street, London, E.C.; or 2 Oriental Place, Southampton. N.B.—No commission is charged to passengers for engaging passages.

FALKNER'S "REAL MALT" WHISKEY.

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c., for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill:—

Captain Fleming, R.A.,
Major Creagh, R.A.,
Captain Hippisley, 2nd Dragoons, and
Major Churchill, Northumberland Regiment,

were successful.

Captain Grieve, R.A., qualified.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITIA COMPETITIVE EXAMINATIONS, 1885. MAJOR COWPER has vacancies for two or three pupils desiring a small class and expeditious preparation.

Individual attention from each instructor.

From 1881-1884 (seven examinations) 22 pupils have competed, and 15 passed, viz., 1st, 8th, 10th, 21st, 28th, 29th, 30th (twice), 33rd, 34th, 37th, 58th, and 64th. Preparation for the Further and Preliminary. Terms moderate.

Testimonials and References on application to MAJOR COWPER, 10 Clifton Villas, Maida Hill, W.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.
By Order,
G. W. FORSTER, Secretary.

LEAVE SEASON.

FINAL MILITARY COMPETITIVE.

MILITIA OFFICERS prepared for the above at

THE ABBEY, ABINGDON, BERKS.

NEXT TERM commences OCTOBER 11.

For particulars see above.

NEWTON COLLEGE, SOUTH DEVON.
President of Council—The EARL of DEVON.
Head Master—Rev. G. TOWNSEND WARNER, M.A., Trin. Coll., Camb. (assisted by twelve Resident Graduates).

This School now offers a first-class education to the sons of the clergy, officers, professional men, &c., on moderate terms.

The system is arranged so as to embrace every kind of Education necessary for the Universities, Army and Navy, Civil Services, Commercial Life, Colonial Life, &c. There are Classical and Modern sides, quite distinct, with all appliances for a Modern Education separate from that required for the Universities and learned Professions.

The success of the School has been undoubtedly due to the large staff of Masters, and the individual attention which can thus be given to boys of different calibre. The New School Buildings also are a great advantage, and teaching is carried on with facility in the large, airy rooms.

After nearly ten years of work at improvements, the Council feel that they can now offer educational advantages, unrivalled in two Western Counties.

There is a School Chapel, large swimming bath, gymnasium, carpenter's shop, eight racquet and fives courts, 20 acres of beautifully situated playing fields, &c., and as a proof of the favour extended to the School under the present regime.

The NUMBERS have RISEN from 22 to OVER 150.

A special feature of the work is that of Preparing Boys in a Junior School for the larger Public Schools.

Since 1882, Six Scholarships have been won at Winchester and Marlborough by Newton Boys, and the work in the Examination all round has been quite up to this standard. Owing to its situation, the College has been able to render great assistance to delicate boys, and the highest references can be given on these points. Special Classes for Woolwich and Sandhurst.

A list of honours for the year (including a first-class at Oxford) will be sent on application to the HEAD MASTER. £400 given yearly to Scholarships.

FLORIDA.—A CLERGYMAN'S SON, who has been three years in Florida, is returning in October. He will be glad to communicate with TWO or THREE GENTLEMEN to JOIN him —"M. H.," care of Mr. GLEN, 379 Strand, W.C.

CIVIL SERVICE and ARMY EXAMINATIONS.

and four others qualified.

NEXT COURSE for STAFF COLLEGE and PROMOTION commences OCTOBER 15.

Militia and other Courses now going on.

MILITIA COMPETITIVE.—Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST and WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomas), Major LENDY continues to RECEIVE Candidates. He has already passed 1,300 Pupils, and of the last twenty he sent up to compete fifteen were successful. Sunbury-on-Thames.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

ARMY and other EXAMINATIONS.—G. W. VON TUNZELMANN, B.Sc. London, Assistant Examiner in Magnetism and Electricity, Science and Art Department, RECEIVES a limited number of Pupils. Special facilities for French, in view of new regulations. Terms moderate. Good success. Highest references. NEXT TERM BEGINS SEPTEMBER 20.—Devon Lodge, Dartmouth, S Devon.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of TEN successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIX SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS.—Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

ARMY EXAMINATIONS.—PREPARATION for WOOLWICH and SANDHURST in the Modern Side of Derby School. Fees £70. Sons of Officers £60. Lists of successes and of Scholarships tenable at School can be obtained from the Rev. WALTER CLARK, B.D., the School, Derby.

THE GROVE COLLEGE, ADDLESTONE, SURREY.

A School of the first-class for the Sons of Gentlemen, particularly of Military and Naval Officers.

A Special Class in which boys are prepared for Service Cadetships, according to the Admiralty Regulations for the Britannia candidates. Success guaranteed in ordinary cases. Inclusive terms for this class, eighty guineas a year.

Only forty-five minutes from London.

Prospectuses and References as to standing and success from Principal, Rev. SAMUEL T. EALES, M.A. D.C.L

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

ARMY and NAVY SCHOOL, BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

INDIA CIVIL SERVICE.—The 22nd successful Candidate in the recent India Civil Service Examination passed direct from TRINITY COLLEGE SCHOOL, STRATFORD-ON-AVON. Preparation for all Competitive Examinations, Classical and Modern sides. Preparatory Department for young boys. Large staff of Masters. Fine buildings, with latest sanitary improvements. Inclusive terms, 60 and 70 guineas.—Apply to the HEAD MASTER.

LIEUTENANT-COLONEL T. J. R. MALLOCK, late Royal Fusiliers, and Garrison Instructor of the Southern District for the last six years, RECEIVES a Limited Number of MILITIA SUBALTERNS as Resident Pupils, to PREPARE them for their MILITARY COMPETITIVE EXAMINATION.

Terms, &c., on application. The NEXT COURSE will commence on OCTOBER 1.

Address—Pinewood, Bagshot, Surrey.

SOUTH COAST.—PREPARATORY SCHOOL.—Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

ARMY EXAMINATIONS.—A RETIRED OFFICER, with some Coaching experience, will be glad to TAKE the TACTICAL or LAW CLASSES, or both, at an Establishment in or near Town. Can also help with French and German.—Address, LE BALAFRE, May's, 159 Piccadilly.

KELLY COLLEGE, TAVISTOCK.

There will be an EXAMINATION for an ELECTION of FOUNDATIONERS on SEPTEMBER 19, 1884. Preference, after Founder's Kin, to Sons of deceased Naval Officers.—For particulars, apply to the HEAD MASTER.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second.—PUNDIT, 21 Beechholme Road, Clapton, London.

CAPTAIN F. H. FAWKES (retired Royal Engineers) prepares quickly and successfully for ARMY, CIVIL SERVICE, &c.

Good house accommodation; excellent staff of Tutors; and all arrangements made with a view to secure in everything as high a standard as possible. Five years' successful experience. References to Masters at Eton and Harrow, and other Public Schools.

Recent Sandhurst successes:—
- Places—7th, 12th, 20th, 27th, 34th, &c.
- Mathematics—FIRST and SECOND places consecutively.
- English—FIRST, SECOND, and FOURTH places consecutively.
- Geology—95 per cent. twice consecutively.

Sandhurst and Woolwich Preliminaries, 21 out of 27.

JULY. { SANDHURST—4 out of 5; and PRELIMINARY—2 out of 3.

Address—UPTON PARK, SLOUGH, BUCKS.

ST. MARY'S HOSPITAL MEDICAL SCHOOL, PADDINGTON, W.

Extension of the School Buildings and Hospital. The WINTER SESSION will COMMENCE on OCTOBER 1, with an Introductory Address by Dr. Lees.

The ANNUAL DINNER of the past and present Students will take place the same evening, Dr. ALFRED MEADOWS in the Chair.

On THURSDAY, OCTOBER 2, a CONVERSAZIONE will be held in the New School Buildings, at 8.30 p.m.

The Hospital contains 270 beds.

The new wing, containing 70 additional beds, was opened by her Royal Highness Princess Louise (Marchioness of Lorne) on July 2 last.

Five Open Scholarships in Natural Science (one of the value of £100, and four of £50 each) will be offered for competition on Tuesday, September 23, and following days.

The School Buildings, to which large additions have been made, especially as regards the laboratories for the teaching of Physiology and Chemistry, are in full working order.

In addition to the open entrance Scholarships, class prizes, and usual appointments, Scholarships will be offered for competition at the end of each year; open to all pupils of the Hospital. As an incentive to clinical study, all the medical appointments in the Hospital, including the five House Surgeoncies, are open to pupils without additional fee or expense of any kind, thus offering advantages both professional and pecuniary of the highest importance to the student, and forming a valuable addition to the system of Scholarships and prizes. These offices are awarded after competition, preference being given to the qualified perpetual pupils of the Hospital. Special Classes are held for the preliminary scientific and intermediate M.B. of the University of London, and for the F.R.C.S. examinations.

For prospectus and further information, apply to the Dean, who may be seen personally at 3 p.m. daily, or to the Medical Superintendent at the Hospital. GEORGE P. FIELD,
Dean of the School.

OXFORD MILITARY COLLEGE, COWLEY, OXON.

PATRON—
H.R.H. the DUKE of CAMBRIDGE, K.G., &c.
Managed by a Committee of General Officers and Gentlemen connected with Education.

Head Master—The Rev. J. M. EUSTACE, M.A., St. John's Coll., Camb. (late Joint Head Master, Wimbledon School), assisted by G. H. Nelson, Esq., M.A., F.G.S., F.R.G.S., Queen's Coll., Oxon., Second Master, and eleven Assistant-Masters.

This College combines the advantages of a public school training with private tuition for candidates wishing to prepare for the Indian and Home Civil Services, for Woolwich, Sandhurst, and for Matriculation. Special importance is attached to mathematics and modern languages, and sufficient individual attention guaranteed.

More than 100 pupils, or 62 per cent. bonâ fide candidates, have passed direct from this College within the last seven years. Upwards of 200 of Mr. Eustace's pupils have passed the competitive examinations for the Army.

The course of instruction comprises—riding, gymnastics, swimming, and the various military exercises. The buildings and grounds include chapel, laboratory, library, swimming bath, fives courts, and large cricket field. Age for admission, 10 to 17. Terms, from 70 to 100 guineas. The Head Master is prepared to admit a limited number of sons of officers on reduced terms.

For Prospectus and list of successful students apply to the HEAD MASTER.

ARMY EXAMINATIONS, 1884.

Dr. CHETWODE CRAWLEY'S LIST:—
SANDHURST, July, 1884.

	Marks.		Marks.
Walpole (1st)	8348	MacGusty	6355
King	6191	Hamilton-Jones	6153
MacDonnell	6057	Crosbie	6021
Wilson	5819	Ford-Hutchinson	5772
Humphrey	5349		
WOOLWICH, July, 1884.		Mil. Officers, April, 1884.	
Digby (6th)	6107	Annesley	2019

*** Walpole's score is by far the highest ever made for Sandhurst. Three times within three years first place at Woolwich and Sandhurst Examinations has fallen to Dr. Chetwode Crawley's pupils.

In previous Academical year, 17 passed for Woolwich, Sandhurst, &c; 7 for Class I, &c.; 18 for Royal Irish Constabulary cadetships, besides 42 miscellaneous Examinations.

W. J. CHETWODE CRAWLEY,
LL.D., F.R.G.S., F.G.S., &c.,
Queen's Service Academy, Ely Place, Dublin.
ESTABLISHED 1852.—Over 1,000 Pupils successful.

ARMY EXAMINATIONS.—PREPARATION in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

THE MANOR HOUSE, LEE, S.E.—SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following SIXTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

THE MANOR HOUSE, LEE.

AUTUMN TERM COMMENCES AUGUST 25.
The NEXT TERM for MILITIA OFFICERS reading for the MILITARY COMPETITIVE COMMENCES OCTOBER 14, 1884.

LONDON INTERNATIONAL COLLEGE,
Spring Grove, Middlesex, W.
Founded under the auspices of the late Richard Cobden.

French and German taught to every Boy.

Among the successes during the year are two OPEN SCHOLARSHIPS at CAMBRIDGE, and a 13th WRANGLER.

Several FOUNDATION SCHOLARSHIPS, tenable at the School, which may be increased from a Special Fund in the case of those requiring it.

Three restricted to Sons of Officers with an additional reduction; also LEAVING SCHOLARSHIPS, tenable at SANDHURST, WOOLWICH, &c.

The NEXT TERM BEGINS THURSDAY, September 18.

Apply to the SECRETARY, or to the Head Master, H. R. LADELL, M.A.

ARMY and UNIVERSITY EXAMINATIONS.—Mr. R. C. DAVIES, M.A., the Wood House, New Southgate, N., has VACANCIES. Three candidates were sent up for the July Sandhurst Competitive, and all were successful, two of them having twice failed previously, and now passing 40th and 41st. Large grounds and cricket-field. Average number of pupils, ten.

RAMSGATE COLLEGE.

Established as Chatham House, 1809; Rebuilt, 1878 to 1882.
WARDEN AND CHAIRMAN OF THE COUNCIL,
The Rev. E. GRIPPER BANKS, M.A. Oxon.
HEAD MASTER,
E. C. MUSSON, Esq., M.A., Camb., F.G.S.
(Late Head Master of the Grammar School, Ashford.)

The College, standing in 17 acres of enclosed park, has unsurpassed Grounds and School Buildings, including a Private Chapel, Chemical Laboratory, Workshops, Gymnasium, Bath-rooms, Isolated Infirmary, Cubicles, Private Studies. The sanitary arrangements have been pronounced, by eminent engineers, perfect.

GENERAL SCHEME.—To provide for Sons of Gentlemen, in a climate especially suitable, a first-class education at a moderate cost. School system framed to combine the advantages of a Public School with the individual attention of a private tutor, so that all the boys—and not only the more clever—are made to work.

COURSE of INSTRUCTION.—To prepare Pupils for the Universities, the Services, the Professions, Mercantile Pursuits, and specially for Scholarships, at the Universities and the Hospitals, the India and Home Civil Service, entrance to the Legal and Medical Professions, Matriculation, and the further Examinations at the London University.

GREAT SUCCESS has been obtained for Woolwich and Sandhurst. The Head Master, who has had long and most successful experience, receives into his house a limited number of pupils who need special aid and attention.

HONOURS GAINED are many and varied, and include in the present year 1st Class in Lit. Hum. at Oxford, a high Wranglership at Cambridge, entrance to Cooper's Hill, Associateship at the R. School of Mines. Sandhurst entrance direct.

MODERN DEPARTMENT.—Great importance is attached to Science, and to Modern Languages, which are taught colloquially as well as grammatically, and by foreigners.

JUNIOR BRANCH, for BOYS, rom seven upwards, in separate wing and with special supervision, such as is necessary for boys leaving home for first time.

The NEXT TERM will BEGIN September 20.

For Prospectus, &c., apply to the SECRETARY of the GOVERNORS of the PROPRIETARY COLLEGE at RAMSGATE (Limited).

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.
The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.
Head Mistress—Miss M. E. POPE,
Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

JERSEY LADIES' COLLEGE.

UNIVERSITY DISTINCTIONS.—Honours have been taken by the Pupils in the London and Cambridge University Examinations, and in those for the Brevet de Capacité (Paris).

Fifteen Resident Mistresses, Members of Newnham Hall, Cambridge, the London University, or Diplomées of the Académie de Paris and Conservatoire de Stuttgart.

School Fees:—Three to five guineas per term; boarding fees, eleven guineas per term. Reduction for sisters and Clergyman's daughters. No charge for Books and Stationery.

For particulars apply to the LADY PRINCIPAL, Ladies' College, Jersey.

CLIFTON HIGH SCHOOL for GIRLS, BRISTOL.

PRESIDENT OF THE COUNCIL.
The Very Rev. The DEAN of BRISTOL.
VICE-PRESIDENT.
The Rev. J. M. WILSON, M.A.,
Head Master of Clifton College.
HEAD MISTRESS—Miss WOODS.

The THIRD TERM of 1884 will begin on SATURDAY, September 20.

Application for admission may be made to the Secretary, at the School, or the Hon. Secretary, G. H. WOLLASTON, Esq., 24 College Road, Clifton, Bristol, from either of whom information as to Boarding Houses may be obtained.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the
STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

HOLLOWAY'S PILLS.—TEACHINGS OF EXPERIENCE.—The united testimony of thousands, extending over more than forty years, most strongly recommends these Pills as the best purifiers, the mildest aperients, and the surest restoratives. They never prove delusive, or give merely temporary relief, but attack all ailments of the stomach, lungs, heart, head, and bowels in the only safe and legitimate way, by depurating the blood and so eradicating those impurities which are the source and constituent of almost every disease. Their medicinal efficacy is wonderful in renovating enfeebled constitutions. Their action embraces al that is desirable in a household medicine. The expel every noxious and effete matter, and thus th strength is nurtured and the energies stimulated,

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE. Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice - Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

⁂ *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* not *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, payable in advance, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

"GENIUS" is erratic. It is sometimes considered that if a man be erratic, inconsistent, whimsical, fantastic, he must be a genius. It may be a just, or it may be an unjust conclusion. Take the case of Major-General Gordon. Above and before all things he hated Turks in general and Pashas in particular, and his antipathy to the rule of the Sultan was intense—a passion of his nature. Gordon was sent by Ismail Pasha to the Soudan to continue Baker's work and exterminate slavery. In the course of his Lieutenancy, he signalled out as the special object of his indignation, on account of his alleged complicity in the slave-trade and as the chief of the slave-dealers, one Zebehr Pasha, and he executed Zebehr's son for revolting against his authority. Some years later on, Gordon was sent back at his own request to settle matters in the Soudan a second time, to arrange for the retreat of the various garrisons and subjects of the Khedive Tewfik scattered over the region between the Red Sea, the Abyssinian frontier, and the two Niles, and to evacuate Khartoum and all the provinces south of Nubia. He arrived at Khartoum, and immediately decreed that slavery was lawful—not slave-trading, may it be said—but slavery itself. That is, he legalised a possession which could only be obtained by the process which he did not sanction. It was lawful to have the article, but the manufacture was forbidden. Next he demanded that Zebehr Pasha should be sent to him as his Lieutenant and successor. He urged it over and over again, and he repeats the demand to-day. Meantime, he fights and prays, and prays and fights, and has not the smallest intention of evacuating any place. Not only that. He is bent on "taking," and he insists on legions of Turks—under Pashas, of course—being let loose on the Soudan. And yet, for all this startling antithesis to his former policy, there may be actual method in Gordon's strange ways, arising out of a clear grasp of the situation by a man of genius on the spot, despising charges of inconsistency or fickleness, and blessed with a perception denied to matter-of-fact dullards. But if Lord Wolseley is bent on emulating the eccentricities of Gordon, we cannot so readily accept his vagaries as proofs of genius, though for the actual conduct of war the genius of Lord Wolseley is incontestable. In his "Soldier's Pocket-Book" there was a good deal of space *pro ratâ* devoted to the consideration of the position of "the plague of modern armies—the Special Correspondent." Lord Wolseley described him much as a naturalist would give an account of a new species of objectionable animal or insect, and examined the means of dealing with his teeth, his beak, his claw, his scratch, neutralising his venom or extracting his honey,—for the creature has the properties of a great variety of the wonders of creation. But presently, when it came to Lord Wolseley's turn to command an army, he not only patronised the "plague," but he actually inoculated the Staff of his army with the virus. Captain A. was allowed to be correspondent of the "*Daily Doldrum*," and Captain B. was recognised as the purveyor of military intelligence and opinions from the Head-quarters camp to the "*Everlasting Weathercock*," so that the world might rely on accurate official accounts, and on the promulgation of orthodox views according to general orders. There was, however, another phase of the war-correspondents' relations with an army when the Expedition to Egypt took the field under Lord Wolseley's command. A code of draconic severity and Spartan simplicity was drawn up for their treatment. They were labelled, ticketed, numbered like railway baggage or railway porters. They were very considerably "sat upon," and were attacked by the moral paralysis which assails the mind of a man who feels he is under a ban, degraded by special codes and edicts, implying deficiency in ethical principle and perception. But they worked on, poor fellows, nevertheless, and they had their reward. There was a great public dinner in London one fine night, and Lord Wolseley stood up, and in a most flattering oration poured out a flood of oratorical, flowery, flaming butter on the heads of the astonished specials and war-correspondents, that flowed down over their heads and dress-coats like the precious unguent applied to the person of the Israelite of old, and nearly smothered them! They, brave and beautiful, were the guides, philosophers, and friends of Generals; they saved armies, and they were the salt of Military life. It was all very nice and pleasant. The Press was delighted with Lord Wolseley's recognition of their merits and with his graceful recantation of his heresies anent the order in the "Soldier's Pocket-Book." But *ecce iterum Crispinus!* The report comes that the new Expedition to relieve Gordon, or whatever else it may be sent out to do, is to be allowed to be sent into the Libyan wastes without any cloud of correspondents in front by day or any pillar of fire from their camps at night. They may fly their own balloons, ply their own row-boats, ride their own camels, swim their own cataracts, and do their own foraging and catering, telegraphing, railway-laying, well-sinking, &c., as they please, but they "will have no facilities!" In that marvellous procession—the like of which was never seen since "Aïda" was produced under Ismail Pasha's auspices and Verdi's direction at Cairo, and Mariette Pasha marched the Egyptian Army, dressed in accordance with the costumes to be seen on the Pharaonic temples, across the stage—the Correspondent is to have no part. He may see the Life Guards mounted on the camel, the Cavalry—Lancers, Hussars, Heavies, and Lights—careering on the dromedary, perhaps on the llama and the ostrich—he may behold the hardy Canadian voyageur impelling the birch bark of the Indian up (or down) the cascades of the Belley of Stone; he will watch Kroomen aloft in balloons; and he may watch a neat epitome of the British Army of all arms, except artillery, aided by sailors, marines, nurses, departing on this mysterious anabasis to the source of the Nile; and then may be left on the banks of the sacred river, lamenting like Lord Ullin, whilst the Staff is charged with the duty of transmitting to a delighted people the full particulars of all the feats of arms and legs, and the desperate exploits of the marvellous conglomerate of means and men directed "to relieve Gordon." Camels are to be used as beasts of draught, which is clean against experience and nature. No animals are so bad; dogs would do far better—for dragging. Next, crowning the edifice, the Egyptian soldiers are not to be employed in their own country. The Mudir of Dongola has used Egyptians to conquer his province; and if he had not done so, there might have been by this time an invasion of Nubia. They can march wonderfully, and want little food and no drink, and for desert work are admirable; but because Baker's rabble ran away, and Hicks' convicts were destroyed, the Regulars, on whom Wood and his officers have exhausted all their energies with excellent results, are to be kept where they will be really dangerous if disaffected. Their English officers believe in them. But they are in the way. When all is said, however, the broad fact remains that Lord Wolseley has all the wealth and resources of the Empire at his feet; that where General Stephenson or any one else could not get a regiment or a pound, Lord Wolseley can have legions and millions. He is master of the situation. He may be as fantastic as he pleases, if he be successful. If he asked for Mr. Augustus Harris and his Drury Lane troupe to-morrow to amuse his officers and men, he could have them as far as Government and Treasury could secure them. And that he may be successful we hope, as that he will successful we believe; but the delay of the Government has placed tremendous difficulties in his way. We advocated the Nile route all along, but we never believed that there could be such crass stupidity on the part of the men charged with the administration of public affairs as to wait till the Nile was falling before they prepared a force to ascend it. Lord Wolseley's genius will be proved by the victory he achieves over the Government which has sent him to conduct an army from Cairo to Khartoum in the month of October.

THE opinions of Admiral Symonds and others on the condition of our Navy have been plentifully quoted by the French Press, and the result has done much to encourage the vituperation now so much in vogue on the other side of the Channel. It is some cold comfort to find that there are critics not wholly satisfied with the state of the French Navy on the other side of the Channel. The *Débats* has recently given a prominent place to Naval affairs, and this is how it writes of the service in two long articles. It begins by complaining of the inaction of the Fleet at Alexandria, where French influence in Egypt was allowed to escape, and where French subjects were allowed to be massacred. It was the same at Tonquin until De Rivière was assassinated. Then Admiral Courbet, who had long been under a cloud, was sent out to replace an officer devoid of energy. Afterwards the writer ejaculates: "The country, which has made enormous sacrifices in order to have a large Naval force, has a right to expect such a force. Vain illusion! The money is wasted in useless constructions, and goes to support institutions which are unnecessary. . . . . . We have a squadron of evolution which costs vast sums. What is this squadron? Among the ironclads of which it is composed, the *Marengo* has just been replaced, her boilers having been condemned. Had the boilers of the *Redoubtable, Trident,* and *Richelieu* been examined, it would have been the same with them. The *Amiral Duperré* is alone fit for active service; in the event of war, she alone could be depended upon. Must the *Trident*, the *Redoubtable*, and the *Richelieu* be replaced? If yes, by what ironclads? By the *Suffren*, which has replaced the *Marengo* and the *Colbert*, both of wood; the *Dévastation*, under trial for the last five years; and the *Friedland*, which is reposing, and that is absolutely all. It is, therefore, to be presumed that in order to hide this deplorable penury, and to continue to persuade the country that it possesses a powerful fighting squadron, the Government will compose the evolutionary squadron of four ironclads, two coast-defence rams, and four torpedo boats." According to the *Débats*, this squadron would be unable to hold its own in the Channel, and can be of no service in China, as the ships are too large for the Suez Canal; and the writer demands more money and new ships, declaring that to keep up the squadron in question, even as it might be constituted, has merely, for effect, to inspire France with a dangerous security, as the armies of the Empire did before Metz and Sedan. The *Débats* informs us that sad complaints are made by all the Maritime Prefects and "majors" of the fleet by the penury of the *personnel*, and says that their observations are fully confirmed by the accidents which happen to all the ships commissioned and sent to sea in a hurry. Then, "the ignorance in which our engineers are of the different types of machines every day more complicated, explains these accidents. . . . . . Five years ago, it was wished to rearm the *Tourville*, and it was found necessary to recall the head engineer from his village, as he alone was acquainted with the machinery and could set it up." The writer in the *Débats*, who seems to us to protest too much that the state of the French fleet is rotten and the service going to the devil, concludes his observations thus:—"It appears to us that the war with China offered a favourable opportunity for taking a glance at our Navy, and for showing in what a sad way it is managed. If we do not take care, we shall be surprised by a serious war in such a state of disorganisation as not to have a real fighting squadron to send to sea. We might console ourselves if we had in its place fleets of cruisers, gunboats, and torpedo boats, capable of destroying all the enemy's squadrons, and of supporting, under the new conditions of Naval warfare, the great struggles which will take place at sea. But we are ready neither for the future nor the present." The *Débats*, in fact, advocates the doing away with monsters, and hence its attack on the present fleet. And there are other journals in France quite as hostile to the present naval administration, as Lord H. Lennox and the Admiral of the Fleet are to the present occupants of office at Whitehall.

THE Royal Warrant of June 25, 1881, was issued in connection with the wholesale reorganisation of the Army, which took effect from July 1, 1881, and was at the time of issue supposed to be especially perfect, both in outline and in detail, and all the more so because a special Committee had been sitting for many months elaborating their work, which was to be free from all the blemishes and defects which had disfigured former Warrants, and rendered it necessary to amend them almost immediately after their issue. But the flourish of trumpets which heralded the birth of this famous Royal Warrant had scarcely died away when, *horribile dictu*, once again amendment followed with such rapidity on amendment, that on March 11, 1882, the whole Warrant was reissued in a complete form, and with so many alterations that in many particulars it could hardly be recognised as the same Warrant, although ostensibly it was so, for all its provisions were to take effect from the old date of July 1, 1881. After this, all should have, of course, gone well, but from March 11, 1882, until the present time, alterations and amendments have taken place almost without cessation. Nearly every month the Army Circulars contain a short Royal Warrant, enacting something new, or altering something unworkable. And it soon began to be rumoured that it would be necessary once again to have a reissue of the Warrant ere the volume of corrections outstripped in bulk the Warrant itself. And at last, after months of delay, a new Warrant, dated June 10, 1884, a much smaller book, printed in smaller type, makes its appearance. All the articles, altered or unaltered, retain their original numbers, new articles being inserted where necessary, and designated by a letter of the alphabet. The altered or new articles are distinguished by an asterisk; and it is interesting to find that there are upwards of 400 of these asterisks! Of course, the great bulk of these alterations have appeared before in Army Circulars, but there are 20 or 30 alterations which appear now for the first time. And even now, alas! of the making of alterations, there is no end! For in the Army Circulars for September there are two additional short Warrants promulgated, one with reference to the "Nursing Staff at Hospitals," and the other to "Gratuities for Long Service and Good Conduct." Of the alterations which appear in the Royal Warrant of June 10, 1884, for the first time, there are a few which are worthy of especial notice, and the first of these is Article 32A, which is entirely new, and runs as follows:—"Our Secretary of State may, under very special circumstances, on the recommendation of our Commander-in-Chief, exempt a Major promoted for distinguished service, or a Captain who may have shown marked ability and gallantry in the field, from the prescribed examination for the position of Regimental Major." This is a fair and just relaxation of a rule which has already worked very harshly in several cases of officers who have been doing their duty on active service in the field, and we welcome the article accordingly. Another new article is 73A, which provides that "any service in an acting appointment in the field shall be permitted to reckon as qualifying service for increased rank; but service in an acting appointment during peace shall not so reckon." This provision applies almost exclusively to Lieutenant-Colonels, but to them it is most important. The new regulations as regards the Army Pay Department are, of course, embodied in the new Warrant, but besides the rules which admit of the admission to the department of Lieutenants of seven years' service, and allow officers to be seconded in their regiments for the first five years in the department, with the option of returning to regimental duty at the end of that time, the only points calling for special remark and congratulation to those concerned are the increase of a Chief Paymaster's pay by 2s. 6d. a day after five years' in the rank, and the alteration of Article 365, in order to make a Chief Paymaster eligible for "charge pay" when serving with an army in the field. Another important concession is contained in Article 963 of the new Warrant, which now grants half-pay to "an officer who may become unfit for service in consequence of wounds or injuries received, or of ill-health contracted in the service," leaving out the word "temporarily" before "unfit" as it previously stood, and granting the half-pay "for such period of his non-employment as Our Secretary of State shall determine" instead of "until he shall recover," as in the previous Warrant. There are many other minor alterations which may be found by any one interested enough in the matter to wade through the 400 odd articles to which the asterisk is prefixed; but even without that fearful amount of labour, those concerned with different points will doubtless speedily find out for themselves the alterations in which they are specially interested, and accordingly bless (or otherwise) the new Royal Warrant of June 10, 1884.

We hear that there was a very formidable competitor, with the highest interest in one branch of the service to back him, for the post carried off by Lord C. Beresford. What it exactly is we do not know.

Captain the Hon. E. R. Fremantle will very soon commission the double turret-ship *Dreadnought*, which is intended to relieve the *Inflexible* in the Mediterranean. The *Dreadnought* was launched at Pembroke as far back as March, 1875, but hitherto she has not hoisted the pendant. It is satisfactory to learn that this ship is at last to be actively employed abroad, and under such a competent officer.

The appointment of Commander-in-Chief at the Nore, consequent upon Vice-Admiral Edward Brydges Rice, C.B., vacating that position at the end of next month, on promotion to the rank of full Admiral, has not yet been definitely decided upon, although the names of three officers have been prominently mentioned. Considerable anticipatory comment has, as usual, taken place, the claims of the most likely successors of the present Commander-in-Chief having been freely discussed. Almost immediately after his promotion, Admiral Rice will be placed on the Retired List by reason of his age. The distinguished career of the gallant officer may be especially referred to, on the occasion of his forthcoming retirement from active service. He was awarded a medal for gallantry in the China War of 1842, and was in command of the *Prometheus* in the memorable engagement with the Riff pirates in 1854, where the British brig *Cuthbert Young* was recaptured. The sum of £1,000 was voted by Parliament to the officers and crew of the *Prometheus* for this act. Vice-Admiral Rice subsequently served with distinction in the Crimean War, being awarded the Crimean and Turkish medals and the Sebastopol clasp. He was Aide-de-Camp to the Queen from 1869 to 1873, and was made a Companion of the Bath in 1881. Vice-Admiral Rice hoisted his flag as Commander-in-Chief at the Nore, in succession to Vice-Admiral Sir Reginald Macdonald, K.C.S.I., on July 22, 1882. It is satisfactory to record the distinguished services of this gallant officer on his retirement.

Some interesting, and to a degree satisfactory, particulars have been received relative to the deplorable error by which the commander of the fort at Kinpai, on the Foochow River, fired on the English gunboat *Zephyr*. When the report of the disaster was circulated, anticipations of undesirable complications were freely indulged in, and the French journals were excited. Happily, the explanations have been so straightforward and clear, that the British Government are quite satisfied with the issue of the unfortunate incident, although the results are greatly lamented. It appears that the *Zephyr* had never been stationed at Foochow, and was unknown to the Chinese. She had been detached by Admiral Dowell to assist in protecting the Europeans in the town. A strong head-wind was blowing at the time, and the British flag was quite invisible to any one looking at the vessel from the front. The *Zephyr*, too, is said to resemble in build and rig one of the French gunboats engaged in the bombardment a few days before. The fort opened fire, the first shell cutting through the rigging and the second falling on deck, wounding severely the officer of the watch and a quartermaster, and slightly injuring another sailor. A sudden change in the course of the vessel revealed the British white ensign, when the firing ceased. The commander of the fort at once put off in a boat to explain the error to the British officer, and a messenger was despatched to the city with the news of the mishap to the Chinese Naval and Military authorities there. The report was promptly telegraphed by the latter to Pekin, where it caused the utmost consternation. Reparation was at once offered to the British Representative, the Foochow Naval Commander-in-Chief was ordered to offer the amplest apology in person to Admiral Dowell, while the Governor of Foochow was directed to call on the British Consul with a similar message. The Pekin Government dealt with the occurrence with commendable promptitude, and the British Government will not, it is gratifying to know, be put to the unpleasant necessity of making any demands on China. Complications will thus be avoided, and this "little cause" will not produce, as was augured by some, any "great event." The Chinese Government have done more than would, under the circumstances, have been required of them by Great Britain, for they dismissed with disgrace the commander of the fort. Thus terminates the *Zephyr* episode.

There is great head-shaking over the little row-boats for the Nile. But they will be useful, no doubt, for various purposes hereafter,—not like the Forty Thieves of Crimean days.

We find in a French paper the following list of vessels in commission:—Squadron of Evolutions, 10; Cochin China and Tonquin, 13; China and Japan, 4 (evidently before Admiral Courbet's arrival); Algeria, 2; Levant, 6; West Indies, 4; Guyane, 2; Newfoundland, 4; Iceland, 2; South Atlantic, 5; Gaboon, 3; Senegal, 6; Pacific Ocean, 4; Tahiti, 6; Indian seas, 3; Réunion, 1; New Caledonia, 4; on various services at home and on trial, 88. This makes 169 vessels, with crews amounting in all to 27,341 men. The total number of ships in the French service is set down at 339. In another paper, we find some details concerning the French naval gunners, whose exploits at Foochow have given great satisfaction. The French naval gunner first passes eight months on board the *Souverain*, never once going ashore. Every four months this vessel receives a contingent of 300 picked men, out of these about 250 pass, and the fleet, therefore, receives 750 excellent gunners a year. The *St. Louis* is another school-ship. We learn that 20,000 rounds are fired from guns of various calibres, that the men are instructed in the use of hydraulic and other carriages, and that a staff of 100 instructors keep the school up to the proper mark. The school-ships do not last long, being shaken to pieces, and the *Souverain* is about to be replaced by the *Couronne*. On the *St. Louis* are the veterans, who, having received their brevet over four years, return for four months to study improvements. Nearly all these men are petty officers. The apprentices are divided into companies of 90 men each—two officers, one a pupil, 11 instructors, and one quarter-master. In addition to artillery practice, these men are taught the use of the musket, revolver, machine-gun, and field-piece, and formed into companies 150 strong receive twice a week military education.

The immediate necessity of augmenting the Squadron of Vice-Admiral Sir William Dowell, in China, having been fully recognised, the determination of the Admiralty as regards selection has been awaited with more than usual interest. Many rumours were afloat on the subject, and it was announced a few days since that the turret-ship *Ajax* would probably be despatched to China to strengthen our Fleet. This report has not proved to be correct, instructions having been received directing that the *Ajax*, now in the steam basin at Chatham Dockyard, is to be retained at that port, and that the *Agamemnon* be prepared at Devonport for the special service indicated. The order from the Admiralty directs the *Agamemnon* to be at once provided with the necessary fittings to protect her from attacks by torpedoes. Captain J. A. Fisher, C.B., of the Torpedo Committee, has recently been engaged on board the *Ajax* in making arrangements respecting the character of the fittings to be provided to meet contingencies. The *Agamemnon* and *Ajax* being almost exactly similar in construction—both being of the *Inflexible* type, although smaller—it is considered that the fittings decided upon for the *Ajax* will be suitable in all respects for the *Agamemnon*. The latter, it may be stated, was built and launched at Chatham Dockyard about two years ago, having been since in the Steam Reserve; therefore, she will be commissioned for the first time for China. The *Ajax*, her sister-ship, was constructed at Pembroke Dockyard, and on being launched she was sent to Chatham to be completed for service afloat. She is now fully equipped, her 38-ton guns being mounted in her turrets, and only awaits orders from the Admiralty for hoisting the pendant. The *Agamemnon* will be a most desirable addition to the China Squadron. It is understood that the orders made by Capt. A. Fisher, C.B., as to the torpedo fittings for the *Ajax*, will be strictly carried out in the *Agamemnon*, the full instructions, with all necessary plans and drawings, being sent to Devonport Yard from Chatham for that purpose. The torpedo-defence fittings will consist of booms of from 12 ft. to 20 ft. in length, projecting at intervals from the vessel's sides, close to the water-line, to which will be attached strong nettings. During the time the ship is under weigh the booms will fall loosely from the sides, but when the vessel is at anchor the booms will be fixed in their proper positions and the torpedo nettings lowered. A similar arrangement will also be carried out in entering or leaving a harbour to guard against torpedoes. The *Agamemnon* will leave for China with the least possible delay, and the work in connection with the torpedo fittings which may not be completed when the vessel leaves Plymouth, will be finished on her arrival at Hong Kong. The *Agamemnon*, being the largest vessel of war which has as yet been sent through the Suez Canal, it will be necessary to reduce her weights in order that she may not exceed the draught of vessels which can safely make the passage of the Canal. Active employment at the present time will, it may reasonably be expected, be given to the *Ajax*.

It is alleged by a daily contemporary that the Governments of China and Japan view the movements of the Russian Fleet in Chinese waters with considerable uneasiness. The English Government have been communicated with on the subject, and it is stated that "fears are entertained that a sudden descent is intended upon the Korean island of Quelpart, at the entrance to the Korean Straits. Quelpart is well adapted for a 'place of arms,' and occupies a commanding position with regard to Korea, Japan, and the Yellow Sea. The attention of English statesmen in the East has often been drawn to its advantageous position. The principal harbour in this island is Port Hamilton, where the Russian flagship is at present stationed. It is probable, however, that the Russian Government does not contemplate immediate action, but is merely preparing against the possible contingency of an alliance between France and Japan, by which Korea might be promised to the latter Power."

Referring to the bombardment and destruction of the Foochow Arsenal, and to the recent events that have attended the Franco-Chinese quarrel, a well-informed correspondent urges that "the lesson that arsenals should not be on the banks of rivers or on the sea-coast does not apply to China alone." "Marine arsenals," the writer argues, "should be ten miles from the shore, a short railroad being applied to transport such outfits as are required to ports while the main stores are kept in the interior." "It is evident," continues the correspondent, "that if a fleet can creep up a river defended by torpedoes and batteries, there is no safety for shore arsenals. Torpedoes have been very much overrated. They are always fished up. And casemated batteries are useless against ironclads, the chief defence of which is to be sought in vertical fire." The writer evidently entertains very strong opinions, and expresses his meaning boldly, but his arguments are, to say the least, "open to criticism." Although inland arsenals may be more secure from attack than those on river banks or on the coast, their situation up-country would be undoubtedly inconvenient, and difficulties would arise in respect to transit, tending to delay and expense. Then it is by no means evident that a fleet can "creep-up a river defended by torpedoes and batteries." Chinese mismanagement and careless engineering does not prove the writer's assertion, which must be regarded merely as an expression of individual opinion. It has not been shown conclusively that "torpedoes have been very much overrated," and it is certainly not a fact that "they are always fished up." Much as the torpedo system of attack and defence may be condemned from a certain standpoint that may be termed heroic, science has introduced a mode of warfare that must be utilised to the bitter end when stern necessity compels the adoption of the best "means to the end." Arsenals on rivers or the sea-coast may be efficiently protected by torpedoes, as auxiliaries, at least. The attention foreign nations are devoting to the torpedo service indicates that its importance is much more appreciated, if not better understood, abroad than at home. Recent agitations will doubtless tend to bring about changes that are absolutely required without further delay. Passing over the subject of casemated batteries and ironclads, it is satisfactory to know that the events which have caused this correspondence have led to suggestions and criticisms from intelligent observers. The writer maintains that the destruction of China is not desirable to the interests of the British Empire, as it is clear that her population would be added to military Powers already gigantic.

Lord Henry Lennox, in the speech he recently made at Portsmouth, successfully disposed of more than one statement made by Sir Thomas Brassey regarding the condition of the British Navy. The speech was supported by "facts and figures;" but it has been admitted that figures can be arranged to conceal, rather than demonstrate, the actual condition of affairs. Lord Henry Lennox's statements were, however, made with great fairness, and his address was an able answer to Sir Thomas Brassey's "comforting assurances." Without doubt, the British Fleet is strong, but yet "relatively" weak; and a feeling of uneasiness has been increasing in the country for some time past as to the state of our Navy. The anxiety manifested is real, and will not be permitted to continue without an effort to remove it. Conclusive evidence has been furnished since Lord Henry Lennox made his speech, and it has been clearly shown by exhaustive statements that our Navy is, at least, less effective than it has been for years past. Active measures are required to be taken to render the Navy of Great Britain not only thoroughly efficient but superior in every respect to that of all other Powers, as it was wont to be in past times.

The correspondence published in the *Pall Mall Gazette* on Thursday, under the heading "The Truth About the Navy," was continued yesterday by articles on the subject contributed by Admiral Sir John Hay, Bart., M.P., and Vice-Admiral the Hon. Francis Egerton, M.P. The former remarks that "We spare ourselves conscription and the cost of a great army, because we believe that our Fleet is more numerous and more powerful than any combination of fleets that may unite against us. It was so once. It is so no longer." The writer illustrates and strengthens his remarks by giving comprehensive tabulated statements. Sir John Hay contends that "the vital question is the necessity for building, without delay, a sufficient number of ironclads to give us preponderance at sea;" and concludes by remarking,—"I do not think we shall be moderately safe, without an addition of at least thirty vessels, such as the *Riachuelo*, for our immediate wants." Vice-Admiral the Hon. Francis Egerton comments upon the terrible results that might arise from the bombardment of our fortified places, the defending works of which lie partly or altogether between the town and the assailant. Who is there, he asks, "who knows Portsmouth, Malta, Gibraltar (to a less extent), Devonport, or other places which could be named, who does not feel the danger of the position?" Is not the moral, enquires the writer, that "the main defence of such places should be, far more than it is now, entrusted to the Navy, so that the intending assailant should be encountered at a distance from his object?" Vice-Admiral Egerton does not think that the Navy is strong enough to undertake such an addition to its work. The questions affecting our Navy are dealt with by both correspondents from different standpoints, and with obvious moderation.

The question of soldiers' ammunition has again been brought prominently forward. The Judges all over India never lose an opportunity of having a hit at the military authorities for allowing the soldiers to remain in possession of their 20 rounds, and as shooting cases have been rather frequent of late, it is said that the Head-quarters officials are discussing the advisability of a new arrangement. Nothing official, however, has transpired to give credit to the rumour.

One hundred and sixty-four non-commissioned officers and men of the Army Hospital Corps have been ordered to proceed from various stations to Aldershot at once, to prepare for embarkation to Egypt.

The big camps of exercise which were to have taken place at Delhi and Hassan Abdul have been vetoed by the Government of India on the double ground that the expense is too great, and that the Zhob Valley Expedition will give enough employment to the Army for one year. It is, however, proposed to hold the usual camps of exercise at Lahore, Meerut, and Umballa for the troops in the commands, and probably any regiments and batteries which they can catch marching in relief.

The preparations for the Zhob Valley Expedition still continue in India. The reason given for General Kennedy's force being divided into two Brigades is that one is to move by the Zhob Valley, the other by the Gomal Pass. The Hindostan regiment to be added to the Frontier Force regiments will probably be the 1st Native Infantry, at present stationed at Rawul Pindee. This regiment was one of those disappointed when the Indian Contingent was cut down at the time of the Egyptian War. The officers and men of the Punjab Frontier Force have been told that all leave and furlough will be suspended on account of the Zhob Valley Expedition. The privilege possessed by the officers of getting 90 days' leave in the year, instead of the ordinary 60 days, is also to be taken away.

Colonel the Hon. R. Talbot will command the Heavy Cameliers.* Colonel McCalmont has been appointed to command the Light Cameliers. They are both what are called "Wolseyites," though Colonel Talbot was sent away from Utrecht very unexpectedly after Lord Wolseley came out of Zululand.

The appointments to the Camel Corps—the creation of the Corps itself—are understood to have been made from Egypt without any reference to the home authorities. In some cases, as in that of Colonel Primrose, the orders from abroad were over-ruled. In most instances they were obeyed and approved.

Colonel Ewart does not go out to Egypt, because of his seniority in reference to Colonel Stewart.

Colonel Fludyer does not go out as second-in-command of Guards' detachment. His place is taken by Colonel Maryon-Wilson.

We hear from Dublin that Sir Thomas Baker is expected to leave for India in October, and that great regret, mingled with satisfaction at his well-deserved promotion to the important post of Adjutant-General, is expressed at Head-quarters on account of his departure.

Aldershot is now nothing more than a huge depôt, where men are brought together from all parts to be prepared for service. At present the Camel Corps for Egypt, and further drafts of the Royal Engineers, Army Hospital Corps, and Departmental Corps for the same happy land, are being concentrated at the Camp, to be equipped and prepared for embarkation about the middle of next week. The six battalions which at present form the garrison are so reduced in strength, owing to the system of feeding one battalion abroad at the expense of another at home, as to be mere *cadres*, and the edifying spectacle of highly-trained officers instructing small squads of recruits in the rudiments of drill, may be seen daily at the Camp. It has only been found possible to carry out very minor operations during the past month, and even these have had to be discontinued during the present week. Easy times, indeed, these are for the enormous Aldershot Staff.

The 17th French Army Corps is manœuvring in the vicinity of Nérac, under the orders of the celebrated theorist General Lewal. No less than fifty-six foreign officers—German, Russian, American, English, Austrian, Swedish, Danish, Portuguese, Italian, Spanish, Belgian, Turkish, Swiss, Greek, Roumanian, Servian, and Japanese—are in attendance. And in some quarters it is urged that French manœuvres should be kept dark!

It is not curious, but it is true, that English officers sent to attend foreign manœuvres always return in a satisfied state of mind. "They have very little to teach us," or "We have very little to learn from them," is the general verdict, whether "they" be French, Austrians, Russians, or Prussians. But our satisfaction at and in these gratifying assurances is somewhat lessened when we reflect on the fact that the breechloader came from Prussia, as the Minie came from France before it, that the rifled cannon with studded projectiles came from France as the first ironclads did (the *Devastation*, *Lave*, and *Tonnant*, at Kinburun in 1855), that we went to Springfield, U.S., for our small-arm machinery in 1855-60; and so on to this day, when Woolwich goes far afield to cull artillery sweets from every foreign flower in its foundries. Captain Brackenbury energetically cried out "fire" when he saw the needle-gun at work against the Danes in 1864, but the War Office heeded him not, and remained serenely indifferent till Königgratz frightened our lives out in 1866. In truth our military genius is not very original. Fortunately there is one inestimable quality to atone for want of originality—viz., fighting power. "Army," "Division," "Brigade," "Corps d'Armée," "Cavalry," "Infantry," "Artillery," "Fortress," "Cannon," "Bayonet," "Bullet," and "Strategy," "Tactics," "Evolutions," "Manœuvres," and innumerable cognate words, denote their foreign derivation. If we look a little more closely at the reports of our own experts, we will often discover a "but" or an admission that there may be here and there a few "wrinkles" picked up abroad in harness equipment, ammunition supply, or internal economy. The new attack of General Newdigate bears a strong resemblance to the Prussian "anstoss," and, indeed, our infantry drill and formations were copied from those of the Great Frederick by such masters as old Abercrombie and Munro. In fact, there is always something to be copied if we would only take it as we did our models and ships in the old war, and then improve on them.

We hear that Surgeon-Major Hume Spry, 2nd Life Guards, will, in all probability, go with the detachments of the Household Cavalry ordered to Egypt.

We have not yet done with the Langson massacre which produced the present situation between France and China. It is now said that the recall of General Millot is in part due to an unguarded opinion expressed before he went to Tonquin, that the occupation was both useless and absurd. This did not prevent him from applying for the post of Commander-in-Chief of the expedition. We also learn that Colonel Dugenne, who commanded the unfortunate column, has been ordered home for having rashly attacked an overwhelming force without asking for orders. A letter, written by a soldier who was engaged in this affair, is published by a French provincial journal. It runs thus:—"We had left Hanoi about a week, and were boldly marching along the banks of the Red River, when we saw a flag of truce on the opposite side. We immediately showed another, and two old Chinamen arrived, and entered into discussion with the Colonel. One of them said,—'You can return to Hanoi; but if you wish to enter Langson you must kill 20 companies of 400 men, —choose.' The Colonel replied that in half an hour he would resume his march. Then the Chinaman broke a branch of bamboo and said,—'If you over-step that branch we shall open fire. Half an hour afterwards we passed the limit, and after a siege of a day-and-a-half we were obliged to fly,—it was high time, a little later and we should all have been captured. Out of 400 men (Frenchmen) we had 275 killed or wounded. Shortly before the struggle began, a Commandant said to the Colonel:—'If we do not fall back at once I shall blow my brains out.' Suddenly there was a cry of *sauve qui peut!* Everyone fled, but we had destroyed our convoy of provisions, throwing the tea and coffee into the river. The rest of our effects, however, remained on the field of battle. Two days later, when the battery arrived to save us, we were like so many bandits, filthy and disgusting. On the day of battle the Chinese were 8,000 against 400 Frenchmen." This description, if not entirely due to the imagination, differs very materially from the official reports published in Paris, and proves, as General Millot's report and as Colonel Dugenne's report proved, that there was no surprise, and that the Chinese were attacked with a full knowledge of the difficulties of the undertaking. However, as a French writer remarks, every time a disaster occurs in Algeria it is always set down to treachery on the part of the enemy, and to overwhelming numbers.

---

* Since this paragraph was written, we hear that Colonel McCalmont has been passed over, and that, *par ordre supérieure*, Colonel Stanley Clarke, Equerry to the Prince of Wales—a very good officer—has been named, to Colonel McCalmont's very great disappointment.

From the French military journals we gather that the French Government, in carrying out its new Colonial policy, has demobilised the Marine Infantry, which, in the event of a European war, would be unable to furnish the two divisions which it ought to be able to furnish towards the organisation of the 20th Army Corps. We see that in Tunis the French have 18,000 men, 7,000 of whom are drawn from France, and in Tonquin 9,000 men, 5,000 of whom belong to Algeria. If, therefore, the mobilisation of the 18 home Army Corps remains intact, that of the 19th and 20th Corps is compromised. "Experience," says one writer, "has shown that in case of necessity we could place 1,200,000 men on the frontier," and yet that it is impossible to detail 100,000 men for an expedition. Every time a distant expedition is decided upon convulsive spasms show the impotency of our military organisation to detach a solid expeditionary force. It is remarked that the War Minister has not sent a single one of the 12 battalions of *chasseurs à pied* abroad, and the reason given is that these battalions are so weak that it would be necessary to amalgamate two in order to bring one up to the proper strength. It may be remembered that in the new organisation of the French Army there are independent cavalry divisions and independent battalions of foot chasseurs, and consequently the chasseurs might have been sent to Tonquin without interfering with the mobilisation of any Army Corps. Some French papers advocate an attack upon Nankin and a trip up the river of Golden Sand; others a march on Pekin with 20,000 men, 15,000 to be drawn from Algeria. The Nankin is perhaps the favourite project, "as the English went there in 1842."

THE EXPENSE OF THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The British Army is costly, more costly, in proportion to its numbers, than that of any other country. There must be, of course, many and various reasons for this, the chief, perhaps, being the fact that the officers and men composing the British Army are better paid and pensioned than are those of other armies. Now, since the object of Army reform is, or should be, an increased, or at least equal, efficiency at a reduced cost, let me briefly show one way in which this might be effected. The charge for non-effectives is a serious item in the cost of the British Army, and is, I believe, under present arrangements, likely to increase rather than decrease, as regards that for commissioned ranks; that for the non-effectives of the rank and file will decrease. How to lessen the cost of commissioned non-effectives, then, is the question. It is an acknowledged fact that every year a large number of officers of the ranks of captain and major are compulsorily retired from the British Army to vegetate on "half" or "retired" pay, the majority of these officers being quite efficient and physically able to perform active duty for years to come. Why, then, are they retired compulsorily to draw annually large sums of money for doing nothing, and when they are just as fit to perform the active duties from which they have been ousted as the officer to whom their retirement gives promotion? The reason is, of course, principally to cause this promotion; but it is an entirely false policy to turn out of the Army to become recipients of non-effective pay, experienced and able officers, to make room for younger and consequently less experienced and often less able ones. But if there were no compulsory retirements there would be scarce any promotion, and grey-headed subalterns would be the result, simply because there are so many—in fact, too many—of them; but reduce the number of subalterns by, say, one-half, and the ordinary promotions consequent on retirements from command of regiments, voluntary retirements, deaths, &c., will be sufficient to absorb them all, and give them two chances to their one at present of attaining command of a battalion; and reduce the number of admissions of officers into the Army by one-half, and you thereby reduce the number retiring by about the same ratio, and there must be an equivalent reduction in the number to whom pensions and retired pay have to be given! What a grand idea this, to be sure, and withal how simple! It will, however, be asked,—Who is going to perform the duties of the subalterns to be dispensed with? In reply, I ask,—(1.) Who does the work at present? Out of two subalterns per troop or company allowed at present, how many on an average are present doing duty, and how many absent on leave? The duration and frequency of leave enjoyed by officers of the lower ranks is absurd, and quite unnecessary, and, besides, detrimental to the efficiency of the Army. (2.) Are the ordinary duties of a subaltern officer so intricate and important that they cannot be performed by any one who has not received a Sandhurst College education; and could not cook-houses, wash-houses, and barrack-rooms be inspected, and even a guard "turned-out" and sentries visited, without a knowledge of German, French, and geometry? (3.) Who performs such duties in the Native Indian Army? Why, native commissioned officers! Yes; but are native commissioned officers of equal status, intelligence, and education with the British subaltern? Are they even to be compared in two of these respects with the British non-commissioned officer? Therefore, why could not the ordinary orderly officers' duties be performed equally as well by a superior British non-commissioned officer as by the native Indian commissioned officer? Yes, most certainly they could; and as for parade duties, it is well known that a colour-serjeant or troop-serjeant-major is of more use than a subaltern officer; therefore, in place of half the present number of subalterns who can be dispensed with—that is, one per troop or company—we want one non-commissioned officer per company to perform some or all of the duties now performed by the orderly-officer. For this purpose I suggest that each colour-serjeant and troop-serjeant-major have warrant rank,—that is all that would be required; no extra non-commissioned officers even, for the company warrant officer could do all the work now done by colour-serjeants and troop-serjeant-majors, only instead of commanding guards they would do orderly officers' duty. There, I have ventilated my idea, and leave it to you to draw to it the attention of the Secretary of State for War or other high authority who is desirous of considerably reducing the cost while maintaining the efficiency of the British Army.—I am, &c., Ben Trovato.

THE AFGHAN FRONTIER.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The appointment of a joint Anglo-Russian Commission for the delimitation of the Afghan Frontier again gives prominence to the Eastern Question. As an old writer on this subject, and a former contributor to your journal,* I would invite attention to the late Gen. Skobeleff's project for invading India, as detailed in his letters to Prince Tcherkassky, reprinted in the *Royal Engineers' Journal* of Sept. 1884. Whatever may be the ulterior designs of Russia, the invasion of India has long been the dream of her statesmen, the ambition of her generals, a goal desired by her troops, and the bait to be offered to the savage hordes of Central Asia, who will be found ever ready to attempt a repetition of history, in following the banners of a northern conqueror, for blood, rapine, and plunder, across the frontiers of India. The idea took possession of Skobeleff's mind during his service in Turkestan and in Trans-Caspia; and he, being held in memory as one of Russia's best generals and a first-class military statesman, his views will find adoption in any future operations of Russia in the direction of India. Skobeleff's project may be very briefly summarised in the following passages:—Possession of the Balkan Peninsula and the command of the Bosphorus being a permanent object with Russia, any diversion she could create in the direction of India, by drawing the armies of England for employment in that country, would materially facilitate her own designs and operations in Europe. In short, India should be used as a lever to assist in effecting the purposes of Russia in Europe. While Persia and Afghanistan in their present integrity are ramparts protecting India, they should be used by Russia as parallels of approach for the invasion of India. Russia having secured a preponderance in Persia, the latter Power should secretly be encouraged to renew her pretensions to Herat, which would soon afford the pretext for Russia's advance in that direction. With the completion of her strategical lines in Trans-Caspia, from the shores of the Caspian through Askabad to Merv, and dominant in the rich province of Khorassan, Russia could bring 30,000 troops from her Trans-Caucasian garrison, and lead them into the valley of the Heri-rud, Khorassan being rendered a base for supplies, Trans-Caucasia, Trans-Caspia, and Persia finding the transport. In Afghanistan, efforts should be made to foster an alliance with the Amir, and to secure the reception of a Russian mission in Cabul, from whence communications would be entered into with disaffected elements in India. In return for the co-operation and alliance of the Amir, Russia would promise the restoration of the Peshawur Valley, so much coveted by the rulers of Afghanistan. If the Amir should resist the overtures of Russia, and remain an ally of the British Government, then the claims of some pretender should be supported, and civil war created in Afghanistan, Russia, too, in the name of her ally and vassal, the Amir of Bokhara, reviving Bokhariat claims for a portion of Afghan-Turkestan to the slopes of the Hindoo Koosh. For operation in Afghanistan, the Turkestan districts would be strengthened by several regiments of Cossacks and other troops from Western Siberia, thus collecting a force which, while providing a sufficient garrison for Turkestan, would admit of 20,000 Russian troops, with corresponding artillery, and independent of feudatories, being moved into Afghanistan. "Finally," writes Skobeleff, "it would be our chief duty to organise masses of Asiatic cavalry, and hurling them on India, as our vanguard, under the banners of blood and rapine, thus bring back the days of Tamerlane." Such, in the briefest outline, are some of the salient points of the late Gen. Skobeleff's project for the invasion of India. When, in my article of February last, I advocated the appointment of a joint commission for the delineation of the Persian and Afghan frontiers, I suggested that it was the only possible peaceable solution of a grave and pressing question. How far the labours of the Commission may frustrate the ulterior designs of Russia against India seems problematical, but they will assuredly retard her progress, and delay any attempt at the dismemberment of Persia and Afghanistan. While calling for the exercise of considerable diplomatic skill, the work of the Commission will afford British officers great opportunities for acquiring a knowledge of provinces and people now but little known, of proving the sincerity of the British Government in its desire for peace, with the integrity of the dominions of Persia and Afghanistan, and of showing the reciprocity of interests that really exists between those Powers and the British Government of India. The disaffected and the disloyal in India, and those who look with satisfaction to the approach of Russia towards India, should mark well the utterances of Gen. Skobeleff, and, studying the past history of their own country, should consider how far it would be desirable to exchange the just, peaceable, and beneficial rule of the British Government for a revival of the inroads of northern conquerors, and a renewal of the periods of rapine, plunder, and devastation that marked the advent of Mahmud, of Ghuzni, of Tamerlane, and of others whose examples Russian Generals of this century wish to follow.

—I am, &c., Edward H. Paske,
Colonel.
Merrow, Guildford, Sept. 19.

PURCHASE SUBALTERNS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I see you have again been good enough to take up the case of the Purchase Subalterns; and I am sorry I did not see "Minus £800's" letter in time to reply last week. I trust, however, you will find room for this, and will, so far as your space allows, continue to urge our claims. Perhaps a little more writing about it, and we may succeed in getting those still serving to unite to press them, the only chance of anything ever being done. If we only combine, we must eventually succeed, as the authorities have practically conceded our right to compensation by granting purchase captains a bonus on retirement. What we ought to claim, and continue to claim till we get it, is an addition to pension at the rate of 5 per cent. on money actually lost to us; and lost, it must be remembered, by our complying with the rules under which we entered the service. The one-year allowance suggested by "Minus £800," is of very little use to those of us who have already attained field rank—such as it is now-a-days—and for myself I should infinitely prefer the addition of £40 a year to my pension. Some years ago, being then in India, I wrote a letter, signed "One of Them," to you on the subject, but I missed seeing the result till the last letter appeared, saying only 16 officers had responded to my suggestion —that we should form a fund and get some one who had left the service to carry on the work for us. If every officer who has purchased one or two steps would forward their names to you, and you would consent to receive them, till we have got some one to undertake it for us, I think it might yet be done. I calculated that £1 each would be quite enough for all expenses, and I shall be glad to send my subscription as soon as the matter is fairly set on foot. The amount actually lost by us is much more than £800; most of us have lost the interest of our money for over 20 years, and it would be much nearer the mark to say we are,—

Minus £1,600.

Capts. Ker and McNabb, 1st Lanark R.V.; Tolmie, 10th Lanark R.V.; Walker and Morton, 1st Renfrew R.V.; Paterson, 2nd Ayr R.V.; Edwards, 1st Suffolk R.V. Major Walrond, 4th Batn. Devonshire Regt. Clapham, 6th Lancashire, passed the examination for lieutenant before promotion to captain. The six marked S.M. were "specially mentioned." Twenty-five failed to pass.

---

* "Power and Position of Russia in Asia." *Army and Navy Gazette*, February 23, 1884.

THE PROPOSED RELIEF EXPEDITION.

The commission issued to Lord Northbrook has been published, and also further details respecting the Military Expedition. As regards Lord Northbrook, we only learn that he is to "report and advise" on "certain weighty matters to be adjusted in Egypt, especially in connection with the present exigencies of Egyptian finance." The military preparations are being pushed forward with rapidity. Lord Wolseley and his Staff will move up to Wady Halfa as soon as the troops and transport have passed the Second Cataract there. The expedition will move thence by water as far as Dongola, where a decision will be adopted as to the route to be taken to Khartoum.

The *Times*' correspondent writes :—"The most contradictory opinions are expressed in military circles as to the prospects of the campaign. While some anticipate a collapse of the rebellion on the arrival of the troops at Dongola, and make light of the difficulties in reaching Khartoum, others basing their opinion on Suakim experience, expect continuous fighting, consider 10,000 troops insufficient, and the difficulties of transport for a greater number insurmountable, and ominously declare that Egypt is the grave of great reputations. Few such critics possess both military experience and a knowledge of the country, but Coetlogon Pasha, a colonel on Gen. Hicks's Staff, late of the 7th Regt., whose services were offered to and declined by the authorities, combines both. Having traversed the desert route from Korosko to Hamad he declines to express an opinion on the bend of the river between these places, but assuming all difficulties to Hamad overcome, and all troops and supplies safely there, he discusses the prospects of the route from Hamad to Khartoum. The first portion, from Hamad to Berber, 133 miles, is absolutely impassable for any boats. At highest Nile only five boats on the river are able to mount the stream, remaining at Khartoum till the following year's rise. In 1877, five steamers attempted to mount; three succeeded, one was totally wrecked, and one was on the rocks for a year. In this portion we must,* therefore, entirely trust to marching, transporting all necessaries. Berber to Shendy, 140 miles, is better, and possibly navigable at high Nile for steamers towing boats, but here there would be a difficulty about coal, as he considers that Gen. Gordon must be burning wood from the Khartoum houses to work his steamers. South of Shendy is the Sixth Cataract, a narrow pass barely 60 yards wide at the broadest part, and overhung by rocks which an enemy could render impassable, but in any case the steamer could only tow up the rapids with great difficulty. In Col. Coetlogon's opinion, the rebels will retire south on the approach of the British, adopt an outwardly friendly attitude, and await events. Gen. Gordon would certainly refuse to go unless the population and garrison were guaranteed safe departure. To ensure this Khartoum and Sennaar would require to be strongly held till the evacuation was completed. The population and garrison of Khartoum and Sennaar amount to about 40,000 or 50,000 souls, and he estimates that the evacuation would occupy two years with the present available transport. As the places became evacuated the rebels would enter and become hostile in front, and in the rear as soon as signs of retiring were apparent. Col. Coetlogon advocates the Suakim-Berber route, which he himself marched in February with a thousand men without any hydraulic appliances, finding a sufficiency of water even for washing purposes. Col. Coetlogon concludes,—'In my opinion this expedition will itself require a relief expedition.'" A Camel Corps is to be formed of detachments of two officers and 44 rank and file, or 1,100 in all, from the three Household Cavalry regiments and the 16 cavalry regiments at home, as well as from the seven battalions of the Guards. They are to be formed into three divisions, the first to consist of Heavy Cavalry, the second of Light Cavalry, and the third of Guards. No horses whatever will be taken, as the officers, who will number largely in proportion to the force, will be mounted, like the men, on camels. Col. the Hon. Everard Primrose, Grenadier Guards, will command the detachment of the Foot Guards, and Col. the Hon. E. Boscawen, Coldstream Guards, will be second-in-command. The National steamship Erin has been engaged to take out the corps.

It is believed eight battalions will go as far as Berber, two guarding the line of communications. Three will remain at Berber and five will push on to Khartoum.

The 53rd Shropshire Regt. and the 107th Royal Sussex Regt. have been ordered to be ready early next month to proceed from Malta to Egypt. The P. and O. Company's ship Deccan will, on Wednesday next, embark at Portsmouth a regiment, the married men being accompanied by their families, and exchange the regiment at Malta for the 107th. Another P. and O. boat, probably the Australian, will on the same day embark at Tilbury the 1st Batn. 7th Fusiliers from Colchester with their families, and leave them at Malta, taking the 53rd on to Egypt. H.M.S. Orontes will on Tuesday embark the 64th Regt. at Portsmouth and convey them to the West Indies, whence she will take the Royal Scots to join the Nile Expedition. Each of these infantry regiments will consist of about 35 officers, 750 men, and the usual proportion of women and children.

A detachment of the Post Office Volunteers which has been selected for service, consisting of 12 non-commissioned officers and men, telegraphists, belonging to the 24th Middlesex Corps, have arrived at Aldershot to await embarkation.

The *Standard* correspondent at Cairo writes :—"Cairo, Wednesday night. Six telegrams have been received this evening from Gen. Gordon. They are all in cipher, and at present (midnight) only three of them have been made out. They are addressed respectively to the Khedive, to Nubar Pasha, and to the British Resident, and they were enclosed in a letter dated August 25, and sent to Major Kitchener, at Debbeh; by whom they have been put on the wire. Gen. Gordon says that he is sending Col. Stewart out with a large force to Berber, which he is to take, to occupy for ten days, and then to burn—razing it to the ground. Col. Stewart's orders are to proceed after this to Dongola, sending his men back to Khartoum. In the telegram addressed to the British Resident, Gen. Gordon reproaches the Home Government as the cause of all the evil that has happened. He says that it is absolutely necessary to push on the Expedition, in order to save the garrisons. Baker Pasha and Sir C. Wilson arrived here this evening, together with M. Camille Barrère."

The *Times* correspondent at Cairo writes :—"Sir,—Your issue of August 23, p. 617, under the heading 'The Proposed Relief Expedition,' quotes a long despatch commencing, 'the apprehensions entertained, &c.,' and doubtless by clerical error attributes it to the *Times* correspondent in Cairo. Without wishing in any way to criticise that despatch, I am sure you will allow me to state as publicly in your columns, that no such despatch appeared in the *Times*, either from Cairo or elsewhere."

WITH THE RESERVE COLUMN IN NATAL.

"An Occasional Correspondent" says :—"It may interest some of your readers to have a short account of the doings of this small column, which now for many months has been at Etshowe, soldiering and doing their duty far away from the remotest civilisation. We have no 'special correspondents' this time to record (and criticise) our actions; but, perhaps, it is as well that our friends in and out of the service should hear something of us, sick and tired of South African expeditions as the British public is. The Etshowe column has been in existence now ever since the disturbances last year after Cetewayo's defeat by Usibepu, soon after which the late King was forced to give himself up to Mr. Osborn, the Resident Commissioner of Reserve Territory, whose official residence is near Etshowe. The troops came up country originally under command of the late Lieut.-Col. Montgomery, of the 41st (Welsh) Regiment. His sad end from the bite of a snake near the Tugela (while marching up) all will remember; and since that event the column has been uninterruptedly commanded by Col. Curtis, 6th Inniskilling Dragoons. The troops originally consisted of a detachment of Dragoons, the greater portion of the 41st (Welsh) Regiment, and two guns, C-1 Royal Artillery. On the arrival of the 91st Argyll and Sutherland Highlanders in Natal from the Cape in November last, one company was sent to Etshowe. In April, 1884, the head-quarters Welsh, together with their mounted company, returned to Pietermaritzburg, after many months' absence, leaving, however, a strong detachment at Etshowe. They were relieved by the mounted company and a strong detachment of the Argyll and Sutherland Highlanders under Major Mills. A month later two more companies of the latter regiment went up, and about the end of May the head-quarters, so that the whole battalion is now in Zululand, for the second time in five years. The garrison at Etshowe was further strengthened a little later by another squadron of the Inniskilling Dragoons from Pine Town. The duties have all along been pretty severe on the troops. "Fort Curtis" was built by the 41st, and owing to numerous reports concerning the movements of the Usutu party, patrolling and night duties often fell heavily on all, more especially on the cavalry and mounted infantry. Although healthy, the climate for the most part of the year is very trying and disagreeable,—heavy storms of thunder, wind and rain, fogs and mists, and for some months in the year most bitterly cold nights and hot days. British soldiers are, however, as usual, equal to every occasion, so it will surprise no one to hear that in the intervals of pretty severe duty, cricket, football, polo, and occasional gymkhana meetings have been indulged in. A very few have managed a flying visit to Durban or Maritzburg, but latterly we have been pretty well tied down. Lieut.-Gen. Sir Leicester Smyth came up as soon as he landed from the Cape, and arrived at the camp on May 20, and stayed a day or two. On May 23, an advanced post was made at the Entumene Hills; 100 of the 91st occupied a position there, built a fort—called Fort Chater, after the officer commanding the detachment*—and this force was increased to 200 directly the head-quarters of the regiment arrived. The Entumene Hills are about 12 miles N.W. of Etshowe, overlooking Kouro, the head-quarters of rebel Usutus. For the next month or so, several reconnaissances were made by the cavalry and mounted infantry, the latter force having been augmented by the mounted company of the 41st Welsh, who have certainly had their turn of Zululand, having only for about a month tasted the sweets of even Pietermaritzburg. The Governor of Natal, Sir Henry Bulwer, also visited the camp in June. The next visitor, however, was the unfortunate Usibepu, who took refuge at Etshowe, after his defeat by the Usutus, —or, more properly speaking, by the Boers. The first real move was made early in July, when a reconnoitring column left under Colonel Curtis, consisting of two squadrons of dragoons, under Major Martin; two guns Royal Artillery, under Lieut. Stokes; and the mounted infantry of Welsh, under Lieut. Hunt. At Entumene they were joined by the 200 Highlanders under Major Chater, and the whole force pushed on at night about twelve miles to the Essunglwene Hills, near the waggon road leading to the middle drift of the Tugela. A large force of about 3,000 loyal natives accompanied this force, under Mr. Galloway, late administrator under John Dunn. This position being close to Kouro and the Nkandhla Bush, enabled many reconnaissances to be made by mounted troops. The Usutus kept pretty well in the background, much to the disgust of the troops, who were all spoiling for the chance of a fight. After some days the majority of the force returned to Etshowe, having established a post at Essunglwene. Here another fort was thrown up, and left in charge of the Highlanders, together with some 600 natives. This was named Fort Yolland, after the officer, R.E., who has been some time with the column. The loyal natives, who had been in hiding for months, have now, to the number of many hundreds, returned to their kraals, emboldened by the sight of the troops. At present, in August, the Etshowe column is thus distributed in the Reserve :—At Etshowe, Col. Curtis commanding, Major McKean, 6th Dragoons, staff officer; two squadrons Dragoons, two guns, C-1 R.A., mounted company and detachment Welsh Regt., under Major Auley; the head-quarters, Argyll and Sutherland Highlanders, commanded by Lieut.-Col. Robley. At Fort Chater, Entumene, a few of the mounted infantry, and three companies of Highlanders, under Lieut.-Col. Forbes-Robertson, and at Fort Yolland, Essunglwene, the mounted company, and two others (91st), under Major Chater. Politics are not intended to form part of this letter, it being simply written to let the world know that a small body of troops are, and have been for many months, taking their share in service of a pretty arduous nature. How long it will last no one can tell, but one and all would only be too glad to settle it out of hand, if the powers that be would only allow it. There are no signs of it at present, but constant night work, all the precautions, exposure, and privations of active service, without the excitement, are apt to break the spirits of the best troops in the world."

WINTER RECONNAISSANCES.

The following General Order relating to reconnaissance has just been promulgated :—"Officers of cavalry, artillery, and infantry will be practised in field sketching and reconnaissance during the winter months. Non-commissioned officers of cavalry and infantry who, having already been through a course of instruction, possess adequate knowledge of the subject, will also be exercised in these duties, either working independently or assisting the officers, according to their capabilities and the nature of the reconnaissance. That the work may be of practical utility and interest, some specific object will invariably form the subject of each reconnaissance, the scheme for which may be drawn up by the commanding officer, or may form part of a general idea issued by the general officer commanding the district, as the latter may direct. The duties will be carried out regimentally under the authority of general officers commanding districts. Classes will be formed in each regiment and battalion for the instruction of non-commissioned officers who may have no previous knowledge of the subject, or may require further instruction to enable them to work independently. The instructors will be selected from the best qualified officers. Non-commissioned officers showing exceptional ability should be employed as assistant-instructors if required. The necessary arrangements for the formation of these classes will be made by general officers commanding districts, assisted by their garrison-instructors, under whose general supervision the work will be carried out. For the use of the non-commissioned officers a limited amount of instruments and materials will be supplied to garrison-instructors, and issued by them to regiments and battalions according to requirements on requisition. The 'Text-book of Military Topography,' compiled by Col. W. H. Richards, Professor of Military Topography at the Staff College, having been approved as the official text-book, the instructions and principles therein laid down will be carefully observed in executing sketches and drawing up reports. Especial attention is directed to the section which treats more particularly with the subject of reconnaissance. The sketches and reports of all the officers and non-commissioned officers who have been practised in accordance with these instructions, will, at the end of each winter's course, be forwarded to the garrison-instructor of the district, who will submit them with his remarks to the general officer commanding, by whom they will be transmitted by April 1 to the Quartermaster-General of the Forces for the inspection of his Royal Highness the Field-Marshal Commanding-in-Chief. The names of those officers and non-commissioned officers whose work is considered worthy of note will be recorded, and the sketches and reports will then be returned to their respective districts." Of course, the officers will be full of *reconnaissance* too!

THE NEW SYSTEM OF ATTACK.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have been expecting to see in the columns of your journal some opinions on the new system of attack; but from the little notice of it that has appeared one is led to suppose that the improvements (?) are unanimously approved of. I am, therefore, extremely chary in offering a few remarks on what appears to give such satisfaction throughout the service; but it has occurred to me that the officer commanding a regiment in action cannot possibly like to break up his regiment into four separate commands, and in a manner to part with the control of his officers and men. I should also be afraid that the system would lead to disjointed attacks. How can any particular double company be told off as one of direction? Is it not possible that the one selected may find such a superior fire in its front as not to be able to advance even after its supports and Reserves come up? Are, then, the other three double companies to have their advance arrested? and is the whole front of attack to be delayed until reinforcements for that particular part of the line have arrived? Again, it is well to lay down the central point of attack, but necessity may arise from that point to be changed. Again, by distributed commands, is it likely that each commander will proceed with the same dash, caution, or activity? Clear instructions are given for the actual charge, and for reforming afterwards. This is well for drill purposes, but in action there could be but little difficulty in reforming after a successful charge. Lastly, we are now getting majors of seven years' service and captains of four years. Are these qualified to take command of double companies of men from one to seven years' service? I don't know whether attention has been drawn to the fact that all the senior officers in a regiment become adjutants of Militia, Volunteers, &c., and though with young soldiers we want old and seasoned officers, they are not forthcoming, and yet we constantly see men of 20 years' service being removed from the Army, when they might be utilised for the above appointments.—I am, &c.,

A FIELD OFFICER OF 18 YEARS.

* Colonel Coetlogon thinks so.

* Rather a change from the position of A.D.C. to the Marquis of Lorne in Canada!—ED. *A. & N. G.*

"THE TRUTH ABOUT THE NAVY."

In a recent issue of the *Pall Mall Gazette*, the present condition of the British Navy was referred to, "irrespective of party," and the question was asked peremptorily, "What, then, is the truth about the Navy?" Definite replies were asked for to the following questions:—

"1. Our war risks have enormously increased. Has our Navy, which is our national insurance, been correspondingly strengthened?

2. Can we or can we not demonstrate beyond all gainsaying our 'irresistible superiority' in armour, guns, speed, and coal-carrying capacity over any combination of fleets which it is reasonable to believe could be brought against us?

3. If at this moment we are in this position, how will it be five years hence, when the ironclads now building are in commission?

4. Have repairs been sacrificed to building, or are our ships in commission really serviceable?

5. If our ironclads are superior in hull, is their armament up to their mark? Is it or is it not true that both the French and Italian Navies are armed with heavier guns of greater precision and more convenient for handling than are our own ships?

6. In case of a sudden outbreak of war with any Naval Power, have we at this moment a fighting-ship on each of our foreign stations better than the best that the enemy could send against us?

7. Have we sufficient store of fast ocean cruisers to scour the seas in search of the innumerable vessels which in case of war would at once be let loose upon our commerce?

8. Are our coaling and telegraph-stations secured against the sudden descent of a hostile ship?

9. Are our own seaports in a state of defence, and our own harbours adequately protected?

10. If an ironclad were disabled in any part of the world, have we provided docks wherein it could be refitted within reasonable distance of the scene of action?

11. Have we sufficient trained sailors and gunners, first, to man our ships; and, secondly, to supply the wear-and-tear of service in time of war?

12. And, lastly, if all these questions can be answered in the affirmative, have we a sufficiently numerous mosquito fleet of torpedo-boats, steam-launches, and picket-boats to fend off the attacks of an enemy's torpedoes, and save our gigantic ironclads from sudden destruction?"

In answer to the above questions, an exhaustive statement—extending over five pages—has been made by "One Who Knows the Facts." It is to be regretted that the authority for so elaborate an answer to the twelve questions is not given, because the author's signature would add very much to the weight of the statements and arguments. The question now asked is, "On whose authority are these assertions made?" At the conclusion of the article, the writer remarks:—

"I think I may now claim to have given you a full, although a somewhat cursory, reply to each of your twelve questions as to what is 'the truth about the Navy.' For convenience, I will summarise my answers in the same form as you summarised your inquiries:—

1. Increased Risks.—Our risks from war have enormously increased since 1868-9. The Naval expenditure of other Powers has increased 40 per cent. Our population has increased 16 per cent., our trade 40 per cent., our wealth 40 per cent., our shipping 30 per cent., and our possessions have been enormously extended. Yet in face of all these increased responsibilities and increased danger, our Naval expenditure has been slightly diminished. To bring it up to the relative position of 1868-9, it ought at least to be increased four millions a year, and even then the increased premium would not be equivalent to the increased risks.

2. Ironclads Afloat.—So far from being able to demonstrate our 'irresistible superiority' in armour, guns, and speed, to any probable combination of fleets, we are just a little ahead of France in ships, behind her in guns and in the age of our ships, and about equal in armour and speed. France has outbuilt us by 10,000 tons of ironclads in the last 10 years. To restore the proportion between the shipbuilding votes of the two countries that existed before 1879, our shipbuilding vote should be increased by at least one million per annum.

3. Ironclads Building.—Instead of making up lost ground we are losing it, and two years hence France will be ahead of us in second-class ironclads, and our superiority in the first-class will have been slightly diminished.

4. Repairs.—Repairs have to some extent been sacrificed to building, with the result that more than half our third-class ironclads can hardly be regarded as fit to go into battle.

5. Guns.—Our guns actually fitted are inferior both in weight and in power to those of France and Italy. We have not one ironclad afloat armed with the new breech-loader, of which 500 have been made since 1880.

6. Our Foreign Stations.—In case of sudden war, the French have better fighting-ships on the China station than England; the Chilian ironclads are stronger than our Pacific cruisers, the new ironclad of Brazil would sweep our South-American squadron off the sea. On the other tations we have ships better than the best that could be sent against them.

7. The Protection of our Marine.—Our fast ocean cruisers available for policeing our maritime highways against the Alabamas of the future are insufficient to allot three to each station. We have 19,000 merchantmen scattered all over the world to protect, and only 24 unarmoured ships of a speed exceeding 14 knots for their protection.

8. Coaling and Telegraph Stations.—A hostile cruiser could with almost entire impunity destroy to-morrow the coaling stations of Hong Kong, Singapore, Bombay, the Cape, Ascension, St. Helena, Mauritius, St. George's Sound, Fiji, and Vancouver's Island, which are virtually unprotected, although Hong Kong has four torpedo-boats, and there are slight fortifications at one or two of the other ports.

9. Docks.—We have eight foreign stations and four docks. There is no dock in all India in which an ironclad could refit, and although a dock is building at Hong Kong, if the Audacious were injured, she would have to go to Sydney or come back to Malta to refit.

10. The Defence of Home Ports.—There are not more than two harbours in the United Kingdom adequately protected, and some of the most important commercial ports absolutely lack a single torpedo-boat.

11. The Personnel of the Navy.—We have not sufficient trained men to man our Fleet when war is declared without drawing 8,000 from the Reserve, and that Reserve is not half as numerous as that of France.

12. The Mosquito Fleet.—In the cheapest and deadliest mode of defence our naval supremacy, instead of being absolutely irresistible, is absolutely non-existent. To bring us into line with our rivals 100 torpedo boats should be laid down at once."

"One who Knows the Facts" concludes as follows:—

"I have done. The substantial accuracy of my answers to your inquiries will not be impugned by any competent authority in the Navy or out of it. I have shown that on almost all 'the vitally important points' mentioned by you 'the truth about the Navy' is that our naval supremacy has almost ceased to exist."

ARMY EXAMINATIONS.

The Civil Service Commissioners are "at it again." In a memo. dated Aug. 8, they have issued a new schedule in lieu of that issued on the 6th inst.:—

At the competition for the Royal Military Academy, Woolwich, to be held in April, 1885, at the competitions for the Royal Military College, Sandhurst, and for the Royal Military Academy, Woolwich, to be held in July, 1885, and at the examination to be held in April, 1885, of lieutenants of Militia who are candidates for commissions in the Regular Army, the examination in English literature will be limited to the following authors:—Chaucer, "Prologue to Canterbury Tales;" Shakespeare, "King Lear," "Henry VIII.;" Pope, "Essay on Man," "Satires (with Prologue) and Epistles;" Bacon, "Essays XXIII. to LVIII.," inclusive; Johnson, "Life of Milton," "Life of Gray," and "Life of Pope." The examination in English history will be limited at the candidate's choice, either to the period A.D. 1760 to 1790 (inclusive), or to the period A.D. 1790 to 1820 (inclusive). The candidate's reading on the period selected should include that part of Bright's "History" which treats of it.

At the examinations to be held in Oct., 1885, of lieutenants of the Militia who are candidates for commissions in the Regular Army, and at the competition to be held in Dec., 1885, for the Royal Military Academy, Woolwich, the examination in English literature will be limited to the following authors:—Spenser, "Faery Queen," Book II.; Shakespeare, "King Lear," "Henry VIII.;" Pope, "Essay on Man," "Satires (with Prologue) and Epistles;" Bacon, "Essays XXIII. to LVIII.," inclusive; Johnson, "Life of Milton," "Life of Gray," and "Life of Pope." The examination in English history will be limited, at the candidate's choice, either to the period A.D. 1760 to 1790 (inclusive), or to the period A.D. 1790 to 1820 (inclusive). The candidate's reading on the period selected should include that part of Bright's "History" which treats of it.

At the competition for the Royal Military College, Sandhurst, to be held in Dec., 1885, the examination in English history will include—(1), A general paper on English history, and (2), a paper on the special period from 1727 to 1760 (the reign of George II.). The candidate's reading on the period prescribed should include that part of Bright's "History" which treats of it.

Civil Service Commission, Aug. 1884.

EDUCATING THE PEOPLE—A SUGGESTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—It has often been stated in the Press that the general public are profoundly ignorant of naval and military matters. The charge is undoubtedly true, as I have been able to prove in many cases. Even the most intelligent of our tradesmen in garrison towns might, as far as their knowledge of military matters is concerned, be living on the top of Ben Nevis. Now, I beg to propose a method by which military and naval affairs might be brought before the general public with some hope of educating the ignorant, and by showing the taxpayers of England that their money is being frittered away in useless and costly experiments and expeditions, instead of being employed in putting our sea and land forces into such an efficient state as to bid defiance to any and all filibustering Powers. Of late years clubs, both Liberal and Conservative, have cropped up throughout the length and breadth of the land; but, with the exception of the rich clubs, the service papers do not find a place on the reading-room tables. I would suggest, then, that all those who subscribe to the military journals should, when finished with, send them to some small club; also, that as far as Conservatives are concerned, the Patriotic Association should take steps to supply Conservative clubs and associations with military and naval literature. My *Army and Navy Gazette* is sent weekly to the club of which I have the honour to be a vice-president. This is the only way in which to educate the masses in military and naval affairs.—I am, &c., J. D. B.

The correspondent of the *Times* writes:—"Some Turkish officers who made a trial of the Berdan fuses for shrapnel at Tchatakdja on Saturday have made a very favourable report to the Sultan. The peculiarity of the invention is that it utilises the rotatory motion of the shell and causes an explosion at a given distance independently of the time which the shell takes to reach its destination. It is thus not affected by many causes of inaccuracy to which ordinary time fuses are subject."

The Army.

1st Life Guards. Lieut.-Col. Hon. R. A. J. Talbot goes out to Egypt in command of the Heavy Cavalry detachments for the Camel Corps.

11th Hussars. Capt. Lord Ernest Hamilton, son of the Duke of Abercorn, while passing St. George's Hall, Liverpool, in command of a detachment of the regiment on Saturday evening, met with a serious accident. His horse became restive, and fell with its rider, whose leg got beneath the animal. He was taken to the hospital, when it was found that several of the small bones of the foot were dislocated. The injured foot was dressed, but his lordship was unable to proceed on board the Assistance, which sailed for Cork in the course of the afternoon. His Lordship is under treatment at Liverpool, with the prospect of soon joining his regiment.

13th Hussars will sail from Bombay in the Serapis, and may be expected at Portsmouth on Dec. 8.

ROYAL ARTILLERY.

No. 1 Baty. 1st Brig., London Division, under the command of Major W. H. Auchinleck, embarked at Portsmouth, yesterday, in H.M.S. Crocodile, for conveyance to Bombay. U Baty. 1st Brigade, commanded by Major J. W. Inge, from Athlone, will embark in the same ship at Queenstown on Tuesday next.

ROYAL ENGINEERS.

Col. Inglis, C.B., who has been in charge of the iron defences of the country since the first application of armour to works of fortification, is about to be retired, and consequently vacated his appointment at the War Office on Saturday.

Lieut.-Col. A. C. Hamilton has been definitely appointed commanding R.E. in the Home District, vice Col. C. E. Webber, ordered to Egypt.

By the special permission of the Duke of Cambridge a party of officers left Chatham, on Saturday, for the purpose of proceeding on a tour of inspection of the principal engineering firms and works in the Northern and Midland districts of England. Accompanying the officers were Lieut.-Col. H. O. Seddon, principal instructor in construction and estimating; Brevet Major H. W. Smith, and Capt. C. L. Young, assistant instructor at the Royal Engineer Establishment, Brompton. The officers composing the party are Lieuts. G. A. Carr, G. A. Stone, J. W. Pringle, H. V. Kent, E. Houston, B. E. Morony, W. B. Brown, C. F. Mould, F. B. Renny-Tailyour, C. S. Rose, W. A. J. O'Meara, J. I. Lang, W. G. Lawrie, A. C. Painter, J. V. Purves, H. Bonham-Carter, E. F. Taylor, R. U. H. Buckland, R. S. Curtis, W. P. Brett, and B. C. Johnston. The officers will be required to furnish full reports on the places and works inspected.

Grenadier Guards. Col. the Hon. E. H. Primrose will command the detachment of Foot Guards proceeding to Egypt for service with the Camel Corps.

Coldstream Guards. The honorary Colonelcy vacant by the death of Gen. Sir W. Codrington has been very judiciously bestowed on Gen. Sir T. Steele, commanding the troops in Ireland, who entered the regiment in 1838, nearly half a century back. Lieut.-Col. the Hon. E. Boscawen will be second-in-command of the detachment of Foot Guards proceeding to Egypt for service with the Camel Corps.

1st, or Royal Scots. The 1st Batn. will be conveyed from the West Indies to Egypt in H.M.S. Orontes, which leaves England on Tuesday next, with the relieving battalion, the 64th.

4th King's Own (Royal Lancaster Regiment). The 1st Batn. proceeds shortly from Preston to Colchester.

7th Royal Fusiliers. The 1st Batn. has been placed under orders of readiness to embark for Malta, to relieve the 53rd, proceeding to Egypt.

14th West Yorkshire Regiment. The annual athletic sports of the 1st Batn. came off with due *éclat* at Castlebar on Friday Sept. 12. Favoured as the proceedings were by glorious weather, and carried out from start to finish without a single hitch, nothing could possibly have gone off better. The chief features of the day were perhaps the steeple-chase, the obstacle race, and the officers' donkey race, nor must we pass unnoticed the excellent clowning of Pte. Newbury (who kept everyone in roars of laughter). As an athlete, Corpl. Smith, of the band, was *facile princeps*, carrying off first in the hurdle race, also 100 yards, long jump, band race, and corporals' race. Pte. Adcock, also of the band, showed very good form in the long races, taking first in the steeplechase (a very difficult course), and second in the mile. At the end of the day the prizes were given away by Mrs. Cosby.

18th Royal Irish Regiment. The 2nd Batn. will leave Malta about the first week in January for Bombay.

21st Royal Scots Fusiliers. Col. Gildea has made a present of a silver cup to the warrant officers, staff serjeants, and serjeants of the 1st Batn., from the command of which he retired, sincerely and deservedly regretted, last month. Serjt.-Major John Smith said, when handing the cup over to the care of the serjeants' mess, :—"I have called this meeting to-night for the purpose of showing the members of this mess this splendid present from Col. and Mrs. Gildea. I value it, as I am sure you all do, not alone for its worth, but coming from the hands of an officer who, with his wife, took such a deep interest in the welfare of every man, woman, and child in this battalion. I value it for another reason, in which you will no doubt join and agree, because, looking round this room, where all our tokens of friendship are, I may say, exhibited, I fail to find one token to remind us of any commander of this battalion except this which I have the honour and privilege of handing to your care to-night, with one request,—that it may be handed down with care and respect to those who, in course of time, must fill the place which we now occupy; that it may be preserved as an heirloom in this battalion; and that the gallant officer whose name is inscribed on it may be kept green in the memory of those who may yet serve under the colours of the regiment he commanded so well." The health of Col. and Mrs. Gildea was then drank, with hearty cheers for each.

23rd Royal Welsh Fusiliers. The name of Capt. (Qrmr.) Knightley, 2nd Batn., was omitted from the list of survivors of the battle of Alma which we published in our last issue.

27th Royal Inniskilling Fusiliers. Gen. Randall Rumley, col. of the regiment, died on Saturday from a carriage accident. He entered the Army in 1824, obtained a lieutenancy in 1825, became capt. in 1827, and major in 1844. He served with the 6th Regt. throughout the Kaffir War of 1847 (medal). He was promoted lieut.-col. in 1848, and col. in 1854. He became a major-gen. in 1862, lieut.-gen. in 1871, and gen. (retired) in 1877. He was considered an officer of great ability, but he had not the chance of showing it much on active service.

28th Gloucestershire Regiment will leave Portsmouth on Wednesday next to relieve the 105th at York.

31st East Surrey Regiment. The head-quarters and service companies will leave Gibraltar on Dec. 21, in H.M.S. Serapis, *en route* to India.

37th Hampshire Regiment. Capt. St. George is a candidate for the Pay Department, and does duty with the 65th Regt., at Dover.

38th South Staffordshire Regiment. Major J. O. Sherrard died at Assouan on the 9th inst., of fever, much regretted. The deceased entered the Army Oct. 15, 1868; became lieut., Oct. 28, 1871; capt., March 28, 1879; and major, Jan. 26, 1884. He served as staff officer of the left attack against Sekukuni in 1878, and as acting adjt. of the 80th Regt. during the operations of the column under Col. Rowlands on the Swazi border in 1879, and during the invasion of Zululand and the battle of Ulundi (medal with clasp).

39th Dorset Regiment. Capt. Piercy has been appointed to succeed Major Mathias, of the 75th, as adjt. of the 3rd Batn.

47th Loyal North Lancashire Regiment. The *Morning Post* says:—"The arrangements for reinforcing the Quetta garrison during the absence of the troops composing the Zhob Expeditionary Force have now been completed. The 1st Batn. of the Loyal North Lancashire Regt., from Ahmednuggur, will arrive in Bombay and embark for Karachi on Tuesday next, the 23rd inst., arriving at their destination on the 26th. The head-quarters of the regiment proceeds to Quetta, and a wing proceeds to Duki (Thull Chotiali), when they will in some measure serve as a reserve to the expeditionary force."

48th Northamptonshire Regiment, from the Curragh, will relieve the 1st Batn. 4th, at Preston.

ROYAL MARINES.

Capt. E. G. Wilkinson and Lieut. F. White, R.M.L.I., have been directed to proceed to the Royal Naval College on the 30th inst., for a course of study commencing 1st prox.

Majors J. J. Morris and T. E. Hungerford, Capts. C. W. Hawkins and C. W. R. Kitching, Lieuts. B. C. Couchman and E. B. Roe, and Qrmr. Syms, six serjeants, six corporals, two buglers, and 139 privates, R.M.L.I., embarked on board the transport Bulimba on the 16th inst., for service in the Red Sea.

Major H. A. Peake, and Lieut. L. J. Hadley, R.M.L.I., have been ordered to proceed to the Recruit Depôt, Walmer, for duty.

Capt. and Brevet Major E. S. Innes, R.M.L.I., has been directed to rejoin his divisional head-quarters, Plymouth, from Gosport.

53rd King's (Shropshire Light Infantry) is under orders of readiness to proceed from Malta to Egypt.

60th King's Royal Rifle Corps. The *Standard*, we are glad to see, says:—"Since his arrival in England on sick leave, the health of Major E. T. Hutton, which was seriously affected by his efforts to complete the organisation of the Mounted Infantry in Egypt, has considerably improved, and, on his return to that country shortly, he will at once resume the command of that force."

64th North Staffordshire Regiment. The head-quarters and service companies embark at Portsmouth on Tuesday next in H.M.S. Orontes for conveyance to the West Indies.

71st Highland Light Infantry. A transfer of 150 privates, 2 serjeants, 2 buglers, and 5 corporals arrived at Plymouth on the 15th inst., for the 2nd Batn., from the 1st Batn., at Dublin. The draft was under the command of Major de Lancey, Lieuts. Mansel and McMurdo. On the 16th inst., 69 privates, 2 serjeants, and 1 corporal of the 2nd Batn. left Plymouth for transfer to the 1st Batn., in charge of Major de Lancey and Lieut. McMurdo.

105th King's Own Light Infantry. The head-quarters and service companies leave York on Wednesday next to embark for Malta.

107th Royal Sussex Regiment is under orders of readiness to proceed from Malta to Egypt.

109th Leinster Regiment (Royal Canadians). Capt. Short has been selected for duty at Pimlico in connection with the preparation of clothing, &c., for the Nile Expedition.

The Auxiliary Forces.

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 20, and the current year must be understood.

Reviews.

England and Canada. By Sandford Fleming, C.E., C.M.G. (Sampson Low and Co.)—This volume describes "a summer tour between Old and New Westminster," and is written in a pleasant, easy manner, which should recommend it to readers generally. Mr. Fleming took notes, and sent them home as opportunities offered. These are by no means ordinary "notes." As a matter of course, they were prepared for publication in book form, and some historical matter was included in the narrative. "England and Canada," "The Old and New Colonial Systems," "Political Exigencies," "The High Commissioners: Lord Lorne's Views," "The Future," "The French Element in Canada," "Colonial Federation," and "The Larger Union," are discussed in turn, and the author, who is a distinguished colonial administrator, closes his work with the following observations:—"We may look hopefully to the closer union of all countries where our language is spoken as a consummation to be desired by the general interest of mankind. In the meantime, as Canadians and British subjects, our first duty is the strengthening and consolidating of the State to which we owe allegiance. It is the peculiar privilege of Canada to make manifest her earnest desire to build up and uphold the empire of which we are an integral part,—an empire without a parallel in the world's history."

The Art of Solving Problems in Higher Arithmetic (Longman and Co.) is considered in a short treatise, prepared by the Rev. J. Hunter, M.A., to which is added a chapter on "The Arithmetic of Latitude and Longitude." The work is clearly intended to serve as a book for senior schoolboys and for examination candidates. The author expresses his regret that the practice of what is called "Coaching and Cramming" should ever have to be resorted to in arithmetic, "a science which, in the deliberate study of it, involves a discipline so conducive to the proper growth of intellect." Some valuable hints on this and on analogous subjects are annexed by the author.

W. and A. K. Johnston's war-map of Foochow and the river Min, showing the forts bombarded by the French Fleet, is published at a very opportune time, and at the trifling charge of 6d. The "Liliputian" map of China and Japan may almost be called a work of high art.

SUBALTERNS' PAY IN INDIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—You were good enough to call attention, a few months ago, to the hardship experienced by subaltern officers of over 10 years' service serving in India, by losing the extra shilling a day. I have made three applications to the proper authorities, and in every instance have been told that only two rates of pay are authorised in India. Consequently, I am out a shilling a day for the privilege (?) of serving out here. Now, if the Indian Government is not prepared to pay the extra shilling to subalterns on completing 10 years' service, it would be only fair that they should be offered the option of serving elsewhere, where the Indian regulations are not in force. As a matter of fact, I should be better off in England on 7s. 6d. a day, than in the Punjab on 256 rupees a month. As there are so few subalterns with more than 10 years' service in that rank (there are only about four in the Bengal and Punjab), the State would hardly be put to much extra expense, and a grievance would be removed. It is bad enough to see junior officers of six and seven years' service promoted in every *Gazette* in the other battalion, but to be deprived of the slight advantage given for length of service is rather exasperating. I must apologise for intruding our woes upon you again, but I am convinced that the authorities at home cannot be aware of the facts of our case; and up to the present all official applications have been returned with the same unsatisfactory reply, and the matter has dropped.—I am, &c.,

10½ Years a Lieutenant.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. Laurance, F.S.S., Oculist Optician, 1a Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 20, 1884.

THIS day thirty years ago, a British Army of 26,000 men was engaged, in co-operation with a French army of the same strength and some 8,000 Turks, in one of the most remarkable and hazardous operations of war,—forcing a strong and partially entrenched position held by an enemy of almost equal strength, with a river in front. The history of the battle of the Alma recounts how the work was done. The French advance on the extreme right of the line was covered by the fire of the Fleets, and their flank was guarded by the Turks. There was no pretence or pretext for the assertion that the English Army then owed anything to its allies. It is true they were a little late in moving, and the

Second Division, left in some unaccountable way without orders, did not march till some time after Prince Napoleon's corps on its right had advanced towards the Alma; but when the battle actually began, the English Army bore the brunt of the fighting, and suffered by far the greater loss. The extreme left of the Russians was forced to retire from the plateau and ridges near the sea by the fire of the ships, and the French right had in climbing the slopes to the plateau and flanking the enemy near the Telegraph Tower no difficulty to encounter from the Russians; but they met a stubborn resistance higher up the stream, and made but little way in establishing themselves on the plateau in front till the British attack opened, and De Lacy Evans became hotly engaged beyond the burning village of Bourliouk, whilst the Light Division, crossing the river on his left, made straight for the epaulement and its devastating artillery. The storming of that work by Codrington's Brigade, the recapture of it by the Russians, the retreat of part of the Brigade, the advance of the Guards under Bentinck, and the swoop on the flank of the epaulement by Colin Campbell's Highlanders, determined the fate of the day, and after three hours' fighting the enemy, in dogged, sullen masses, ploughed by the French and by the British guns, fell back, covered by their cavalry, on the Katcha in a retreat which the advance of Lucan's horse and horse artillery, supported by the untouched regiments of the Third and Fourth Divisions, would have converted to headlong flight. A total rout, indeed, the retreat very nearly resembled some hours later, and there is no reason to question the truth of Todleben's assertion that if the Allies had moved next morning with the dawn, Sebastopol must have been at their mercy. But the French would not or could not continue the pursuit at the close of the day on September 20. Lord Raglan did not think he could go on without the French. Next day the French were ready to go on, but Lord Raglan, having waited so long, thought it best to put his wounded on board ship, &c. And so the Allies halted for three days on the battle-field, and Sebastopol was saved! The decision taken three days after the battle by the Council of War on the Katcha, to abandon the fleet as a base, and to make a flank march round Sebastopol to the south side, was the direct *causa causans* of the bombardments of the Southern City and defences,—there was no siege,—of the battles of Balaclava and Inkerman, of the winter war, of the mortality and death in that dreadful time in open trenches, and of more serious evils still, for it may be said to have had for its outcome the war with Persia and the Indian Mutiny. Such may be the consequences of a day's delay—of one mistake.

The Military Secretary will resume his weekly levées on Tuesday, the 23rd inst., at the Horse Guards, War Office.

The meeting of the three Emperors has occurred, and the three Emperors have parted, but no one except their confidants and councillors know what they did or said. France was out of it. So was England. So were the smaller States, but for all that, Russia, Germany, and Austria, potent as they are, dare not, we think, affront the rest of Europe, or set at defiance the united fleets of Great Britain, France, and Italy, should there be need of their services. After all, it may well be that the Conference tended to ensure the continuance of peace, and a reduction of the cruel pressure of the standing armies which are nightmares to the world.

Major-General Dillon has returned to London from attending officially the Belgian manœuvres, and gives a very favourable account of the efficiency of the Belgian Army. So much the better. It may be needed to help itself at any moment.

General Higginson has also returned to London, and has prepared a lengthy and interesting report on the manœuvres he attended officially for the War Office.

The officers of Household Cavalry appointed to the Camel Corps are:—1st Life Guards:—Lieutenant-Colonel the Hon. R. A. J. Talbot, Major the Hon. C. C. G. Byng, and Lieutenant Lord Rodney. 2nd Life Guards:—Captain Lord Cochrane and Lieutenant Beach. Royal Horse Guards:—Major Lord A. Somerset, Lieutenant Lord Binning, and, should another be required, Lieutenant Sir J. C. Willoughby, Bart.

Whilst the War Office is committing the most extraordinary excesses in expenditure on an outfit of an eccentric, fantastic sort, never yet seen out of the range of the *mise en scène* of some grand *ballet d'action* at the Opera, they are apparently indifferent to the health of officers and men quartered in such pestilential places as the Richmond and other barracks in Dublin. It is scarcely credible, but it is true, that at the very height of the International Health Exhibition fever in London, and in the full swing of lectures on Sanitation, the barracks in Dublin in which the Grenadier Guards are quartered should be in very much the same state as Edinburgh was at the end of the last century, when the cry of "Gardey lo!" prepared the pedestrian for the deluge of unmentionable matter from the windows of the houses above, and the plaintive appeal, "Wha wants me?" indicated the absence in the dwellings of the ordinary arrangements which in the cities of to-day lead to Barking Creek and the like. But so it is, and this very day or night the primitive and nasty means which were in vogue a century ago for the removal of *excreta* are still employed at Richmond Barracks!

Captain Alexander, 21st Royal Scots Fusiliers, takes up the appointment of Superintendent of Gymnastics at Glasgow.

We have been shown an ingenious application of the pocket compass to the general purposes of military surveying, which has been patented by Major A. Wilkinson, 1st Battalion, South Lancashire Regiment. It consists of the usual magnetic needle in a compass-box, fitted with Colonel Richards's working meridian. The compass-box is fixed to a clamp, by means of which it can be attached to any note-book, sketch-block, plane table, map, &c. We think that this instrument will form a most useful addition to an officer's field kit, for it is no larger than the pocket-compass, which all should carry, while, provided with it, an officer could do whatever might be required in the rough sketching line. The compass can, if desired, be carried attached by a strap to the inside of the lid of the field-glass case. It appears to be already well launched, the first two made having been taken, one by an officer on the Staff of the Afghan Boundary Commission, and the other by an officer of the Mounted Infantry in Egypt. The instrument is made by Messrs. Barker, 12 Clerkenwell Road, E.C.

Captain W. R. Routh, 12th Suffolk Regiment, has been appointed a Brigade-Major on the Bengal Establishment.

Inquiries have been made as to what prospects there would be of buying suitable remount horses for the English cavalry in Canada, and what they would cost delivered in Quebec. In connection with the above, the Ontario Agricultural Exhibition, shortly to be held in Toronto, will have a special class of horses suited to cavalry purposes, and have named the Adjutant of the Cavalry School Corps as one of the judges in this class.

Captain C. G. Alison, late 91st Highlanders, has been elected to fill the vacant Chief Constableship of the County of Somerset.

Surgeon W. S. Pratt, on the Army Medical Staff at Gibraltar, has been appointed to the charge of Lord Wolseley's personal Staff, and embarked for Egypt on the 8th inst. During the Franco-German War, Doctor Pratt was attached to the French Army, and was shut up with Bazaine in Metz. He was present at the battles of Rezonville and Gravelotte, and was awarded the Legion of Honour for his subsequent services in the fortress of Metz.

Captain C. V. Ibbetson, late 4th Dragoon Guards, has been appointed Assistant Chief Constable of Lancashire.

The remarks of the Umpire-in-Chief (Major-General Lyons) on the minor operations of the 11th inst. at Aldershot, have been circulated. The most notable feature in connection with this document is that it is not "confidential," which is unusual. If these strictures on Aldershot operations are considered necessary, they should certainly not be for private circulation only. As they are intended for instructional purposes, they should be read by all ranks.

Major Dixon, Royal Dragoons, has been selected for special duty at Pimlico, in connection with the transmission of supplies for the use of the troops in Egypt.

The Infantry Committee on Valise Equipment assembled at Aldershot on Tuesday last, when, it is said, the question as to wherein lay the difference, if any, between the present regulation valise and the new Woolwich-Aldershot modified valise (1884 pattern) was discussed.

The report comes to us from India that the Duke of Connaught thinks he has not been well treated with respect to the Bombay command, which his Royal Highness was promised, or was led to believe he would get, presently. But it is not easy to understand how, if the promise were made, any one who had the power to appoint could have broken faith, or how the Duke of Connaught could have relied on a pledge or declaration from any authority who could be overruled. So that there is a mystery in the business, if the story be true at all. Furthermore, it is said that the wish of the highest personage that the Duke should be appointed, expressed in the Constitutional way in which such wishes are conveyed, was not acceded to. There have been instances in which the desires of the Queen were withstood, as was the case when the First Lord of the Admiralty passed over the promise, ere he was put out of office, of Mr. W. H. Smith to the Prince of Leiningen to give him the post of second-in-command of the Channel Squadron; but they are rare, and justly so, inasmuch as her Majesty is generally most reasonable. It is believed in India that the Queen is anxious to have the Duchess of Connaught at home, but that her Royal Highness, though quite satisfied with what she has seen of life in India, in camp, court, and quarters, does not like to leave her husband; and, as the Duke has not in prospect the command to which he aspired, their Royal Highnesses will return together. There is only one opinion of the manner in which the Duke of Connaught has discharged the duties at Meerut. It would not surprise us very much if he tried to be let make a razzia on the Nile, when he arrives in the Red Sea; for it must be very trying to be so near the scene of an action for a keen soldier as he is, and meantime the Duchess of Connaught would be suitably received at Cairo, which is a veritable caravanserai for Princes, but it is roumoured that he would like to return by way of America.

Colonel C. W. Robinson, 1st Battalion, Rifle Brigade, has been appointed an Assistant-Adjutant and Quartermaster-General at Aldershot, in succession to Colonel R. Harrison, C.B., C.M.G., R.E., proceeded to Egypt.

The choice of Lord Dufferin to succeed Lord Ripon in India is infinitely wise, and happy is the Government to have such a man at hand at such a time to preside over the Council Board at Calcutta. It was thought that, having aspired to the post some time ago, and not having received it, Lord Dufferin would not care to go to India. We are glad, indeed, to hear that was a mistake. Again, in Sir E. Malet the Government are able to put their hands on a diplomatist whose past career, young as he is, gives promise of his fitness to sit in the chair left vacant by Lord Ampthill's death—difficult as it must be to take up the threads dropped by those delicate fingers, and to continue the work of that fine and subtle brain. Egypt has prepared them both, and we can only hope there will never be any complications in their new scenes of action such as they had to deal with on the banks of the Nile.

The Duke of Cambridge arrived from a round of visits in Scotland on Wednesday, attended by Major-General Bateson, and transacted business at the Horse Guards on Thursday and yesterday. His Royal Highness leaves town again to-day.

More than two years ago, a certain Soudan merchant, Abou Gaourt, having escaped through the Mahdi's army with part of his caravan, struck the Nile at a point where Dr. Russell was travelling at the time. Abou Gaourt gave a graphic account of the Mahdi's progress and of the danger to Khartoum, but expressed a confident opinion that if Dongola and Berber were fortified and garrisoned at once, that not only would the Soudan and Nubia be made safe, but that the Mahdi would never venture to move north of Khartoum. When Dr. Russell returned to Cairo, he reported this conversation to Baker Pasha, and subsequently when Abou Gaourt arrived at the capital, introduced him to the Pasha and Lord Dufferin. To them, to Cherif, to the Khedive, he expressed the same opinions that he had uttered months before on the Nile, and entreated that Berber and Dongola should be put in a position of defence. But nothing was done. Had not Gordon and his gunboats been at Khartoum, Abou Gaourt's prophecy of evil would have been fulfilled long ere this. The courage and energy of the Mudir of Dongola have averted the conquest of this province, and the odds are now that Berber has been retaken by Gordon's expedition under Colonel Stewart from Khartoum, that all the Mahdi's followers will vanish from the vicinity of the Nile, and the Mudir and Gordon may shake hands before Lord Wolseley arrives within striking distance. Under the circumstances, it seems to be very doubtful policy indeed, to send up Colonel Herbert Stewart to supersede or interfere with the Mudir in his own Mudirieh, and much mischief may come of it; but Colonel Stewart has capacity and tact, and will do his spiriting gently.

During Colonel Lockhart's absence in Acheen, Major Mark Bell, V.C., has charge of the Indian Intelligence Department.

There has been great influence used to obtain "situations" for officers on the new Egyptian Expedition. No wonder officers should be eager to go. The climate is very pleasant now, the country intensely interesting, and if there be the least taste of fighting, the honours, decorations, and rewards, including promotions, promise to be stupendous. The pressure on War Office and Horse Guards has been enormous. Every one is eager, and as all cannot go, the disappointed ones can cut a dash. "I applied, but the confounded fellows would not let me go, you know—an infernal shame! Lady Simper asked the Duke for Giggle, and worked it, of course, and Toady got his county Members to bear on the Sec., but a fellow without friends has no chance!"

The Navy.

ADMIRALTY, Sept. 13, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surg. J. Buckley has been placed on the Retired List of his rank (Sept. 6).

ADMIRALTY, Sept. 15, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Chaplain and Naval Instructor the Rev. R. L. Neale, M.A., has been placed on the Retired List (Sept. 12).

ROYAL MARINE LIGHT INFANTRY.—Lieut. J. W. Robyns to be Capt., vice Scott, retired (Sept. 3).

ADMIRALTY, Sept. 18, 1884.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and March 3, 1873, Assist.-Pymr. C. W. Jago has been placed on the Retired List of his rank (Sept. 8).

APPOINTMENTS.

Captains—Charles Johnstone, Herbert H. Edwards, Swinton C. Holland, and John Ingles, to the President, additional, for study at the Royal Naval College.

Commanders—Henry W. A. Littledale, Robert H. Archer, Gerald W. Russell, and Charles J. Burton, to the President, additional, for study at the Royal Naval College; Herbert W. S. Gibson, to the Lily.

Lieutenants—Arthur T. S. Carter, to the Valorous; Frederick C. T. Jones, to the Zephyr; Thomas Hill Jerman, to the Lion, for the Liberty; Henry J. Oldfield, to the Impregnable; Lewis F. Blackburn and Hugh B. Barton, to the Lily; Archibald J. Pockington, Robert B. D. Bruce, and John Gibbings, to the Excellent, additional; Robert H. Stewart, Alfred E. Tizard, Lancelot B. Denman, Gerald S. Hawker, and Paul W. Bush, to the Vernon, additional; Charles E. Gladstone, to the Vernon; Charles S. Needham, to the Heroine; Frederick R. Gransmore, to the Lily.

Navigating Lieutenant—Charles D. A. Morshed, to the Wye.

Sub-Lieutenants—Peter N. Richards, to the Agamemnon; Pennant A. I. Lloyd, to the Curaçoa; William P. Hillyar, to the Assistance; John F. Lea, to the Satellite; Frank H. Peyton, to the Zephyr; Spencer V. Y. de Horsey, to the Inflexible; Henry D. Wilkin, to the Rapid.

Chaplains—Rev. G. P. Archer, M.A., to the Agamemnon; Rev. John Evans, B.A., to the Pembroke; Rev. Frederick H. J. Grace, to Hong Kong Hospital; Rev. Reginald Dolby, to the Orontes; Rev. Auguste B. S. West, to the Achilles.

Fleet Surgeon—William D. Longfield, to the Royal Adelaide.

Staff Surgeon—Bernard Renshaw, to the Boscawen.

Chief Engineer—Richard T. Rundle, to the Lily.

Surgeons — Herbert E. Marsh, to the Alexandra, additional; John Brunt, to Royal Marine Artillery, Eastney; George R. Charlton, to the Lily.

Paymasters—Alfred G. Hill, to the Lily; Henry G. Snowden, to the Lord Warden.

Assistant-Paymaster—William H. F. Ray, to the Alexandra, additional.

Gunners—David H. Williams, to the Indus, for the Lily; Trayton K. Page, to the Sultan; James Magner, William J. Talbot, John Courtnell, and Henry G. Keenor, to the Alexandra, additional; George J. Metters, to the Revenge; William Leather, to the Brilliant, additional.

Boatswains—William Cotter, to the Revenge; William Tozer and Alfred Radford, to the Alexandra, additional.

COASTGUARD.

Surgeons and Agents—John S. Maskens, to Calshot Castle, Lepe, and Fawley; Charles Williams, to Port Isaac, Cornwall; John J. O'Doherty, to Cushenden and Cushendall.

Commissioned Boatman—William Swain, Porthleven, to be chief boatman, Penzance, vice Veal, promoted.

ACHILLES, Capt. Alexander Buller, C.B., A.D.C., will be undocked at Devonport early next week, and the Northumberland, Capt. F. R. C. Robinson, will be taken into the dock vacated to complete repairs.

AGAMEMNON, Capt S. Long, was commissioned on Tuesday, in Keyham basin, for the China station. The ship is about to make a trial of her machinery, and the new 6-in. guns on Albani mountings will be tested.

ASSISTANCE, troopship, from Liverpool, arrived at Queenstown on Monday morning, and landed the 3rd Division of the 11th Hussars, comprising six officers and 130 men. The vessel would have sailed immediately but for a fatal accident which occurred to one of the crew. An able seaman named Coughlan, who had been ashore, was returning to the vessel, which lay alongside of the deep-water quay at Queenstown, and being under the influence of drink a comrade offered to assist him. He, however, refused any help. A moment afterwards he staggered and fell over the quay. He was found jammed between the vessel's side and quay wall, his head being in the water. The unfortunate man was taken out with difficulty and restoratives were applied by the naval and army surgeons, who were in the vessel, but he never rallied. There was a severe wound on the head caused by the fall, but the medical evidence at the inquest was to the effect that death was caused by suffocation.

CANADA, Capt. Curtis, which has been detained at Spithead in consequence of the desertion of two of the crew, sailed on Saturday afternoon for the North America and West Indies station. The Canada was commissioned at Portsmouth on May 1, 1883, by Capt. Durrant, and subsequently left England with Prince George of Wales as one of her midshipmen. She returned prematurely on August 2 and after undergoing a slight refit she has gone back to her old station to complete her commission. Capt. Curtis has assumed the command, while Mr. Berkeley has been succeeded by Mr. Barker as chief engineer. Previous to leaving the dockyard, as some of her 6-in. breech-loaders had exhibited defects in their breech mechanism, they were taken out and their places supplied from the armament of her sister-ship Cordelia.

CROCODILE, Capt. Carr, the second of the troopships proceeding to India this season, is under orders to leave Portsmouth to-day (Saturday) for Bombay, with four batteries of Royal Artillery, and draughts of various regiments. She will call at Queenstown to embark troops for India.

DECOY, Lieut.-Com. H. C. Bigge, arrived at Aden on Thursday.

DIAMOND, Capt. Dale, will be recommissioned for a further term of service on the Australian station. She was commissioned at Sheerness in Oct., 1881. Her present crew will return to England, and a new crew of 230 officers and men will be selected at the various naval establishments at Sheerness, Portsmouth, and Devonport. The Diamond's crew will be conveyed to Australia in the troopship Tamar, in company with the new crew of the Nelson, armour-plated ship, which is to be recommissioned as flagship of Rear-Admiral Tryon, C.B., the newly appointed Commander-in-Chief of the Australian station. Owing to the number of desertions from the Diamond and Nelson during their present commissions, the Admiralty have directed that only men of upwards of five years' service shall be selected for these ships. The Diamond is one of the few of the old class of wooden corvettes at present employed on active service.

GRAPPLER, Lieut. and Com. Charles H. Cochran, is at Gibraltar.

HIMALAYA, Capt. H. St. L. B. Palliser, which conveys a battalion of the line from Bombay to Egypt, is to proceed to Portsmouth after landing the men of the battalion, calling at Malta and Gibraltar.

INVINCIBLE, Capt. C. Buckle, remains at Alexandria; mails to be sent to Alexandria.

KINGFISHER, Com. Algernon Evan-Thomas, was paid off at Sheerness on Wednesday last. The Admiralty have decided to recommission this ship in a few days for service on the East Indies station, in the place of the Dryad, Com. E. G. Hulton, which has received orders to leave the squadron under Vice-Admiral Sir W. N. Hewett, K.C.B., V.C., and return to England immediately, without waiting to complete the three years' foreign service for which she was recommissioned in January last. It is thought inadvisable to keep the Dryad on the station any longer. The vessel is one of the now almost obsolete class of wooden sloops, and it is very improbable that she will again be refitted for foreign service. The Dryad is the vessel which, under the command of Capt. Johnston, played such a prominent part about a year ago in the affairs at Tamatave on the outbreak of hostilities between France and Madagascar.

NEPTUNE, Capt. H. Maxwell, was taken into dock at Portsmouth on Thursday.

ORONTES, Capt. Andoe, which left Gibraltar on Saturday afternoon, arrived at Portsmouth on Thursday. She will leave again on Tuesday to convey to Barbadoes the North Staffordshire Regiment, stationed at Manchester, which will relieve the Royal Scots Regiment to be conveyed by the Orontes to Alexandria. She brought home drafts of invalids and supernumeraries, numbering 26 officers, 589 men, 96 women, and 134 children. There were two deaths on the voyage.

OSBORNE, Royal yacht, Com. W. H. May, returned to Portsmouth on Wednesday, having conveyed the Crown Princess of Prussia to Flushing. The Osborne brought over H.S.H. the Grand Duke of Hesse-Darmstadt and the Princess Irene to Port Victoria.

POLYPHEMUS, Com. W. H. May, anchored at Spithead on Thursday.

RIFLEMAN, Com. P. H. W. Mayow, arrived at St. Vincent from the South-East Coast of America on Sunday. She was under orders to leave for Devonport on Thursday last.

STARLING, Com. F. W. Sanders, which has been selected to act as a despatch vessel to the Channel Squadron, under the command of Vice-Admiral H.R.H. the Duke of Edinburgh, K.G., has received orders to undergo a thorough overhaul and repair at Sheerness Dockyard. It is intended to employ her with the Channel Fleet until one of the new despatch vessels building for the Government at Jarrow-on-Tyne is ready for active service.

TEMERAIRE, Capt. C. E. Domvile, arrived at Alexandria on Saturday last.

TRENT has been commissioned by Lieut.-Com. Rogers. She will replace the Slaney, recently employed as gunnery tender to the Duncan, the iron screw gun-vessel having been put in the first division of the Medway Steam Reserve at Sheerness.

WANDERER, Com. Orford Churchill, arrived at Colombo on Wednesday last, and will leave Singapore on Monday next.

WASP, Lieut. and Com. John D. Nichols, arrived at Clifden on Monday from Westport, and sailed on the following day for Boffins Island. She has since arrived at Baylyak.

WATCHFUL, Com. J. E. C. Goodrich, arrived at Madeira from Devonport on Thursday, and has since left for Cape Coast Castle.

WOODLARK, Com. A. Kingscote, arrived at Alexandria from Suakim on Saturday last. She will proceed to Malta to complete defects.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS. —The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

A DELICIOUS COOLING DRINK is supplied in ROSE'S LIME JUICE CORDIAL in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order ROSE'S CORDIAL. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

ROYAL NAVAL COLLEGE, GREENWICH.

PRIZE LIST FOR SESSION 1883-84.

General proficiency:—Lieut. H. E. Purey Cust, £100; Com. J. E. T. Nicolls, £80; and Com. R. B. Maconochie, £50. Best examination for gunnery lieutenant:—Lieut. T. B. S. Adair, £80. Best examination for torpedo-lieutenant:—Lieut. L. Bayly, £80. Six prizes for proficiency in the following subjects:—Pure and applied mathematics,* £50; physics and chemistry,* £50; navigation, nautical astronomy, and marine surveying,* £50; marine engineering and Naval architecture, Capt. R. D. King, £50; fortifications and other military subjects,* £50; foreign languages, Capt. G. Skipwith, R.M.L.I., £50.

* Standard not reached.

The Admiralty have issued instructions for her Majesty's ships Arethusa and Rambler, fitting out at Chatham Dockyard, to be completed for sea with all possible despatch, and in order to expedite the work a party of sailors from Sheerness Royal Naval Barracks have been sent to Chatham to assist in masting and rigging the vessels. The Arethusa is one of the new class of powerful ocean cruisers of 3,750 tons, fitted with machinery of 5,000 horse-power. There are at present four of these vessels being brought forward for commission, viz., the Leander, Arethusa, Phaeton, and Amphion. The Rambler is a composite gun-vessel of 774 tons, fitted with engines of 690 horse-power, and is being overhauled and repaired for surveying duty in the China Seas, in the place of the wooden sloop Fawn, 7 guns, which was recently condemned as unfit for foreign service.

Advices from the North American and West Indies station, from the commodore at Jamaica, announce that the Bullfrog and Urgent were at Port Royal, the former refitting; the Flamingo was at Nassau, and the Griffin had left there for Halifax.

The Admiralty have requested the Medway Steam Reserve authorities to immediately furnish the names of twelve warrant officers, six chief gunners, and six chief boatswains for the command of the boats to be employed in the Nile expedition. H.M.S. Wye is having her defects made good in the steam basin at Sheerness Dockyard, in readiness to convey stores to Egypt.

Lord John Hay left Alexandria on Monday for Limasol, where he arrived yesterday with Alexandra, Temeraire, Inflexible, Superb, and Monarch, calling on his way at Port Said.

Great activity exists at the Clarence Victualling Yard, Portsmouth, the millers and bakers being employed at the rate of nine working days per week.

Her Majesty's ships Dragon and Philomel were at Muscat on the 19th ult. The latter ship was to leave on the 29th for Kurrachee.

The Sappho, after leaving Callao, was about to visit the Southern Ports of the Pacific at the end of August.

Robert Stumble, boatman, of the Coastguard, and Joseph Anning, quertermaster, of the Cambridge, have been awarded the medal for long service and good conduct.

The Naval Pension of £50 a year for Staff Commanders and Navigating Lieutenants, and for Captains and Commanders retired from Staff Commanders, vacant by the death of Retired Capt. E. J. P. Pearn on Sept. 2, 1884, has been awarded to Retired Capt. William Henry Fawckner from that date.

Com. Samuel Pritchard has been awarded the Retired List Commanders' Naval Pension of £65 per annum, vacant by the death of Capt. Edmund Wilson, from Aug. 23, 1884.

The body of a naval officer named Alfred Shaw, belonging to the Pembroke, flagship of Admiral Superintendent Watson, at Chatham, was discovered early on Thursday morning wedged between the sides of the ship and the wall of the dock. No explanation as to how the deceased came to be in the position in which the body was found has been given. An inquest will be held.

Mr. J. A. Hearson, R.N., of the Royal Naval College, Greenwich, has succeeded Professor Unwin as Professor of Engineering at the Royal Indian Civil Engineering College, Cooper's Hill.

The transport Bulimba, after embarking a detachment of marines from the Plymouth Victualling Yard, and a large number of naval supernumeraries from the flagship and boys from the Impregnable, left Plymouth on Wednesday morning for Malta.

We are requested to state that the sentence on Mr. Bernard Francis Meyer, paymaster, late of the Kingfisher, recently tried by court-martial on board the Duncan on a charge of drinking to excess, whereby he was incapacitated from duty, was forfeiture of eighteen months' seniority only.

Advices from the Cape of Good Hope states that the Boadicea was at St. Simon's Bay on the 27th ult. The Frolic was to sail on the 1st inst. for Angra Pequena and St. Helena; mails to West Coast. The Firebrand sailed for Singapore, and the Goshawk was expecting orders to proceed to Simon's Bay on the 15th inst.

Preparations are being energetically made in anticipation of the approaching launch of the steel armoured turret ship Rodney at Chatham on Oct. 8. The ceremony of christening this fine ship will be performed by the Duchess of Edinburgh. Several hundred mechanics and other workmen are busily engaged in completing the Rodney, 10, 9,700 tons, 7,500 horse-power, by far the largest armoured ship which has been constructed in the ordinary way on a building slip at Chatham Dockyard. Hitherto, ships have been built at Chatham in a dry dock, from which, on the water being admitted, they were merely floated out in the usual way. The Duke of Edinburgh will inspect the turret-ship early next month.

The Lords Commissioners of the Admiralty will commence their annual tour of inspection of the various dockyards and naval establishments in the second week of October.

The Channel Squadron will, according to present arrangements, assemble at Portland at the end of next month. Vice-Admiral the Duke of Edinburgh has issued an order to the ships to complete with stores for six months from Oct. 1. The Fleet will proceed on a cruise, and not return to England until January.

LORD HENRY LENNOX ON THE NAVY.

In reply to the speeches recently delivered on the Navy by Lord Northbrook and Sir Thomas Brassey, M.P., Lord Henry Lennox, M.P., spoke at Portsmouth a few nights since on Naval matters. He said that the present Admiralty were without a shipbuilding policy, and at the very outset they laid down the convenient doctrine of avoiding details. But the question was eminently one of detail. They took displacement as the fairest measure of the relative power, but that was the most misleading way of learning the comparative fighting power of ships of different nations. There was no attempt to prove that, either in speed, thickness of armour, perfection of design and construction, or armament, our ironclad Fleet was as superior as it ought to be to that of France alone. Sir Thomas Brassey stated that the effective armoured fleets of the leading Powers of Europe might be summarised as follows :—England, 329,520 ; France, 201,789 ; Germany, 74,007 ; Austria, 63,110 ; Russia, 83,621 ; and Italy, 59,905 ; and that in this computation only those ships were included which were actually ready for sea. But although the figures bore the weight of official authority, he was convinced that they were erroneous and misleading. He had carefully analysed the effective armour tonnage, including every ship except those building and completing, and, giving the Admiralty credit for the Conqueror, the Colossus, and the Impérieuse, which were to be finished this year, he could only find a tonnage of 228,070 tons which would be effective. Sir Thomas Brassey's statement with regard to the effective armoured tonnage of other countries was equally exaggerated, for the total tonnage of France, compared with similar English ships, was 162,068 ; and with regard to the other Powers, the Austrian effective armoured fleet had a tonnage of 28,800 ; Germany, 62,102 ; Spain, 8,208 ; Russia, 36,165 ; and Turkey, 22,580. Tonnage of displacement, as the fairest measure of relative power of armoured fleets, might be useful as a matter of comparative value as between ironclads of any particular type, but it was most misleading when dealt with in the wholesale manner of Sir T. Brassey. It was a manifest absurdity to include the Minotaur, 10,960 tons; Northumberland, 10,780; Hector, 8,710 tons, or other heavy obsolete ship, in the same return with the Inflexible, 10,880 tons; Dreadnought, 10,820; or Conqueror, 6,200; or to contrast them with the Admiral Duperre, 10,427; Lepanto, 10,000; or Italia, 13,825 tons. Sir Thomas claimed an advantage for an administration which pursued the wiser course of having fewer ships in hand and pushing them forward with vigour, but he hoped Sir T. Brassey did not take them for such *gobemouches* as to believe that the ships were built quickly, or that much vigour had been displayed. There was no appreciable difference between ourselves and the French in the average thickness of armour and the weight of armaments, said Sir Thomas Brassey. He (the speaker) knew this was not true, and if it were true, the Admiralty ought to be impeached for talking of our supremacy being safe under such conditions. In the next place, Sir Thomas Brassey took the case of torpedoes, and pointed out that Germany was building only one large ironclad, but had voted £850,000 for the purchase of 70 torpedo-boats, and added that the French and Russians were also expending large sums annually on torpedo-boats. It would have been much more satisfactory if he had given a numerical comparison as to ourselves and other nations in the matter of torpedo-boats. The fact was we had only eight first-class torpedo-boats fit for sea, while Russia had over a hundred, and France still more. Sir Thomas Brassey admitted the importance of the *personnel*, and held that the manning of the Navy was a still more vital question than the number and type of our ships. If that were really so, why had the number of men and marines steadily decreased for some years? Proceeding to deal with armoured ships, Lord H. Lennox said it would be seen by the Navy Estimates that in March next year there would be nine ironclads in various stages of construction, of a gross tonnage of 79,000 tons. It had also been whispered that another ironclad of about 10,000 tons was to be laid down at one of the dockyards at the close of the year. France, three months earlier, would have eleven ironclads in various stages of construction, of a tonnage of about 100,000 tons, excluding eight *cannonières cuirassées*, and the importance of these could be judged from the fact that the eight collectively were estimated to cost as much as one of the biggest ironclads in course of construction. The Italian Navy had recently been remodelled, and there were now seven monster ironclads building, four of 10,000 and three of 13,000 tons. The mere possession of these ships had raised Italy to the position of one of the three important Naval Powers in the Mediterranean. Taking the whole of the money spent by the Liberal Administration between the years 1869-70 and 1873-4 on armour-clad shipbuilding in the dockyards and by contract, including labour and material, the annual expenditure was £694,277 during the five years, while the annual expenditure under the Conservative Administration that followed it was £800,773, and under the present Administration £969,114. The average outlay on unarmoured shipbuilding from 1869-70 to 1873-74 was £505,952. Under the next Government it was £851,226, and under the present Government £721,069. They could only argue from these facts that the last Liberal Administration spent so little on unarmoured ships that the following Conservative Government was compelled to make good the deficiencies. The same rule applied to the repair and maintenance of the Fleet. During their last Administration the Liberals spent £3,093,743 on repairs, giving a yearly average of £618,748; while the Conservatives in the following, exclusive of the Vote of Credit year, spent for the same purpose £4,640,503, or a yearly average of £928,101, or half as much again as their predecessors. The present Administration had spent on repairs £3,288,357, or a yearly average of £822,089. Again, if they took the total amount of money devoted by either Administration in the shape of expenditure on ships, armoured and unarmoured, building and repairing, including labour and material, they saw that the Liberals when last in office spent £9,094,891, or £1,818,978 yearly. The Conservatives, excluding the Vote of Credit year, spent £12,800,498, or £2,560,099 yearly. The present Administration had spent £10,086,062, or £2,521,515 yearly. He regretted that he had been compelled, in connection with the Fleet, to mention the words Liberal or Conservative, for the Navy was a national question, dear to all alike, but he could not allow such statements as had been made by the First Lord to pass unchallenged.

Obituary.

◆

We have to record the death, in his 61st year, on Sept. 4th, at Chant-oiseau, near Dinan, France, of John Ferdinand Beckwith, only son of the late Major-Gen. W. F. Beckwith, consequently grandson of Major-Gen. John Beckwith, of the 20th Regiment, who distinguished himself at Minden, and in the Seven Years' War; and great-grandson of Col. John Beckwith of Beaconsfield; nephew of Gen. Sir George Beckwith, G.C.B., who commanded the troops in Ireland; of Lieut.-Gen. Sir Sydney Beckwith, K.C.B., who commanded the Rifle Brigade and Light Division in the Peninsula, and died in command of the troops in Bombay; and of Brigdr.-Gen. Ferdinand Beckwith, first cousin of Major-Gen. Charles Beckwith, C.B., Quartermaster-General of the Light Division in the Peninsula; of Lieut.-Col. Henry Beckwith, who died in command of the Reserve Battalion of the Rifle Brigade in Canada; of Lieut.-Col. Sidney Beckwith, of the Rifle Brigade, who died of cholera in the Crimea, the day before the battle of the Alma; and of Capt. Thomas Sidney Beckwith, who died of consumption in the same regiment. He himself served in the Rifle Brigade for a few years.

The following alterations are to be made in the Queen's Regulations, 1879 :—Page 286, Art. 857.—Cancel, and substitute :—875. He [the armourer] is to be very careful of the tools he receives from the War Department for the use of the armourer and other artificers, to whom he is to furnish only such as they may want for immediate use, and he is to require them to account particularly for all those delivered to them. Page 286, Art. 858.—Add :—He is also to take care that the small-arm materials and spare parts of arms are constantly inspected, oiled, and kept free from rust. Page 560, Art. 1,768, par. 2.—After the word "sent," in line 2, insert "in duplicate."

Extraordinary efforts are to be made at Portsmouth to complete the Cormorant, composite sloop, for the pendant during the current financial year. This ship—which returned to England in 1882, after a four years' commission on the Australian station—is being fitted with a poop for the first time. It was intended to give her an improved armament, consisting of eight of the new 5-in. breech-loading guns, but this order has been countermanded. She will therefore carry the same armament as during the last commission, consisting of a couple of 7-in. guns amidships, arranged to fire either on the port or starboard, two broadside 64-pounders, and two guns of the same nature in the bow and stern, the former firing through two and the latter through three ports. But in addition to these guns, she is to be provided with two 1-in. four-barrelled Nordenfelt machine-guns on the forecastle, two 1-in. two-barrelled Nordenfelts on the poop, and a brace of 0·45-in. five-barrelled Gardner guns on the broadside, besides torpedo stores. The suggested change in armament—which has been countermanded, as stated—was abandoned because it would "materially protract her completion for sea." The Cormorant has been, however, waiting to undergo a thorough repair for nearly two years.

"HEALTH EXHIBITION."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

London Amusements.

◆

At the Covent Garden Promenade Concerts, Madame Patey, Mr. Walter Mills, and Mr. Barrington Foote have been the principal vocalists engaged during the week. This evening (Saturday) is identified with the "first grand military night of the season." Jullien's "British Army Quadrilles" will be a prominent feature of the programme, and Mr. Walter Joyce will recite "The Charge of the Light Brigade."

The Court Theatre was reopened on Thursday evening, Mr. John Clayton and Mr. Arthur Cecil commencing their second season with a revival of the comedy by Tom Taylor and A. W. Dubourg called "New Men and Old Acres," originally produced at the Haymarket on Oct. 25, 1869. The present cast includes Mr. Arthur Cecil as Vavasour, Mr. John Clayton as Samuel Brown, Mr. H. Reeves Smith as Bertie Fitzurse, Mr. G. W. Anson as Bunter, Mr. E. D. Lyons as Berthold, Miss Le Thière as Lady Matilda Vavasour, Miss Marion Terry as Lillian, Miss Fane as Fanny Bunter, and Mrs. John Wood as Mrs. Bunter.

The new five-act play, by Mr. Henry A. Jones, entitled "Saints and Sinners," and illustrating English middle-class life, will be produced at the Vaudeville Theatre on Thursday next. The prominent characters will be embodied by Mr. Thomas Thorne, Miss Cissy Grahame, Miss Kate Phillips, and Messrs. Henry Neville, Mackintosh, Frederick Thorne, E. M. Robson, Lestocq, Grove, and H. B. Conway.

The Savoy Theatre was reopened, after a short recess, on Monday night, with the "Princess Ida," the cast being the same, with two unimportant exceptions as when Gilbert and Sullivan's still popular opera was originally produced. Mr. Cellier has resumed his position as musical director.

The Grand Theatre, Islington, of which Mr. Charles Wilmot is now the sole lessee and manager, has been furnished by Messrs. Arthur Goodrich and J. R. Crauford with an effective melodrama called "A Ruined Life," ably acted by Mr. J. H. Clynds, Mr. Arthur Goodrich, and Mr. Harry Proctor.

With this week, Mr. Brookfield has brought to a close his brief autumnal season at the Haymarket, which has not to be regarded as a remarkable financial success.

On Thursday night the Moore and Burgess Minstrels commenced their twentieth consecutive year at the St. James's Hall, the occasion being celebrated by a special performance.

Mr. Gilbert Farquhar has a matinée at the Gaiety next Thursday, when he will make his reappearance on the stage after his long and dangerous illness.

To the Royal Westminster Aquarium Mr. Farini has brought a troop of dwarf earthmen from the interior of South Africa, and belonging to a tribe inhabiting a region to the north of the Kalahari desert. They have a remarkable power of pantomimical expression, and present a curious type of the human race in an undeveloped condition.

Mr. Henry Irving entertained a large number of personal friends on Sunday last at the Continental Hotel, Regent Street, at a farewell dinner previous to his departure for the United States, which took place on Thursday evening.

The troopship Tamar, which has undergone extensive repairs in Devonport Dockyard, has just made a successful full-power six hours' trial of her engines in the Channel. The new engines have been made by Messrs. Maudslay, Son, and Field, and are very similar to those fitted by the same firm on board the Himalaya. During her trial, the Tamar was in charge of Capt. Edward Kelly, of the Steam Reserve; the navigating duties were carried out by Staff Com. Thomas, of the Indus; and Mr. O. N. Brooke, Chief Inspector of Machinery, was present on behalf of the Engineering Branch of the Steam Reserve. The engines were in charge of Mr. H. Warrener, the manager for Messrs. Maudsley, Son, and Field. The machinery worked very satisfactorily, the speed attained being 13½ knots per hour. This final trial has been made considerably in advance of the time originally fixed, and the officials immediately concerned are to be congratulated on the result attained.

BIRTH.

Arbuthnott.—On the 14th inst., at Montrose, N.B., the wife of Captain C. W. Arbuthnott, R.A., of a son.

MARRIAGES.

Molyneux—De Crespigny.—On the 16th inst., at Hampton Wick Church, by the Rev. F. Champion de Crespigny, Lieutenant-Colonel Edmund Molyneux, late 7th Dragoon Guards, of Sandfield, West Derby, Liverpool, to Sarah, daughter of the late Sir Claude William Champion de Crespigny, Baronet.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

HOLLOWAY'S PILLS.—THE CHIEF WONDER OF MODERN TIMES.—This incomparable medicine increases the appetite, strengthens the stomach, cleanses the liver, corrects biliousness, prevents flatulency, purifies the system, invigorates the nerves, and reinstates sound health. The enormous demand for these Pills throughout the globe astonish everybody, and a single trial convinces the most sceptical that no medicine equals Holloway's Pills in its ability to remove all complaints incidental to the human race. They are a blessing to the afflicted, and a boon to all that labour under internal or external disease. The purification of the blood, removal of all restraint from the secretive organs, and gentle aperitive action are the prolific sources of the extensive curative range of Holloway's Pills.

ARMY EXAMINATIONS.— Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill:—

and four others qualified.

NEXT COURSE for STAFF COLLEGE and PROMOTION commences OCTOBER 15.

Militia and other Courses now going on.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

ARMY and other EXAMINATIONS.— G. W. VON TUNZELMANN, B.Sc. London, Assistant Examiner in Magnetism and Electricity, Science and Art Department, RECEIVES a limited number of Pupils. Special facilities for French, in view of new regulations. Terms moderate. Good success. Highest references. NEXT TERM BEGINS SEPTEMBER 20.—Devon Lodge, Dartmouth, S Devon.

MILITIA COMPETITIVE EXAMINATION.

The undersigned PREPARES a LIMITED NUMBER of PUPILS (Five) for the above. Successes in March, 1883,—two, one taking the second place (first try); in September, 1883—two, Fowle, 25 (first try); Moir, 27. At the March Examination, 1884, one pupil competed, A. H. Robinson, passing 1st for Cavalry, with 2,018 marks. after four months' work.

Officers prepared for the Promotion Examination. Terms moderate.—Apply, Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

MILITARY EDUCATION, GERMANY.— Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of TEN successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIX SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL, SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.— First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS.— Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.— Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

ARMY EXAMINATIONS.—PREPARATION for WOOLWICH and SANDHURST in the Modern Side of Derby School. Fees £70. Sons of Officers £60. Lists of successes and of Scholarships tenable at School can be obtained from the Rev. WALTER CLARK, B.D., the School, Derby.

THE GROVE COLLEGE, ADDLESTONE, SURREY.

A School of the first-class for the Sons of Gentlemen, particularly of Military and Naval Officers.

A Special Class in which boys are prepared for Service Cadetships, according to the Admiralty Regulations for the Britannia candidates. Success guaranteed in ordinary cases. Inclusive terms for this class, eighty guineas a year.

Only forty-five minutes from London.

Prospectuses and References as to standing and success from Principal, Rev. SAMUEL T. EALES, M.A. D.C.L

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, Spring Grove, Isleworth.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.— Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.— A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.— Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

ARMY and NAVY SCHOOL, BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

BRIGHTON.—TUITION for SANDHURST.— A Private TUTOR who takes only five Resident Pupils, has ONE VACANCY. Terms, £150 per annum; no extras. Can enter at any time.—83 Montpellier Road, Brighton.

LIEUTENANT-COLONEL T. J. R. MALLOCK, late Royal Fusiliers, and Garrison Instructor of the Southern District for the last six years, RECEIVES a Limited Number of MILITIA SUBALTERNS as Resident Pupils, to PREPARE them for their MILITARY COMPETITIVE EXAMINATION.

Terms, &c., on application. The NEXT COURSE will commence on OCTOBER 1.

Address—Pinewood, Bagshot, Surrey.

SOUTH COAST.—PREPARATORY SCHOOL.— Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

MILITIA COMPETITIVE.— Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have succeeded at purely Military Competitions. Sunbury-on-Thames.

SANDHURST & WOOLWICH.— Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY continues to RECEIVE Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th. Sunbury-on-Thames.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second.—PUNDIT, 21 Beechholme Road, Clapton, London.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

THE MANOR HOUSE, LEE, S.E.—SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following SIXTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

THE MANOR HOUSE, LEE.

The NEXT TERM for MILITIA OFFICERS reading for the MILITARY COMPETITIVE, and for OFFICERS desirous of passing for Promotion in January next, COMMENCES OCTOBER 14, 1884.

ARMY EXAMINATIONS.—PREPARATION in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

CANDIDATES for the ARMY.—TUITION by CORRESPONDENCE in GEOMETRICAL DRAWING, by a successful Teacher and Author.—"A. B.," Stanton House, 1 Belleville Road, Wandsworth Common, London.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

DRILL and GYMNASIUM INSTRUCTOR REQUIRED in a large high-class school near London. Residence in the village necessary, and the whole of the working-day would be occupied.—Particulars of Messrs. ASKIN, GABBITAS, and KILLICK, 38 Sackville Street, W.

CAPTAIN F. H. FAWKES (retired Royal Engineers) prepares quickly and successfully for ARMY, CIVIL SERVICE, &c.

Good house accommodation; excellent staff of Tutors; and all arrangements made with a view to secure in everything as high a standard as possible. Five years' successful experience. References to Masters at Eton and Harrow, and other Public Schools.

Recent Sandhurst successes:—

Places—7th, 12th, 20th, 27th, 34th, &c.

Mathematics—FIRST and SECOND places consecutively.

English—FIRST, SECOND, and FOURTH places consecutively.

Geology—95 per cent. twice consecutively.

Sandhurst and Woolwich Preliminaries, 21 out of 27.

JULY. { SANDHURST—4 out of 5; and PRELIMINARY—2 out of 3.

Address—UPTON PARK, SLOUGH, BUCKS.

ARMY and UNIVERSITY EXAMINATIONS.—Mr. R. C. DAVIES, M.A., the Wood House, New Southgate, N., has VACANCIES. Three candidates were sent up for the July Sandhurst Competitive, and all were successful, two of them having twice failed previously, and now passing 40th and 41st. Large grounds and cricket-field. Average number of pupils, ten.

MEDICAL.—WANTED, by a COUNTRY PRACTITIONER, a PUPIL to EDUCATE for the Medical Profession. Qualifications necessary, he must be intelligent, extremely steady, and his parents of good social position.—Apply, Dr. CHITTENDEN, R.N., Faversham, Kent.

OXFORD MILITARY COLLEGE, COWLEY, OXON.

PATRON—

H.R.H. the DUKE of CAMBRIDGE, K.G., &c.

Managed by a Committee of General Officers and Gentlemen connected with Education.

Head Master—The Rev. J. M. EUSTACE, M.A., St. John's Coll., Camb. (late Joint Head Master, Wimbledon School), assisted by G. H. Nelson, Esq., M.A., F.G.S., F.R.G.S., Queen's Coll., Oxon., Second Master, and eleven Assistant-Masters.

This College combines the advantages of a public school training with private tuition for candidates wishing to prepare for the Indian and Home Civil Services, for Woolwich, Sandhurst, and for Matriculation. Special importance is attached to mathematics and modern languages, and sufficient individual attention guaranteed.

More than 100 pupils, or 62 per cent. bonâ fide candidates, have passed direct from this College within the last seven years. Upwards of 200 of Mr. Eustace's pupils have passed the competitive examinations for the Army.

The course of instruction comprises—riding, gymnastics, swimming, and the various military exercises. The buildings and grounds include chapel, laboratory, library, swimming bath, fives courts, and large cricket field. Age for admission, 10 to 17. Terms, from 70 to 100 guineas. The Head Master is prepared to admit a limited number of sons of officers on reduced terms.

For Prospectus and list of successful students apply to the HEAD MASTER.

LEA and PERRINS'.

☞ Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

CORBETT'S WORCESTERSHIRE SALT.

AGENTS: WESTON and WESTALL, LONDON.

The purest and most wholesome Salt for the Table, and all Culinary and Dairy purposes, and the best for the Preservation of Fish, Meat, and Vegetables, or for any other purposes where Salt of the greatest strength, most brilliant whiteness, utmost purity, and most delicate flavour is required.

Has gained Highest Awards wherever Exhibited.

An important condiment of universal consumption like salt ought not to be purchased without thought or care, as too frequently is the case, but should be selected with the circumspection experience shows to be necessary in all articles of diet, or where intrinsic purity and absolute freedom from foreign matters are of essential importance. These conditions are completely fulfilled by CORBETT'S WORCESTERSHIRE SALT, produced not from water more or less impure, which has passed freely through fissures or otherwise to Salt deposits lying comparatively near the surface, and therefore necessarily exposed to risks of organic contamination, but made from natural brine formed in Nature's laboratory, and drawn from the purest and deepest natural brine springs in England, lying in the same district and the same geological formation which yield the famous spring water of Malvern, the purest water known.

To protect consumers, this Salt is packed for the Table, General Household, and Dairy purposes, in Jars, Bottles, Packets, and Calico Bags, from 1lb. to 28lb. each, bearing the name and trade mark of the Proprietor. It is also supplied in squares and other forms for various uses, and for manufacturing purposes.

May be obtained of all Oilmen and Grocers throughout the World.

EXHIBITS AT THE HEALTH EXHIBITION AND CRYSTAL PALACE.

BEWARE OF IMITATIONS.

Now ready, crown 8vo, 6s.

NOTICE.—Captain R. Armit, *Central London Rangers, formerly Lieutenant R.N., lately engaged on the Staff of* The Army and Navy Gazette, *having received notice of dismissal six months ago, has ceased to have any connection with this office. This notice is rendered necessary in consequence of statements having been made in circulars, &c., that his connection with* The Army and Navy Gazette *was severed voluntarily by Captain* Armit.

⁂ *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*
MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*
MR. RICHARD JAMES WOOD,
AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE Annual General Return of the British Army for 1883, although the information given therein does not bring us up to any later date than January 1, 1884, has only just been published. What the necessity for the delay may be we fail to perceive, unless it be to afford an opportunity of replying to any adverse criticisms by a declaration that the information is so old that it is not fair to argue upon it, without knowing what has taken place since; this later information always being kept back, however, until it, in its turn, has become stale. Nevertheless, we shall decline to modify our criticisms on the present Return for any reason of the kind referred to, and we think that we may with safety state that the Return now before us is by far the most unsatisfactory that has been presented for several years. In the first place, we find that, on January 1, 1884, with a reduced establishment of 189,069 of all ranks of the Regular Army, the total number of effectives amounted only to 181,227, leaving a deficiency of 7,842 below the authorised establishment. This deficiency is by far the largest which has appeared in any return for the last 20 years, with the one exception of 1871, when the deficiency stood at 9,280; but this is easily accounted for by the fact that at that time the authorised establishment had just been raised, on paper, by about 10,000 men. Within three years, however, this high establishment was reduced below the number at which it stood before, and since then there has never appeared such a deficiency as that existing on January 1 last, and this, too, in the face of the fact that a larger number of recruits had been enlisted in 1883 than in any year since 1864. At first sight, this state of affairs would appear to be inexplicable; but in a table in the Return, which shows the past services of the non-commissioned officers and men on January 1, 1884, will be found a key to the mystery. From the table in question it will be seen that of the 33,096 men enlisted in 1883, there were only 29,576 remaining on January 1, 1884; of the 23,802 enlisted in 1882, there were only 18,517 remaining; and of the 26,258 enlisted in 1881, there were only 19,484 remaining. Thus it will be seen that in three years the "waste" from 83,156 recruits amounts to the alarming total of 15,579, none of whom had enough service to have been transferred to the Reserve. Here, then, is probably the secret of the whole affair. With the numbers of recruits that have been enlisted lately, the authorised establishment could easily have been maintained but for this fearful "waste." And now we see for the first time that when Lord Wolseley, in the early part of the present year, was boasting of his 33,000 recruits, he quite forgot to tell us that already 3,520 of them had ceased to belong to the Army. But let us now pass to the tables in the Return which show the quality of those recruits who are remaining in the Army still; and here we find that of the 33,000 enlisted, 1,193 were boys under 17 years of age, 59 were between 17 and 18 years of age, 7,988 between 18 and 19 years of age, and 11,573 between 19 and 20 years of age, making in all a total of 20,813, or about two-thirds of the whole number of recruits enlisted under the age of 20; while during the last ten years the highest number ever before enlisted under the age of 20 in any one year was 15,197. The tables which show the physique of the recruits for 1883 only serve to tell the same story of degeneracy. There were 10,903 recruits enlisted under 5 ft. 5 in. in height, and another 6,280 under 5 ft. 6 in., making together 17,183 under 5 ft. 6 in.; and we know that of those below 5 ft. 5 in., many are no more than 5 ft. 3 in. in height, that being now the minimum for Infantry recruits. Again, there were 1,316 enlisted whose chest measurement was under 33 inches, 9,632 more under 34 inches, and 11,658 more under 35 inches. The state of the Militia is even worse than that of the regular Army, for the Return shows that, on January 1, 1884, the rank and file of the Militia numbered only 97,778, showing a deficiency of 29,875, the figures given being the lowest for the enrolled strength and the highest deficiency for any one year since 1873. And further, there was on the date of inspection of the different regiments a total of 669 officers below the establishment. If something be not done immediately to remedy this state of things, matters will necessarily go from bad to worse, for something must indeed be radically wrong with a force which cannot even maintain its establishment of officers at a respectable figure. The Yeomanry, having presumably attained, in 1882, as low a pitch as possible without disappearing totally, has, in 1883, actually increased from 11,173 to 11,204 of all ranks. The Army Reserve and the Volunteers show real and appreciable improvement. The Reserve now amounts to 43,185 men, of whom 34,589 belong to the 1st Class. The Volunteers, on November 1, 1883, had reached the highest number (209,365) ever known. But their improvement does not stop at an increase of numbers, but extends in other directions which are, if anything, more important than mere numbers. The total number present at inspection in 1882 was 175,878, but in 1883 this number had increased to 179,739, being an increase of 3,861; while the total increase of enrolled members of the force was only 2,029. And again, in 1882 the number of efficients was 199,374; but in 1883 that number was increased to 202,428, a total increase of 3,054 efficients. These figures show that the Volunteers are earnest in that which they do, and are always striving to improve themselves. And it is this example of the Volunteers which should lead us in our most despondent moments to think that there is yet hope of an efficient British Army, if only a Secretary of State for War shall arise who will take the matter in hand without prejudice, and will seek advice from those who have gone step by step through the regimental mill rather than Staff officers, whose good fortune it has been to escape the drudgery of regimental work, and who have consequently come to regard the commanders of regiments, troops, and companies as little better than "drones and dullards,"

A SAD disaster at sea, attended by very great loss of life, has removed one of her Majesty's ships from the *Navy List*. It is lamentable to state that, from the evidence given by the survivors, the melancholy occurrence was by no means the result of circumstances beyond control, or at all unavoidable. About four o'clock last Monday morning, while cruising off the North-west Coast of Ireland, the *Wasp*, gunboat, Lieutenant and Commander John D. Nicholls, was totally wrecked off Tory Island, every soul on board being lost with the exception of six men. The *Wasp* was in no strange waters, although cruising off a wild and stormy coast, fringed with islets and open to the huge waves of the Atlantic Ocean. She was a well-furnished craft, and, as her name implies, one of the smallest of her Majesty's vessels-of-war. The *Zephyr*—recently fired upon by the Chinese in the Min river—closely resembled the useful and capable little vessel just lost, together with so enormous a proportion of precious lives; and the *Sheldrake*, the *Stork*, and the *Starling* are similar gunboats. Her commander was a most skilful sailor, and took a great pride in his ship, the remarkably neat trim of which evoked favourable comment. The crew comprised picked seamen, and most perfect discipline existed. The little *Wasp* was a composite gunboat, of 465 tons, and 470 horse-power; she carried four guns, and her crew consisted of 58 men. Two officers were on leave and one seaman was absent, and nine only of her full complement survive. The scene of the disaster, on the coast of Donegal, is a well-known and perilous spot, where the sea cliffs of the mainland tower over "a constantly tempestuous sea;" and a sound, eight or ten miles wide, through which the north-easterly breezes blow fiercely, separates the islet with its lighthouse from the craggy shore. The *Wasp*, with her comparatively diminutive displacement, afforded but little space for watertight compartments, and she may be said to have had ribs of iron and a skin of wood. Thus her chance of flotation after striking the rocks was comparatively small. It was in the month of June last year that her Majesty's despatch-boat *Lively* ran upon the Chicken Rock, while on her passage from Ness to Stornoway, with the Crofters' Commission on board, a circumstance to which we allude from the fact that it has been stated that the *Wasp* was going round to Moville for the purpose of taking the sheriff and an evicting party, and landing them at Innisbrahock Island to superintend certain evictions. If this be so, it may be urged that the employment of the officers and crews of her Majesty's Navy for such services is most impolitic and undignified. Immediately after the disaster was reported, many statements and alleged particulars obtained publicity, and it was not until last Thursday that the actual circumstances attending the loss of the *Wasp* became known. It was at first anticipated that the loss was attributable to extraordinary conditions of weather, and it was inferred from the immense disproportion of the victims to the rescued that the wreck was appallingly sudden. But the very plain facts were scarcely expected in connection with the wreck of a well-found English vessel-of-war, provided with charts, on a familiar though dangerous coast. The *Valiant* ironclad was despatched from Rathmullen to inquire into the sad story, the details of which were necessarily delayed. The latest particulars respecting the loss of the gunboat, establish beyond any doubt whatever that the cause of the disaster was careless navigation and "keeping too near to the unfriendly shore." Remembering the acknowledged skill and the usual care manifested by the commander, some of the circumstances are inexplicable. The *Wasp* was endeavouring to weather Tory Island on the Atlantic side under sail, her fires having been banked, so that for the nonce she was practically a sailing ship. This is a point that should be remembered. A fresh breeze was blowing from the west, veering towards the north-west, and the position of Tory Island was most clearly indicated by the lighthouse at the western extremity. The tide was favourable, yet she struck within fifty yards of rocks. It would appear that the men were alarmed when it was too late—the ship being only under sail—at the proximity of the shore. A vessel under steam may, in rounding a point situated to leeward, take a course that would not be justifiable, and perhaps highly dangerous, for a ship entirely depending on her sails. And this seems to bring us very near to the actual cause of the disaster. The *Wasp*, while on this course, undoubtedly possessed, in herself, all the means and appliances of a steam-vessel; but that power was not available, and she was evidently attempting, under sail, to steer a course which would only have been safe under steam, if it were then justifiable. It is estimated that she ought to have been "about three hundred and fifty yards further out to sea than she was." It is an unpleasant duty to be obliged to state facts tending to cast blame on a gallant officer who lost his life when his ship was wrecked; but facts are stubborn things, though it is possible that at the court-martial which will be held to inquire into the loss of the *Wasp*, some defence or excuse for the course adopted by the unfortunate Commander may be given in evidence. When the dangerous position of the vessel was seen by the watch on deck, it is alleged that her course was maintained until she struck on the rocks; and even if steam power had been available, it is doubtful if it would then have been of any service. It was not until after she struck that any attempt was made to use her engines. Most remarkable it was that her Commander, after she struck, immediately ordered the engineers to get up full steam. But the fires were banked, and the order could not possibly be obeyed,—indeed, it is asserted that steam could not have been got up under an hour. Thus it appears that the Commander calculated upon a power that was absolutely not available, and failed to realise that *de facto* the *Wasp* was dependent on her canvas. The end soon came, for the sea swept her off, and she sank rapidly in deep water, the fatal rock being only about fifty yards from the shore. Attempts to launch the lifeboats failed, for they were dashed to pieces by the waves, and thus so many lives were lost within hail of the shore. It has been asserted that, had steam been up, and had the first indication of alarm been met by prompt remedial measures, the *Wasp* would still have been afloat; but that is mere conjecture. Reliance on the engines under the circumstances was unjustifiable, and this disaster is an additional illustration of how terribly sudden are the effects of mishaps at sea. All was over in a few minutes, and the wreck had soon entirely disappeared. Considering the statements upon which these remarks are founded, there is reason to arrive at the conclusion that those who were responsible for the navigation and the safety of the *Wasp* failed to take into account, as it was their duty to have done, the extent to which she was at the mercy of accidents or Tory Island would have been given a much wider berth, for there was really no cogent reason for making a short cut to economise time. Whatever conclusion may be arrived at, it is certain that the *Wasp*, depending alone on canvas, ought not to have been permitted to "hug a lee shore" on such a dangerous coast, under the swell of the Atlantic. The Court-martial will elicit every circumstance likely to afford further information, and it is to be hoped that the wreck of the *Wasp* may teach a useful lesson, and prevent in future unnecessary risks. It may be a question whether steam ought not always to be "up" in gunboats when on a dangerous coast.

THERE are probably no men in her Majesty's dominions better pleased at the great movement which is gathering force every hour for the strengthening of the Navy than Lord Alcester and Sir Cooper Key, and those Naval officers who, in the present or in the late Ministry, had to accept the situation and do their best on the Board with the materials in hand, and all the time feel and declare that the condition of the Navy was dangerously unsatisfactory. For many a long year—indeed, since the paper was started—has the *Army and Navy Gazette* preached on the same text; but in vain have leading articles been written, speeches been spoken, letters been published, the voices of men like Symonds, Elliott, Hay, &c., raised, and their cries uttered, or the remonstrances of officials in office delivered *sotto voce* to their chiefs. The Chancellor of the Exchequer and the Treasury sat on the money-box, and no First Lord had the courage to tell the Government that they were trifling with the life of the Empire, and that he would not be responsible for the result of their cowardly concessions to party exigencies. We are told there is no "party" in the Navy. But every Government, in framing the Naval estimates, has one eye on the estimates of the Government it displaced, and another on the faces of the economists in the House. When the policy of a Ministry is attacked, the defence is conducted on party lines. It is considered sufficient to show that the Board of to-day does not spend so much as the Board before it, and that it lays down as many keels, is as active in repairs, and advances its ships in at least equal fractions. Very often the exaggeration and violence of the attack divest it of real force, and render repulse easy. We have abstained from producing laborious statistics, to all of which, perhaps, the detection of one flaw would be taken as a complete refutation, but we have insisted that there was a clear case for inquiry presented in the antagonistic statements of Lord Northbrook, Sir T. Brassey, and Mr. Bannerman on one side, and Lord H. Lennox, Sir J. Hay, Admiral Symonds, and Mr. W. H. Smith on the other. We know that officers like Sir H. Keppel, Sir B. Seymour, the Duke of Edinburgh, Lord John Hay,—in fact the great body of professional officers,—with such men as Sir E. J. Reed, Mr. Barnaby, and Mr. White in rear of them, were unanimous in thinking that what is called the pessimist view of the Navy was more nearly correct than that of the official representations to Parliament; but as long as the latter were accepted, and the country was content, protests and demonstrations were futile. Now, what will be done? What ought to be done may be very much in the direction indicated by Admiral Elliot in the *Morning Post* of Thursday:—

> "A grant of £10,000,000 for defensive armaments would go far to restore our prestige, and a great deal might be done within the short space of twelve months, under pressure, to increase our defensive power in the matter of guns and torpedo vessels alone. For £3,000,000, 50 first-class and 100 second-class torpedo-boats could be produced within twelve months in this country, and distributed for home and colonial defence, and 50 more of the first-class added to our Fleet. Another £2,000,000 could be utilised to hasten the completion of war-ships. Another £5,000,000 should be appropriated for our war Fleet, and with proper exertions much might be done in a couple of years. Many ships in the lists of available war-ships in the *Pall Mall Gazette* are now unserviceable, their boilers being worn out, and none ready to replace them. I say nothing about gunboats, but of the 70 or 80 we can muster, all told, about half carry an 18-ton breech-loading gun, and the other half guns of lighter calibre. Immediate steps should be taken to organise a coast brigade, which should muster at least 25,000 men, to man the coast flotilla. A selected portion of engineer mechanics should receive torpedo instruction and have extra pay."

These suggestions are excellent, and Admiral Elliot gives others of great value as to details; but is it not quite possible, if he were on the Board to-morrow,—we ask, without offence,—that he might point out to any one in opposition who made such proposals in Parliament that there was no occasion for all this hurry, and that there was not the least chance of a sudden outbreak of war? It is thus we go on year after year cowering under the lash of the politicians and hiding ourselves under Ministerial responsibilities. As for the complimentary platitudes of the Chevalier Eduardo de Martino, none, we presume and hope, would pay less attention to them than the officers of the British Navy, proud as they are of their traditions and their sailors. Naval officers are all aware that the Navy is not what it ought to be. They do not despise the descendants of the sailors who fought so well that the victories we won were never empty honours or bloodless contests, and they are convinced that torpedoes and ironplates have no feelings. The cry of "keep out the shells," which arose between decks on October 17, 1854, came from no coward lips.

NO one who has not experienced it can know or form any idea of the bodily agony caused to a beginner by a long ride on a camel. Many people have experienced the misery and pain produced in unaccustomed muscles by a heavy day's work in the pigskin—the "loss of leather," the burning heat, the racking torture in back and legs, the parched mouth, sleepless hours, and feverish thirst,—but these are quite pleasurable sensations and results compared with the state of body and feeling superinduced by thirty miles' jog as a "Shuttee Sowar." And whereas the horseman gets himself to rights in a few days, a European may take a week and more to recover from the effects of his first voyage outside the "Ship of the Desert." There are camels and camels, just as there are horses and horses. The best of them are "kittle cattle," the worst—well, wait till the British Cavalry and Infantry find the adjectives! *Punch* depicted a lovely Lifeguardsman in a comfortable saddle astride a camel, with a regulation bit and bridoon and reins in the creature's mouth; but the camel rein is a rope or thong put through a hole in the cartilage of the nostril, and the native guides the beast by the pressure of his heel to the side of the camel's neck. The camel bites like a shark and kicks like a horse. Its passions are furious and insatiable, its love of liberty romantic but troublesome, its noises and smells dreadful to ear and nose, and some of its procedures disgusting to the eye. To the manners and customs of this frightful quadruped the British soldier will entertain decided repugnance; he will regard him very much as Mr. Winkle did his horse, and as to feeding and watering him, he might as well be expected to look after a hippogriff or hippopotamus. Therefore, there must be a great company of natives to the manners of camels borne in attendance on the force; and we devoutly hope there may be no fighting, for in that case the natives will certainly not be in attendance on the camels. But with all these little drawbacks, the men will enjoy the camelcade when they get used to it, as "Johnny Ross's" riflemen did in 1858 in India. Nubia and the Soudan are far better countries to travel in than Oude and Rohilkund. There is no ophthalmia below the Saaed, and the green veils and spectacles provided for the men will not be needed; but there will be fever as the Nile recedes. Murray says there are no flies in Nubia. There may not have been when Mr. Eaton, or whoever it was prepared the Handbook, was there; but since then the flies have all come back, and we are quite ready to make a bet that they will show heads with any flies in the world. In a few weeks it will be quite cool on the Nile in the morning and evening, and chills should be avoided sedulously.

RECENTLY most serious statements, accompanied by weighty statistics as to the present condition of the British Navy, have produced a feeling of keen anxiety. It has been shown that since 1868-9 the Naval expenditure of other Powers has increased forty per cent., while that of England has diminished. Something approaching a "scare" has been created. "Are these statements true; and if correct, what is to be done?" If the country is convinced that its Navy has been permitted to decline, prompt initial measures will be insisted upon to restore the British Fleet to its proper state. There seems to be a general concurrence on one point,—that if our Navy is inadequate, it ought to be raised as rapidly as possible to a condition of efficiency to enable it to cope with any probable combination. Threatening voices have been heard of late, and unpleasant rumours of coalitions against England have been circulated; but when statements, clearly backed by facts and figures, announced all over the world that Britannia is "practically dethroned from the sovereignty of the ocean;" and that the Navy is not strong enough to assure victory, the fact was met in a manner which ought to convince us it was not disagreeable to anyone but ourselves. Our brilliant Naval history is still the national boast. Richard Cobden asserted he would cheerfully expend a hundred millions sterling, rather than that any two foreign Naval Powers should be able to equal the Navy of Great Britain. It has been urged very recently, in a quarter essentially commercial, that "we must still be prepared to spend our money like water, if necessary, in order to keep up the strength and the reputation of our Fleet. This was long ago the opinion of so distinguished a non-Interventionist as Mr. Cobden, and it is the opinion which has been more than once avowed by Mr. Gladstone." Without inquiring whether Mr. Cobden's views were attributable to abstract patriotism, or to his knowledge that the immense commerce of Great Britain depended upon our Naval supremacy, the sentiments of all true Englishmen will accord with those of Mr. Cobden. We do not anticipate that the country will grudge any necessary expenditure on our Navy, for be it remembered that the "one vote never seriously challenged" in the House of Commons is that for ships, men, and guns for the Royal Navy. In the days of Nelson, when seamanship and pluck rendered the name of Britain glorious on the seas, we had force enough to block the ports of France and Spain, to convoy fleets of merchant vessels laden with valuable cargoes, and to protect our coveted Colonies! But since those halcyon days all has become changed. Foreign nations have increased their Naval armaments; and some, at one time possessing scarcely any ships, have powerful vessels on the most approved designs. Fifteen years since, England expended as much on her Naval armaments afloat in one year, as France, Germany, Italy, and Russia combined. Now, it has been estimated, we are spending only, *pro rata*, eleven to fifteen. The late First Lord of the Admiralty remarks that, notwithstanding the repeated assurances of the Government, there has been in the public mind, for some time since, a sense of insecurity as to the condition of our Naval defences. This feeling of alarm and insecurity has, the writer affirms, widened and deepened, and the representatives of the Government, he asserts, avoid the real issue, and satisfy themselves by piling figures upon figures, in order to prove that they have at least done as well as those who preceded them in office. This plain-speaking will be readily understood and its veracity admitted, although there have been also plenty of figures used to show Government remissness and neglect of the Navy. Mr. Smith says what the country really wants to know is,—"Whether our own shores, and our Colonial possessions are safe; whether we have a fighting Fleet which can dispose of any probable combination of forces which could be brought against it in battle; whether our food supplies, our trade, and our commerce are reasonably secure from interception by an enemy; whether, in point of fact, we are strong enough to make it in the highest degree improbable that an attack shall be made anywhere, and impossible that such an attack can be made successful?" Mr. Smith recommends the adoption of a proposal, made in the last session of Parliament by Sir John Hay—to which he gave his support—namely, that the whole matter should be referred to a Committee either of the House of Commons or of both Houses conjointly, "whose verdict would carry with it the confidence and respect of the nation." The questions are not of a party nature, for they are "being urged with the greatest vehemence by warm supporters of the Government; and unless they are dealt with exhaustively and immediately by such a Committee, disquiet and anxiety will increase and swell until some little incident will turn it into a panic." Although it has been announced that the autumn session will be devoted to the Franchise Bill only, "the country will not be satisfied with any such answer," argues Mr. Smith. We need not fear that such an inquiry will teach our rivals anything which they do not already understand. Our foreign neighbours know "the truth about the Navy" by this time; and our foes will certainly not be more inclined to attack us when they learn that Britain intends to make herself more secure. Mr. Smith points out that ships now building may be got ready for sea with despatch, and a year or two economised, thus strengthening our Navy with all speed. In conclusion, he asks the plain question,—"Will the Government grant the inquiry when Parliament meets in October?" The answer depends much upon public opinion. Mr. Smith has not expressed any opinion on the question whether the anxiety now felt in the country is well founded or not. As an ex-First Lord of the Admiralty, he has said as much as he deems necessary at present. But he will doubtless be ready to state whether, in his judgment, "the Navy, in its present and prospective condition, is entirely adequate to the discharge of the duties required of it," before the responsibility of the Admiralty is transferred, as he proposes, to a Parliamentary Committee. It is maintained that another four millions a year will be required to place this country in the position we held fifteen years ago. What are four millions out of a revenue of nearly eighty millions? The Treasury, however, control the Admiralty, and a mistaken economy tends at times to defeat the intentions of the Admiralty, which has to submit to financial considerations. We entirely concur in the statement that the country is perfectly ready to sanction "whatever expenditure may be necessary in order to place the Navy and the national defences connected with it in a thoroughly satisfactory condition." No Board of Admiralty can successfully shelter itself under the authority of the Treasury if the Navy be proved to be insufficient. It has been stated regarding our relative position that we are a ship or so ahead of France in number, but inferior to her in guns, armour, and speed. The official statement of the French Minister of Marine, that "it was absurd to compare the small French Fleet of ironclads with the invincible armoured armada of England," has been quoted. The facts will not corroborate this estimate. We are altogether behind in torpedo boats and home defences; "half our third-class ships of the line could not go into action," and "our cannon are inferior to those of France and Italy, and not a single breech-loader is shipped upon our ironclads." Our Mercantile Marine comprises nearly 20,000 vessels of varied tonnage, and we have "only twenty-four fast cruisers to protect them against swift depredators of the *Alabama* type." Many of our chief stations, including Singapore, Bombay, the Cape, and St. George's Sound, are open to attack by an enemy, and "only two of our great harbours are adequately guarded" at home. Then, to continue this sorry statement, it is alleged that we have only "men enough to man our Fleet for the first month of a war, and not a dock in the East where an ironclad could be refitted." It is not a question now as to responsibility. Mr. Smith has spoken in no party spirit, and his remarks are conscientiously written at a time of unmistakeable anxiety. Lord Northbrook is absent on affairs unconnected with his office as First Lord of the Admiralty, during a period when his presence is required at home. When he returns, unless he can "satisfy the country that its present alarms are wholly without foundation, the demand for such an inquiry as Mr. Smith recommends will speedily become irresistible." At all risks, at any cost, and with vigorous energy, the proud position of Great Britain as the first Naval Power must be maintained. We cannot entertain the idea of being "vanquished on the sea," which has ever been England's glory. Our best interests demand prompt action. To possess boundless wealth, to build fleets, to rule the seas, and to be in a state of helplessness, is a position altogether indefensible and humiliating; an inquiry is necessary, to allay public anxiety, without delay.

Mr. Campbell-Bannerman, the Secretary to the Admiralty, returned to London on Tuesday night.

There is no truth in the statement of the *Hampshire Telegraph* that "Lord Alcester has been ordered by the Admiralty to concentrate his ships at Alexandria, and to there land a strong Naval Brigade to co-operate with the Military authorities organising the Gordon Relief Expedition." Lord Alcester is a Lord of the Admiralty, and has no ships that we know of, and there has been no order given by him to himself to concentrate his imaginary fleet, and land a Naval Brigade at Alexandria or anywhere else.

By the retirement next month of Vice-Admiral Rice, on promotion, Captain J. Rowley, flag captain at Portsmouth, will attain flag-rank, and the appointment of Naval Aide-de-Camp to Her Majesty will be placed at the disposal of the Admiralty.

On the expiration of the tenure of Admiral Sir W. H. Stewart, K.C.B., as Naval Commander-in-Chief at Devonport, which will take place shortly, this important appointment will become vacant. Although announcements have been made as to Admiral Stewart's successor, no nomination has yet been made, and the anticipatory statements are altogether premature. On relinquishing his present position, Admiral Sir W. H. Stewart will, it is stated, probably be appointed a Lord Commissioner of the Admiralty, but this has not been finally decided.

In the event of it being found necessary to strengthen the squadron in China waters for the protection of British interests, it is understood that the reinforcements will be drawn from the Straits Settlements and East Indies stations. A quantity of war stores were shipped on Thursday morning on board the steamship *Benarty* for conveyance to Hong Kong.

The accession which is promised to the list of works by Royal authors in "The Cruise of the *Boadicea*," by Prince Edward and Prince George of Wales, will be heartily welcomed, and, if it be not too much "edited," will prove, we are sure, very pleasant reading; but we hope judicious Mr. Dalton will let their young wits play as they please, and allow them, like Nora Creina's gown, "to rise and fall as Nature pleases," subject to the laws of grammar—though even these—"princeps sum et supra" grammaticam—might be disallowed, if it did not discredit the teaching of one of the most assiduous of tutors.

Among the many rumours that have been circulated recently in connection with Naval matters at home and abroad, was a report that the Chinese Government had offered to sell to that of Germany the two ironclad breastwork monitors built by the Vulcan Company of Stettin, and which are now, and have been for some time past, at Kiel. The acquisition of these two vessels would just now have been most desirable, and the purchase of itself would undoubtedly have been regarded as a valuable addition to the German Navy, as the two ironclads are of a class of vessel which would be of very great service to Germany in any future naval war. But the rumour, it appears, has no foundation in fact, and the Chinese Government doubtless fully appreciate the value of these ships at the present critical period. Like European nations, the Chinese are determined, under somewhat adverse circumstances, it must be admitted, to increase the strength of their Navy rather than sell most useful modern war-vessels. To carry out their views of adding to their war-ships, the Chinese Government are now in negotiation with Messrs. Howald, a Kiel firm of shipbuilders, for the construction of several new corvettes. On former occasions, Messrs. Howald have built war-vessels for the Chinese Government. France is well informed of the arrangements that are being made for these additions to the Chinese Navy.

Rear-Admiral Tryon will, we believe, leave England next month. His Flag Captain will be Captain L. Hay, Commander de V. Hamilton will be Commander, and Mr. Pawsey Admiral's Secretary.

It is somewhat remarkable that the Americans should have discovered also their naval defences are in a position altogether unjustifiable. This discovery comes just now when the naval deficiencies of Great Britain are commented upon extensively. "It is a humiliating confession which patriotic Americans are forced to make," remarks a well-known New York daily paper, "that their sea-board is open to attack from the fleets of inferior nations, and that neither the Federal nor the State governments can furnish in a sudden emergency sufficient force to protect life and property from mob rule, much less to repel foreign invasion."

The steel guns manufactured at Spezzia by the Italian Government have proved a great success, and according to the *Italia Militare*, they will forthwith be issued to the ironclads *Vesuvius*, *Stromboli*, and *Doria*.

In connection with the loss of the *Wasp*, a Naval correspondent writes to remonstrate against the employment of her Majesty's Navy in such very disagreeable duties as those connected with the evictions of the miserable tenantry on the islands on the West Coast of Ireland. We presume that her Majesty's ships are available, and properly so, for the use of the local authorities in maintaining law and order; but we confess that the duty assigned to the *Wasp* in conveying "an evicting party" to their destination, and taking back a return cargo of wretched peasants, does not seem very agreeable.

The French squadron of evolution, composed of the *Richelieu*, *Trident*, *Redoutable*, and *Admiral Duperré* entered the port of Algiers on the 21st inst.

The appointment of Vice-Admiral J. Corbett, C.B., to succeed Vice-Admiral E. B. Rice, C.B., as Commander-in-Chief at the Nore, will necessitate comparatively few changes. The new Commander-in-Chief will take up his appointment on the 27th ult. Captain J. A. Poland will continue his duties as flag-captain of the *Duncan*, and Vice-Admiral Corbett has selected Lieutenant C. E. J. C. Graham, late of the Royal Naval College at Greenwich, to succeed Lieutenant F. D. S. Scott, as his flag-lieutenant. Mr. W. B. Risk, who has so ably discharged the duties of Secretary to Vice-Admiral Rice, will continue to act in the same capacity to the new Commander-in-Chief.

Captain Alexander Buller, C.B., now in command of the *Achilles*, is named as the successor of Captain Richard Carter, of the *Royal Adelaide*, flagship at Devonport. The latter officer's period of command will terminate in December.

The launch of the armour-plated ship *Rodney*, which will be named by her Royal Highness the Duchess of Edinburgh, is anticipated at Sheerness Dockyard with considerable interest. It is satisfactory to announce the addition to the British Navy of this powerful vessel, which has been built upon the slip from which the *Agamemnon* was launched about four years ago. The *Rodney* is of the "Admiral" type, and will be fitted with all the latest improvements in shipbuilding science. She will be equipped with ten heavy guns, together with Nordenfelt and Gardner machine-guns. When ready for commission, this ship will be a perfect example of modern Naval construction, no improvement tending to secure efficiency in detail having been omitted in her fittings. The cost of the hull of the *Rodney* is estimated at £440,000. The dockyard authorities at Sheerness have received directions to hold H.M.S. *Sampson* in readiness to assist at the launch on next Wednesday week.

It has been decided by the French Minister of Marine that the steam fleet shall be divided into seven categories, to wit: ironclads, cruisers, despatch-boats, gun-boats, steam-launches, torpedo-boats, and transports. The sailing vessels are to retain their old denomination.

The Woolwich authorities, it is stated, are erecting Siemens-Martin furnaces for the production of steel-castings for guns. In Sheffield this innovation has caused very naturally some heart-burning, as four large firms in that town have already extensive facilities for the production of steel castings for this purpose; but Col. Maitland stated at the United Service Institution not long ago that he could not get them large enough for his purpose. It is asserted in Sheffield that Woolwich, being so far away from the raw material, cannot manufacture the castings so cheaply as Sheffield; but this contention must be taken for what it is worth, considering the circumstances. The British ordnance has hitherto been composed of steel tubes with coils of wrought iron. In future the guns will be composed entirely of steel.

A thorough inspection of H.M.S. *Black Prince* has just been concluded by Mr. Sennett, from the Controller's Department of the Admiralty, with a view to her refitment as flagship of Vice-Admiral the Duke of Edinburgh, Commander-in-Chief of the Channel Squadron. It having been found that she can be rendered serviceable at a moderate cost, she will doubtless be brought forward for service almost immediately. It is not yet decided whether her defects are to be made good at Devonport or at Portsmouth, but in the latter case she will be towed round by the *Valorous*. The favourable character of Mr. Sennett's report cannot be otherwise than most satisfactory; and it will be gratifying to notify the readiness of this ship for active service again.

Respecting the relative strength of the Navies of France and England, there are, as in other matters, generally two opinions. The *Débats* does not at all support Lord Henry Lennox's views about the efficiency of the French fleet. It declares that it is a vain delusion to think that France, which has made enormous sacrifices to possess a large fleet, has really got it. Four of her most formidable ships, the *Marengo*, *Redoutable*, *Trident*, and *Richelieu*, are unserviceable for want of boilers, and of all the others only one is pronounced fit for active service in the event of war, that vessel being the *Amiral Duperré*. It goes on to state that presumably to hide this deplorable penury, and to continue to persuade the country that it possesses a powerful fighting force, M. Ferry's Government will probably compose the evolutionary squadron of four ironclads, two coast-defence rams, and four torpedo-boats.

The German Naval manœuvres are of great interest and significance, and it is surprising that the tactics that have already taken place this summer in German waters by various portions of the fleet have hitherto created so little interest in England. The manœuvres very clearly indicate the determination of Germany to become a first-rate naval power. The Army is admirable, and the Navy, it is intended, shall be worthy of the Empire, and its prestige among the Great Powers. Already, Germany occupies the third rank amongst Naval Powers, having, within 30 years, replaced Russia, which is now content with seventh place. Germany could at the present time employ 24 ironclads in the attack on a blockading fleet, of which only four would be obsolete vessels, and the number of her armoured vessels which, owing to their storage of coal and their sea-going qualities, may be employed for foreign expeditions, has risen to nine. In a few years' time Germany will be able to maintain the sea against a coalition of the Baltic Powers and Holland, supposing such a coalition were ever to be formed. With a view of being able to hold the position which an increase of her Naval strength in the near future entitles her to, Germany is equally persevering in improving the quantity and quality of her torpedo-boat service. Quite recently, in a comparative speed trial of German and English-built boats, a torpedo-vessel constructed by the most eminent English firm of torpedo-boat builders was beaten by the German boat by one mile an hour. It is evident that Germany aims high, as regards Naval excellence and efficiency, and the steady persistency with which all the essentials to insure success are being pursued by the stolidly persevering Germans, is characteristic. The utmost care is bestowed on the training of the crews and manning the German Navy, the progress made being an evidence of earnest determination to achieve perfection. The German manœuvres teach Great Britain a lesson, as well as warn us of what we may expect in the near future. The Naval policy of Germany alone ought to bid old England put her "house in order." The facts reported merit most serious consideration. While keenly aware that powerful ships are a primary consideration, the Germans quite understand that the seamen must be made thoroughly efficient by instruction, drill, and constant practice. The manœuvres in the Baltic and North Sea unmistakeably prove this fact. In the operations off Dantsic, Kiel, and Wilhelmshafen the leading idea was the attack of sea forts and attempted landings on the one side, and their defence on the other, night attacks being conspicuous features of the operations, whilst torpedo-boats and submarine mines were equally important factors in the mode of attack and defence. In his reports on the various manœuvres, the head of the German Admiralty, General von Caprivi, expresses himself satisfied on the whole with the operations, and mentions, even with undisguised praise, some of the skill displayed in individual cases. The fact of German Naval commanders being satisfied with the progress made expresses more than appears on the surface. To preserve peace, it is maintained, nations must be prepared for war, and the progress of Germany as a Naval Power will, perhaps, stimulate other powers to devote more attention to their Naval armaments, manœuvres, and general efficiency. This week extensive operations off Zoppot have formed a fitting conclusion to the German Naval manœuvres which have been carried on during this summer in the Baltic and North Sea.

It is announced that every officer belonging to the Royal Marine Battalion landed at Suakim receives 5s. a day field-allowance, and every non-commissioned officer and private receives 6d. a day. The blue-jackets, officers, and men of the ships stationed at Suakim receive no extra pay.

A change, tending to desirable concentration, simplicity of detail, and undivided control, is in contemplation by the Admiralty authorities in conjunction with the War Office. It is proposed to transfer the whole of the Naval gun-mountings and fittings, hitherto in the ordnance stores at the various ports, and in charge of the War Department, to the dockyards, making Portsmouth the principal store. This proposed amalgamation will place the whole of the arrangements as to guns, fittings, &c., connected with ships' armaments under the immediate control of the Admiralty, without the authority of the War Department intervening. In order to carry out the changes suggested, new buildings will be required to be erected at the dockyards, with the necessary overhead travelling-cranes and other machinery, the estimated cost of which the authorities at the several yards have reported upon to the Admiralty. The contemplated arrangement appears to be desirable; and although not finally determined, the obvious advantages that must arise will probably secure the change, with its consequent advantages.

Admiral of the Fleet Sir T. Symonds, and Military mentor unattached Sir E. Sullivan, have been the Solomon Eagles of the time. "Woe! woe! unutterable woe!" was their cry, in print and out of it; but a people stricken with a plague of franchise fever and the blight of Lords of the Treasury, cared nothing for their warnings. One is reminded now of the passage in "Peter Plymley's Letters," wherein the retaliations of Mr. Canning on the "great Gaul" were so mercilessly ridiculed, and the horrors of a possible French invasion placed in a vivid picture before the indifferent eye of the nation. And yet there was never a period in our history when the efficiency and completeness of Army and Navy—of Navy first and Army afterwards—was of such vital consequence. The violent irruption of England into Egypt, without any European mandate, has placed her in a position in which every step is fraught with danger, and in which immobility is death. If we had an army of 500,000 men ready for the field, and a fleet to correspond with our military power and naval necessities, England might go on her way without much heed. But we have only the territorial organisation, and its shadowy battalions do not furnish us with substantial legions, and the Reserve is fading into the first line and into civil life. But who is to blame for the state of the Navy? Is everyone's business nobody's business? Is it true that the Naval Lords have, ever since Lord Northbrook came into office and they with him, been raising up voices which never went beyond the green-baize doors of the Admiralty? We do not know it as a fact, though we have heard it; but we do know that no Government that ever was called to power and no Parliament that ever sat had graver responsibilities and heavier arrears to make up than Mr. Gladstone's Ministry and the House of Commons of to-day.

It has been said that if the Infantry battalions had responded with more alacrity to the call for volunteers for the Mounted Infantry, the Camel Corps would not have become a necessity, and would have been unheard of. Be this as it may, when on the desert war-path the Mounted Infantryman on his camel meets his brother Infantryman of the Foot Guards, also on his camel, experience will by that time have taught them (what is now a mystery to the uninitiated) the distinct and different functions of the two corps, and why they have been both alike armed with the Infantry Martini-Henry.

The following regimental moves are shortly to be carried out, viz.,—1st Battalion, 6th Royal Warwickshire, from Chatham to Devonport; 39th Dorsetshire, from Aldershot to Chatham; 2nd Battalion, King's Royal Rifle Corps, from Winchester to Plymouth; and 2nd Battalion, Rifle Brigade, from the Curragh to Aldershot.

The *Globe*, of Thursday, contained the following paragraph:—

> "Dr. W. H. Russell kindly volunteers to direct us as to the management of the *Globe*. He is of opinion that 'if we thought it right to state that Captain Armit had severed his connection with the *Army and Navy Gazette*,' we should also have inserted Dr. Russell's indignant correction that Captain Armit had not so much severed himself from the *Army and Navy Gazette*, as that the *Army and Navy Gazette* had severed itself from him. The difference between these two operations is so tremendous, that neither the universe nor Dr. Russell can be expected to have any peace of mind until we point it out."

We dare say there is some "tremendous" sarcasm in this; but we are too crass to feel or perceive the point, and so transfer the sentence to the appreciation of "the universe." Our contemporary is rather incoherent in his playfulness, and "scratches Priscian's head" consumedly, over the "indignant correction." There was no indignation at all expressed or felt in the correspondence. We can assure the *Globe*, however, that "Dr. Russell" never dreamed of undertaking such a task as that of helping the editor in the direction of his important "organ." The *Globe* made a misstatement in reference to a matter connected with the *Army and Navy Gazette*. The editor of the *Army and Navy Gazette*—thinking the *Globe*, as it considered it worth while to mention the subject at all, might like to be accurate—wrote a civil note stating the truth about it. The *Globe* did not notice the communication; whereupon the editor of the *Army and Navy Gazette* wrote again to the *Globe*, and obtained the elegant notice we reproduce for our readers. We shall only "volunteer" to direct the *Globe* management so far as to venture to point out to its manager that there is a "tremendous difference" between wit and impertinence.

It is announced that General Campenon, struck with the defects of the new military organisation in France, brought to light by events in China, will shortly submit to Parliament a plan for the formation of a colonial army. The creation of such a force has for some time been advocated. It is calculated that it will cost the country £240,000 a year, with an outlay of £120,000 to begin with.

It is not easy to understand what position the Duke of Connaught is to occupy at the Horse Guards; but *Truth* affirms his Royal Highness is to be installed there until a higher post is handed over to him.

The selection of officers for the composite Camel Corps and the Expeditionary Force has been attended with bitter heartburnings. Seniority has been upset, and selection,—*i.e.*, favouritism in most instances,—has rolled over the bodies of the unlucky ones. We do not say that there is a single bad officer selected; but some at least as good, senior to them, have been passed over. Of course, the Queen approves of the lists sent to her, and nothing more is to be said, except in private, where a good deal is said. By-the-bye, as to this matter of her Majesty's approval, which is constitutionally most proper to insist upon, is it not rather disrespectful that officers should set out wholesale for Egypt to take up Staff and other appointments, and that then, after they have gone for a week or more, the *Gazette* should gravely announce their names and functions?

The friends of Captain C. C. Brooke, who for nearly twenty years has held the post of Ridingmaster to the Royal Military College, will be glad to hear that a subscription is being raised to present him with a tangible memorial of regard in the form of a life annuity. As the circulars issued may fail to reach so many of Captain Brooke's old friends, we beg to second the endeavours of the promoters of the scheme by stating that any subscriptions to the credit of "The Brooke Fund" will be received by Messrs. Cox and Co., Craig's Court.

The position of the Major-General at Suakim reminds us very forcibly just now of the state of affairs very aptly described in the well-known phrase of "coachman over a wheelbarrow." There is the coachman in full array, with his Aide-de-Camp, Brigade-Major, Commissariat and Ordnance Store Officer, but the forces under his command consist of five companies of Marines, and one company of Engineers only. A veritable wheelbarrow in all conscience, compared with the large forces in other places, where the Staff is no larger, and, in many instances, where there is no Staff at all, and only a lieutenant-colonel in command. Surely some more useful employment could be found for these officers in rendering assistance along the Nile where it is so sadly needed at the present time, instead of keeping them kicking their heels at Suakim with a force so small that it is absolutely impossible for them to find employment in their various departments.

Count Herbert Bismarck has made the greatest score in diplomacy—not even excepting Sir E. Malet's—of any we know of since Emperors and Kings made Ambassadors off-hand *ad libitum*. He has gained the esteem and friendship of the highest personages here, and if Count Herbert Bismarck were to take his place, society would even put up with the departure of Count Münster and his four-in-hand without a tear; but it is not likely that the young diplomatist will have such a responsibility at present.

The authorities at Aldershot have had a busy time of it with the officers and men whose novel concentration and mobilisation have furnished them with constant occupation.

A correspondent of the *New York Herald*—who is not a soldier, we imagine, from his very unprofessional account of a field-day at Aldershot ("within sight of Chislehurst," he says)—makes the following observations on

> "These British soldiers that seem to spend their time in fighting fancy wars with naked heathen in the four quarters of the globe. And certainly from a distance they looked well. The accoutrements are effective and simple. The cavalrymen are mounted on beasts that would raise the envy of any regular United States Army officer. What money can do seems to have been done to give England's Army of over 100,000 men the tools necessary for the annihilation of her enemy. But leaving trappings, and coming down to the individual, the English soldier of to-day is not a better man than the German, and by no means the superior of the United States enlisted man. The English gentleman is, to be sure, an accomplished athlete and sportsman, and that has tended to give the impression abroad that the English soldier was gifted with an individual capacity and intelligence far beyond that of ordinary soldiery. But a little mingling with all branches of the English service will soon disabuse a military student of that impression. To look at the large proportion of thin-necked, pinched-faced, and stunted young men in her

> Majesty's forces, one would think that the slums of big cities were the main recruiting grounds for them. Although the United States have not a quarter of the men that England has, it would be difficult in any of our white regiments to find so large a proportion of incompetent-looking men, and in comparison with the hearty levies of the 'Fatherland,' these men are children at war."

Alas! that this, with a little touch of exaggeration, should be so in some cases! We have, however, seen very poor critters in United States uniform, notably the garrison in the forts at San Francisco not long ago; and the American who wants to see English troops at their best must go to an Indian camp, or even to Egypt, or though he might have excepted the latter as not regular service men for ordinary work, unless in case of war, till recently, see a turn-out of the Guards.

The 64th North Staffordshire Regiment left Manchester on Tuesday morning for Portsmouth, where it embarked for the West Indies in the *Orontes*, to relieve the 1st Battalion of the Royal Scots, which being composed of older soldiers, has been selected for service in Egypt by Lord Wolseley. Although recruits of three months' service were ordered to be taken out, the 64th Regiment embarked for foreign service nearly 300 under its establishment. It will be distributed as follows on arrival in the West Indies, namely, head-quarters and four companies at Barbadoes, three companies at Jamaica. The garrisons of these Islands will indeed be of the most formidable proportions.

There is a delicate suggestion in the comparison made in the *Pall Mall Gazette* of September 25, by a mysterious gentleman "whose official duties connected with the management of one of the Scotch railways brought him into contact with Mr. Gladstone last week," between the reception accorded to the Grand Old Man and that of the Prince of Wales at "Old Meldrum." We suppose the gentleman may have been the stoker, and we think it very likely he was, but, anyway, he throws on the coals and a lot of greasy adulation which illuminates our contemporary's columns like an electric light, in the midst of which the Premier is seen "booin' an' booin'," like Sir Pertinax MacSycophant to his worshippers, and the poor Prince, "in the shade," is left to "look on astonished and amazed." But for all that, "he bowed kindly to Mr. Gladstone, than whom a king could not have had a worthier welcome!" Old Meldrum fiddled, and scratched, and yelled, whilst something bigger than Troy was burning.

There is a deal of nonsense written, spoken, and printed in reference to the use of ballooning for the purposes of war. Until a balloon is navigable in the same way as a ship is navigable, capable of direction by sail or steam, it cannot be used with certainty,—that is, there may be occasions on which a balloon may be relied on to obtain information not to be had otherwise; but it is quite uncertain whether a balloon can be used when wanted. A free balloon in the nature of things is practically valueless for war purposes except for escape from a beleaguered city or invested position outside of which there is safety in descent. If a balloon were sent up free from any position, it would be carried in the direction of the enemy without any means of returning when the current of air set from the front, and it would be absurd to send up a free balloon to sail to the rear of the position. When a captive balloon is employed the air must be quite still, or the balloon begins to rotate at the end of its tether. If the wind be strong in the direction of the enemy the rotation is violent, and the balloon is depressed, with unpleasant possibility of capture and destruction. If the wind be the other way, the occupants of the balloon have a very unsatisfactory view of their own camp, and none of the enemy's. In low countries, under favourable conditions, captive balloons may secure good results, but in Nubia, near the Nile, where there is always a strong north or south wind, much mirage, dust storms, &c., balloons would be a mockery, a delusion, and a humbug. Still, it can be no harm to have one on an off-chance.

It is to be regretted, says the *Morning Post*, that the authorities at the Horse Guards have not thought fit to avail themselves of the services of Colonel Burnaby. It will be remembered that this officer was specially thanked in General Orders by General Graham for the assistance rendered by him in the Soudan. Colonel Burnaby speaks Arabic, and is one of the very few English officers serving who has been to Khartoum. Perhaps that would be a reason against him. But there are no authorities at the Horse Guards. The Powers that be are far away. The "authorities" who remain have merely to register ukases, to fill up returns, inspect troops, make speeches, and keep up appearances generally. There are many cases like those of Colonel Burnaby, whose seniority is distinctly against him. Besides, he is not *persona grata*.

It has been brought to our notice that the Civil Departments of the War Office have hit upon a new plan for carrying on the war against the "malignant" Purchase officers who have money claims on retirement against the Government as represented by the Civil Secretary of State for War. War-Office letters on financial questions to retired or retiring Purchase officers were always addressed "by direction of Secretary of State for War," and signed with the puissant names of Knox, Thompson, De la Bère, Cave-Browne-Cave, &c., which frequently produced very disagreeable and unpleasant replies. Even the mighty name of Hayter seemed to have no effect whatever on extra-malignants, who objected to be turned out of their profession without the return of their purchase-money. The officers, in fact, ignored these high functionaries, and addressed their replies straight to the Secretary of State for War—often by name. These letters on unpleasant financial questions are now sent to officers under cover and protection of the Commander-in-Chief, by which means it may be supposed that his Royal Highness is identified with, and takes an active part in, these contentions between the officers and the Civil War Office. This is very misleading, and we question whether the Commander-in-Chief's name should be mixed up with such purely financial questions at all, with which he has really nothing to do. Any way, this clever ruse is quite understood, and seen through, by such officers as have money claims on the Government, arising out of the abolition of Purchase, and the numerous contentions and fights over compulsory retirement.

We hear from India that more than three years ago Sir A. Hardinge having tested the working of the troops very carefully in what is called "the new attack," recently promulgated here, and attributed to the Adjutant-General and Major-General Newdigate, sent the book of orders in relation to it to the Horse Guards. Our correspondent thinks that the credit due to the "inventor," which we ascribed to General Newdigate, really belongs to Sir A. Hardinge; but we cannot undertake to express an opinion on that matter.

A correspondent writes from Zululand:—"On the arrival of the column at Rorke's Drift as a 'moral support' for Chief Hlubi, many thousands of refugees were encamped with their cattle on the left bank of the Buffalo; but all have now returned to their homes, as the arrival of the British troops has restored confidence. On July 31, the detachment of the Inniskilling Dragoons, under Major Froom, accompanied by Sub-Commissioner Pretorius and Lieutenant-Colonel W. Bennitt, 6th Dragoons, commanding the Rorke's Drift column, with Major Boyle, Rifle Brigade, Deputy-Assistant-Adjutant-General, made a reconnaissance to the far edge of the Ingutu Range. Many Boer waggons were reported on the banks of the Nondwene, which river here forms the boundary of the Reserve; and a very distinct view was obtained of the Ezunganyan Hill, where the Usutu Chief Medhlokazulu (son of old Sirayo) is hidden with all his followers in the caves; but no Boers or Usutus were seen in the Reserve, where all is reported quiet. Lieutenant-General the Hon. Sir L. Smyth, C.B., K.C.M.G., and Staff accompanied the reconnaissance."

It is very desirable that the Duke of Cambridge should visit Ireland and examine the military situation there with his own eyes, for it is possible—and it ought to be certain—that the horrible condition of the barracks and quarters in Dublin and elsewhere, which Generals and doctors have reported upon and protested against in vain, will not be allowed to last the moment the weight of a Royal Duke Field-Marshal Commanding-in-Chief is brought to bear against the Treasury obstructionists. When Lord Strathnairn commanded in Ireland in troublous times, he drew out an admirable scheme for the concentration of troops in case of a rising, the only thing wanting to complete which was the absence of a force to operate against; but some changes might be found necessary to-day, and the want of barrack accommodation is certainly a blot to be hit. The situation of Mallow, commanding the railway from Dublin to Cork and its junction, with the railways to Waterford on the east, and to Kerry on the west, is adapted admirably for a military station; but we hear with astonishment that the Government have selected Buttevant as the site of the new barracks, on account of some paltry economy. Buttevant could be isolated from the north and from the south, but Mallow occupied, and Limerick Junction in possession of the troops, the south and west of Ireland would be in secure communication. The Duke will find a great and a melancholy change in Dublin and in a review in the Phœnix, since first he saw them "warm and young" as Prince George of Cambridge and of the 17th Lancers; and as for the rest of Ireland, we fear he will be disposed to say "age has not withered nor custom staled thine infinite variety" of desiderata.

In reading the voluminous reports in the daily papers of the French, German, and Russian Manœuvres, we encounter considerable discrepancies and differences of opinion; and as we are not able to identify the writers, we do not know whose judgment is most to be relied upon. The leading journal's correspondent eulogised very highly the endurance, spirit, hard work, and efficiency of the Rhinelanders who have been manœuvring against the Westphalians before the Emperor, and no doubt deservedly; but he could not help dropping into the besetting sin of Chauvinism which is growing on us; and in order to illustrate the excellent marching and springiness of the Germans, he lugged in the bearing of "the Highland Brigade at the Alma," as if that was the acme of military perfection. Mr. Kinglake, who never saw a shot fired till he was in the Crimea, and who was far from the scene he describes so poetically and rapturously with Lord Raglan's Staff, has cast over the appearance of the Highlanders a glamour of words and imagery which is in sharp contrast with the facts. So far from the Black Watch "gliding smoothly, easily, swiftly, like the shadows of sailing clouds up the hill," Sir Colin describes them as "struggling in a disorderly manner" through the enclosures near the river, and of his being "enabled to collect a goodly number" of them under the cover of the left bank, "as it was high." When they reached the top of the high ground sloping towards the Alma, he says "the men were too much blown to think of charging, so they opened fire whilst advancing in line." It must be remembered, too, that the Highlanders were exposed to no fire, and lost neither officer nor man in their advance to the river; that they were exposed to no enemy at all till they gained the brow of the hill, as the Light Division and the Guards had cleared the enclosures, and the epaulment and guns had been taken; and that they had scarcely any casualties when they did come on the right flank of the Russians just as the day was won, the left having been forced by the French, and the centre by the 2nd Dragoons and the Guards. But like "Up Guards and at them!" the legend will live

There will be a good roll in the Bay to-night, and the troopers which left yesterday will be well into it; but it is astonishing how speedily men shake into their places in a well-ordered troopship, and by the time the Rock is sighted in some four and a half or five days' time, we expect there will be none but pleasant letters ready for home. Amen!

At the inspection of the heavy and light divisions of the Camel Corps on Thursday, at Aldershot, the Commander-in-Chief did not seem to be particularly pleased with the marching-past of the force—857 of all ranks representing 19 cavalry corps. The marching might certainly have been better, had a band been present; but, singular to relate, the only musical instruments on the ground were carried on the trumpeters' backs, and remained there, and the gallant Cameliers marched past their Commander-in-Chief amidst painful silence. No wonder they were out of step and dressing! It was the opinion of the bystanders, however, that, under the circumstances, they came out of it remarkably well. A certain awkwardness was also observable in the handling of the infantry Martini-Henry. This is easily accounted for. The cavalry carbine, to which the men have been accustomed, is much lighter and handier, but not such an effective weapon as the one which has been supplied to them.

The daily papers, in their accounts of the preparations for the departure of the Egyptian contingent, state that the Peninsular and Oriental, &c., ships "are manned by Hindoos." A Hindoo would as soon think of manning a troopship as the Prince of Evil would bathe in holy water. The skinny, wiry, muscular little men, with bandy legs, whom the newswriters saw, were Mahometans to a man—Lascars—on whom our shipmasters for the Eastern seas mainly rely.

In an interesting article on the Russian Press in the *Morning Post*, the writer says:—

> "The *United Service Gazette* claims to be the oldest military paper in the world, but the *Rooski Invalide* is twenty years its senior. Founded in 1813 by Pezarovius, a foreigner in the Russian service, and afterwards edited by Volykoff, the satirical poet, it gradually developed under the auspices of a number of clever military editors into one of the most influential newspapers in Russia. During the Polish revolt of 1863 it actually encouraged the national movement, and for a long time denounced the policy of oppression preached by the *Moscow Gazette*. Ultimately the Government decided that it was inconvenient for a military paper to hold forth on politics, and cut down its programme until it made it what it is to-day, a mere military gazette of four poorly-printed pages, with a few stale cuttings from home and foreign papers, and perhaps a professional article, which is only worth reading when it discusses military events of some such safe and distant period as that of Peter the Great. The result of this policy is, that whereas the *Rooski Invalide* was once a good paying paper, with a large circulation, it now costs the State £1,000 a year, and is only subscribed for by persons interested in the gazette."

The following Divisional Order was published at Aldershot yesterday:—"The Lieutenant-General commanding has received the orders of the Field-Marshal Commanding-in-Chief to notify to the Division under his command, that, on the occasion of the inspection yesterday, his Royal Highness had every reason to be satisfied with the admirable manner in which the troops of all arms turned out and drilled. His Royal Highness desires that the expression of his thanks be conveyed to the Generals of Brigades and to the officers generally, to whose care and attention the excellent state of the Division is to be attributed."

It is instructive to note that the claims of the rival candidates for the Presidency of the Great Republic—Mr. Blaine and General Cleveland—are mainly regarded by the Democrats and Republicans from a moral point of view. Mr. Blaine is accused of having loved too well, where he should not have loved at all; and General Cleveland has had to encounter damaging charges about his relations with a gay widow-woman—very distressing for elderly gentlemen.

The Commander-in-Chief has made his autumn inspection of the Aldershot Division much earlier than usual this year, and with it the drill season, if such it can be called, may be said to have terminated. The combined minor operation which was to have taken place yesterday has been postponed until further notice, and we have probably heard the last this season of these interesting tactical movements of small bodies of the three arms, which are so much appreciated by all ranks who take part in them. The numbers on parade on Thursday were 4,742 men, 1,654 horses, and 50 guns, less by 1,000 infantry than the number on parade on the occasion of the autumn inspection last year. The effective strength of the Aldershot Division proper grows smaller every year. The official field state of Thursday last shows that there are now at Aldershot over 8,000 men eating rations daily, yet, with every available man in the ranks, it is not found possible to put 5,000 in line!

The *Times*' correspondent remarks on the sad fate of the English officers at the manœuvres in regard to decorations. Poor Sir F. P. Haines and his Staff had to stand by and see the Kaiser showering stars and ribands on their comrades the other day. Well, Sir F. P. Haines is not so badly off as it is. He is G.C.B., C.I.E., G.C.S.I.; medal and clasp for Sutlej, Moodkee, and Ferozeshah, 1845; medal and clasps, Punjaub, 1848-9; Ramnuggur, Chillianwallah, Goojerat; Crimea and Sebastopol medal, with Alma, Balaclava, Inkerman, and siege clasps; Turkish war medal, Mejidieh, &c. Sir Howard Elphinstone, too, glitters like a mackerel in the moonlight with medals well won all. Then "General Higginson (of the Bengal Cavalry," according to the leading journal, who may possibly—nay, must be—Major-General Higginson, late Commanding Home District), a Guards officer, is a C.B., and other things besides of service record. The fact is that the English rule places the English officer in a high position as regards himself and his country, and in a very disagreeable and ungracious one as regards the Sovereign of a foreign country.

THE GERMAN NAVY.—TORPEDO WARFARE.

The following account of torpedo-boats and torpedo shooting in the German Navy will be of especial interest, considering the keen interest taken in Naval matters at present. In no previous year have the experiments with torpedo-boats and in torpedo shooting assumed such dimensions in the German Navy as in the late Naval manœuvres. Not only were all the ironclads provided with torpedo-shooting apparatus, but a special torpedo-boat division was formed, which joined the squadron at the end of July, another experimental division being added later for the testing of the new torpedo-boats. This year's experience has enhanced the favourable opinion of the value of the submarine weapon for the protection of the German coast. The idea of putting one or two torpedo-boats on board every large ironclad seems to have been finally abandoned. It is found preferable to make these boats larger and more seaworthy, and to attach them to the ironclad squadron as a floating appendix. In distant expeditions in which torpedo-boats could not be dispensed with, the boats would have to be sent on special transport ships. This year's manœuvres have confirmed the conviction that colossal ironclads can be sunk by a single blow from a torpedo. Even in bright moonlight nights, and with keen vigilance, no ship is safe within reach of a hostile coast plentifully supplied with torpedo boats, especially if at anchor. Even in motion the blockading ships will not be safe, for the torpedo boats can follow them, and will recognise their victims by the lights which the enemy, if he sail in squadron, will not be able to dispense with. A stricken ship, even with watertight compartments, becomes *hors de combat*, for she become motionless. No strengthening of her armour can hinder this. As far as one can see at present there are no means of securing even the mightiest battle ships which modern science has built against the annihilative effect of a surprisal by torpedo-boats. Watch boats have been tried surrounding the ships at a distance of 500 mètres, but experience has shown that even on moonlight nights, and with crews fresh from their sleep, they do not suffice to secure the threatened ship. Just as little has the idea of drawing a submarine guard of wire nets round resting ships yielded practically useful results, while this fence will always entail the disadvantage that if the ships are attacked they cannot move, and are consequently rendered almost defenceless. The boats themselves are difficult to hit, and have in torpedo shooting the advantage over big ships, that it is easy to give them the direction which they must have if the torpedo is to hit. They can be used with effect, however, only when they can surprise the enemy under veil of night or fog or powder smoke, or by darting out from a hiding-place on the coast. As to the torpedo itself, experiments with the different kinds have clearly proved that the German Navy alone possesses the most death-dealing torpedoes. The German Navy uses a torpedo invented by a captain of the Austrian Navy. The secret of the invention was bought by the German Admiralty for 180,000 marks (£9,000), and then the further perfecting of the weapon was taken in hand by the Navy itself. It has now attained singular perfection, and is one of the wonders of modern times. For non-experts it is always a puzzle how the fish-torpedo can be steered under water. Being a kind of underwater ship, able to move both horizontally and vertically, its steering apparatus is duplex. The apparatus which keeps its course horizontal is not automatic, and does not differ in principle from the helm of a ship. The mechanism, on the other hand, which keeps it at the desired depth, is automatic. In the details of its construction lie the importance and the main secret of the German torpedo.

THE TRAINING OF RECRUITS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Kindly allow me space for a short reply to "Senex." He asks,—"How do rowing men, pedestrians, coal-heavers, and navvies manage?" The answer is that they practise their work; and what is wanted is that the soldier, whom we enlist for hard work, should be allowed to do the same. I am glad he allows that one of the extension motions is useless, and may be hurtful; but he says the others are harmless, or calculated to have good results. But he can neither tell why he says they are harmless, nor what the good results, nor who calculated them. He says our national physique must be wretched if the men cannot bear half an hour of this training without damage—a just observation, if the training were good—but here we have interference with respiration and with the circulation of the blood put down as the equivalent of work! Let "Senex" stand for 15 minutes faithfully in the attitude of the soldier as laid down in the drill-book, with "the fore part of the feet bearing the principal part of the weight of the body," and he will find out what I mean, even though he does no extension motions and does not swell his chest, as the recruits are obliged to do. If he adds these he will find out that the attitude soon becomes unbearable. I described in my pamphlet (p. 17) how the men deal with the orders of the drill-book. The men who are fit to soldier are the men who in time manage to evade the orders. Were it not for evasion of orders, desertion of recruits, and the hospital, the evils of this false system must have been exposed long ago. Would "Senex" object to a full inquiry? Is he of those who think that other things may advance and improve, but not recruit training? Let the soldier work hard, but at his work. For that we select him. But we surely might remove grave defects in his training, which are shown to render him unfit for hard exercise.

THE PAY OF MAJORS.

"Major" observes:—"When the amalgamation scheme was first introduced, promotion was to have gone by battalions for seven years from the date of the order, but as this scheme did not answer it was shortly afterwards altered and promotion was to take place regimentally in precisely the same way as in the double battalion regiments. This scheme is now in force, but for pay there is a different scheme. In the old double battalion regiments the four senior majors draw the increased rate of pay for majors irrespective of the battalion to which they belong, but in the remaining regiments of the line they do not do so, but only the two senior majors of each battalion (a seconded major though not belonging to either battalion for purposes of pay belongs to the battalion from which he was seconded). Owing to the two senior majors in the regiment belonging to my own battalion, I find that though I am fourth senior major in the regiment and am liable for promotion in either battalion, I am drawing less pay than a much junior major simply because the latter belongs to the other battalion. Now this in the case of a purchase officer who has probably borrowed money for his promotion for which he is possibly paying interest at the rate of £50 per annum and has lost the capital, is very hard, especially where the junior major referred to has not spent any money for his promotion. If it was found necessary to alter the amalgamation scheme so as to make it identical with the old double battalion system, as far as promotion is concerned, it surely would have been more just to have carried it out in its entirety at the same time, and have made it identical, as far as pay is concerned, instead of having two systems going on side by side, one for pay, another for promotion, conditions of service being equal. Although the Secretary of State for War has declared he will not re-open the case of purchase officers, he will only be doing them a duty by seeing they are not exposed to further injustice."

The designation of the various vessels of which the French Navy consists, has been changed, by an order of the Minister of Marine. The ironclads will be divided in future into the following classes:—1. Squadron ironclads, large armoured ships, which, with few exceptions, will be employed abroad; 2, armoured cruisers, those at present in Chinese waters; 3, ironclad coasting yachts; 4, ironclad gunboats of the first and second class; 5, ironclad floating batteries. The designation, *éclaireur d'escadre*, has been abolished. The vessels of that description will be comprised amongst cruisers, of which there are five classes:—Cruisers with batteries, cruisers with barbette of the first, second, and third classes, and torpedo cruisers. The *avisos* form four classes:—*Avisos* of the first and second classes, transport *avisos*, and torpedo *avisos*. Gunboats will be known as gunboats and gun-launches. The torpedo-vessels form four classes:—High-sea torpedo-boats (a new type), torpedo coastguard vessels of the first and second classes, and torpedo vedettes, the latter of which are to be taken on board large war-vessels. There are, besides, three classes of transport ships.

Capt. Lord C. Beresford arrived at Alexandria on Sept. 11 from Trieste, and proceeded to Cairo by the afternoon train, to assume his duties as naval aide-de-camp to Gen. Lord Wolseley, and has since gone up the Nile towards Wady Halfa.

A massive sculptured memorial in marble of the late Admiral Sir Richard Collinson, K.C.B., Deputy-Master of the Trinity House, has just been erected by Mr. E. J. Physick, sculptor, over the family vault in Perivale churchyard, near Ealing, from a design specially prepared by Mr. Physick, in which the various services of the deceased, both in China and the Arctic regions, are also effectively introduced.

The sum of £100,000 in gold was sent to Lord Wolseley on Wednesday, being shipped in the steamer Australia, which left the Royal Albert Docks to receive the Camel Corps and other troops at Portsmouth.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

THE NEW ANABASIS.

[A Romantic Drama, in Several Acts. Time—Reign of Queen Candace II. Scene 1. A Rapid River in Ethiopia. Cascades in the background; rocks, crocodiles on sandbanks in foreground. Hippopotami gambolling in the rushes by the brink at each side. Small row-boats, Picts, Celts, &c., asleep under awning, or smoking, appear, towed by Ethiopians on shore. The *voyageurs* paddle gracefully to the refrain.]

"Row, brothers, row! the stream runs fast!
More rapids are near, just like the last."

Music and chorus.

Elderly Crocodile.—By Jingo! Cook's tourists up as high as this! I'm off to Gondokoro!

Hippo.—And all of us! The river is becoming unbearable!

[A general splash, dive, rough-and-tumble in the water. Ethiopians halt, and boats sway to and fro in the stream.]

Jones-el-Crusty, a Pictish Centurion (*from boat*).—Now then! Pull, you niggers, or you'll get toko all round! Pull at once, will you?

Sheik Rum-el-Wateer.—My sons are tired, and will work no more to-day. As to toko, friend Captain, know the courbash is abolished. See Article 7, Clause 11, Ethiopian Constitution! But (*looking up*), by the beard of Ptolomy Euergetes, what is this?

[A grand procession of balloons appears, and a chorus is heard overhead:—

"Up in our balloon, boys! Up in our balloon!
We'll teach the Mahdi soon to sing a very pretty tune.
Up in our balloon, boys! very near the moon!
That's the way to make this war, and end it very soon."]

Jones-el-Crusty.—Why, here they are at last! Our General Intelligence Department! I can see the Mushir, El Brackenbury, and the whole bilin'. (*Something falls from above.*) Hallo, what's that? A champagne cork! There are more of them! What a time they are having of it! Oh! why did not my mother get me into the Balloon Corps, instead of my toiling for three long weeks on this confounded river! They're blowing off gas, and going to anchor for the night. We'll do the same.

[Martial music heard—"The Camels are Coming," and enter the leading files of the Dromedary Dragoons on the R. They are attired in suits of buckram, corduroy breeches, cowhide boots, and spurs; on their heads pith helmets, on their noses green spectacles, over their faces mosquito-veils; each man, in addition to the equipment of the soldier of the period, carries a revolver of the Candace pattern, a medicine-chest, a pound of beef-essence, a sword, a telescope, a case of dynamite-cartridges, a Bible and family Prayer-book, an accordion; a kilt and bagpipes for state occasions. They slowly file and defile across the front, the camels gurgling and groaning, and the cameliers praying in emphatic sentences, in which the words "blooming," "b——y," and similar energetic adjectives abound. The parachutes are let down from the balloons. The Mushirs, Generals, Emirs, Mudirs, Muddlers, Fuddlers, and other great officers descend. Mushir Alcibiades sings to zither, accompanied by a gentle swain:—

"Some talk of Alexander and some of Hercules,
Of Solon and Lysander, and fellows such as these.
But of all those gallant heroes
There's none can be the peer,
With his tow-row, tow-rowdy-dow,
Of the man of Tel-el-Kebeer."

(*Speaks.*) What ho! without there! Turn on the ballet!

[The strains of the triumphal march of Ramses II., *à la Verdi*, are heard, and a brilliant dance of Gawazis in full dress is performed in front; the Coryphées are all K.C.B.'s, the corps are all C.B.'s, C.M.G.'s, or other things too numerous to mention.]

Alcibiades.—Here we will halt to-night! To-morrow fly or sail through the soft air and o'er the turbid wave. How many days to Khartoum? Let us see!

[Examines map. Suddenly a tremendous alarm is heard in front. Sheiks, Bedouins, camels, &c., rush to the rear, and boats fly past in wild confusion. Enter excited newspaper correspondent, brandishing revolver, and waving British ensign.]

"Hurra! hurra! hurra! We're all coming! He'll be here in a minute with Stewart! The Mahdi's smashed! All the garrisons are playing skittles, and ——

Alcibiades (sternly).—Cease this mumming! Who are you? Of whom speak you?

Excited Correspondent.—What!—not know me? I'm British Vice-Consul, Khartoum! Correspondent of the *Times!* And look! See, there's Stewart! And there's Gordon! And there are the prisoners! Hurra! Hurra! Hurra!

[Alcibiades faints. General rush for balloons as small man in fez, smoking pipe, stick in hand, appears on a pony waving the Mahdi's flag.]

"Ah! Alcibiades! Just come in time to save you." Tableau!—*Finis.*

The Alexandra (flagship), Temeraire, Inflexible, Superb, and Monarch sailed from Larnaca on Monday for Alexandria. Before leaving, Lord John Hay, accompanied by 17 officers, went to Mount Troodos, on a visit to Sir Robert Biddulph, the British High Commissioner.

A DELICIOUS COOLING DRINK is supplied in ROSE'S LIME JUICE CORDIAL in water; effervescing in all the Mineral Waters. It is non-alcoholic, and highly medicinal, purifying the blood. Recommended by the *Lancet*, and Medical Profession. Sold everywhere. Purchasers should order ROSE'S CORDIAL. Wholesale Stores—11 Curtain Road, London; and Leith, N.B.

The Army.

1st Life Guards. Lieut.-Col. the Hon. A. Talbot, Major Hon. C. Byng, and Lieut. Lord Rodney have left for Egypt with the Camel Corps.

2nd Life Guards. Capt. Lord Cochrane and Lieut. Beech have left for Egypt with the Camel Corps.

Royal Horse Guards (Blue). Major Lord A. Somerset and Lieut. Lord Binning have left for Egypt with the Camel Corps. Capt. Brocklehurst has proceeded on special service to Egypt. Amidst a scene of extraordinary enthusiasm, which extended from one end of Windsor to the other, the draft from the Royal Horse Guards for the Camel Corps, under the command of Major Lord Arthur Somerset, left the royal borough about mid-day last Wednesday. There were thousands of people in the streets, and the cheering of the crowd at some points was tremendous. When the detachment, which had been preceded by the band of the regiment, reached the South-Western Railway, a corporal gave the word and called for "Three cheers for the Rev. Arthur Robins, the soldiers' friend,"—this was answered with a will; Mr. Robins, their chaplain, who had walked with the men from the barracks, calling for "Three cheers for the Blues," which the multitude took up and shouted till they were hoarse.

2nd Dragoon Guards. Capt. Gough and Lieut. Hibbert have left for Egypt with the Camel Corps.

3rd Dragoon Guards. Capt. Parke has been selected for the adjutancy of the Northumberland Yeomanry.

4th Dragoon Guards. Capt. Darley and Lieut. Law have left for Egypt with the Camel Corps.

5th Dragoon Guards. Major Atherton and Lieut. Gore have left for Egypt with the Camel Corps.

1st (Royal) Dragoons. Brevet Major Gough and Lieut. Burn-Murdoch have left for Egypt with the Camel Corps.

2nd Dragoons. Capt. Hippisley and Lieut. Wolfe have proceeded to Egypt with the Camel Corps.

3rd Hussars. The Duke of Cambridge visited York on Saturday, and inspected the regiment. The Duke addressed the regiment, and expressed his high approval of the way in which all the movements had been carried out. It was only a short time since he had inspected the 3rd Hussars at Hounslow, and he was glad to have the opportunity of seeing them again, but he could only endorse the remarks which he had then made in their favour. He added that he was particularly anxious to see them after their very long march, and congratulated them on the good condition of the horses, which evidently had not suffered much from the journey. Major Beckett and Lieut. Scott have embarked for Egypt with the Camel Corps.

4th Hussars. Capt. Peters and Lieut. Kincaid-Smith have proceeded to Egypt with the Camel Corps.

5th Lancers. Major Carmichael and Lieut. Costello have proceeded to Egypt with the Camel Corps.

7th Hussars. Brevet Lieut.-Col. M'Calmont, Capt. Paget, and Lieut. the Hon. R. T. Lawley have gone to Egypt with the Camel Corps.

10th Hussars. Brevet Lieut.-Col. Brabazon and Lieut. Hon. G. L. Bryan have proceeded to Egypt with the Camel Corps.

11th Hussars. Major Swaine and Lieut. Harrison have embarked for Egypt with the Camel Corps.

13th Hussars. The depôt proceeded on Tuesday from Canterbury to Colchester.

15th Hussars. Capt. Holland and Lieut. Coke have embarked with the Camel Corps for Egypt.

16th Lancers. Major Davison, Capt. Lord St. Vincent, and Lieut. Browne have left for Egypt with the Camel Corps.

18th Hussars. Major Gould and Lieut. Knox have embarked with the Camel Corps for Egypt.

19th Hussars. It is interesting to note, says the *Morning Post*, "as an unusually rapid case of promotion, that Capt. J. C. K. Fox, who has just passed the qualifying examination for that rank, was only three years back serving as a corporal of horse in the 1st Life Guards. He enlisted as a private in Sept., 1878, and served as adjt. of the 19th Hussars, his present regiment, during the Egyptian War of 1882." Our contemporary apparently does not know that Capt. Fox, ere he enlisted in the Life Guards, was an officer in a distinguished regiment of Prussian cavalry, which he left in consequence of the results his kindness in becoming liable for brother officers; and as he brought to his new corps great experience and aptitude, Col. Keith Fraser, who knew his case, pushed him rapidly forward to deserved promotion, so that Corpl.-Major Fox was appointed as subaltern to the 19th in an unusually short time.

20th Hussars. Capt. and Adjt. Courtenay and Lieut. Richardson have left with the Camel Corps for Egypt.

21st Hussars. Major Wyndham and Lieut. Fowle have left with the Camel Corps for Egypt.

ROYAL ARTILLERY.

Capt. T. H. E. Acton has been selected for the adjutancy of the 2nd Lancashire A.V.

The following officers return home from India this winter to join the School of Gunnery at Shoeburyness:—Capts. H. Willoughby and W. De Jersey; Lieuts. H. Rogers, H. Chance, A. Stuart, G. Rundle, S. Lane, and B. Baker.

ROYAL ENGINEERS.

The left half of the 26th Company of the Royal Engineers and Nos. 9 and 11 Companies of the Commissariat and Transport Corps left Boolak Dacroor *en route* for Wady Halfa on Sept. 13.

Gen. Browne, Governor of the Royal Military Academy, Woolwich, has issued the following order on the departure from that institution of Col. Marsh, whose appointment as secretary and treasurer has expired:—"The *Gazette* has announced that Col. Marsh, R.E., is about to leave the Royal Military Academy, after a service of many years in responsible appointments—for the last seven years as secretary, an office bringing him into close and constant communication with all branches. The great advantage that Col. Marsh has been to the institution is so well known that it is needless to dwell upon it here. His views on sound military education, his intimate knowledge of all that has passed here, have been of the very greatest use to me personally; for his advice and assistance, sometimes in cases of extreme difficulty, I thank him. I am quite sure the remainder of the staff will join me in bidding a kindly good-bye to Col. Marsh, and wishing him success in his future course. Col. Marsh's kindness and thoughtfulness have been appreciated by not only the cadets now studying at the academy, but by many and many a one who has gone before into the two regiments. I desire in the name of the former to bid him God speed.—J. Browne, Lieut.-Gen. Governor."

Grenadier Guards. Lieut.-Col. Herbert, Capt. Crabbe, and Lieuts. Wolrige-Gordon, D'Aguilar, and Count A. Gleichen have left with the Camel Corps for Egypt.

Coldstream Guards. Lieut.-Cols. Hon. E. E. T. Boscawen and Graves-Sawle, and Lieuts. V. Dawson, Hon. H. Amherst, and D. Dawson have left with the Camel Corps for Egypt.

Scots Guards. Lieut.-Cols. Cumming, Willson, and Sir W. G. Gordon-Cumming, and Lieuts. A. S. Drummond and Baden-Powell have left for Egypt with the Camel Corps.

2nd Queen's (Royal West Surrey Regiment). Major W. Clarke died at Russell House, Plymstock, on the 18th inst. He joined the Army, Feb. 17, 1857; became lieut., Oct. 1, 1858; capt., April 1, 1870; and major, July 1, 1881.

4th King's Own Royal Lancaster Regiment. The 1st Batn. proceeded yesterday to Aldershot from Preston.

6th Royal Warwickshire Regiment. The 1st Batn., at Chatham, is under orders to proceed to Devonport.

7th Royal Fusiliers. The order for the embarkation of the 1st Batn. for Malta has been countermanded for the present.

8th King's (Liverpool Regiment). The 1st Batn. left Cork yesterday for the Curragh, to relieve the 48th Regt., two companies at the same time proceeding on detachment to Castlebar, under command of Capt. Beresford, relieving the 14th Regt. at that station. Serjt. Master-Tailor Plunkett was granted a medal on parade for long service and good conduct last summer; mention of the fact at the time was accidentally omitted. Colour-Serjt. S. Broadbent, who has recently taken up duty at the depôt at Warrington, received his good-conduct medal before leaving headquarters.

12th Suffolk Regiment. The 2nd Batn. has moved from Galway to Cork.

14th West Yorkshire Regiment. The 1st Batn. has moved from Castlebar to Galway.

15th East Yorkshire Regiment. Major Smyth obtains his lieut.-colonelcy, vice Col. Hallowes, placed on half-pay.

18th Royal Irish Regiment. The 1st Batn., on arrival in Egypt, is to be sent on to the front. The battalion was inspected by the Duke of Connaught, prior to its leaving Meerut. The regiment paraded in fighting kit. After riding down both lines the Duke addressed the regiment. He referred to the past services of the Royal Irish in New Zealand and Egypt, hoped they would give a good account of the enemy, and said they carried with them his best wishes. The officers who accompanied it were:—Col. Shaw, commanding; Lieut.-Col. Wray; Majors Simpson, Dixon, and Tufnell; Capts. Morgan, Gavin, Spyer, and Forster; Lieuts. Morris, Boisragon, Stevens, Doran, Moore (adjt.), Apthorp, Rickman, Doran, and Koe; Major and Pymr. Mosse; Qrmr. Jamieson, and Surg.-Major Lloyd.

20th Lancashire Fusiliers. Major Wahab obtains his lieut.-colonelcy, vice Col. Bowlby, retired on full pay.

28th Gloucestershire Regiment. Three officers and 100 rank and file arrived at Tynemouth from Portsmouth on the 18th inst., in relief of the detachment of the 105th. The head-quarters will eventually proceed to York.

30th East Lancashire Regiment. Col. Campbell has passed the higher-standard examination in Hindostanee.

35th Royal Sussex Regiment embarked at Sarras for Dongola on the 8th inst., and were conveyed on board 19 boats fitted-up with awnings, and two of them had also been fitted-up as floating hospitals, each of 20 tons, and accommodated 40 men with their stores and equipments. The men were very comfortable and cheerful, and had plenty of room. The flotilla succeeded in passing the Samneh Rapids without the boats being unloaded, so that the camels, which had been collected for the purpose of transporting the stores and baggage to the further side of the rapids, were not required.

39th Dorsetshire Regiment is under orders to move from Aldershot to Chatham.

42nd (Black Watch) Royal Highlanders left Cairo on Tuesday and proceeded up the Nile, *en route* to the front.

50th Queen's Own (Royal West Kent Regiment). The *Standard* correspondent at Cairo writes:—"The West Kent will probably go up the Nile, as Lord Wolseley expressed his great satisfaction at their general fitness."

ROYAL MARINES.

Capt. T. I. P. Evans, R.M.L.I., has been directed to join his Divisional Head-quarters for duty, from the Recruit Depôt, Walmer.

Major F. R. Beechey, R.M.L.I., has been placed on the Half-pay List for six months; he will then be surveyed as to fitness for further service.

Capt. E. G. Wilkinson and Lieut. F. White have been ordered to proceed to the Royal Naval College, Greenwich, for a course of study, commencing on the 1st prox.

The following gentlemen have been appointed lieuts., on probation, to the Royal Marine Artillery from Sept. 1, 1884, and have been ordered to join the Royal Naval College, Greenwich, on the 30th inst.:—Messrs. Harold Arthur Buxton, Humphrey Oldfield, Cecil Alvend Fitzherbert Osmaston, Sydney Gaitskeld, Gerald Noel Anstice Harris, Edward Roden Cottingham, and Arthur French Sladen.

The following gentlemen have been appointed lieuts. in the Royal Marine Light Infantry, with seniority of Sept. 1, 1884, and posted to the Divisions noted against their names:—Messrs. Frank William Luard and Godfrey Estcourt Matthews, Chatham; Francis William Archibald Hervey, Portsmouth; John Frederick Whyte, Hugh John Craig Gibsone, Richard Lane Bayliff, Godfrey Lancaster Beaumont, and Robert Douglas Beith, Chatham.

53rd King's (Shropshire Light Infantry). The order for the removal of the regiment from Malta to Egypt has been countermanded for the present.

60th King's Royal Rifle Corps. The 2nd Batn., at Winchester, is ordered to proceed to Plymouth.

64th North Staffordshire Regiment left Manchester on Tuesday for Portsmouth, and embarked in H.M.S. Orontes for conveyance to Barbadoes.

70th East Surrey Regiment arrived in Egypt yesterday from India.

75th Gordon Highlanders are to form part of the Highland Brigade of the Nile Expedition.

79th Cameron Highlanders are to form part of the Nile Expedition.

80th South Staffordshire Regiment will shortly proceed from Lichfield to Manchester.

93rd Argyll and Sutherland Highlanders. The regiment, the *Portsmouth Times* says, is under orders to proceed from Portsmouth to Windsor.

100th Leinster Regiment (Royal Canadians). Major Prior has passed the higher standard in Hindustani.

105th King's Own Light Infantry. The order for the embarkation of the regiment for Malta has been countermanded for the present.

107th Royal Sussex Regiment. The order for the removal of the regiment from Malta to Egypt has been countermanded for the present.

Rifle Brigade. The 2nd Batn. is under orders to move from the Curragh to Aldershot.

Army Medical Department. Surg.-Major Flood, Surg. Harding, Qrmr. Mullins, and a detachment of the Army Hospital Corps are under orders to leave the capital for Dongola. Surg. J. McD. Stewart, of the Army Medical Department, has been directed to assume medical charge of the station at Assiout. Surg. Davies has been directed to take over the duties of Sanitary Officer at Cairo to the Army of Occupation from Brig.-Surg. Norris, who is under orders to proceed to Wady Halfa with a detachment of the Army Hospital Corps. The following officers left England on Thursday for Egypt, viz.:—Surgs.-Major Hopkins, Harvey, Price, Waters, Garde, Tolmie, Beattie, Martin, Jennings, Greene, Brown, Kinahan, Govan, Seymour, Fishbourne, and W. Barrow; Surgs. Bradshaw, Stevenson, Powell, Trevor, Rainsford, Greene, Allen, Ryan, Wilson, Pinching, Carleton and Boyd. Capts. of Orderlies Osborne, and Qrmr. Strange. A correspondent writes:—"I have not the pen of a ready writer, but I beg to offer you my thanks for the articles which have appeared in your *Gazette* about the Army Medical Department. It is not that I alone am grateful, but every one of the A.M.D. I have come in contact with, or heard of—even those rabid Unificationists and Would-be Military doctors—agree most thoroughly with you. The whole aim of the present administration of the A.M.D. is to destroy every vestige of self-respect, professional pride, and responsibility. Every circular that has been issued of late is calculated to sink everyone to the lowest level, and instead of directing good Medical officers to see that the juniors are instructed, and do their work—as they would soon have done under the regimental good *régime*—senior officers are now put on orderly medical officers' work, 'to go round wards at certain hours,' and, in fact, do serjeant-majors', and ward-masters', and stewards' work altogether. Then look at the scandalous anomaly of being 'reported upon unfavourably by military or medical authorities!' The medical officer concerned never is told a word of this, and many men passed over cannot find out why! The greatest scoundrel in the ranks, when 'crimed,' is brought before his commanding officer and charged with his delinquincies, and he has an appeal to the General, or even the old Commander-in-Chief. Whereas all this bare justice is denied us. If medical officers are supposed only to learn their operative surgery before going up for an examination for promotion, then they will only do so, and take very little interest in their work, and have very little respect for those whose opinion of them is so unjust."

By permission of Major-Gen. J. T. Boileau, R.E., 100 orphans from the Soldiers' Daughters' Home will be entertained by Messrs. Welford and Sons, of the Warwick Farm Dairies, Maida Vale, at the Health Exhibition on Friday next.

The London correspondent of the *Western Morning News* says:—"Steps are about to be taken in the Queen's Regulations to provide that in future soldiers shall not be committed to ordinary prisons except for disgraceful crimes. The theory of the Judge-Advocate-General's office is that this rule is now observed, but in fact the case is far otherwise. The most recent return shows that of 284 soldiers then undergoing punishment in civil prisons, nearly two-thirds has been found guilty by courts-martial of purely military offences. In no other country in the world, I believe, are soldiers guilty of mere breaches of martial duty under an Army Discipline Act, or similar law, sent for punishment with ordinary criminals. Sir Edmund du Cane's recommendations have produced the desirable change, it appears. In his most recent communication to the War Office, however, it is very interesting to find him advocating an elaborate system for the detection of men guilty of fraudulent enlistment, that offence having been responsible for about two-sevenths of the committals of soldiers to penal servitude while it was punishable with penal servitude. Sir Edmund, while he would not degrade the soldier by putting him into a convict prison, would deal with men who defraud the recruiting department in the same way that habitual criminals are now dealt with by the police. He would keep a descriptive register of them, and place them under supervision."

Admiral Sir Houston Stewart, at Devonport, has given a handsome cup to be sailed for in the first week of next month by all service boats.

AYALA & Co.

CHÂTEAU D'AY CHAMPAGNE.

SPECIAL NOTICE.

TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat-cutter at Messrs. Poole's, Saville Row), having succeeded to the old-established first-class business of Jackson and Co., 5 CORK STREET, BOND STREET, respectfully solicits the patronage of the Nobility and Gentry.

Best trade only, at fixed, fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready-money entitles them to.

WILLIAM PUGH (from Poole's), 5 CORK STREET, LONDON, W.

SCHWEITZER'S COCOATINA
ANTI-DYSPEPTIC COCOA OR CHOCOLATE POWDER.
Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy.
In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

FOR BREAKFAST.
THE PERFECTION OF PREPARED COCOA.

TAYLOR BROTHERS'
"MARAVILLA" COCOA.

Sold in tin-lined Packets only, by all Grocers.

TAYLOR BROTHERS call the attention of consumers to the high sustaining and nutritive powers possessed by MARAVILLA COCOA and MARAVILLA COCOA ESSENCE. These articles being prepared with great judgment and skill from the choicest growths of the Trinidad and South American estates, compare advantageously with the productions offered by other houses, and a trial is strongly recommended before a preference is finally given to any other description.

TAYLOR BROTHERS, MARAVILLA, HOMŒOPATHIC, ROCK, FLAKE, and PEARL COCOA MANUFACTURERS,
Brick Lane and Wentworth Street Steam Mills, Spitalfields, London.

"A PURE COCOA OF THE CONSISTENCY OF TEA."

TAYLOR BROTHERS'
"MARAVILLA" COCOA ESSENCE.

Sold in Tins and tin-lined Packets only, by all Grocers.

BOOKS, Etc., RECEIVED FOR REVIEW.

Cholera Treatment and Cure, by K. H. Cornish, Surgeon to the Royal Humane Society (Ballière, Tindall, and Cox)—Le Général Comte Todleben, par Le St. Général A. Brialmont (Bruxelles: C. Muguardt)—Magazines for October:—Longman's Magazine (Longmans, Green, and Co.); The English Illustrated Magazine (Macmillan and Co.); The National Review (W. H. Allen and Co.); Cassell's Publications (Cassell and Co., Limited); Cornhill Magazine (Smith, Elder, and Co.); Longman's Magazine, Vol. IV. (Longmans, Green, and Co.)

NOTICES TO CORRESPONDENTS, Etc.

T. S., Liverpool.—You had better write to Sir E. Newdigate, Major-General, Commanding at Dover, where the Court was held.

ALIQUIS.—We have nothing to do with the matters to which you direct attention, and if our excellent contemporary really thinks Sir F. Campbell's honour is damaged, it must be regarded as an individual private opinion. "Aliquis" may not be aware that it is a costly luxury to bring an action for libel, even if there be verdict for damages and costs awarded. Our damages and costs in a suit against a paper owned by a firm of bankers and army agents remain yet unpaid, on the pretext that their publisher, against whom the action was brought, died insolvent! In the case of defendants against whom damages are awarded in vain, the remedy for a wrong by action for libel is worse than the disease.

JOHN BULL.—Yes. The British Fleet passed the Elsinore batteries in peace time, and was enabled to begin the bombardment of Copenhagen and the attack on the Danish Fleet without any molestation from the forts at the entrance. Our Fleet at Alexandria was in a strong position taken up in peace time before the bombardment commenced, and there was no declaration of war. Navarino was fought, and the Turkish fleet destroyed, without any declaration of war, &c. Admiral Courbet would have been very silly if he had not availed himself of his advantages to save his ships and crews from the fire of the forts; and it was the fault of his enemy, who, under all the circumstances, ought to have forbidden the passage, that he was allowed to pass up the river.

"HUMBUG."—You are right. No commanding officer of Volunteers, or, for the matter of that, Regulars, can place officers or men of his corps at the disposal of anyone.

"U. S. A."—The best answer to the charges made with the authority of "Stone Pasha" against Lord Alcester for recklessness, &c., in the bombardment of Alexandria, is furnished by and in the official report to the U.S. Navy Department of Com. Goodrich, U.S.N. Stone Pasha, when he was brigadier in your war, did not quite cover himself with laurels at Ball's Bluff, the only action in which he was engaged in command; and he did not make up for the deficiency in Egypt. His trained battalions did him little credit at Tel-el-Kebir.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

Several Naval and Military letters, &c., are in type, but are forced to stand over through want of space.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenschaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 27, 1884.

THE extraordinary device of ordering detachments from the Household Cavalry, the Brigade of Guards, the Cavalry and the Infantry at home, is exceedingly clever. It is a "dodge" which secures the popularity of a possible campaign, and enlists the sympathies in a medal-hunt of the greatest number with the greatest good of their friends. At the same time, it reduces no regiment or battalion to mortal agonies by depletion, and it leaves undisturbed the actual arrangements in camp and quarters of the home district. The Guards and Household Cavalry constitute an immense social and moral force in the country. The Cavalry and Infantry regiments *pro ratâ* have their weight in every shire and town; and if the officers are disappointed as individuals, they are gratified regimentally, and take a pride in the preparation of the force in which their men and brother officers will be employed. True, it is, as an organisation, essentially unmilitary. It is a violation of all the principles on which our bogus system pretends to be founded. Many misfortunes, from the repulses and disasters at the Redan down to Laing's Nek and Majuba Hill, can be traced to the vicious system of employing composite bodies of troops of many different corps; but in dealing with the Nile Arabs, a General may take liberties. In accordance with the traditions of the service, formerly the Guards were never employed unless in a foreign war; and they were only once in service after Waterloo, with the exception of the battalion engaged in the Canadian rebellion. But the Guards were sent out to Egypt under the Duke of Connaught by a Minister who distinctly stated there was no war at all; and the Household Cavalry, though they were kept at home during the great war with Russia in 1854, similarly figured as the "Compound Householders" in a military operation which was not war. The theories of our military Le Bœufs concerning the fitness of our battalions and regiments first on the roster for service to march at once were treated as too delicate to be played with, and an *olla podrida* was formed out of the whole home army except the artillery. "Send me out lots of Lords, plenty of squires, and give me a brick from every barrack-room in the three kingdoms to build up a Temple of Glory at Khartoum." That is the device, and it would not be possible to carry it out under any military administration in any other country. We have no doubt it will succeed. All the Army will be represented, and any credit acquired by the force will be divided among all its components. For our own part, we do not think it likely or possible there will be any such actions as Graham's force had with the desert Arabs near Suakim, because the tribes under the Mahdi are not of the same fierce indomitable type as the Arabs between the Nile and the Red Sea; and it is probable that the greatest danger to which the force will be exposed may have to be encountered only when the retreat of the garrisons begins, unless it be considered necessary to repeat Hicks' march to El Obeid, and to smash the Mahdi. That latter operation would surely bring on hard fighting; but it may be found impossible to make a retreat covering the civilians until the Mahdi's power is broken or peace is made with him. It is very possible many of the people in Khartoum may refuse to go, and more probable still that the force of circumstances and common sense may compel the Government, whether they leave Egypt or not, to allow that Khartoum must be held by the Power that holds Cairo. Meantime, we wish our gallant fellows "God speed, good luck, and safe home!" It is on the cards that before they have done with their expedition they will have to welcome many brother-officers and comrades to Egypt, for the sky looks very black; and it may turn out, indeed, some graver questions than even the increase of the Franchise or Redistribution will imperatively claim the attention of the Government, and demand the sacrifice of all party interests before the year closes upon us.

Colonel G. D. Barker, late Assistant Director of Military Education, has been selected to act as Assistant-Adjutant and Quartermaster-General, Western District, vice Colonel Butler, who has proceeded to Egypt.

We are glad to see in Tuesday's *Gazette* that Major H. F. Grant, 4th Hussars, at present serving in Egypt, has obtained a Brevet Lieutenant-Colonelcy for an act of daring and cool courage which has been seldom equalled. A few months ago he enlisted in Cyprus 200 Turks, and brought them over to Cairo to serve in the Egyptian Army. Some of them deserted, but the remainder were sent up the Nile. On arriving at Assiout, 32 of them mutinied and crossed the river. Colonel Grant went in pursuit, but on arriving at the bank found the boat there too small to carry his party over, so he crossed alone, and discovered the mutineers had taken refuge in the house of the shiek of the village. On approaching the house he saw a sentry guarding the door, who ran in and gave the alarm. Colonel Grant followed, and there the 32 men were, with fixed bayonets, confronting him. He ordered them to lay down their arms, but they refused, one man rushing forward to attack him; the Colonel shot him with his revolver in the temple. A second, who followed, received a bullet in the stomach; and a third a ball in the throat. It was only after thus disabling three men (one of whom was killed) that the others laid down their arms. The Colonel carried the arms out of the room, locked the door on his prisoners, and quietly waited outside till his party came over the river and secured them. Colonel Grant is a son of the distinguished old veteran, Field-Marshal Sir Patrick Grant, the present Governor of Chelsea Hospital, and a grandson of another distinguished soldier, the late Field-Marshal Lord Gough; he is, therefore, descended from a line of Field-Marshals, and we trust there are in store for him honours equal to those of his gallant ancestors.

Dr. G. Fleming, Principal Veterinary Surgeon, who lately had a severe illness, is making fairly good progress.

The large numbers of 150 Captains and 700 Lieutenants, it is estimated, are required to fill existing vacancies in the establishment of the Militia of the United Kingdom. It is to be hoped that the suggestions of those commanding officers who, from past experience, can show the cause for such a falling-off in the applications for Militia commissions, will be carefully considered. Evidently the assimilation of the Militia with the Territorial Regiment has not had the desired effect of keeping up the establishment of officers; and the same remarks equally apply to the Volunteer forces, the number of resignations of officers being very much on the increase.

Surgeon-Major O'Donnell has been appointed to take charge of the Army Hospital at Assouan.

The Frontier Force column of the Zhob Valley has been countermanded, the reason given (unofficially) being that it might get too close to the Mahsud Waziri country. The tribe received a good lesson as late as 1881, when a force was sent against them; but it is more than possible that the temptation of being able to act on the rear of the column might prove too much for them. The experience of former wars on the frontier points to the disastrous consequences of such an event; and General Kennedy is not to take his force against the Zhob Valley tribesmen, who will now be dealt with solely by the Quettah column. One result of this counter-order is that the talk of a camp of exercise at Hassan Abdul has already been revived. Sir Michael Biddulph, who commands at Pindee, and who is probably the "hottest" soldier in India, is said to have been much disappointed when it was counter-ordered, as all the plans were ready, and as he is now in Simla it is possible we may hear more of it shortly.

Major Hutton, restored by the healing waters of Spa to perfect health, left England this week for Egypt, to take command of his 300 Mounted Infantry.

Keen disappointment is felt by all ranks of the Artillery that their regiment is not to be represented in the Expedition up the Nile. No guns to be sent, and scarcely a single regimental officer is to be employed in any of those multifarious and special duties which are the outcome of the peculiar nature of the Expedition now being organised by Lord Wolseley. The wide and varied experience of Artillery officers with mule, elephant, and camel batteries in India, might be utilised with advantage in various ways, and particularly in connection with the Camel Corps which is now being sent to Egypt. Detachments of officers and men from the Cavalry, Infantry, Engineers, and from all the departments of the Army, are daily leaving the country for service in the East. The Artillery alone have been left out in the cold.

The railway from Suakim has been completed as far as the mainland (a distance of about a mile), but the guage is very narrow and the carriages are, as a consequence, so small that a load of one ton each would be the utmost that they could carry. Upon this toy show a sum amounting to nearly £500 a week is being spent, but at the rate the works are at present proceeding, the railway will not be finished this winter if it is to be carried as far as Berber.

The *Times* positively announced three weeks ago that Baker Pasha was appointed to be Chief of the Intelligence Department of the Expedition, and the news caused general satisfaction, and no surprise or annoyance. It was regarded as a natural and suitable appointment. A Sunday paper, a few days later, contradicted the statement on authority; but it was supposed that the contradiction referred merely to a specific post on the Staff. The announcement that Baker Pasha has resumed his post in command of the Constabulary (the papers and correspondents will vex the authorities by terming the force "Gendarmerie") is perplexing. It is known that Baker Pasha sent a powerful appeal to Lord Hartington for his restoration to the British Army, and that his case was under the consideration of the Government as a Cabinet question before he left England. The Duke of Cambridge, Lord Wolseley, and Lord Hartington were in favour of his restitution (on the Retired List) in the Army as an act of grace, and it is understood that the belief in the hostility of the highest personage as the cause of the rejection of efforts in that direction is not well founded. As to the number of officers who think the time of amnesty came when Baker Pasha took the field on the Staff of a British army, and was terribly wounded, if not before that, they are legion. It would seem, however, as if, as yet, the Cabinet were inexorable and pitiless, if not unjust. It would seem as if those who have so long opposed the restoration of Baker Pasha to the Army, no matter how heavy his punishment, no matter how great his sufferings and his services, have prevailed. It is quite plain his Gendarmerie cannot be made available even as a camp police or provost guard with a British force, and the Egyptians are not of it.

Lieutenant-General Maunsell, Royal (late Bengal) Engineers, has been admitted to Colonels' allowances.

We noticed amongst the many absurdities connected with the preparations—(for what?)—on the Nile, that the flotilla will be provided with a supply of fishing nets, hooks, and other fishing tackle, in order that the men may beguile the journey and vary their diet on the Nile. The men certainly cannot fish or net whilst on their way, but the great objection to Nile fishing is that the fish, when caught, are "beastly." They are nearly all siluroids—some poisonous, all nasty, some with spines sharp as lancets, others with horrid teeth and great wattles like the hideous catfish of the Mississippi. The Arabs eat some of them, but not with "gusto;" and though the kamr-el-bahr and the fesikh, &c., are just eatable, the best thing that the lucky angler can do is to treat his fish as Dr. Kitchener served his salad, especially if there be an electrical eel among them, which is not unlikely.

Brigadier-General Annesley arrived at Marseilles on September 20, and proceeded to Bombay to complete his term of duty as Adjutant-General.

The number of General officers on the strength of the Army of Occupation is now nearly as large as that engaged in the campaign of 1882. General Lord Wolseley, Lieutenant-General Stephenson, Major-Generals Lennox and Dormer (Cairo), Davis (Abbasseeyeh), Lyon-Fremantle (Suakim), Earle, Buller, Wood (Expedition), make a total of nine General officers as compared with twelve during the 1882 campaign, wherein there were twice as many soldiers of all arms, the present strength in Egypt being 13,000 odd. What General Stephenson, Major-General Lennox, Major-General Dormer, and Major-General Davis do at Cairo it would not be easy to say, but one thing we may be sure they will do if they be left there. The present arrangement of the Staff gives the possible plums to the new lot. Major-General Earle gets a shove-up to Wady Halfa, but has not much chance of the front, as Sir H. Stewart has passed over him southwards to take command at Dongola, and, may be, quarrel with the Mudir,—not that he is quarrelsome, but that the Mudir may resent the irruption of a stranger after all the fighting is over. Stewart has an excellent A.D.C. in Lord Airlie, and a capital commissariat officer in A.-C.-G. Nugent, C.B. The first duty of a soldier is to obey, but surely a more bitter pill, and one more utterly destitute of gilding, than that which Sir H. Stephenson has had to swallow has seldom been prepared by the War Office and Horse Guards' alchemists, who have got their hands quite into the work recently. In some maladies it is desirable to produce nausea. Capital practitioners in that line are to be found in Pall Mall.

The Earl of Dufferin, who is at present in London, will proceed on a short visit to his estates near Belfast presently, and will then return to England to complete the preparations for his voyage and departure to India, which is, we believe, fixed for the first week in November. Lord Lytton had even less time to prepare for his Vice-Regal.

What are we coming to? The British public went mad after Lord Cardigan for awhile when he returned from the Crimea, and nearly pulled every hair out of his horse's tail! Then they dropped him like a hot potato, and the horse was left in peace to encourage his tail to grow again. Now we read that the worthy manager of the P. and O. "introduced some privileged visitors on board the *Chusan* to *the Doctor's horse*, which was an object of interest through having been at Tel-el-Kebir and with the cavalry dash to Cairo"!

The 1st Battalion of the Royal Sussex Regiment is in Egypt, and the 2nd Battalion has been ordered to proceed thither from Malta; but yet the two battalions have only four Majors between them, one of the vacancies having been open for nearly a year. The other three vacancies are dated respectively, April 16, May 28, and August 6. The long delay which has taken place was probably caused originally by the arrangement by which captains who failed in the examination held last January were allowed to try again in July. But surely the results of the July examination must be known by this time, and still nothing is done, although the regiment is under orders to proceed up the Nile, and when the promotions do go on some five or six captains and about the same number of subalterns will receive a step.

The Navy.

ADMIRALTY, Sept. 23, 1884.

In accordance with the provisions of her Majesty's Order in Council of Aug. 11, Staff Com. D. Pender, on the Retired List, has been allowed to assume the rank and title of Retired Capt. (June 25).

ROYAL MARINE LIGHT INFANTRY.—Major F. R. Beechy is placed upon half-pay, in accordance with the provisions of her Majesty's Order in Council of Nov. 30, 1882, paragraph (*a*) (Sept. 22).

ADMIRALTY, Sept. 24, 1884.

ROYAL MARINE LIGHT INFANTRY.—The under-mentioned gentlemen to be Lieuts. :—Mr. Frank William Luard, Mr. Godfrey Estcourt Matthews, Mr. Francis William Archibald Hervey, Mr. John Frederick Whyte, Mr. Hugh John Craig Gibsone, Mr. Richard Lane Bayliff, Mr. Godfrey Lancaster Beaumont, and Mr. Robert Douglas Beith (all dated Sept. 1).

APPOINTMENTS.

Commanders—Alfred Carpenter, to the Euryalus, additional; Richard F. Hoskyns, to the Myrmidon.

Lieutenants—Francis A. Brooks, to the Monarch; Herbert A. Warren, to the Hector; Herbert M. Wyatt, to the Assistance; Charles H. Cross, to the Undine, in command; M. L. Bridger, W. T. Warren, S. H. M. Login, and Henry Preedy, to the President, additional, for study at the Royal Naval College; T. J. Oswell, to the Polyphemus, for navigating duties.

Navigating Lieutenants—William J. Bullmore, to the Serapis; Henry Backer, to the President, additional, for the Royal Naval College.

Midshipmen—Archibald W. Shaw-Stewart and Francis G. Powell, to the Duke of Wellington, additional.

Fleet Surgeon—William J. Eames, to the President, additional.

Staff Surgeon—Robert W. Biddulph, to the President, additional.

Chief Engineer—James Stiven, to the Indus, additional, for the Resistance.

Surgeon—Otway P. Browne, M.D., to the Asia.

Assistant-Paymaster—Francis C. Alton, to the Royal Adelaide.

Engineers—John H. Slade, to the President, additional, for the Royal Naval College; Ernest F. Ellis, to the Asia, for the Colossus; John H. Walton, to the Asia, for the Dreadnought.

Assistant-Engineers—Edwin W. Cudlip (a.), to the Neptune; James H. Watson, to the Asia, for the Dreadnought.

Clerk—Alfred Clarke, to the Agamemnon.

Gunners—William Hatson, to the Agamemnon, for torpedo duties; Frank Holsgrove, to the Temeraire; Albert Smith, to the Excellent.

Boatswains—Joseph Leech, to the Alexandra, additional; Michael Kennelly, to the Pembroke; George R. Vickery and Charles Duggan, to the Indus.

Carpenter—Samuel J. Wicks (a.), to the Pembroke, for the Kingfisher.

ACHILLES, Capt. Buller, having undergone repairs at Plymouth, was taken out of dock on Monday, and will remain in the basin to complete her refit. The Northumberland, Capt. Robinson, has been placed in the same dock, and when both ships are ready they will proceed to Portland to join the eastern division of the Channel Squadron, prior to proceeding on the winter cruise.

AGAMEMNON, Capt. S. Long, is expected to be out of the dockyard hands at Davenport in the course of next week. When the ship is ready to proceed to Portsmouth to be docked, her machinery will undergo the usual six hours' trial. A preliminary trial, however, will be undertaken outside Plymouth Breakwater, when officers from the Cambridge, gunnery ship, will attend, and the efficiency of the 6-in. guns on the Albani mountings will be tested.

AJAX, in the first division Steam Reserve at Chatham, awaiting orders from the Admiralty for being commissioned, is expected to be selected to take the place of the Dreadnought, as gunnery-ship at Portsmouth, on the latter vessel proceeding to the Mediterranean to relieve the turret-ship Inflexible, which is about returning home to be put out of commission. The Ajax is to be supplied with torpedo nettings, to protect her against attack by torpedoes. These nettings will be exactly similar to those fitted to the sister-ship Agamemnon, preparing at Devonport to be despatched to China to strengthen Vice-Admiral Sir W. Dowell's squadron.

ARAB, Com. R. W. Stopford, was at Aden on the 9th inst., and Ranger, Com. W. E. Darwell, was at Berbarsh on the same date.

ASSISTANCE, Capt. W. H. C. St. Clair, which was under orders to leave Portsmouth on Tuesday for Queenstown to bring over drafts, had her instructions countermanded in consequence of the alteration in the Egyptian military programme. The dockyard authorities, however, have received orders not to take any of her defects in hand, as her services may be required almost immediately.

BRITOMART, Lieut. and Com. William E. B. Atkinson, arrived at Plymouth on Monday from Queenstown, and went into harbour to have her defects made good.

CONDOR, Com. Domville, has left Alexandria for Zebel Zukar.

CROCODILE, Capt. Carr, sailed for Bombay on Saturday with relief drafts, amounting to about 400 officers and men, calling at Queenstown to fill up with troops.

CYGNET, Lieut.-Com. A. M. Gardiner, at Port Said, will, on arrival of the Falcon, Com. J. E. Pringle, proceed to Suakim to relieve the Albacore, which ship, on relief, will join the flag at Alexandria.

DRYAD, Com. Edward G. Hulton, has arrived at Malta from Port Said.

EURYALUS, Capt. A. P. Hastings, C.B., arrived at Aden on Wednesday last. Vice-Admiral Sir William N. W. Hewitt, K.C.B., V.C., Commander-in-Chief of the East Indies station, was on board.

GANNET is being refitted at Sheerness, great activity being displayed to bring this unarmoured, composite sloop forward for another term of foreign service. To afford increased accommodation for officers and men, she is being fitted with a poop, which will be protected with Bessemer steel, and surmounted with machine-guns and a new long-range breech-loading gun. The Gannet is a sloop of the "bird" class, and has only served one commission on the Pacific station. She is now in No. 4 dock at Sheerness Yard, and before she is again commissioned it is expected that some alterations will be made in her armament. It is anticipated that the Gannet will proceed to the Pacific station to relieve H.M.S. Sappho.

HIMALAYA, Capt. H. St. L. B. Palliser, arrived at Suez on Wednesday last.

LILY, Com. Gibson, was commissioned at Devonport on Thursday with a complement of 100 officers and men for the North America and West Indies station.

MALABAR, Capt. Harris, arrived at Malta on Sunday from Portsmouth. She sailed on Monday for Bombay, having on board 1,100 officers and men, the drafts of various regiments.

NELSON, Comdre. James E. Erskine, A.D.C., will be re-commissioned as flagship of Rear-Admiral George Tryon, C.B., Commander-in-Chief of the Australian station. The new crews of the Nelson and the Diamond will be composed of men with at least five years' service, this arrangement having been determined upon by the Admiralty in consequence of the numerous desertions of young seamen on the Australian station.

ORONTES, Capt. Andoe, embarked at Portsmouth on Tuesday the 1st Batn. of the North Staffordshire Regt. (late 64th Foot), which arrived from Manchester for conveyance to Barbadoes to relieve the Royal Scots Regt., which will be conveyed to Alexandria in this troopship. The strength of the battalion of the North Staffordshire Regt. consisted of Lieut.-Col. Watt, 17 officers, two warrant officers, 39 non-commissioned officers, 567 men, 45 women, and 72 children. She also takes out 14 men belonging to the Royal Artillery from Dover to Jamaica, and Capt. Birlow and 12 men, R.A., from the same place to Barbadoes; Lieut. Bunon, 1st Shropshire Regt.; Lieut. Apthorp, 1st West India Regt.; and Surg.-Major Kingston, Surg. Hayes, and three men of the Army Hospital Corps, for duty on the voyage. Owing to delay in the arrival of the baggage and the advance party, which ought to have reached Portsmouth on Sunday night, the Orontes did not sail until Wednesday morning.

OSBORNE, Com. W. H. Fawkes, left Portsmouth yesterday morning to embark the children of the Crown Prince and Princess of Germany, who are about to return to Germany.

POLYPHEMUS, Com. E. J. Jeffreys, arrived at Spithead on Thursday.

RAMBLER is being refitted with all possible despatch at Sheerness. Upon survey, it has been found that the defects of the vessel are not of an extensive character, and it is anticipated that she will be quite ready for commission before the close of the present financial year. The Rambler is nearly a new ship, having been built at Govan, Glasgow, by Messrs. Elder and Son in 1880. She has had one commission of three years' duration on the South-East Coast of Africa station. The vessel is intended to be employed on surveying duty, instead of the Fawn, an old wooden sloop, which has been condemned as unfit for further service. It is expected that when completed she will receive orders to proceed to the China station.

SLANEY has been placed in the first division of the Medway Steam Reserve, in readiness for active service.

TAMAR is almost ready for sea, the vessel having been thoroughly overhauled and fitted with new engines and machinery at Davenport Dockyard. When turned over from the Dockyard authorities she will be one of the most efficient troopships in the service. The crews of the Nelson and Diamond are to be selected by the end of October, in readiness to leave England for the Australian station early in November, when they will embark on board the Tamar, the new crews taking her to Australia, and the present crews of the Nelson and Diamond navigating her back.

TOURMALINE, Capt. Boyle, will, on her arrival at the Nore from the East Indies, be put out of commission and paid off at Sheerness, after which she will be placed in the Chatham Steam Reserve. The Tourmaline has been in commission since Sept. 25, 1880.

WARSPITE, now in the steam basin of Chatham Dockyard, is ordered to be brought forward for commission as soon as the work in progress at the establishment will permit of her being taken in hand.

WATCHFUL, Lieut. and Com. J. E. C. Goodrich, arrived at Madeira on the 17th inst., after a rapid passage of eight days from Plymouth. The Watchful is a new type of gun-vessel, three of which have already been constructed for the Admiralty by Messrs. Laird, of Birkenhead. She is armed with two 5-in. and two 4-in. breech-loading guns and two Gardner machine-guns, fitted either for use on board or in the boats. She has a complement of 62 officers and men. The Watchful achieved on her measured-mile trial, after being commissioned, a speed of 11 knots, and on the passage from Plymouth to Madeira proved herself a good sea-boat, a fast sailer, and a swift and economical steamer. Having coaled at Madeira, she left again on the afternoon of the 19th inst. for St. Vincent, Sierra Leone, and Cape Coast Castle. On her arrival at the latter place, the Stork will be despatched to the West Indies to relieve the Mallard, which vessel will then return to England to be put out of commission.

The scheme for the employment of female trained nurses in the Royal Naval Hospital, which has been under the consideration of the Admiralty for about two years, is to come into operation, experimentally, at Haslar Hospital on the 1st of next month. Nine trained nurses will enter upon their duties, and it is anticipated that the scheme will supply a requirement long felt.

"HEALTH EXHIBITION."—"Visitors should not fail to view the fine exhibit of Messrs. Rose and Co., London, of their Lime Juice Cordial, and other Lime Juice beverages, at Stand No. 116, in main transept. The exhibit includes a fine display of the Jamaica Lime Fruit from which these delicious non-alcoholic beverages are made. Their Lime Juice Cordial supplies a most refreshing summer drink in water, effervescing in all aerated waters. No beverage has received higher recommendation from the medical profession as eminently wholesome."—See *Lancet*. No table should be without it. The Wholesale Stores are 11 Curtain Road, Finsbury.

NAVAL NOTES.

Capt. Field, R.N., has been selected as the Conservative candidate for Colchester, in succession to the late Mr. Percy Mitford.

The compulsory closing of the ancient ferry across Chatham harbour, from Gillingham and Chatham to Upnor—under the provisions of the Act for the extension of Chatham Dockyard—having deprived a number of men of their livelihood, their cases have been brought under the consideration of the Admiralty with the view to compensation being awarded them. After carefully considering the cases of the ferrymen, and the loss they had sustained, the Admiralty have awarded the whole of those who were successful in establishing their claims to compensation a gratuity of £10 each.

The following official intelligence has been received from the Admiralty, relative to the China Squadron. The Commander-in-Chief, Vice-Admiral Sir W. M. Dowell, K.C.B., was to leave for Hong Kong on the 9th inst. The Fleet were thus distributed, according to the official advices :—The Audacious was at Amoy, there to remain for the present. The Sapphire and Champion were at Pagoda Anchorage, River Min, on Aug. 18, the former bearing the flag of the Commander-in-Chief. The Merlin was at Foochow on Aug. 18, and was to remain. The Daring was at Canton on Aug. 13, and was ordered to proceed to Hong Kong when relieved by the Swift, and thence to Ningpo. The Fly left Ningpo on Aug. 15 for Takao, Formosa. The Swift was at Hong Kong on Aug. 15, and would probably leave Hong Kong for Canton on Aug. 19 to relieve the Daring. The Vigilant left Hong Kong on Aug. 16 to join the flag. The Zephyr was in the Gulf of Tonquin, Pakhoi, and on being relieved by the Foxhound would proceed to Hong Kong. The Cockchafer was at Tamsin, Formosa, on Aug. 11, and was to remain for the present. The Tweed was at Hong Kong on Aug. 16, and left for Swatow; she was commissioned temporarily as tender to the Victor Emanuel. The Cleopatra was at Shanghai on Aug. 16, and would remain. The Albatross was in the Yangtse River; was at Chinkiang on Aug. 7. The Curaçoa was at Chefoo on Aug. 2; and was to remain as senior officer's ship in the Gulf of Pechili. The Midge was at Chefoo on Aug. 2; was to proceed to Ningpo, thence to Foochow when relieved by the Daring. The Espoir was at Tientsin on Aug. 5, and would remain. The Pegasus was at Penang on July 31, and was to leave for Acheen in pursuance of Admiralty orders. The Linnet was at Singapore; and left Hong Kong on Aug. 2 for Singapore, to keep up communication between Acheen and Penang. The Foxhound was at Singapore on July 22, and was to proceed to the Gulf of Tonquin and relieve the Zephyr. The Flying Fish was at Corea, surveying the coast and off-lying islands; proposes to call at Nagasaki for coal in September.

Preparations are being made in Sheerness Dockyard for the construction of H.M.S. Swallow, which will be commenced shortly on the building slip. The Swallow will be built on the same lines as the Mariner, one of the new class of gun-vessels, and will carry an armament of eight 5-inch breech-loading guns mounted on the Vavasseur system. She will be fitted with machinery of 950 horse-power, and will have a displacement of 1,040 tons. She will also be provided with electric machinery for discharging torpedoes.

A new war-vessel is being built at Dumbarton for the Greek Government.

Inquiries have been made of the Portsmouth Dockyard authorities as to whether the defects of the Shah can be undertaken at Devonport Dockyard. It appears that this inquiry has been made in consequence of the whole force at Portsmouth Dockyard being engaged on the construction of new vessels, and consequently only a few artisans are available for carrying out repairs, and making good defects of ships that are required for active service afloat.

Orders have been received at the Royal Marine Barracks, Stonehouse, Plymouth, to hold the following detachments of Marines in readiness to embark in the following ships on Oct. 1 :—Britannia—1 colour-serjeant, 1 serjeant, 22 privates; Royal Adelaide—1 lieutenant, 1 serjeant, 2 corporals, 1 bugler, 22 privates; Indus—1 lieutenant, 3 serjeants, 2 corporals, 1 bugler, 69 privates; Cambridge—1 corporal, 1 bugler, 6 privates; Impregnable—1 bugler, 10 privates; Lion—6 privates; Ganges—1 colour-serjeant, 1 corporal, 9 privates; Revenge—1 serjeant, 8 privates; Valiant—1 serjeant, 3 privates; Shannon—4 privates.

A court-martial was held on Wednesday, at Portsmouth, under the presidency of Capt. Stewart, of the Hector, for the trial of Lieut. C. F. M. Somerset, belonging to the Duke of Wellington, and lent for service to the Orontes, for drinking to excess between August 13 and 18, whereby he was incapacitated from the performance of his duties as officer of the watch. Capt. Andoe, of the Orontes, said in the forenoon of August 18 he observed on inspecting the wine book that the prisoner had been taking an excessive quantity of spirits, and he therefore called upon that officer for an explanation. He found him in a nervous condition and not fit to take charge of the ship as officer of the afternoon watch. Staff Surg. Grant, of the Orontes, said that with his concurrence Capt. Andoe cut off all alcoholic supplies to the prisoner with the exception of two bottles of ale and one glass of port daily. Mr. Child, the steward of the ship, put in evidence the wine-book of the general mess, which showed that the prisoner had charged to him a large quantity of alcoholic liquors. The log of the Duke of Wellington showed that the prisoner had been previously admonished in respect to excessive drinking. The court convicted the prisoner, and sentenced him to forfeit one year's seniority, and be dismissed the Duke of Wellington.

The Falcon arrived on Sept. 13 at Alexandria, being replaced as despatch-boat at Constantinople by Coquette.

We note that the Ocean Steam Yachting Company, Limited, propose sending the Ceylon on a cruise to the Mediterranean as far as Alexandria. This will afford peaceful but enquiring travellers an opportunity of witnessing the great activity and precision which precede and accompany preparations for war without themselves experiencing unnecessary discomfort, as they will have their good ship to return to as a home at any moment.

THE REORGANISATION OF THE MILITIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I should like to supplement my last letter on the above subject, for which you were good enough to find space in your number of August 23, with a few remarks on the important subject of expenses incurred during trainings. I consider that this subject more nearly concerns subaltern officers than senior officers of Militia battalions, so propose to consider the question chiefly in reference to subalterns. In my former letter I said that, as a rule, these officers only make use of the Militia for the purpose of passing through it by the prescribed course into the Line; but all the same, whilst serving with their Militia battalions, they have to share the expenses of trainings almost equally with their senior officers. Again, the question of expense during trainings does not so much affect senior officers of Militia as subalterns, for the reason that they are invariably men of means, and are generally actuated by the desire "to do things well" during the training, which, after all, only lasts 28 days! Now, to go practically into the matter, let me take the case of a subaltern who joins a Militia battalion with the intention of passing into the Line. If his regiment be under canvas, his total pay will amount to 11s. 9d. per diem. His messing, exclusive of beer or wine, will cost about 6s. a day, so at first sight it might appear that he would clear 5s. 3d. a day, or a total of £7 7s. towards defrayment of extras for 28 days' training. To go minutely into all items that come under the heading of "extras" would be unnecessary, but I may briefly state that entertainments are one of these, and it is my experience they are the chief cause of the heavy expenses of trainings. At the first mess-meeting after assembly, which generally takes place on the first or second day of training, the question of entertainments is invariably discussed, and, in most cases, the one fixed upon is a ball. Indeed, so much is this the case that when a regiment is about to assemble for training, the residents in that place immediately begin to speculate as to what date will be settled for the ball. Moreover, a ball is somehow considered as a portion of the training in many, if not most, Militia regiments, and I may instance the following fact as proof of this. I was present at a mess-meeting such as I have just spoken about, when this was the procedure in connection with the subject:—C. O. (who, of course, presided).—"Well now, what about our ball; I suppose we shall give one, as usual? Who'll propose a ball?"—"I will," said Captain V.—"I second it," said Captain S. C. O.—"Anyone say no? Well then, gentlemen, it has been carried *nem. con.* that a ball be given. Now, then, for the committee, &c." This ball duly took place; we were in rather an out-of-the-way neighbourhood, it was managed in the usual style, and my share, the cost being divided equally among all officers, was £9 10s. By foregoing remarks it might be inferred that I am opposed to balls and all such entertainments. This is far from being the case; on the contrary, I think every Militia regiment should return, and return well, any hospitality it receives during the training; but I beg to protest against a ball or any expensive entertainment being considered an absolute right by the inhabitants of any town or place of training, and that if such right were withheld, they (the inhabitants) would feel themselves grievously wronged. In my opinion a regiment should not seek to acquire the goodwill and popularity of its place of training by an annual tribute to that place of a lavishly-managed ball or other entertainment. I have now tried to show that extras are the expensive items during trainings, and also that the chief of these extras, as a rule, may be defined by the ball. Clearly, then, it is over extras that a subaltern may sigh when the day of reckoning at conclusion of training arrives. In a future letter, Sir, if I may, I should like to deal with certain matters in connection with Militia messes. But, meantime, may I offer the suggestion that, when the much-needed subject of Militia reorganisation receives attention from the authorities, it be distinctly laid down that all entertainments given during trainings be carried out in strict accordance with the Queen's Regulations for the Army, as contained in Section 7, par. 65 to 69? Again apologising, Sir, for the length of my letter, I am, &c.,

P. J.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—As a Militia officer of over twenty years' service, I beg, for one, to thank you for bringing to the notice of the authorities and the public the deplorable condition into which the Militia is now drifting, chiefly for want of officers. Now, Sir, during my long service, I have witnessed our branch of the service under many different phases, but the present appears one of the darkest; for a force to be short, lamentably short, of officers cannot but be regarded as a weak force, and a Militia regiment is, perhaps, of all other branches of the service most in need of being well officered, considering the great amount of efficiency which is looked for, and which has more or less to be attained in a few days' training, if we deduct the time taken up in "giving out" and "taking in" arms, &c., ball-firing (the *bête noire* of a Militia training), broken weather, swearing-in reserve men, boards, &c. Again, a weakly-officered regiment must, *per se*, be an expensive regiment. Certain and various subscriptions must be paid, if five or five-and-twenty officers remain, which is simply unfair, particularly on those whose means are limited. Why, I ask, should a few officers really pay out of their own pockets to uphold and support what the nation ought to provide? Lord Hartington was asked the question in the House last spring if he was prepared to allow officers, in regiments which were weak, some compensation for the extra expense they are put to. His answer was, "No." By this time probably the noble lord will have discovered that application was not made without some grounds. Government ought to allow a sum of not less than £25 for each regiment towards the band alone. When regiments have their head-quarters at some little rural, out-of-the-way country-town, bandsmen are not to be obtained, because there is no source—or very small—of income to be derived out of the training period. They prefer large towns, where, out of the period they are on full pay, they can and do earn money by playing at balls, shows, parks, &c. As it is, £50 for a month's hire of bandsmen for a Militia regiment is not an unheard-of circumstance. Ought this to be? I wonder if the War-Office authorities know what are the expenses attending a Militia training? With your permission, I will give you what may be considered a not over-estimated list:—Hire of band for the training, £50; hire of mess waiters, &c., £40; stationery, newspapers, &c., £6; hire of furniture for mess and ante-room, £10; hire of table-linen, washing, glass, and knives, £15; gas, or candles, £4; coals, £2; various tradesmen's bills, £5; total, £133. Mess and wine account, say, £20 for each officer; if the proverbial ball is given, £100. The inspection lunch and other entertainments, say, £25. If the bandmaster has £50 salary, that sum, like the rest, comes in for division. Then there are extra travelling expenses, should an officer reside out of the county, and hotel expenses. I may have omitted some items of expense, as they are so numerous and various, that place and circumstance alone can define; for example, if a regiment is in camp, there will be the hire or purchase of a cooking-stove, and perhaps a mess hut, items which add largely to the expenses. But why should the Militia be so short of officers now? Is it not in a great measure, if not entirely, because the War-Office authorities have taken into their heads to alter the "nomination" plan which was found to answer so well in filling the ranks of the Militia? Why not revert to it again, it is said "never to be too late to mend"? No officer ought to be allowed to remain in the Militia if his private position is such as to render impossible his going for any length of time and to any place with his regiment, if required. Are there not some now serving who belong to this class? What good are they, really? They certainly now fill up a gap, but they are not the class who ought to be allowed to remain, as when the chief time arrived when their services would be most required, where will they be? Simply *non est!* Colonels of Militia are not now what they once were; now, they spend little or no money over their regiments—not that I would for a moment advocate any system which would in any way pauperise officers, but there are occasions when a colonel might step in and say,—Now I will pay so and so,—and thus keep the wheels oiled and reduce the present friction, and not try and get as much as possible out of the thing and be at as little expense as possible. We find Volunteer colonels spending large sums over their regiments. If it is an honour to command the regiment of your county, let it be paid for. An impecunious colonel of Militia is not a desirable man to have to manage a regiment. If the War-Office authorities would assemble a board of officers who would be likely to grasp the Militia question, and take such evidence as might be considered of use, something might result to the good. The sooner the present system of drilling Militia recruits at the depôt is abandoned, the better. They are imperfectly instructed—by order—and are, no doubt, considered a nuisance. If a Militiaman has an incomplete kit and his arms and himself are dirty, the probabilities are he is for the depôt. It has been said that the evil under which the Militia suffers lies deep; it is pretty certain that if a few of the big errors which now lie on the surface were removed, and which are, perhaps, easy to alter, a different state of things might result. The present 4s. allowance might with advantage be supplemented by an additional 4s. per day—in the case of subalterns only. The ball-firing ought not to interfere with the training proper, as it does so much at present, but keep up the battalion which has to fire for ten days after the other battalion has been dismissed. It would be found that the men would have become more accustomed to handle their rifle, would be better "set-up," and better practice would be the result.—I am, &c.,

A Militia Officer.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Your article in a recent edition of the *Army and Navy Gazette* touching the condition of the Militia must strike every one acquainted with that branch of the service as a faithful description of its present state. I have had over 20 years' experience of the force, and can affirm that not only is it now, but that it has been from the time it was revived in 1852, exactly as you describe it; and it will probably continue the same to the end of the chapter, unless some great national danger or disaster forces the consideration of our military position on our rulers, or until the country comes to understand that, however wide the distinction may be between the Regular Army and the Militia in its present form, the latter is of necessity the force it must look to for protection against invasion. To hold that invasion is a contingency too remote to be seriously considered is to emulate the ostrich when he buries his head in the sand to avoid the unpleasant necessity of looking danger in the face. If we look the present position in the face we shall have no difficulty in discovering that we are hated and distrusted by every nation in Europe; that, owing to our recent foreign policy, England is discredited all over the world; that foreign armies, as regards numbers and organisation, are in the highest state of efficiency; that the navies of the Great Powers have become so powerful of late that, should a coalition be formed against us, a well-directed combination of their fleets would bring a successful invasion of our shores within measureable distance; and that, if we turn our attention more closely to what is taking place on the Continent, we shall see that our relations with Germany are strained, and that she is at this very moment bidding for an alliance with France, possibly with an eye to a rupture with this country, and to a combination against our naval superiority. In the event of France and Germany combining against us, the invasion of England would become quite possible; and if a landing were effected, what, let me ask, have we to oppose the 100,000 or 150,000 picked men who would form the expeditionary force? Probably not more than 50,000 Regular troops of the best quality. What then? The Militia? But will any soldier in England, with the least experience of war, advise the employment of the Militia in its present state against Continental armies? If such a one can be found, I would remind him of the fate of Arabi Pasha, of Hicks and Baker, and of Osman Digna; without going so far back as the Franco-Prussian war, when Paris, with a garrison of some 50,000 Regulars, and five or six times that number of Gardes Mobiles, surrendered to a German Regular Army of about 200,000 men. And so it would happen with London, unless we were prepared to meet the enemy with a well-appointed force of 150,000 or 200,000 men. Such a force, I maintain, can only be found in the Militia of the country, unless we adopt the conscription. But before the Militia become reliable as soldiers, or of any value, our military system will have to be entirely recast. At present, the Militia is a sham, maintained and periodically tinkered to delude the nation, and to supply recruits to the Army. Names are altered, uniforms changed, gold substituted for silver lace, but only with this object in view; and as long as it answers, the same neglect, the same cold-shouldering, the same indifference, will continue. Professional prejudice on the part of the military, ignorance of the Army Estimates on that of the civilian authorities responsible for our military forces, will prevent the auxiliary element from becoming a reality and what it ought to be,—the national army for the protection of the country. As long as the country chooses to put up with things as they are, no Government will incur the odium of raising the Army Estimates to provide anything better. It is to be hoped, however, that England will wake up, and become alive to the state of false security she is in before it is too late. Then, and not till then, will she compel the Government to organise her Military strength in a manner to give confidence to the nation, and produce an Army which, if called upon to repel an invasion, would enter upon its duties with every chance of success in its favour. But it is very difficult to move and hard to convince John Bull; nevertheless, the Military Press are performing a great service in endeavouring to open his eyes by exposing the weak points and showing up the rotten condition of the forces the country depends upon to protect it from invasion, should an enemy ever succeed in eluding or defeating our fleets.—I am, &c.,

Monitor.

Gen. Hardinge, Commander-in-Chief of Bombay, met with a serious accident while out hunting. His horse fell and rolled over him, breaking a rib of the rider. No grave consequences, however, are expected.

BIRTHS.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S
WORLD-FAMED
BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig **Company's** Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

The Finest Meat-Flavouring Ingredient.

Invaluable and efficient Tonic for Invalids.

Ask for the Liebig **COMPANY'S Extract**, and see that no other is substituted for it.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

FALKNER'S "REAL MALT" WHISKEY

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

HOLLOWAY'S OINTMENT and PILLS are the best, the cheapest, and the most popular of remedies. The seasons change and circumstances vary, but these remedies can always be used with certainty and with safety. Eruptions, rashes, and all descriptions of skin diseases, sores, ulcerations, and burns are presently benefitted and ultimately cured by these healing, soothing, and purifying medicaments. The Ointment rubbed upon the abdomen checks irritation in the bowels, averting and curing diarrhœa and other disorders of the intestines frequently prevailing through the summer and fruit seasons. Heat lumps, blotches, pimples, inflammation of the skin, muscular pains, neuralgic affections, and enlarged glands can be effectively overcome by using Holloway's remedies according to the instructions accompanying every packet.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill:—

Captain Fleming, R.A.,
Major Creagh, R.A.,
Captain Hippisley, 2nd Dragoons, and
Major Churchill, Northumberland Regiment,

were successful.

Captain Grieve, R.A., qualified.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITIA COMPETITIVE EXAMINATIONS, 1885. MAJOR COWPER has vacancies for two or three pupils desiring a small class and expeditious preparation.

Individual attention from each instructor.

From 1881-1884 (seven examinations) 22 pupils have competed, and 15 passed, viz., 1st, 8th, 10th, 21st, 28th, 29th, 30th (twice), 33rd, 34th, 37th, 58th, and 64th. Preparation for the Further and Preliminary. Terms moderate.

Testimonials and References on application to MAJOR COWPER, 10 Clifton Villas, Maida Hill, W.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London.

By Order,
G. W. FORSTER, Secretary.

LEAVE SEASON.

35.	Capt. E. R. Evans, 1st Batn. Royal Welsh Fusiliers	2008

and four others qualified.

NEXT COURSE for STAFF COLLEGE and PROMOTION commences OCTOBER 15.

Militia and other Courses now going on.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.
His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey.

ARMY EXAMINATIONS.—PREPARATION in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of TEN successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIX SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS.—Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

CANDIDATES for the ARMY.—TUITION by CORRESPONDENCE in GEOMETRICAL DRAWING, by a successful Teacher and Author.—"A. B.," Stanton House, 1 Belleville Road, Wandsworth Common, London.

INDIAN MEDICAL SERVICE.

INDIA OFFICE, September 20, 1884.

An EXAMINATION for FIVE APPOINTMENTS as SURGEON in her Majesty's Indian Medical Service will be held in LONDON in February, 1885.

Copies of Regulations for the Examination, with information regarding the pay and retiring allowances, &c., of Indian Medical Officers, may be obtained from the Military Secretary, India Office, London, S.W.

The exact date of the Examination will be announced hereafter.

EDMUND NEEL,
Assistant Military Secretary.

ARMY.—LINE and MILITIA.

IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

ARMY and NAVY SCHOOL

BROMLEY, KENT.

Young BOYS PREPARED from the first on the SPECIAL LINES required for these SEVERE EXAMINATIONS.

Head Master—JOHN GIBSON, M.A., assisted by three resident Graduates, and a resident French and Drawing Master.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

BRIGHTON.—TUITION for SANDHURST.—A Private TUTOR who takes only five Resident Pupils, has ONE VACANCY. Terms, £150 per annum; no extras. Can enter at any time.—83 Montpellier Road, Brighton.

LIEUTENANT-COLONEL T. J. R. MALLOCK, late Royal Fusiliers, and Garrison Instructor of the Southern District for the last six years, RECEIVES a Limited Number of MILITIA SUBALTERNS as Resident Pupils, to PREPARE them for their MILITARY COMPETITIVE EXAMINATION.

Terms, &c., on application. The NEXT COURSE will commence on OCTOBER 1.

Address—Pinewood, Bagshot, Surrey.

SOUTH COAST.—PREPARATORY SCHOOL.—Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second.—PUNDIT, 21 Beechholme Road, Clapton, London.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

THE MANOR HOUSE, LEE, S.E.

A CLASS for OFFICERS going up for the PROMOTION EXAMINATION in January next will be BEGUN at the MANOR HOUSE, LEE, S.E., on October 21, under the direction of Lieutenant-Colonel NEEDHAM, P.S.C., late Professor of Fortification, Tactics, &c., and formerly Garrison Instructor.

The MILITARY COMPETITIVE CLASS for MILITIA OFFICERS begins on October 14.

THE MANOR HOUSE, LEE, S.E.—SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following SIXTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

THE MANOR HOUSE, LEE.

The NEXT TERM for MILITIA OFFICERS reading for the MILITARY COMPETITIVE, and for OFFICERS desirous of passing for Promotion in January next, COMMENCES OCTOBER 14, 1884.

MAJOR DE THOREN'S COURSE of INSTRUCTION for MILITIA OFFICERS READING for the MILITARY COMPETITIVE EXAMINATION in March next, and the COURSE for OFFICERS STUDYING for their PROMOTION EXAMINATION will COMMENCE on THURSDAY, October 16.

Major de Thoren receives but a limited number of Militia Officers, each of whom obtains great individual attention. He particularly desires gentlemen will join his class, if possible, *at the time of its formation*, in order that they may go steadily through the five months' course, by which time they ought to be thoroughly well prepared in the various subjects.

For particulars, apply to Major DE THOREN, Bellefield, St. Helier's, Jersey.

ANNUAL SALE OVER HALF A MILLION.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in

NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC for CHOLERA, DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:

Dear Sir,—We congratulate you upon the wide-spread reputation this justly esteemed medicine has earned for itself all over the East. As a remedy of general utility, we much question whether a better is imported, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike.—We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, his Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.

The immense sale of this remedy has given rise to many unscrupulous imitations. Of all Chemists, 1s 1½d, 2s 9d, and 4s 6d.

WRECK OF THE "WASP."

On Tuesday afternoon we received the following communication from the Admiralty:—"The Secretary of the Admiralty presents his compliments to the Editor of the *Army and Navy Gazette*, and regrets to inform him that a telegram has been received this afternoon at the Admiralty reporting the total loss of her Majesty's gunboat Wasp, at Tory Island, North-west coast of Ireland, on the 22nd. Only six men saved out of a total complement of 58. The lieutenant commanding and other officers are not among the survivors. Her Majesty's ship Valiant, from Rathmullen, has been sent to Tory Island to render assistance, and to obtain particulars.—Admiralty, Sept. 23, 1884." Almost simultaneously Lloyd's Agent at Innisboffin telegraphed:—"Her Majesty's gunboat Wasp wrecked, Tory Island, only six men saved, on Monday morning, 3 o'clock; not practical to proceed from mainland in open boat."

About three months ago the Wasp was set apart for special service on the north-west coast of Ireland, to proceed with several Commissioners of the Harbour and Fishery Board round the different harbours and rivers where statistics and other information were being collected relative to the fisheries and navigation. The Wasp was a composite gunboat of 470 horse-power, carrying four guns, and of 465 tons burden. She was commissioned at Devonport on Dec. 1, 1881, and was engaged on particular service on the North-west coast of Ireland. Lieut. and Com. Nicholls is represented on all hands as having been a highly qualified officer, and a great favourite with his men. The Irish Fishery Commissioners, who knew him intimately, speak specially of his watchfulness in cases of difficulty. He was always in the habit of remaining on the bridge until assured that all danger was past. His mother resides at Shaftesbury Road, Southsea, and his brother is Adjutant of the Royal Marine Artillery at Eastney Barracks, Portsmouth. Com. Nicholls, who had been in command of the gunboat since Jan. 1, 1883, was well acquainted with the North Coast of Ireland. The first intimation which his brother, Capt. Nicholls, received of the disaster was while he was at dinner with his brother officers at the Royal Marine Artillery mess, at Eastney, on Tuesday evening, a message having been despatched to him from the office of Admiral Sir G. T. Phipps Hornby, Commander-in-Chief. His brother officers expressed their sincere condolence, and the mess was at once broken up. Capt. Nicholls has sent a telegram to Ireland, directing that in the event of the body of his brother being recovered, it should be sent to England for interment. A letter was received on Monday from the late commander of the Wasp. He merely explained that he was going to Moville, and made no mention of the vessel experiencing either rough or foggy weather. Navigating Lieut. G. H. King was appointed to the Wasp only about a month ago, succeeding Navigating Lieut. A. Warden. Lieut. King had previously served on board the Merlin, gunboat, in China, and arrived at Plymouth about three months since. His friends reside at Gazely, Newport, Suffolk. Lieut. King entered the navy in 1869, and was promoted to lieut. Aug. 10, 1881. Sub-Lieut. Thomas S. Guppy was a son of Dr. Guppy, of Falmouth, and was 22 years of age. He was educated at the Falmouth Grammar School, and went thence to the New Cross College, where he obtained his nomination by examination. He was educated as midshipman on board the Britannia training-ship for cadets at Dartmouth, from which vessel he went to the Volage, while it was stationed on the South Coast of Africa. After serving on board one or two other ships he joined the Cleopatra as senior midshipman, and accompanied the Princess of Wales and family on their cruise in that vessel. On his return home, he went to Greenwich Naval College, and was appointed sub-lieut. of the Wasp on Sept. 13, 1883. Lieut. Guppy was brother to Dr. Guppy, at present serving abroad in the Lark, which is on survey duty. Another brother, a surgeon in the army, on Lord Blantyre's Ambulance Corps during the Russo-Turkish war, died while with the Turkish army at Erzeroum in 1877.

The north coast of Donegal is of a wild and rugged character, studded with numerous little islands, of which Tory Island is the most important. Bold headlands and precipitous cliffs render the coast very dangerous for navigators in stormy weather. Tory Island is about two and a half miles long and one mile broad, and has a lighthouse on the north-west end. The north side presents a range of cliffs from 100 ft. to 300 ft. high. Towards the south the land slopes down and the shore is flat. The lighthouse stands 122 feet above the sea level. There are about 70 families on the island, depending chiefly upon fishing. Innisboffin is an island about one mile from the mainland, and has a coast-guard station. The islet is about a mile in circumference. When the news of the wreck reached the Admiralty, Admiral Sir Cooper Key, who is fulfilling Lord Northbrook's duties *ad interim*, was in the office, and instantly telegraphed to the nearest available responsible officer to proceed to the spot and report upon the disaster. Meanwhile, a further telegram was received from one of the crew confirming the earlier news, but giving no additional facts. It is evident from the number of lives lost that the vessel must have sunk very rapidly, as she was well supplied with boats and lifebuoys, which were always kept ready for immediate use. The Wasp belonged to the Queenstown division of the British Squadron on the Irish coast.

A report that eight Commissioners were on board at the time of the disaster caused a painful apprehension that the Fishery, Piers, and Harbour Commissioners had been lost. We are happy to announce that they were not on board at the time of the fatal occurrence. On Wednesday the following communication was received from the Secretary of the Admiralty:—"The Secretary of the Admiralty presents his compliments to the Editor of the *Army and Navy Gazette*, and begs to inform him that her Majesty's ship Valiant left Duncrana at 11.40 this morning for Tory Island. Very heavy squalls, with rain, reported. Admiral at Queenstown reports that he is informed men saved are in the lighthouse on Tory Island. Surg. O. P. Browne and Engineer William Hudson were on leave, and James Eva, able seaman, was in sick quarters at Westport. The names of the other officers belonging to the ship who were on board at the time the wreck took place are:—Lieut. and Com. John D. Nicholls; Lieut. George H. King (for navigating duties); Sub-Lieut. Thomas S. Guppy; Gunner John W. Kerrigan. Admiralty, Sept. 24."

On Wednesday afternoon Lord Leitrim sent his steamer, the Norseman, to Tory Island, but the men saved from the Wasp refused to leave the island until officially ordered. The men seemed to be suffering from wounds received in landing. The master of the Norseman landed his mate at noon. At a meeting of the Piers and Harbours Commissioners, held at Dublin Castle, Col. Nolan, M.P., in the chair, a resolution was passed expressing the deep regret of the Commissioners at the death of Com. Nicholls and the officers and crew of the Wasp, and bearing testimony to the care, skill, and efficiency with which the vessel was navigated by Com. Nicholls during the recent inspection of the Commissioners on the West Coast of Ireland.

The following telegram was received at the Admiralty on Thursday, from Com. Marrack, of H.M.S. Valiant, at Rathmullen:—"I succeeded in embarking the six survivors of the Wasp yesterday (Wednesday) afternoon, from Tory Island, and returned to Lough Swilly at 11 p.m. The names of the men saved are,—John Hutton, ship's cook; Richard Rattenbury, quartermaster; Phillip Andrews, second captain forecastle; William Henry Dunn, able seaman; and Alfred Broomhead and William Styles, privates, R.M.L.I. They state that everybody else perished except Surg. Browne and Engineer Hudson, who were on leave; and James Eva, A.B., who was left behind at Westport, breaking leave. Ship struck north-west of Tory Island, whilst trying to weather it, about 3.45 a.m., Monday last; under plain sail at the time. Wind moderate. Fires banked. Weather clear. Wreck entirely disappeared; apparently sank in deep water. No bodies have been washed up." On the receipt of the above telegram, a despatch was sent to the commander to forward the six survivors, if well enough to travel, to Dublin, where they would place themselves under the care of Surg. Browne, of the Wasp. Thence they would proceed to Portsmouth and join the flagship, the Duke of Wellington, on which ship the court-martial will be held shortly. The Admiralty, on receiving the list of saved, did not at once issue the names of the drowned, preferring to take the safer course of verifying every name rather than run any risk of unnecessarily alarming relatives and friends. The list of the crew now in the possession of the Admiralty was correct up to June 30 last, but there may have been changes among the seamen since that date of which the officials in London are not cognisant. So far as the disaster itself is concerned, as much has now been revealed as will probably be known until the survivors are subjected to examination before a court-martial.

Another telegram from Rathmullen says:—"When the Valiant arrived off Tory Island the state of the sea was appalling. To attract the attention of the islanders two guns were fired, and after some time the officers at the lighthouse made signals, which were responded to by those on board the war-ship. Com. Marrack at once intimated that he wished, if possible, to take on board the six survivors, and one of the island fishing-boats, although the sea was heavy and the wind rising, was soon manned, and the gallant fellows who had been immured under such melancholy circumstances in the Tory Island lighthouse since Monday morning last at once expressed their willingness to join in an attempt to reach the Valiant. After a very dangerous passage the war-vessel was reached, and the six survivors, all of whom were suffering from their recent exposure, were received on board, where they had a cordial welcome and hearty congratulation from Com. Marrack. The chaplain of the vessel, the Rev. Mr. Tucker, was also present when the men stepped on board, and made several inquiries as to the fate of their late officers and comrades who had met with so untimely an end. The men were in need of rest, and every attention was at once paid to their wants. Several of them, through being dashed against the rocks, have received some ugly wounds about the head, body, and limbs, but they are now sufficiently recovered to start for Portsmouth, to which place they will travel *viâ* Londonderry and Dublin. Of course, their evidence will be taken before a court-martial as soon as the authorities are prepared to hold it; but from the statement they made, no doubt under reserve, it is not at all probable that they will be enabled to throw very much light upon the causes which led to the disaster. Until Wednesday morning the weather was so rough and treacherous off the north coast of Donegal that it was impossible for the Valiant or any other vessel to make any attempt to communicate with those on Tory Island. But at the same time the Valiant left Lough Swilly, the weather having somewhat moderated, and was enabled to reach Tory Island about 4 o'clock in the afternoon. After firing signal-guns, as already stated, to attract attention, the survivors appeared at the south part of the island at Port Doon, and ultimately at 6.10 they were safely got on board. The Valiant then proceeded towards her moorings in Lough Swilly; but seeing that the north-west wind was gaining in force, Com. Marrack deemed it prudent to come to an anchor for the night off Ballymas Lake, just at the entrance to the Lough. The seas off Tory Island were tremendous, and all along the coast of Donegal the sea was very high. On Thursday morning the Valiant reached her moorings off the pier at Rathmullen before noon. The whole circumstances of the wreck, as reported to Com. Marrack by the men, have been forwarded in the shape of a report to the Admiralty authorities, who all this week have been telegraphing almost hourly until Thursday for full particulars, which were not forthcoming until then. By permission of the commander of the Valiant, I was enabled to hear from the lips of the survivors themselves all that they had to tell me of the terrible calamity that overtook their ship last Monday morning. The narratives are given in the order in which they were relateed by the men thmselves."

STATEMENTS OF THE SURVIVORS.

John Hutton said:—I was ship's cook on board her Majesty's ship Wasp. I was in my hammock, when, about half-past 3 o'clock or a quarter to 4 o'clock on Monday morning, I was roused up by a cry of "The ship's on the breakers." I at once got out of my hammock, and on coming on deck, I saw the four officers on the bridge. I soon found myself washed overboard. For about 20 minutes afterwards I was struggling in the water as best I could, and the next I remember was finding myself in the lighthouse on Tory Island. I was on the forecastle when I was washed off, and I saw, just before, about one-half of the crew in the rigging. I think it was from 10 minutes to a quarter of an hour, as nearly as I could judge, after the vessel struck that she went down. After I found myself struggling in the sea, I knew nothing until I found myself taken off the rock by the two lighthouse keepers. They took me to the lighthouse, and I received from them the greatest assistance any shipwrecked sailor could receive. It was bright, but a stormy night, and I noticed that the lighthouse light was burning brightly. It appeared to me that the officers and the bridge were swept away together. I have been three years on board the Wasp.

Qrmr. Rattenbury said:—I was down, sleeping in my bed, when I was aroused by a cry of "Clear lower deck; ship's on a reef." I immediately ran on deck, and I at once saw where the ship was; she was ashore on the rocks. All hands then were on deck, and I had to use my utmost efforts to keep the men from crowding together up the companion. When the alarm was given they made a rush for the deck. I noticed as soon as I came on deck that the light of the lighthouse was burning brightly, and that it was bearing right off our starboard beam. I got up the rigging, and after that I did not see anything more. When getting up the rigging I noticed that the port bulwarks were washed away. From the time the blow was struck until the ship went down was about a quarter of an hour. When I was in the rigging the ship was taken from underneath me, and I found myself in the water. The Wasp was schooner-rigged, and at the time she struck she was under all plain sail, barring the spanker. The night was bright and clear, but there was a heavy sea on. When the vessel sank those in the rigging came to the level of the water; after that all was silent. This is all I know. The total number af lives lost was 50. There was no pilot on board. Pilots are only employed when ships are navigating in strange waters.

Philip Andrews, second captain of the forecastle, said:—The first alarm heard was about 20 minutes to 4 o'clock in the middle watch. I heard the order given, "Brace up," and when I looked round I saw that it was among the breakers. I was one of the watch on the deck. I was second captain of the forecastle of this watch, and I was forward at the time. The order to brace up was obeyed, and after bracing up the lighthouse light was quite plain. It had been seen two or three hours before the vessel struck. It was not raining at the time. The order was given to shorten sail, and after the shortening of sail the upper deck was covered with water up to my waist. I heard no order to lower the boats. When I saw that the ship was breaking, I did my best to climb up a rock which was on our starboard quarter. She struck below the lighthouse. When I got on to the rocks I saw no one until I got on the top. The vessel struck to the north-west of the lighthouse. It was about 100 yards from where the Wasp struck upon the rocks to the lighthouse. There was a nice steady breeze at the time, but there was a heavy sea on.

W. H. Dunn said:—I was up the yard before the alarm was given, bracing. We were sailing at the time with the wind right aft. Just immediately before she struck we braced up, according to orders, and after we had belayed the braces, she struck. We braced up the foresail, the topsail, and the topgallantsail. After the vessel struck she forged ahead, and the seas began to break over her. I then heard a crash, and knew that she was on the rocks. She took us under when she sank. It was the bottom of the ship struck first. I went up the rigging, and found myself under the quartermaster. He was washed out of the rigging, and I went up further. There was another man, a seaman, named Styles, who was washed from the cross-trees, and I was washed on to the rocks. The night was clear, and the lighthouse light was burning brightly.

Alfred Broomhead said:—I am a private in the Royal Marine Light Infantry. I was below in my hammock about a quarter to 4 o'clock on Monday morning, when there was a pipe, "Clear lower decks; the ship's on the rocks." I was thrown under water, and the seas rolled over me, and I was ultimately washed ashore on the rocks. I found that I could move, and then I climbed up the rock some 30 ft. or 40 ft., when I found that I was on the level surface of the island. When I got to the top I saw another man (Dunn), who told me he could see a lighthouse. I made for it. I saw none of the other members of the crew, except Dunn, until the four other survivors were brought into the lighthouse. I had not been three minutes in the rigging when I was washed overboard.

William Styles, also a private in the Royal Marine Light Infantry, said:—I belong to the Plymouth division of the Royal Marines. I was below, and sleeping beneath the forecastle, when I heard the alarm, "Clear the lower deck; the ship is on the rock." I jumped into my pants and ran on deck, and I could see nothing but foam all round and the rocks about us. The weather boats were carried away. The order to shorten sail was given from the bridge, on which were Com. Nicholls and Sub-Lieut. King; and on the forecastle before that I saw the Navigating Lieut. and Gunner Kerrigan. I heard no particular voice from the bridge before the ship went down; a number of voices were heard together on the bridge just before she went down. I was washed out of the gallant yards, and the seas washed over me. I caught hold of an old jibboom that had been washed off the deck, and I was washed on and off the rocks several times, still clinging to the jibboom, which at last was washed into what appeared to me to be a crevice in the rock. I stuck on there, and was saved. The vessel struck three or four times before the order to shorten sail was carried out. I should say that it was 20 minutes after the vessel struck before she went down.

Up to the present time, it is stated that no bodies have been washed up. Com. Marrack states that the tide runs east and west of Tory Island, and that it is quite probable that some of the bodies may be washed up on the Donegal mainland. The survivors speak in the highest terms of praise of the considerate and kindly treatment they received, not only from the officials in the lighthouse, but from the simple peasantry who live on Tory Island. The weather has since increased in violence, and no attempts to reach the island from the mainland will be made for the present. The Royal Irish Constabulary have received strict orders to watch the coast in the neighbourhood of the scene of the disaster. A Letterkenny correspondent telegraphs that five Admiralty divers have passed through that town on their way to the scene of the disaster. There have been a trunk and pieces of boats washed ashore in the vicinity of Lloyd's signal-station at Malin Head, also a brush with "John Marshal" printed on it. They are supposed to have belonged to the Wasp.

A correspondent, telegraphing from Londonderry, says:—"The survivors of the Wasp have left the Valiant, now lying in Lough Swilli, for Portsmouth. They were recognised at various railway stations on the way to Londonderry, where they were the objects of considerable attention. Their hands and faces still exhibit traces of the violence with which they were cast upon the rocky coast of Tory Island."

Several sailors belonging to the Shannon, guardship on the Clyde, had a narrow escape from drowning on Saturday morning. They were sleeping on board the steam launch, which was moored at the steps of the Albert Harbour, Greenock. As the tide receded the stern of the launch sank in the harbour. The water rushed in, and speedily filled the vessel. The seamen had barely time to spring ashore before the launch went down. They lost most of their clothes.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, —How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

THE RUSSIAN MANŒUVRES.

The St. Petersburg correspondent of the *Times* says:—"The Russian Naval and Military manœuvres this year have been of peculiar and special interest, and this fact seems to have been duly appreciated by most of the foreign Governments in sending some rather strong deputations of officers to watch the mimic warfare around Krasnoe Selo. Each of the great military Powers sent three more or less distinguished military men, to whom were added their regular military agents attached to the different Embassies; while England was this time equally well represented by Gen. Higginson, of the Bengal Cavalry; Col. Law and Capt. Davidson, R.H.A.; assisted by our own Military Attaché, Col. F. Chenevix Trench. The troops of the Guard, some 40,000 to 50,000 strong, were in camp at Krasnoe Selo three or four weeks before the actual grand manœuvres began, and the latter part of this time was occupied in the initial ceremonies, *fêtes*, and preliminary operations which always usher in the Russian autumn manœuvres proper. His Majesty the Emperor opened the proceedings on August 1 by attending the religious ceremony of blessing the colours. The following day was occupied in watching the tactical exercises of the 37th infantry division, 1st and 6th reserve battalions, and 1st reserve artillery brigade, ending with the capture of the Kavelakht hills, the first piece of high ground on the south-east of the perfectly flat country round St. Petersburg. These separate operations were treated from the point of view of actual warfare, by the placing of dummies and figure targets in position to represent the enemy's troops. The artillery practice especially, says the same paper, must have astonished many of the foreign officers present. The military correspondent of the *Cologne Gazette* speaks of the present efficiency of this arm. Still vigorous efforts continue to be made here towards further improvement, and there has long been a rumour of Armstrong supplanting Krupp by taking over an unsuccessful Government works for a fixed period, in much the same way that Messrs. Cammell have undertaken to manufacture armour-plates at the Kolpino Works during the next five years. Hotchkiss and Nordenfelt, it may be mentioned, are also competing fiercely with each other for Russian orders. About two months ago a comparative trial was made of a Nordenfelt 12-barrelled gun, firing Martini-Henry cartridges, with two 3½-in. field-guns, using shrapnel with 232 bullets in each shell, against four targets 50 ft. long and 9 ft. high, at distances from 1,400 to 1,550 ft. The Nordenfelt, in something less than two minutes, made 574 hits, or 45 per cent. of shots fired, while the two field-guns made 1,561 hits, or 33 per cent. of the bullets fired in twelve minutes. In the manœuvres more particularly referred to above, the artillery result was 36 per cent. of hits, and the brilliant success of the infantry firing was proved by the scoring of 7,988 balls out of 17,225 cartridges fired by three battalions, making an average of 46 per cent. The Finnish battalion made the highest score of 53 per cent. of hits. His Majesty reviewed the entire forces before they divided to take up the positions of two hostile armies. The two contending forces were divided into Eastern and Western corps. The Eastern corps defending St. Petersburg, and consisting of 31½ battalions, 21 squadrons, and 88 guns, was under the command of Gen. Driesen, who is reputed to be one of the best officers in the Russian Army. The Western, or enemy's army, which was supposed to have effected a landing in the Gulf of Finland, and to be advancing on St. Petersburg, was composed of 28 battalions, 24 squadrons, 74 guns, and one telegraph park, under the command of Gen. Timofeieff. The details of the plan of operations were promulgated each day for the troops to work out. The general idea was a simple and practical one. In regard to the way in which the Russian troops worked, one can only repeat with reference to the Infantry of the Guard what is so well known already, that they are excellent troops in size, physique, and discipline, and that, as usual, they made their long marches without showing any signs of distress, and generally appeared in hard health and condition. Notwithstanding the distances they often traversed, there were no stragglers and no drunken men. They appeared to be well handled by their officers, and threw up their hasty entrenchments wherever necessary with great rapidity. As at all manœuvres, they often exposed themselves in positions where in real war they would have been all killed to a man. The artillery, both field batteries and horse, did not appear to be very well managed. The horse artillery especially seemed to be too fond of changing positions, and sufficient care was not taken to mask the gunners and the guns, and that, too, in positions where it could have been easily done without any diminution of effective firing. On other occasions, when they had to retire and were ready limbered up, they might have been observed standing still, with their teams and all exposed to the fire of the horse artillery. It is plain that as they were intended to retire when they were limbered up, the sooner they were off the better. Their horses, though much smaller than the English artillery horses, are wonderfully strong, active, and hardy little animals, and they retained their condition well during the manœuvres. From what I heard on good authority we may rest assured that both in fortress and siege artillery we have not much to learn in Russia. In regard to the cavalry, or mounted infantry, whichever it may be called, there is not much to be said. They appeared to be wanting in enterprise, in patrolling, in reconnoitring, and in obtaining information of the enemy. It is only fair, however, to say that their horses are very good, and in the main well equipped. No one would call them smart cavalry in our sense of the word; but the Russian soldier does not pretend to that. Individually he is about the most slovenly man you could find, and has nothing of the 'set-up' of other armies. The ordinary Russian, too, however otherwise endowed, is not a horseman by nature; and, considering this and the difficulties with which they have to contend in the character of the climate during six months in the year, it is wonderful that such good results are obtained as were to be seen at these manœuvres. It may be mentioned, in conclusion, that besides the grand manœuvres around Krasnoe Selo, the troops of the Northern, Southern, and Western Districts have been inspected and manœuvred by the three Grand Dukes Vladimir, Michael, and Nicholas respectively; while those of Poland will be manœuvred at the fortress of Novogeorgifsk by the Czar himself. The numbers of the two forces operating at Novogeorgifsk are 49 battalions, 30 squadrons, and 84 guns for the attack, and 40 battalions, 24 squadrons, and 70 guns for the defence."

THE GERMAN MANŒUVRES.

The German manœuvres were concluded on Tuesday, by the operation of the 8th (Rhineland) Corps against a skeleton enemy. The *Times* correspondent at Cologne writes:—"What with beautiful weather and lovely scenery the final act of this year's *Kriegspiel* drama was a very brilliant spectacular display, but that was all. Manœuvres against a marked enemy are executed according to a strict programme, leaving no margin for the unexpected or for originality on the part of the leaders, and to-day's evolutions, therefore, offered no special feature of interest. The more fatigue these sturdy and high-spirited Rhinelanders undergo the stronger and fresher they seem to become—which is a fact well worth the careful consideration of all possible foes of the aforesaid Rhinelanders. It is now nine days since the manœuvres began, and I am sure the Rhinelanders have had more than their fair share of hardship. During this period they fought a three days' desperately contested battle with the Westphalians, they bivouacked in the open for a night or two, and after that they entered on a two days' march to the scene of to-day's operations. Yesterday, in spick-and-span condition, they paraded to perfection before the Emperor, and to-day they performed a great deal of marching and fighting over heavy ground, and when it came to the final storming of the phantom foe's position their elastic step and cohesive order only fell short of the bearing of the Highland Brigade at the battle of the Alma. Nothing, on the whole, but good can be said of the Rhineland Corps, and what is said of this corps must be said of every other unit of the same kind in the German Army, and unless I am very much mistaken, this is the opinion of every foreign officer who has attended this year's German manœuvres. It only remains to be said that to-day's manœuvres, which took place about three-quarters of an hour by rail south-west of Cologne, were witnessed by the Emperor, the Empress, and the Princes of their house, including the Crown Princess, who rode by the Crown Prince, Prince Frederick Charles, Count Moltke, and more of his Majesty's mighty men of valour. The Emperor drove during the combat, but when the halt sounded all along the long line, after the centre of the enemy's position had been taken, he mounted his charger to make the usual critique on the day's doings, and to receive the adieux of the foreign officers, who have enjoyed his Majesty's munificent hospitality for more than a week, and not only hospitality but also favour, for most of his guests will return home the richer by a coveted decoration. By the laws and customs of their Court, Englishmen are precluded from accepting foreign orders, otherwise Sir Frederick Haines, as well as Col. Howard Elphinstone, would certainly have added a Prussian Order to the numerous war medals which adorn their breasts. But as it is, they had to stand by and behold a shower of distinctions falling on Austrians, Frenchmen, Italians, Belgians, Servians, Roumanians, Spaniards, and Japanese. Addressing his assembled guests before the manœuvre curtain fell, the Emperor said a few gracious words to all, and hoped that they would always think pleasantly of the time they had spent in his peaceful camp. The Emperor with his Court then returned to Castle Brühl."

"REAL JAM" FOR A PREMIER'S SCOTCH BREAKFAST.

Suspension of Law of Liquidation—
("Sharp practice of Northbrook's. But 'better than nothing at all.'")
Porte protests to the Powers against action of British Government in Egypt—
("Bother Porte! Never mind; its 'action' he's protesting against, not 'inaction.' Shall have to propose another Conference, to gain time; and 'time is money.'")
Boers threaten to take Natal and shoot down all Englishmen—
("Dreadful! After all I've done for them, too!"
English colonists, dissatisfied with British Government' inaction, will side with the Boers—
("Good gracious! 'Inaction!' Can't they see how busy Northbrook is in Egypt, and how I've got my hands full with the Franchise. Really they ought to know better.")
Strong anti-English feeling on the Continent—
("Where's the Continent? Granville can see to this; but when I've got this Franchise Bill passed, then we shall be at peace with everyone everywhere."
Inefficient state of the Navy—
("Nonsense! We've got a lot of boats being repaired. Perhaps they mean 'navvy.' Going to enfranchise him.")
Gordon disgusted with the British Cabinet—
("He means me, I do believe.")
telegraphs to say he throws entire responsibility of bloodshed and carnage—
("What dreadful expressions!")
on British Government—
("He's so obstinate and impetuous! so inconsiderate too, at the moment when he must know I'm so busy with the Franchise Bill. But Wolseley and 'the camels are coming.' What can Gordon want more? If latest telegrams correct, question whether he'll want them.")
Sir Hercules Robinson—
("Dear me! why doesn't he keep quiet till I've got my Franchise Bill out? And what's this?")
Angra Pequena—
("Where is 'Angra Pequena?' Not in Midlothian, or I should have stopped there, and won 'em with a speech. No; let me see —that's something to do with Granville and Bismarck. What a nuisance Bismarck is! Can't he understand how entirely occupied I am with the Franchise?")
Mr. Parnell says—
("Ah! I can wait till October for that. And when I have 'disposed of my correspondence,' I must plant a few more sycamores, make some more speeches on the Franchise, receive addresses on same subject, and say good-bye to Great Glamis.") [EXIT.

—*Punch.*

THE NILE EXPEDITION.

No one knows when Lord Wolseley will leave Cairo on his journey up the Nile, but it is stated that he will move his headquarters about the middle of October, by which time all the troops and the requisite stores are expected to have passed Wady Halfa. Meantime, he is pleasantly housed in the Kasr-el-Mussa, a palace frequented by princes in Ismail's time, and occupied by the Duke of Connaught on his return from Tel-el-Kebir. The *Standard* correspondent at Sarras telegraphs:—"All hands here are working with a will, preparing for the advance. Stores are accumulating below the Cataract, and are gradually being passed up. The enterprise and co-operation of the Mudir of Dongola are enabling our officers to make an amount of progress in forwarding stores which would be otherwise impossible, for we are at present exceedingly short of boats. The armed steamer Nasefra has started for Dongola. Should she be successful in passing the upper rapids, she will in a fortnight's time be able to steam up beyond Debbeh, which lies some thirty miles above Dongola. The presence of a vessel flying the British flag in the upper waters, which are regarded as the Mahdi's country, is expected to produce a great effect upon the natives, who will then, for the first time, be convinced that a force is on its way to Khartoum. The other steamer, which had been intended to accompany the Nasefra, has stuck half way up the Cataract. Every day impresses more strongly the fact that the work has been begun altogether too late. Had the whole Expedition been collected at this spot two months ago, its prospects would have been very different, as we could then have taken advantage of every rise in the Nile to get over the difficult points. At present there are frequent variations in the water level, and to-day there has been a slight rise; if it continues there are hopes that the steamer may be able to get off to-night. Every effort will be made to move her the instant the rise affords a chance of doing so. The first instalment of the Egyptian troops, 100 strong, has gone forward; it is intended that they shall for the present occupy Dal, some 70 miles up the river. Five more cipher telegrams have been received from Gen. Gordon. He insists strongly on the necessity of retaining Khartoum; holding it with Indian troops, and establishing a just government there. He says that all the troubles there arise more from misrule than from fanaticism or any religious movement. He has also returned entirely to his old opinion, rejecting the ostensible object of his mission, namely, the evacuation of the Soudan."

The detachments of the Foot Guards forming part of the Camel Corps for Egypt were inspected at Wellington Barracks on Thursday by the Duke of Cambridge. They were drawn up in open order at half-past 10, under Lieut.-Col. Boscawen, Coldstream Guards, Lieut. Crutchley, Scots Guards, and Surg. J. Magill, being also present. Officers and men were equipped in the special uniform. At a quarter to 11 the Duke arrived, and was received by Gen. Gipps. His Royal Highness made a minute inspection of the men, after which they marched past, returning in quarter-distance column, They then formed square, facing inwards, and the Duke, entering the square, addressed a few remarks to them. He said that they were going to start on a peculiar service, but he felt quite sure that they were ready to do anything, even to ride on camels. A large part of the Army would be represented in the Expedition they were to take part in, and the Guards would have an opportunity of showing what sort of stuff they were made of. He felt a great interest in the corps they formed part of, as it was one composed of men who had volunteered. But they should remember that it was made up of men from different regiments, and that each of these detachments should do its utmost to sustain its regimental prestige. He hoped that this would produce a spirit of emulation on the part of the Guards which they would do their best to carry out, and that the officers and non-commissioned officers would set them an example in this. The Marquis of Hartington had wished to be present on this occasion, but this not being possible, he had desired him (the Duke) to wish them "God speed" in their arduous undertaking. The Duke afterwards visited Aldershot, to inspect the mounted portion of the corps at the North Camp. After making an inspection of the officers and men, the Duke saw the troops march past, after which he addressed them and wished them success in the campaign upon which they were about to start. A detachment of the Army Hospital Corps, consisting of about four officers and 120 non-commissioned officers and men, proceeded on Thursday from Aldershot to Woolwich Arsenal, and embarked on board the steamer Anglian for Egypt. There were crowds of spectators present on both occasions.

In the event of it being decided to construct a railway to Berber from Suakim now or hereafter, Lord Wolseley is stated to have received an offer from an English firm of railway contractors in London to supply rails and patent sleepers with switches for £400,000 for a distance of 300 miles.

A Portsmouth correspondent telegraphed last night:—"Portsmouth Dockyard was alive with excitement to-day on the occasion of the embarkation of the members of the Camel Corps for the Soudan. Numbers of friends and relatives of both officers and men came from London and other parts to witness the embarkation of the troops and the departure of the vessels. These, the Deccan and Australia, both belonging to the P. and O. Company, lay along the south railway jetty on to which the various trains ran on their arrival at the Harbour station. The first to arrive were 350 officers and men of the Household Cavalry, who came by special train from Victoria. A little later the cavalry division arrived from Aldershot. The men were rapidly detrained, and told off to their respective messes on board the two transports, which lie stern to stern alongside the Dockyard. The men presented a smart and serviceable appearance in their new uniforms and accoutrements, and much interest was taken in them by the spectators who had assembled."

The following officers form the Staff of the Camel Corps:

Cavalry Division.—In command, Lieut.-Col. Hon. R. A. G. Talbot, 1st Life Guards; Adjt. and Qrmr., Capt. Lord St. Vincent, 16th Lancers; Surg., J. T. Falvey, A.M.D.

Light Cavalry Division.—In command, Lieut.-Col. Stanley Clarke, from half-pay; Adjt. and Qrmr., Capt. Paget, 7th Hussars; Surg., P. B. Connolly, A.M.D.

Infantry Division.—In command, Lieut.-Col. the Hon. E. E. T. Boscawen, Coldstream Guards; Adjt. and Qrmr., Lieut. Crutchley, Scots Guards; Surg., J. Magill, A.M.D.

Col. Clarke, as senior officer, will command the whole corps, Capt. and Pymr. Mackie, A.P.D., will act as paymaster, and Surg.-Major L. Corban, A.M.D., is senior medical officer.

THE STAFF OF THE BRITISH ARMY IN EGYPT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—It was in 1870 that the present First Minister of the Crown abolished Purchase in the Army, and so ushered in two great changes,—(1), the admittance as a general rule of the middle classes by severe and earnest competition; (2), the making of the Army a profession for life, in place of—as had been often the case—a stepping-stone to one's position in society, and as a proof of good training. Those men, however, who were willing to work in this new and *bonâ fide* profession, like many Continental officers, hoped that they would have the same chance of mounting the difficultly attainable rungs of the ladder of fame as any one else; but they have, it is said, both old and young, to bitterly complain of their unequal chance as compared with those who either participated in the Red River Expedition or the Ashantee campaign, and whom some of them are pleased to denominate "the stones of the Garnet ring." In addition to good regimental officers, there are those who also, from their varied abilities, pass through the Staff College, obtaining high certificates, whose talents are well-known to the Commander-in-Chief and the military authorities. In days gone by it was pretty well the rule that officers serving in various parts of the world should there continue, in order to equalise foreign service, and give men on the spot where a campaign was going on the chance of distinguishing themselves in their turn; but now, from the system which has of late years been adopted of calling the same men from all parts of the world, and so monopolising nearly all the titles, rank, and honours, the greater number of British officers, faithful, ardent, and in many cases talented, are looking on in positive anger, and a fire of injured *amour propre* is burning in their breasts. The present state of things seems a flat injustice to many, and more particularly since the rules have been introduced for the shelving of officers at an early age. The Horse Guards and War Office can recommend, if they like, man after man with great talents, and who have stood the proof; the present shower, however, of stars, crosses, titles, and other honours on the same men is the cause of the present bitterness. The rules for the distribution of honours and decorations require a thorough change, and date back beyond the Crimean War, where there was such a prostitution of the Medjidie, for the sake of all field officers who had been one week in the Crimea, that it robbed it of its value for juniors who had to go through hard work to get it. This, however, has been exceeded in the case of the heroes of 1882, some of whom did not assist at Tel-el-Kebir, yet carried off promotion and three decorations for less than three weeks' field service, and, in many instances, the C.B. to boot. And it is a fact that any man now, never having smelt powder, but being in command of a regimental corps in Egypt, will, in all probability, if he writes a report or is named in a despatch, carry off the same number of decorations for a short run of service. The question which the public may now ask is—Have we only a few brilliant staff officers? and if so, how is it? The accomplished General who has gone to command the Nile Expedition is a man who since Feb., 1852, has worked conscientiously and well, and has always been ready with his portmanteau packed, to start at a moment's notice. Every one knows that a good Staff is of immense value, but this is also quite ready if needed, without the Horse Guards and War Office, the same members being collected from all parts of the world. Many of the men who are now pretty-well covered with honours have really no more ability than others who are left in the cold; but on the outbreak of war they all appear as the curtain rises from the East and West, the North and South, and carry off more and more titles, honours, and rewards, while men by the hundred who have served for long years through severe campaigns find themselves with only the regulation five-shilling piece and its ribbon. Others have three and four decorations for three weeks' field service in 1882. The most astonishing thing is how the Ministers and country now give carte blanche for any expense, although with the Great Duke they grudged him rice for his bullocks in India, and boots for his soldiers in the Peninsula, and left him to make the best of it, and constantly fight the home Government besides the enemy in his front. Truly, one might cite to the Field-Marshal Commanding-in-Chief the words of Theodor Körner,—"Die Ehrenstellen löschen den Durst des Ehrgeizigen nicht, sondern sie vermehren ihn" ("Offices of honour appease not the thirst of the ambitious, but increase it.")—I am, Sir, &c., Justice.

Obituary.

Deputy-Comy.-Gen. of Ordnance H. Blakeney, whose death took place recently at Brighton on the 11th ult., had seen a good deal of active service. He served in the Crimea throughout the campaigns of 1854-55, and was on the personal staff of Lord Raglan at the battle of the Alma. He received the Crimean medal with four clasps and the Turkish medal. He served in China during the war of 1857 to 1860, and was in charge at Canton and Hong Kong.

Reviews.

Desert Warfare. By Bennet Burleigh. (Chapman and Hall).

The author of the letters from luckless Sir Gerald Graham's column in the operations for the relief of the garrisons near the coast of the Red Sea and Suakim won his spurs in a field wherein he had rivals of fame; but we doubt if he did wisely in publishing this volume, unless it should turn out that there are more people take an interest in the actions of El Teb (or "the mound") and Tamai than we think likely. However, we shall be glad to find we are wrong; and the addition of all the official despatches, of geographical information, and of maps and plans, makes the book valuable as a work of reference, and as a history of the episode in which the General who was victorious, and who was described publicly by Lord Wolseley as "irresistible," has been rewarded for his successes by compulsory inactivity and unwelcome repose.

The admirable publication of M. Challamel (Aîné, publisher of charts, &c., of the Marine), called "*L'Année Maritime*," edited by M. Durassier (formerly Secretary of the Minister of Marine), in the volume for the present year, in a well written preface in which the newly developed "politique coloniale" in Tonquin, Madagascar, on the Congo, Senegal, &c., is considered with moderation, and, we think, some distrust, makes some remarks on the bombardment of Alexandria, which we cannot but characterise as unjust, and, if read by the light of Admiral Courbet's procedure, *in pari materiâ*, very unjustifiable. The writer says "the excesses and bad direction of the operation approached to barbarism, and was neither to the credit of British Naval artillery, nor to the honour of British policy." The opinions of a disinterested neutral critic on the spot do not bear out the views—or let us say the statements founded on prejudices—of the Naval editor of "*L'Année Maritime*"; Commander Goodrich, U.S.N., makes no charge against the British of exaggeration or bad direction, and exculpates Lord Alcester from responsibility for the sack and burning of the city. Those who live in glass houses should not throw stones, and we have read accounts of "bombardments" of open towns which much more nearly "*confine à la barbarie*" than that of Alexandria. But on the whole we can say we wish we had some publication like *L'Année Maritime*, and not having it, we can only recommend this substitute to our readers.

The first number of a new volume of the *English Illustrated Magazine*, which is now published, is rich as well in its illustrations as in its letterpress. The contents bill for October is varied and attractive. Its principal features are the first four chapters of a serial by the author of "Called Back." It is named "A Family Affair," and already promises to be highly sensational. Then comes Part II. of a "spiritual romance," by the well-known author of "John Inglesant." Its title is "The Little Schoolmaster, Mark." The subjects chosen for illustration are the "Horse, Ancient and Modern," engraved by Alfred Watson; "Loch Fyne," illustrated by David Carr; and several views of Heidelberg, by E. R. Butler.

Longman's Magazine, for October, contains several pleasantly-written short stories, in addition to further instalments of "Jack's Courtship" and "Madam." The feature of the number, however, is a touching story told in a few short chapters by W. E. Norris, the author of that most charming novel, "Mademoiselle de Mersac." The name of this tale is "The Hermit of Saint Eugene." It is a mere trifle, but amply sufficient to stir the feelings of its readers and mark the ability of the writer.

Messrs. Cassell and Co. (Limited) have issued an attractive bundle of literature in the October number. There is no particular novelty to point out, but readers can scarcely make a mistake, no matter what selection they may fix upon. This little cutting from *Cassell's Household Guide* may be useful to many:—"There is a vast field for the employment of medical women, lying within the British dominions, and completely outside of the work on which men are engaged—we mean in India. There—as has been recently stated on the best authority—women are almost absolutely without medical help; and the suffering and death consequent on this state of things it is not easy to overrate. Attention has often been called to this state of things in India, and efforts are being made in Madras, and other Indian cities, to give ladies such medical instruction as will fit them to be the attendants so much required by native women. Englishwomen with proper medical degrees would find in India a field for their labours which is, as yet (with the exception of a few American ladies), totally unoccupied, and one which would be not only useful, but most lucrative."

EGYPTIAN ITEMS.

"The latest news from El Obeid is to the effect that the missionaries and sisters in captivity there are being well treated, and that the Mahdi has placed a house outside the town, with a garden attached to it, at their disposal. Baron Seckendorff's servant is in command of a battery of artillery. Both he and Mr. Vizetelly are said to have embraced the Mussulman faith."—*Egyptian Gazette.*

"Mr. O'Kelly, M.P., who has been acting as correspondent in the upper country for the *Daily News*, is leaving for England, as in consequence of his relations with British officers his position had become untenable. In consequence of his statement respecting the Army the British authorities had found it necessary to forbid him admittance to the camp at Assouan. Col. the Hon. J. C. Colborne will replace Mr. O'Kelly as the special correspondent of the *Daily News* at the front."—*Egyptian Gazette.*

THE BOERS, THE BRITISH, AND BECKUANA.

The *Times'* correspondent at Durban telegraphs :—Feeling at Cape Town runs high among the English population regarding Boer action in Bechuanaland, and a monster memorial to the Queen is talked of. All sorts of stories about the Boer proceedings are circulating, but I hesitate to repeat them, reports from that quarter being so contradictory. It is clear, however, that the Boers in Goshen and Stellaland are carrying matters with a high hand. Meetings have been held at Grahamstown and George Town to invoke Imperial intervention. Usibepu has declined a location near Inkankhla, declaring the Usutu submission to be a mere blind to get the troops away. There is no truth in the report that the Reserve is to be controlled by John Dunn and Usibepu; the ordinary garrison remains there for the present. The prospect is peaceful. A deputation of three Boers from the new Republic visited the General prior to his departure. I believe that the results of the interview were satisfactory. An enthusiastic meeting has been held in Cape Town in regard to the Bechuanaland question. The audience sang 'Rule, Britannia' as the Mayor took the chair.

ROYAL MILITARY ACADEMY.

The next examination of candidates for admission to the Royal Military Academy, Woolwich, will commence in London on Wednesday, Nov. 26 next, the medical examination taking place at the Academy on the previous day. The number of vacancies to be competed for will be 50. Applications cannot be received unless made in strict accordance with the Regulations. The successful candidates will be required to join the Royal Military Academy about Jan. 7 next.

SELECTION *V.* SENIORITY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—A paragraph appears in your impression of Sept. 20 to the effect that Col. Ewart, C.B., has declined or is debarred from service in Egypt during the present campaign by reason of a question of seniority as between Col. Sir Herbert Stewart, K.C.B., and himself, which paragraph surely implies that Col. Ewart has been given to understand that he would be required to serve under Col. Stewart, or at least to occupy a position inferior to him. I am mindful that both these officers served in the same brigade in the 1882 campaign, and that while Col. Stewart occupied a comparatively subordinate position on the staff, Col. Ewart in command of a combined regiment of Household Cavalry was reported by Lord Wolseley himself to have acquitted himself most creditably. Col. Stewart has since successfully commanded the cavalry under Gen. Graham in the Soudan to the exclusion, however, of many cavalry officers, his seniors, who naturally looked for advancement in that branch of their profession to which they had devoted themselves and to which, until recently, Col. Stewart (who had exchanged or been transferred from the infantry) had not. If, therefore, an officer of the distinction of Col. Ewart has been virtually superseded, the question arises, how many other cavalry officers' claims have been similarly over-ridden or dismissed? Though 19 cavalry regiments and seven battalions of the Guards sent a contingent of 40 men to form the Camel Corps not one of the commanding officers of these regiments or battalions is detailed to command. Can it be that the same question of seniority interferes with the appointment or selection of any one of these 25 officers, and that Col. Stewart is the officer fortunate enough to have been selected to command the corps? Whether or no, the total exclusion of these officers certainly appears remarkable to

AN INQUIRER.

The Rev. Arthur Robins has given a copy of "The Soldier's Prayer," and "The Soldier's Hymn," written by him, to each officer, non-commissioned officer, and trooper of the Household Cavalry, who is appointed to the Camel Corps, and to all the soldiers of the Household Brigade who are leaving Windsor for Egypt. He was heartily cheered by the detachments leaving Windsor for embarkation.

Advices from the North-American and West Indies station announce officially letters from Commander-in-Chief at St. John's on the 11th inst. The Northampton was at St. John, N.B., on Sept. 11 (at present at Halifax). The Garnet was at Quebec on Aug. 28, and would return to Halifax shortly. The Tenedos and Mallard were on the Newfoundland coast on Aug. 26, on fishery duties. The Dido was at Barbadoes on Aug. 7; senior officer's ship on the Barbadoes Division. The Fantôme was at Halifax on Sept. 2, and is to proceed, when ready, to Bermuda to be docked. The Griffon was at Halifax on Sept. 9; ordered to St. John's, Newfoundland, to replace Fantôme on Newfoundland fishery duties.

A very hopeful suggestion is made from India, in pursuance of the reform of our Army system, whereby regiments are associated by names and by centres with the counties from which in the main they spring. It is that, instead of sending all time-expired and invalided soldiers returning from India to one discharge depôt at Gosport, as at present, there to receive their deferred pay and their savings-bank balance, and there to be immediately surrounded by ravenous harpies to rob them of their savings and keep them from their homes, they shall in future be sent direct to their respective counties, and their pay and savings be remitted to the depôt centres nearest their homes, or their intended places of abode. At these same centres, too, they would have their discharge-papers completed. There would be gain every way by such a change. The invalids would be brought under the care of home or of relatives; the strong would be spared needless temptations; and by a wise use of the Post-Office Savings-Bank economy in administration could doubtless be effected. It would be another step in the direction of keeping the soldier within reach of the humanising influences of home.

We are requested to state that the firm of Charles Lancaster, of 151 New Bond Street, gunmaker, is totally distinct from that of Mr. Alfred Lancaster, of 27 South Audley Street, gunmaker, whose bankruptcy is noticed in the papers of Tuesday.

The Gazettes.

◆

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, Sept. 23, 1884.

3rd Dragoon Guards—Lieut. R. G. Dyson, from the Duke of Wellington's (West Riding Regt.), to be Lieut., vice H. Gillon, seconded (Sept. 24).

ROYAL ARTILLERY.

Col. W. J. Williams, C.B., has been placed upon the Unemployed Full-pay List, under the provisions of Art. 79-I. of the Royal Warrant of June 10, 1884; Lieut.-Col. and Col. C. J. Hope-Johnstone has retired upon retired pay, with the hon. rank of Major-Gen. (both dated Sept. 10).

Major W. R. Rudge, from the Seconded List, to be Major, vice A. H. J. Des Barres, retired (Sept. 6); Capts. C. J. Blake to be Major upon the Seconded List; W. W. Smith to be Major, vice Brevet Lieut.-Col. A. G. Yeatman-Biggs, seconded for service on the Staff (both dated Aug. 27); Lieuts. F. B. Elmslie to be Capt. upon the Seconded List; N. B. Inglefield to be Capt., vice W. W. Smith, promoted (both dated Sept. 1); C. E. Jervois to be Lieut. upon the Seconded List, for service in the Bengal Ordnance Department; R. C. O. Stuart to be Lieut. upon the Seconded List, for service with No. 1 Mountain Battery, Native Artillery, Bombay (both dated Sept. 5).

Gent. Cadet William Anthony Foster Von Iffland, from the Royal Military College, Kingston, Canada, to be Lieut., vice C. E. Walker, promoted (June 26).

The dates of the promotion of the under-mentioned officers to be altered as stated against their names, viz. :—Majors C. M. H. Downing (Aug. 25); R. S. Watson, the Hon. F. W. J. Shore, and W. N. Jervis (all three dated Aug. 26); Capts. K. S. Davison, R. M. Crofton (both dated Aug. 25); C. H. Blount (Aug. 26); and G. N. H. Barlow (Aug. 27).

Royal Engineers—Col. T. Inglis, C.B., has retired upon retired pay, with an annuity and the hon. rank of Major-Gen. (Sept. 14); Capt. H. H. Whatley retires upon retired pay, with the hon. rank of Major; Capt. F. Beauclerk retires, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

Scots Guards—Lieut. W. A. W. Lawson, from the York and Lancaster Regt., to be Lieut., vice J. B. Stracey, seconded.

LINE BATTALIONS.

The Buffs (East Kent Regiment)—Lieut. R. L. Retallack resigns his commission.

The Northumberland Fusiliers—Lieut. A. A. Etheridge has been appointed a probationer for the Indian S.C. (June 24).

The Royal Fusiliers (City of London Regiment)—Capt. R. L. Appleyard, about to be appointed to the Militia, retires on half-pay.

The King's (Liverpool Regiment)—Lieut. H. L. Dodgson has been appointed a probationer for the Indian S.C. (June 12).

The Norfolk Regiment—Lieut. B. W. Morton has been appointed a probationer for the Indian S.C. (June 12).

The Devonshire Regiment—Lieut. P. R. T. Gurdon has been appointed a probationer for the Indian S.C. (July 12).

The Suffolk Regiment—Lieuts. J. D. McAndrew has been appointed a probationer for the Indian S.C. (July 2); H. W. Campbell has been appointed a probationer for the Indian S.C. (July 6); W. I. Ryder, from the Queen's (Royal West Surrey Regt.), to be Lieut., vice G. F. H. Dillon, appointed a probationer for the Indian S.C.

The Prince Albert's (Somersetshire Light Infantry)—Lieuts. H. G. Burton has been appointed a probationer for the Indian S.C. (July 6); W. N. R. Bates, from the Sherwood Foresters (Derbyshire Regt.), to be Lieut., vice R. E. Sullivan, appointed a probationer for the Indian S.C.

The East Yorkshire Regiment—Lieut.-Col. H. J. Hallowes has been placed on half-pay, on appointment to the command of the Deolali Depôt (June 30): Lieut. D B. Thomson has been appointed a probationer for the Indian S.C. (July 19); Qrmr.-Serjt. William Speak to be Qrmr., vice C. J. Knott, deceased.

The Royal Irish Regiment—Lieut. L. N. Herbert has been appointed a probationer for the Indian S.C. (June 24); Lieut. E. C. Ryall has been appointed a probationer for the Indian S.C. (July 4).

The Lancashire Fusiliers—Lieut.-Col. H. R. Bowlby retires on full pay, with the hon. rank of Col.

The Royal Scots Fusiliers—Lieut. C. G. Eyre resigns his commission.

The Worcestershire Regiment—Lieut. C. M. Edwards has been appointed a probationer for the Indian S.C. (July 13).

The East Lancashire Regiment—Lieut. C. L. M. Rich has been appointed a probationer for the Indian S.C. (June 25).

The Hampshire Regiment—Capt. J. A. Eastham has been placed on retired pay, with the hon. rank of Major (Sept. 22).

The Dorsetshire Regiment—Capt. M. J. E. Fenwick has been seconded for service in a civil capacity under the Egyptian Government (July 18).

The Prince of Wales's (North Staffordshire Regiment)—Major E. W. Carleton retires on retired pay, with the hon. rank of Lieut.-Col.

The Highland Light Infantry—Lieut. D. J. C. Macnabb, from the Cheshire Regt., to be Lieut., on augmentation.

Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's)—Lieut. K. P. Burne has been appointed a probationer for the Indian S.C. (July 1).

Royal Dublin Fusiliers—Lieut. A. H. Lindop to be Adjt., vice Lieut. F. L. C. Thomas, who resigns the appointment (Aug. 4).

Staff—Lieut.-Col. and Col. Sir O. V. Tanner, K.C.B., Bombay S.C., has been appointed to the command of a brigade of the Bombay Army, with the rank of Brigdr.-Gen. (Nov. 1, 1883); Capt. Lord C. W. De la P. Beresford, R.N., to be Naval Aide-de-Camp to Gen. Lord Wolseley, G.C.B., G.C.M.G., commanding the Forces in Egypt (Sept. 2). The Christian name of Lieut. Lord Frederick FitzGerald, the King's Royal Rifle Corps, appointed in the *Gazette* of Sept. 9 as Aide-de-Camp to Major-Gen. Sir R. H. Buller, V.C., K.C.M.G., is as now, and not as therein stated.

Royal Military College—The appointment of Lieut. F. G. Stone, R.A., as Instructor, to bear date Sept. 1, and not Aug. 1, as notified in the *Gazette* of July 15 last.

Army Schools—Schoolmaster J. B. Eldridge to be Sub-Inspector, in succession to Inspector W. Robinson, retired (July 13).

Medical Department—Brig.-Surg. J. G. Faught to be Deputy-Surg.-Gen., vice F. Holton, M.B., retired upon temporary half-pay (Sept. 3); Surg. P. J. Gallwey, M.D., has resigned his commission (July 12).

Army Pay Department —Chief Pymr. and Hon. Lieut.-Col. J. George is placed on retired pay, with the hon. rank of Col. (Sept. 23); Capt. G. H. Powell, the Essex Regt., to be Pymr. (Oct. 12); Capt. E. L. R. Thackwell, the Royal Fusiliers (City of London Regt.), to be Pymr. (Nov. 16); Capt. I. W. T. S. Smythe, the King's (Shropshire Infantry), to be Pymr. (Feb. 11); Capt. H. S. Tunnard, the Royal Inniskilling Fusiliers, to be Pymr. (April 26).

BREVET.

Major T. C. Price, R.A., to be Lieut.-Col., under the provisions of Article 11 (*f f.*) of the Royal Warrant of June 10, 1884 (Sept. 10).

Major H. F. Grant, 4th Hussars, to be Lieut.-Col.

MEMORANDA.

Lieut.-Gen. F. R. Maunsell, C.B., Royal (late Bengal) Engineers, has been placed upon the Unemployed Supernumerary List, under the provisions of Article 107 of the Royal Warrant of June 10, 1884 (June 21).

Col. Sir W. Bellairs, K.C.M.G., C.B., from Lieut.-Col. half-pay, to be Major-Gen., vice H. H. Crealock. C.B., C.M.G., retired (Sept. 4).

Lieut.-Col. F. Brodigan, the Gloucestershire Regt., to be Col. (Sept. 22).

Capt. J. Jervois, R.E., to have the local rank of Major, whilst employed as Deputy-Assist.-Adjt.-Gen. in South Australia (Sept. 12).

Capt. R. L. Appleyard, half-pay, is placed on the Retired List.

[Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 24 and the current year must be understood.]

FRIDAY EVENING.

MILITIA.

WAR OFFICE, PALL MALL, Sept. 26, 1884.

INFANTRY.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry) —Capt. and Hon. Major K. A. A. Brasier-Creagh to be Major.

3rd Battalion, the East Yorkshire Regiment—Major D. Broughton, 1st Batn., to be Adjt., in succession to Major R. V. S. Riall, 1st Batn., whose term of service as Adjt. has expired (Oct. 1).

3rd Battalion, the Royal Welsh Fusiliers—Gordon Edward Boileau Wood, gent., to be Lieut.

3rd and 4th Battalions, the Queen's Own (Royal West Kent Regiment)—Lieut. R. W. Coombs to be Capt.

4th Battalion, the King's (Shropshire Light Infantry)—Major W. C. Seymour resigns his commission; also is granted the hon. rank of Lieut.-Col., and is permitted to wear the prescribed uniform on his retirement. Capt. H. P. Williams to be Major.

8th Battalion, the King's Royal Rifle Corps—Capt. A. W. Lawe resigns his commission.

9th Battalion, the King's Royal Rifle Corps—John Edmund Longfield, gent., to be Lieut.

3rd and 4th Battalions, the Manchester Regiment—Capt. H. H. Gray, from the 4th Batn. the Cheshire Regt., to be Capt.

3rd Battalion, Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's)—Capt. W. W. Sandeman, 2nd Batn., to be Adjt., in succession to Capt. C. Roberts, promoted to a Majority on half-pay (Sept. 1).

2nd Battalion, the Queen's Own Cameron Highlanders—Lieut. R. W. E. Grant resigns his commission.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, Sept. 26, 1884.

Royal North Devon—The Hon. C. J. R. Hepburn-Stuart-Forbes-Trefusis to be Lieut.

VOLUNTEERS.

WAR OFFICE, PALL MALL, Sept. 26, 1884.

ARTILLERY.

1st Cumberland—Lieut. J. Jenkinson resigns his commission.

1st Devonshire—Capt. W. Harvey resigns his commission. Capt. W. Vining resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Inverness-shire—John Taylor Garrioch, gent., to be Lieut. (supernumerary).

3rd Kent (Royal Arsenal)—Charles Edward Grainger, gent., to be Lieut. (supernumerary).

1st Sussex—Henry Habgood, gent., M.D., to be Acting Surg.

2nd East Riding of Yorkshire—John Wright Mason, gent., M.B., to be Lieut.

2nd West Riding of Yorkshire—Arthur Wood Sonnenthal, gent., to be Lieut.

RIFLE.

1st Volunteer Battalion, Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. E. Fisher resigns his commission.

1st Dumbartonshire—The Rev. George Alpine, B.D., to be Acting Chaplain.

3rd Forfar (Dundee Highland)—Capt. C. A. Bushman, 2nd Batn. the Black Watch (Royal Highlanders), to be Adjt., in succession to Major J. H. Tarleton, half-pay, whose term of service as Adjt. has expired (Sept. 13).

1st Volunteer Battalion, the King's Own (Royal Lancaster Regiment)—Horace Barlow-Massicks, Esq., to be Capt.

1st Volunteer Battalion, the Leicestershire Regiment—Lieut. H. W. Plant to be Capt.

1st London (the City of London Rifle Volunteer Brigade)—Lieut.-Col. Comdt. Lord E. W. P. Clinton is granted the hon. rank of Col.

8th (S.W.) Middlesex—Lieut. W. R. Tindale to be Capt.

3rd Volunteer Battalion, the Northumberland Fusiliers—Lieut. A. R. Mackintosh to be Capt.

1st Sussex—Henry Frederick Leicester Locock, gent., to be Lieut. (supernumerary).

1st Volunteer Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Robert Ward Ringrose, gent., to be Lieut.

1st (Hallamshire) Volunteer Battalion, the York and Lancaster Regiment—Lieut.-Col. T. E. Vickers is granted the hon. rank of Col.; Major W. Prest is granted the hon. rank of Lieut.-Col. (both dated Sept. 30).

Where not otherwise stated, the foregoing commissions and announcements bear date Sept. 27, and the current year must be understood.

London Amusements.

◆

When a piece produced in the Metropolis has once secured popularity, a long career is generally assured. "The World," at DRURY LANE, has proved a most successful revival, and is still drawing crowded houses. "Our Boys," at the STRAND, seems likely to keep its place till Boxing Night; and the drama of "In the Ranks," at the ADELPHI, on Wednesday evening passing its three hundredth consecutive representation, may probably remain in the programme at Christmas.

Miss Anderson will revive "Romeo and Juliet" at the LYCEUM about the middle of October. The designs for the dresses and decorative accessories have been furnished by the Hon. Lewis Wingfield. Mr. Standing has been engaged for Mercutio, and Mr. Farren for Friar Laurence.

The VAUDEVILLE THEATRE, closed for three nights to receive some needful attention from painters and paperhangers, reopened on Thursday evening with Mr. Jones's new and original five-act play, entitled, "Saints and Sinners." The scene is laid in an English country town, and depicts middle-class life. Mr. Thorne represents Jacob Fletcher, minister of Bethel Chapel, Mr. Mackintosh and Mr. Robson the senior and junior deacons, Mr. Frederick Thorne the collector of pew rents, Miss Phillips the minister's housekeeper, and Miss Graham the minister's daughter. Mr. Conway plays Eustace Fanshawe, a captain in the Army, and Mr. Neville his friend George Kingsmill. The plot, suggestively indicated by an enumeration of the characters, is novel as a subject of stage treatment, and the scenic illustrations are elaborately realistic.

The GAIETY THEATRE is henceforth to be managed by the directors of "The Gaiety Company, Limited." Mr. Browne's comedy of "A Wet Day" is announced for Monday evening, and Mr. Merivale's burlesque, to be entitled "Called There and Back," is promised as an early novelty. Miss Farren will play Gilbert Vaughan, Mr. Royce Macari, and Miss Gilchrist Pauline.

Mr. Samuel Hayes has arranged a series of performances of Italian opera at HER MAJESTY'S, to be given at what are called "popular" prices. Four representations are announced for each week, beginning at the end of October, and though no great names will appear on the programme, it is understood that the operas most in favour with the general public will be rendered with care and completeness.

When the successful revival of "New Men and Old Acres" has run its course at the COURT THEATRE, the American play of "Young Mrs. Winthrop," by Mr. Bronson Howard, will be produced; and early in the ensuing year may be expected a version of "Les Rantzeau," written by MM. Erckmann-Chatrian, and adapted by Mr. Scott and Mr. Stephenson.

The next novelty at the GLOBE THEATRE will be a farcical three-act comedy, called "Out of Sorts," tentatively produced at the Windsor Theatre last Saturday to preserve the English copyright.

Mr. Baily has taken the OPERA COMIQUE for six weeks, and will open the theatre on Saturday, October 11, with "Nita's First" and "Vice Versâ."

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, Sept. 27, 1884. Letters on Business and Remittances should be sent to Mr. RICHARD JAMES WOOD.

STATIONS OF THE BRITISH ARMY AND NAVY.

NOTICE.—Captain R. ARMIT, *Central London Rangers, formerly Lieutenant R.N., lately engaged on the Staff of* THE ARMY AND NAVY GAZETTE, *having received notice of dismissal six months ago, has ceased to have any connection with this office. This notice is rendered necessary in consequence of statements having been made in circulars, &c., that Captain* ARMIT *had severed his connection with* THE ARMY AND NAVY GAZETTE.

*** *NOTICE.—The* EDITOR *of the* ARMY AND NAVY GAZETTE *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the EDITOR *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE unfortunate announcement of the *Times* yesterday that Lord Wolseley had been recalled afforded another proof of the indiscretion which has been manifested in the direction of the leading journal since the death of Mr. Delane, and of which several conspicuous examples have been afforded under the *régime* of Mr. Chinery's successor. Homer may sometimes nod, but it does not answer now-a-days for Jupiter wide awake to "fright the isle from its propriety" with flashy stage thunderbolts out of a clear sky. There is not a word of truth in the precise statement that Lord Wolseley has been recalled, and that he is to come home before the end of the month. The story was telegraphed from Alexandria—the head-quarters of the Father of lies, as Durban is of the Mother thereof—and its origin may have been some idle telegram from Cairo referring to a report which was being circulated in that lively and mendacious capital; but we have reason to believe that if the gentleman who has for some time past displayed such ability and activity as correspondent of our great contemporary in Egypt had not been disabled by a severe and unlucky accident at this critical time, the telegram would never have appeared, for he would, with his usual energy, have tested the truth of the information, and have examined the basis on which it rested, when the whole fabric would have collapsed, and the *Times* have been spared some considerable mortification. The strange part of the affair is the corroboration of the figment which was given to it in London by the persons to whom our contemporary applied for the purpose of ascertaining the truth, and the result at which the *Times* arrived in consequence of special inquiries, that Lord Wolseley had actually been recalled, and that General Stephenson was to take his place in command of the Expedition! It will take twenty-four hours to run down the blunder and smother it. Indeed, in remote parts of the world, it may go on living for days and weeks, and newspapers in all languages may be discussing learnedly the reasons for the extraordinary action of the Government. But it is wonderful how it could have been accepted at such a moment. Lord Hartington was in attendance at Balmoral; Mr. Gladstone was just beginning to find out in his quiet moments that there were countries as interesting as, and much larger than, Scotland, and that they cared more about Egypt than they did about the Franchise Bill or Redistribution; the Duke of Cambridge was enjoying in Ireland the unwonted and not ungrateful manifestations of the attachment to royalty which has such infrequent occasions for its exhibition; Lord Granville was by the sad sea wave, cogitating an expedient to "nobble Bismarck," and it really was unlikely that Mr. J. Chamberlain, Mr. Mundella, and Sir C. Dilke would form a caucus to recall Lord Wolseley, or that he would come if they did summon him. But, after all, events may quite justify the *Times*, which will then have prophesied in the *paulo-post futurum* tense; for if Gordon's razzia on Berber has succeeded so well, he may alter his intention of retiring from the place, when he hears that an English force has reached Dongola; and should the Nile route be opened up to Khartoum, the Government may consider it desirable to have the Adjutant-General near at hand when Parliament opens, and questions of great gravity may claim the attention of the War Office. Meantime, Lord Wolseley and his Staff are serenely breasting the muddy current of the Nile in one of the most interesting sections of the Sacred River, and are probably at this moment resting at the base of the cliffs in which are hewn out the wondrous statues and the rock temples of Abou Simbel. They are, we may be sure, enjoying themselves in scenes which, despite a monotony of crop-covered banks and arid rocks, of palm and doûm trees, and of golden sand-hills rolling away to the desert horizon, are full of attraction, the air delicious, the commissariat quite good enough, and a prospect at the end of the journey of a scrimmage or two and more promotion. Had it, indeed, been the case that Lord Wolseley was recalled at this stage of the operations to relieve the garrisons—for Gordon is quite safe, having relieved himself—it would have implied that Lord Wolseley, for some inexplicable cause, had not been considered necessary to conduct the operations he was specially commissioned to organise in his own fashion,—in other words, was in disgrace; or that some secret change was revealed to the Government, which made them anxious for the presence of a trusted, indispensible, if not unique, military adviser at their command. Had Lord Wolseley been summoned back, the collapse of the expedition would by no means have followed, of course; but the execution of it on the lines laid down by the General would certainly have been modified, and if it be undesirable to swop horses when crossing a stream, it is still more objectionable to change Generals when an army is on the march. There would, of course, have been a considerable break-up of the Staff arrangements also, and there would have been a very great friction produced in the working of the old stagers and the new comers. It must be remembered that the real work of the Expedition is commenced only when Khartoum is reached. Then begins the solution of a very grave and difficult problem. What is to be done with the civil inhabitants, the men, women, and children—in thousands and tens of thousands—in the towns on the Upper Nile, on the Bahr-el-Gazal—at Gondokoro even—in the districts between Abyssinia and the river, and between the river and the Red Sea? Already we hear the people refuse to leave one of the ceded towns and to abandon their property, and that it would need 30,000 camels to transport their effects! We may be sure the people of Khartoum will not move, except under compulsion. It will be an operation of exceeding difficulty to get away the garrisons south of Khartoum, even if yielding to necessity and common-sense Mr. Gladstone abandons his position and leaves it to Egypt. Perhaps the difficulty may be smoothed down by negotiations with the Mahdi. Or Gordon's expedient may be tried, Zebehr Pasha may be installed—a bitter pill to swallow—but one more or less for the Ministerial stomach cannot matter much.

"HOW We Educate our Officers"* is the title of a small volume which has very opportunely issued from the press. We need scarcely remind our readers of the vital importance of this subject in order to enlist their interest. The latest War Office edicts anent the Army examinations constitute a veritable pronunciamiento, threatening to revolutionise the whole mode of education for our officers. In the latest Warrant for the regulation of the competitive examinations, we look in vain for some rational and intelligible basis that would justify in some measure the many sweeping changes it is proposed to make. But like so many, if not most, of the laws that govern our Army, this Warrant has been framed by men profoundly ignorant of the requirements of the services. The Warrant referred to was framed in consultation with the Head Masters of our Public Schools. Had the War-Office authorities consulted the report issued by the Public Schools Commissions of 1864, or the report of the more recent Commission on Wellington College in 1880, they might easily have foreshadowed the kind of advice likely to emanate from that source. That our readers may be the better able to grasp this question and its bearings, we place both the new and the old Regulations in juxtaposition.

Regulations for the Competitive Examinations for Commissions in the Line and Cavalry:—

Up to the End of the Year 1884.	Marks.
1. MATHEMATICS — viz., algebra, up to and including quadratic equations; the theory and use of logarithms; "Euclid," Books I. to IV. and VI.; plane trigonometry; and mensuration	3,000
2. ENGLISH COMPOSITION, tested by the power of writing an essay, letter, or précis; English literature, limited to specified authors; and English history, limited to certain fixed periods: the authors and periods being notified beforehand	3,000
3. LATIN	3,000
4. GREEK	2,000
5. FRENCH; the Examination to be partly colloquial	2,000
6. GERMAN; the Examination to be partly colloquial	2,000
*7. EXPERIMENTAL SCIENCES—viz., (*a*) chemistry and heat; or (*b*) electricity and magnetism	2,000
8. GENERAL AND PHYSICAL GEOGRAPHY AND GEOLOGY	2,000
9. DRAWING, freehand	1,000
10. ,, geometrical	500

Of these ten subjects Candidates will not be allowed to take up more than four nor less than two.

* Subjects (*a*) and (*b*) are alternative; a Candidate will not be allowed to take both.

From the Year 1885 inclusive.	Marks.
CLASS I.	
1. MATHEMATICS — viz., algebra, up to and including the binomial theorem; the theory and use of logarithms; Euclid, Books I. to IV. and VI.; plane trigonometry up to and including the solution of triangles; and mensuration	3,000
2. LATIN	3,000
3. FRENCH (600 for colloquial)	3,000
4. GERMAN (600 for colloquial)	3,000
CLASS II.	
1. GREEK	2,000
2. HIGHER MATHEMATICS, including analytical geometry; conic sections; differential calculus; statics; and dynamics	2,000
3. ENGLISH HISTORY:—One paper general. One paper limited to a fixed period, of which notice will be given	1,500
4. EXPERIMENTAL SCIENCES†—viz., (*a*) chemistry and heat, or (*b*) electricity and magnetism	1,500
5. GENERAL & PHYSICAL GEOGRAPHY AND GEOLOGY	1,500
CLASS III.	
1. ENGLISH COMPOSITION, tested by the power of writing an essay, letter, or précis	500
2. DRAWING, freehand	500
3. ,, geometrical	‡500

† Subjects (*a*) and (*b*) are alternative; a candidate will not be allowed to take both.

‡ Of these subjects candidates must take up three subjects in Class I., and may, in addition, take up one subject in Class I. or II., and all the subjects in Class III.

In this new scheme mathematics rank very high, and deservedly so; we have no fault to find with the provisions made for this subject, they constitute the one redeeming feature of the whole scheme. Under the old Warrant the marks allotted are,—for English composition, history, and literature, 3,000; for experimental sciences, 2,000; for general and physical geography and geology, 2,000; for freehand drawing, 1,000; or in all 8,000 marks for the four subjects,—and for a soldier, four of the most important subjects. Under the proposed new scheme, these marks are changed as follows:—For English history and literature, 1,500; for composition, 500 = 2,000; for sciences, 1,500; for general and physical geography and geology, 1,500; for freehand drawing,

---

* London: Allen and Co.

500; total for the four subjects, 5,500, or 2,500 less than under the old Warrant. Latin and Greek are to remain stationary, viz., 3,000 and 2,000 marks respectively being awarded for them. For French and German, 2,000 marks each were awarded under the old Warrant, the examination being partly colloquial. The new Warrant proposes to award 3,000 for each, of which 600 may be gained for colloquial knowledge. What is the reason for lowering the marks so conspicuously for English, sciences, and drawing? Is it less important for an English officer and a gentleman —we still look upon these as terms synonymous—to be acquainted with the history and literature of his own country, and to write his mother-tongue correctly, than to possess a smattering of Greek? Is freehand drawing of so little utility to an officer? Are such subjects as chemistry, electricity, magnetism, general and physical geography, and geology of less importance to an officer than Latin, or a parrot-like knowledge of French and German? It would appear that such is the opinion of the framers of this document. When pressed to assign some reason for their extraordinary decision, they reply, "Those are regular crammers' subjects, and our object in framing that Warrant was to put cramming and the crammer down!" May we ask,—What are the crammer's crimes, that he should deserve extermination? His offences are, no doubt, both numerous and grave; but, after all has been said, it must be confessed that he is as much sinned against as sinning; he is the creature, not the creator, of circumstances. Before introducing competitive examinations, our legislators should have taken into consideration the question of preparing for them; but in this, like in other matters, we have imitated and imported from our neighbours, without troubling ourselves about the accessories necessary for a successful transplantation. Our old public schools declined, and still decline, to prepare for these special examinations; they declare it an impossibility to embody the required subjects in their curriculum. What are parents and guardians to do in these circumstances? They adopt the only course open to them, and send their sons to some of the more modern public schools, such as the Oxford Military College or the Cheltenham College, or to special tutors. The latter receive their pupils—who have, perhaps, spent between seven and eight years at some classical school—steeped in ignorance; and, with little time at their disposal, the private tutors or crammers force into their pupils as much ill-digested knowledge in a brief few months as their brain will hold. The examination once passed, the knowledge so hastily amassed is soon forgotten. How can it be otherwise if we persist in forcing the brain in as many months as it should take years to stow away a certain amount of knowledge? Thus, in spite of public schools, competitive examinations, and crammers, we produce annually a number of essentially ignorant officers,—men who, under a better system, might be converted into shining lights. These facts have gradually dawned upon the public, and loud has been the outcry from time to time; but instead of bringing the guilt home to the real culprits, criticism has generally taken the form of abusing the crammers, whose main faults consist in complying with a well-known law of political economy—namely, to supply a demand. Our legislators have created a want, which the crammer has supplied; and thanks to his aid, thousands of young men with legitimate military aspirations have attained the goal of their ambition, to serve their Queen and country. That the crammer has not at all times supplied this want in a manner most conducive to his pupils' prospects in life, and that the system is an objectionable one in many respects, we admit. But the remedies proposed in the new Warrant are far worse than the disease. The first effect of the operation of the new Warrant will inevitably be to lessen the study of sciences, a most deplorable result, when it is borne in mind how important a factor science is in modern warfare and in our daily pursuits,—how all but indispensable it is now-a-days to the soldier. As for English history and literature, few candidates will think the subject sufficiently paying to take it up; a parrot-like knowledge of French and German will carry them further at the examinations than the most profound knowledge of their own mother-tongue, history, and literature. After debasing modern languages, we now find them ranging as next in importance to mathematics, to the exclusion of more important subjects. We do not undervalue the importance of modern languages to a soldier; on the contrary, we fully recognise their immense utility; but their utility, although great, nowise justifies the preponderating influence assigned to them under the new Warrant. The motives of the framers of the new scheme and their advisers is not far to seek. Latin, Greek, and even mathematics, they say, we can manage, so you had better award high marks for them, which is done accordingly. At the age of 17 or 18, when boys begin to be tiresome, we like to get rid of them; they bother us, and require supervision and special treatment. You object to the crammer. Very well, then, award extra high marks for modern languages,—they are said to be useful and necessary to a soldier. We do not exactly believe it; at all events, we cannot and will not teach them; but then everybody knows they cannot be learned except by going abroad, so candidates for the Army must go abroad. That is the way to put down cramming! The extra high marks, and the 600 marks allowed for colloquial knowledge, will undoubtedly have the effect of driving thousands of our Army candidates annually abroad. One of the gravest charges brought against the crammer is a want of moral training and an absence of supervision over his pupils. There is also too much truth in these assertions to attempt a denial, but, we repeat, it is the system, not the men, that are at fault. Will this absence of moral training, this want of supervision, be supplied by a residence on the Continent? What special advantages has the French or German tutor over his English colleague in this respect? Are Continental morals superior to our own? We leave our readers to answer these questions for themselves. The new Warrant will undoubtedly do much to extinguish cramming at home, and transplant it on a foreign soil.

THE condition of the British Navy has now been very freely discussed and criticised by authorities on Naval matters, whose opinions and suggestions are entitled to the respect of the country. Among the numerous correspondents, there exists a remarkable unanimity of statement on the main point, and there is a general concurrence of opinion that the first line of defence is lamentably weak, and ought to be strengthened without delay. The work of bringing up the strength of the Navy to a state of admitted efficiency will require considerable time, the construction of our most powerful ironclads occupying years, therefore any unnecessary delay in adding to our Naval strength would be of the most serious consequence. To make up for our deficiency, vessels of a class which would place this country in a position of very much greater security may be constructed in less than two years. Sir William Armstrong, in referring to the steel cruiser *Esmeralda*, built for the Chilian Government, asserts that no cruiser in the British Navy is swift enough to catch her, or strong enough to take her; and although she has sufficient coal-carrying capacity to enable her to keep the sea for an unusual length of time, she has also the great advantage of being of comparatively small dimensions. Although unarmoured, this remarkable vessel is almost absolutely secure against the worst effects of projectiles. A cruiser of this type of "the sea-wolf of the future" can be built in less than two years. No nation is so dependent upon her commerce as England, and our Mercantile Marine is the most numerous in the world; yet Sir William Armstrong states "our Fleet of swift cruisers is perfectly insignificant in relation to the number of ships to be protected or the extent of ocean to be covered." Imagination may suggest with adequate reason, based on a knowledge of facts and some experience in the past, how immense would be the damage that one smartly-handled *Esmeralda* might do, if let loose against England. She would probably give the "go-by to our ironclads," and inflict fatal injury, with very little damage to the cruiser. The Navy is in need of fast cruisers, and ships of this class may be constructed at a comparatively small cost—while "the fate of a nation might turn upon the loss of a monster armour-clad, either by defeat or accident." The ex-First Lord of the Admiralty was recently twitted, after his recent suggestions, because he had refrained from expressing any opinion on the question whether, in his judgment, "the Navy, in its present and prospective condition, is entirely adequate to the discharge of the duties required of it," and whether the anxiety in the country is well founded or not. Mr. W. H. Smith has just supplied this alleged omission. He states that he has examined very seriously indeed the question whether the provisions for the security of the seas and for the safety of every ship flying the English flag are sufficient. He had seen what was being done by the European Navies, and he had come to the conclusion that our present Naval force was inadequate. Like Sir W. Armstrong, the ex-First Lord of the Admiralty repeats the "old, but still unlearnt lesson" of the danger to our commerce, and contends that "we must have fast cruisers enough to make it impossible for the cruisers of the enemy to sweep the seas, and it was a serious question whether we had enough fast cruisers to keep the seas secure from the enemy." France, if engaged in a war with England, would not attack the English fleet of ironclads, but she would arm and equip and send into all parts of the world a number of fast cruisers, which would attack our ships and cripple our commerce. To meet such a possible contingency it behoves England to construct cruisers like the one built for the Chilian Government, heavily armed, and "swift as a flying scud." Mr. Smith believes that war is as possible now as at any period of the history of the world, while he regrets that England has so few friends. The British nation is bound, he contends, "in justice to themselves and to others, to use all the precautions which are necessary to make the sea as safe for the flag of this country as they believe their island home to be." The ex-First Lord significantly declares that unless the professional officers of the Navy are able to say positively that they are prepared now to secure the interests of this country at sea, the force must be increased. Professional officers of the Navy have declared that the force is insufficient. Sir Edward Reed, always an able critic of the Naval policy of successive Administrations, has spoken to some purpose on this subject. He is avowedly a strong supporter of the present Administration. After admitting that he has frequently been silent because he would not create embarrassments for the party he represents, Sir Edward Reed has at length spoken in the plainest possible terms. The difficulty is "to encounter the great, astonishing, and continual indifference of the people of England to our position as a Naval nation." "You are content," he asserts, "to let your Navy go forward, starved and sacrificed, because you do not realise the frightful position that must ensue from a single overthrow of your Naval force." He contends that the question to be confronted is not,—Is it equal, and will it be equal three or four years hence, to a combination of Naval Powers, but to a single Power? Sir E. Reed maintains that no Cabinet has kept the power of England at sea in a state adequate to demands upon it; what they thought of was to prevent any increase of the Estimates. Therein lay the root of the whole question, and hence it was that we had reached the position we now occupied. These three important speeches have the merit of variety and straightforwardness. Parliament will speedily be obliged to discuss this question, and if "there is not a member of the present Board of Admiralty, from Lord Northbrook downwards, who is not ready to admit that the statements of both Mr. Smith and Sir Edward Reed are substantially correct," then the time for discussion or committees has passed, and the time for action has come. It is essential that some official statement should be made to relieve the national anxiety.

THE letters and articles in the *Pall Mall Gazette* on the subject of the Fleet have attracted a good deal of attention on the other side of the Channel. To the assertion that the French Government, after making up its mind to diminish the Naval expenditure by £2,000,000 in the ordinary Budget, had asked for £2,600,000 from the extraordinary Budget to complete the armament of the fleet and the coast defences, the following reply is given:—"The Minister of Marine has asked for this money, but the Committee on the Budget has not yet come to any decision on the matter." We are then told that the sum is not for immediate expenditure, but to be spread over a period of ten years. The *Temps*, a very able and moderate paper, complains that the French Navy has been credited in the way of sea-going ships with vessels which have been condemned, and with vessels the keel of which has not been laid, and that the inverse proceeding has been resorted to with regard to the British Fleet. The Budget of the French Navy, it adds, hardly exceeds 150 million francs, while that of England exceeds 275 million. The *Temps* admits that in the event of a Naval war England would be exposed to an immense danger, and that this is our feeble point. We are reminded of the excitement caused in England in 1878 when Russia purchased a fleet of cruisers, and the writer might have mentioned, when it was found that one of these cruisers was knocking about the Channel ready to commence operations at any moment. According to the *Temps*, the English Fleet is quite inadequate to protect the "army of vessels" which imports annually

15,000,000 and exports 17,000,000 tons of merchandise. It is true that the *Temps* says the problem which English statesmen have to solve is insolvable, and that if we were to double the strength of our Fleet, to render our coasts invulnerable, to possess any number of torpedo-boats, we should still be exposed to suffer irreparable loss in the event of war with even a third-rate Power, so immense is our commerce. It none the less behoves our rulers to accord our commerce afloat the greatest possible amount of security. If we turn to the *Avenir Militaire*, which deals with naval as well as military matters, we find such observations as these. Sir Thomas Symonds declares that England could not send to sea such a squadron as that which France sent to China at the end of August, composed of the *Terrible*, *Furieux*, *Fulminant*, *Tonnerre*, and *Tempête*. The *Avenir* points out that the gallant Admiral jumped at a false conclusion on reading in the *Times* that five ships had passed through the Straits of Gibraltar steering east. The five vessels signalled formed the squadron of evolution under the command of Rear-Admiral Juarez, and did not include any of the ironclads mentioned by Sir Thomas Symonds. The *Terrible* and *Furieux* are not yet finished, and will not be ready for sea for another year. The *Fulminant* and *Tempête* are not in commission, nor have any orders been given to arm them, although they are more formidable than the wooden ironclads composing the squadron of Admiral Juarez. These vessels have hardly any freeboard, and are so uncomfortable that it is not probable that they will be employed, except in the event of war. The *Tonnerre* and the *Vengeur*, the same type as the *Fulminant* and *Tempête*, have been sent to sea merely to test their capabilities. "Thus," says the *Avenir*, "vanishes the phantom which troubled the imagination of the British Admiral, who sees French ironclads which are still on the stocks, even those commenced last year, already afloat, with guns and stores on board." The writer concludes by observing that the English Government would not have presumed to violate their engagements in Egypt had they not been aware that the superiority in the way of ironclads is still, and will be for some time, in their favour.

AN interesting International Conference is being held at Washington for the purpose of endeavouring to fix a Prime Meridian, to be universally accepted by all nations. The United States Government has received the learned gentlemen who have assembled in the Federal capital in a manner signifying the high importance in which the subject to be discussed is estimated. Admiral Rogers, of the United States Navy, has been elected permanent Chairman, and the Conference is composed of forty representatives of twenty-two countries. The necessity for this Conference is obvious. While English geographers have adopted Greenwich as their Prime Meridian, Parisian scientists have calculated from Paris, Americans from Washington, Russians from Pulkova, and other countries use the places within their own dominions, the result being that it becomes necessary for the observer, under the present confused conditions, to ascertain what meridian the explorer has reckoned from. As a greater number of the maps are constructed on the Greenwich basis, the Prime Meridian has been calculated by the majority of geographers from that point, owing to the fact that our sea charts are undoubtedly the best, our navigators having surveyed every land and sea. The ancient Greeks, regarding their country as the centre of the earth, calculated the meridian accordingly, and so modern nations have severally chosen the meridian running through their capital, or chief observatory, as the right one from which to reckon. Ferro, one of the western isles, was the Prime Meridian at one time, which many nations adopted; but that basis was abandoned, and a chaotic state of things has been permitted to exist which this Conference will, it is anticipated, terminate. Modern navigators have been furnished with the means of ascertaining longitude with great accuracy by the relation of a meridian to time. The Prime Meridian question occupied the attention of the Geodetic Congress held in London last autumn, and after an exhaustive discussion it was agreed, almost unanimously, that Greenwich ought to be accepted by all nations as the "universal starting-point for the measurement of longitude." The representative of France stood alone in opposition, and it is alleged that this course will be repeated and the adoption of any other meridional zero except Paris strenuously opposed. If this policy is due to patriotism, it is very much misplaced—if not altogether absurd. Apart from all other considerations, the general adoption of Greenwich would be the most economical and convenient solution of the question; and it is difficult to discover any other that could possibly be accepted by England. The adoption of Greenwich is no reflection on France whatever, and assuredly England is not aggrandised by the arrangement. If any other Prime Meridian were decided upon, the results would be most disadvantageous, and the changes necessary almost impracticable. As the Geodetic Congress could not bind other nations, the subject was referred to the decision of an International Congress, held under State authority. Thus the Conference of Washington has been summoned by Congress, and the inaugural address was delivered by the doyen of the Ambassadors accredited to the United States. Passing the scientific matters involved, we are reminded that "Harrington, by his invention of the Chronometer in 1761, afforded the means of conveying the mean-time to Greenwich—or any other meridian—to any part of the world, and since then, a comparison between the local time and the time of the selected meridian, at once informs the navigator how far the two places are apart. If he has a chart calculated from one meridian, and a chronometer showing the time at another, he has to calculate a second difference; and it would be a manifest gain to mariners if this trouble could be set aside, and if the charts prepared in all countries could be rendered equally available for the ships of all nations." It is satisfactory to know that the Conference is composed of scientific gentlemen who will bring to bear on the discussions great technical and practical knowledge. Without desiring to anticipate the result of the deliberations, it is only reasonable to suppose that the decision of the Geodetic Conference in London will be maintained. France may oppose, but it is not likely, under the circumstances, that she will do other than protest, as her interests will be best upheld by joining in an international understanding. Another question, in addition to the general or nautical uses of the meridian, will be discussed, in reference to the fixing of time. It will be considered whether in future longitudes should be calculated, not east and west of the Prime Meridian, but simply so many degrees from it, following the sun in its course round the world, without regard to the duration. It is proposed in future to reckon degrees of longitude in time. This subject is somewhat exhaustive, and need not now be discussed, as the question has yet to be considered at the Congress. The progress of the Washington Congress will be watched with interest, and the conclusions regarding the Prime Meridian for longitude will be embodied in the Law of Nations, thus by universal consent settling a question of paramount importance.

The *Wasp* court-martial should clear up many matters. One matter is clear enough already. A glance at the *Navy List* will show that many of the gun-vessels employed on "particular service" are very much under-officered as regards deck watch-keeping. There are two of these vessels, one of 600, the other of 450 tons; one lieutenant in command and one warrant officer. Two vessels, one of 600, the other 330 tons, carry one lieutenant and one warrant officer, but have an additional warrant officer for temporary service. Seven others carry two officers available for watch-keeping purposes under the officer in command, but in three ships out of the seven the extra officer is only additional for temporary service.

Rear-Admiral Tryon has selected Staff Commander James R. Quinn, now on half-pay, as the staff commander of his flagship.

The Mediterranean Squadron, under the command of Admiral Lord John Hay, and consisting of the *Alexandra*, *Inflexible*, *Superb*, and *Téméraire*, arrived off Limasol from Brindisi, on Thursday, and subsequently anchored in the harbour.

The Admiralty have issued orders directing that both divisions of the Channel Squadron are to be ready for sea on the 16th inst., under the command of Vice-Admiral the Duke of Edinburgh. It is understood that the programme of the winter cruise of the squadron has presented some difficulties to the authorities, owing to the prevalence of cholera on the seaboard of the Continent, both on the Atlantic and Mediterranean sides. But the cruise, according to present arrangements, will probably be to Madeira, the Azores, and the Canary Islands, and afterwards to Gibraltar for orders. The squadron will not be allowed to be more than a few days away from a telegraphic station, owing to Eastern complications. All supernumeraries of the seaman class in the Channel Squadron ships are to be drafted into the Reserve for newly-commissioned ships, and as many boys as can be passed out of the various training-ships will be sent to replace them.

Vice-Admiral John Corbett, C.B., who has been selected for the appointment of Commander-in-Chief at the Nore, will hoist his flag on board the *Duncan* at Sheerness, on the 27th inst.

The French Naval Divisions are seven in number:—The Northern Atlantic; the division of China (Japan, Tonquin, Cochin China); the Indian Sea division; the South Atlantic division; the Pacific Ocean division; the division of New Caledonia; and the division of the Levant.

We are scarcely surprised, considering the apathy shown by the Government on all matters of national defence, that the absolutely defenceless condition of Esquimault, in Vancouver's Island, our only naval depot along the whole coast of North and South America, continues unnoticed. In the event of war, it seems probable the whole of our commerce in the Pacific will have to be sacrificed, in order that the few ships we maintain in those seas should protect Esquimault, and the hardly less important neighbouring coal-field of Nainaimo. So extraordinary has been the position chosen for the depôt, that in order to defend it ships in the anchorage would have actually to fire over and through the storehouses. No dock exists here for the repair of our ships; in short, everything seems prepared for a disaster to our shipping in that part of the world.

Captain Long, who has served for the last three years as Chief Organiser and Vice-Admiral of the Chinese Imperial Navy, has resigned the position he held under the Chinese Government, in consequence of the outbreak of hostilities between France and China.

The German Squadron will proceed to the West Coast of Africa about the middle of this month. It has been semi-officially explained that this movement has been ordered "for the protection of German interests, and the proper representation of the German flag on the West Coast of Africa. The vessels selected are of the corvette class, and are the two cruisers of the second class, *Bismarck* and *Gneisenau*, and two cruisers of the third class, *Olga* and *Ariadne*. The first destination of the squadron is Fernando Po, from which point it is to cruise down past Lüderitzhafen as far south as the frontiers of Cape Colony. West Africa is to be the fifth naval station of the German Navy, and at the same time, the most important of them. With the exception of the East Asian station, there is no Commodore on the other stations, the German flag being carried only by single vessels on the three other stations, which are those of the South Pacific, the eastern and western coasts of America.

We regret to announce that Admiral Chaloner, C.B., is lying seriously ill at his seat, Loughall, near Guisborough, Yorkshire.

The Lords of the Admiralty will, it is understood, be present at the launch of the armour-plated ship *Rodney* on Wednesday next, after which they will commence their annual inspection of the Dockyards and other Naval establishments. The First Lord, being in Egypt, cannot this year accompany his official colleagues, whose tour will be regarded with particular interest on account of the national anxiety expressed regarding the state of the Navy. Colonel Percy Smith, Director of Works, has completed his preliminary examination of the sites for proposed new works which are now being numbered for the convenience of the Lords of the Admiralty. The *Enchantress* will leave Portsmouth for Chatham to-day for the use of their Lordships during their inspection. It has been decided to give a public reception to the Duke and Duchess of Edinburgh on their visit to Chatham, when the Duchess will christen the *Rodney*. Extensive preparations are being made for the launch, accommodation having been provided for many thousands of visitors.

The condition of the French Navy has recently been keenly criticised, and its comparative excellence freely discussed. While the state of the British Navy has been the subject of interesting correspondence tending to demonstrate deplorable weakness, the French Press, with singular unanimity, deny that the French Navy is "anything like so good as the English." *Le Voltaire* treats the article written to prove its alleged superiority as an attempt to throw dust in the eyes of British taxpayers, who will, it insinuates, soon be asked to pay heavy Naval Estimates. *La Justice* has taken precisely the same view, and has warned the French not to flatter themselves that they are in a position to withstand the English successfully at sea. In the *République Française* a warning article has been published on this subject. Admiral Symonds is accused of "laying a trap with a bait for French vanity," and at the same time bringing Great Britain to make new sacrifices. It denies that the ironclads *Terrible*, *Furieux*, *Fulminant*, *Tonnerre*, and *Tempête* are on the way to China, as they are lying quietly in French ports, but Sir T. Symonds is too eager to be always accurate. Moreover, the Naval Estimates have, says the *République Française*, been so cut down that it would be impossible, were these vessels wanted, to get them soon ready. The French Press do not assuredly evince any disposition to overrate their national maritime strength, and it may be questioned whether they take proper credit for their Naval strength and efficiency.

An appointment will shortly become vacant in the *Victoria and Albert*, in consequence of the retirement of Staff Commander Stopford C. Tracey, who will be invalided out of the service, much regretted.

The Admiralty are, it appears, taking practical measures for strengthening the British Fleet in China waters. A considerable supply of war stores have been despatched from Woolwich to Hong Kong in the *Benarty*, and on Wednesday the Admiralty commenced the shipment, on board the *Glenalvon*, in the West India Docks, of 600 tons of ordnance, shot, shell, and other war stores, addressed to "The Senior Officer of Ordnance Stores, Hong Kong." Amongst the ordnance is a full battery of 8·1 in. 70-cwt. muzzle-loading howitzers, with broad-wheeled gun-carriages and limbers complete, together with the requisite ammunition; 160 rounds of common shell will be sent out with each gun. Fittings are being made on board the P. and O. steamship *Ganges*, loading in the Royal Albert Docks, Woolwich, for the accommodation of 60 Blue-jackets, ordered out for duty at the China station.

Captain Raven, of the German Navy, has, according to a telegram, announced that he had placed the African coast line between latitude 26 deg. S. and Walvisch Bay, as well as that north of the latter point as far as Cape Frio, under German protection. The German flag had been hoisted at Sandwich Harbour, as well as north of Walvisch Bay and at Cape Frio, and boundary posts had also been erected bearing the German national colours. This information is sent by the representative of a German firm in Angra Pequena, with a request by Captain Raven to communicate the intelligence to all German or English war vessels which might call at Angra Pequena.

The appointment of British Consul in the territories of the African Chiefs in the districts adjacent to Lake Nyassa, has become vacant by the death of Captain C. E. Foot, R.N., who was appointed to that post only in October, news of which has just been received from Mozambique. Captain Foot rendered valuable service in the suppression of the slave-trade on the East Coast of Africa, and commanded her Majesty's ship *Ruby* in the Egyptian War of 1882, having previously served with the Naval Brigade in the Indian Mutiny and on the West Coast of Africa. He received the thanks of the Commander-in-Chief and the Government of India for effecting the capture of the ex-Sultan of Muscat on his attempt to land with an armed force to seize that place in October, 1875. The vacant appointment is now one of special interest, and Captain Foot's successor will be invested with authority, in the discharge of which much tact and discretion are essential.

The International Prime Meridian Conference was opened at Washington, in State, on Wednesday. Forty delegates were present, representing twenty-two countries, and were welcomed by Mr. Freylinghuysen. Count Lewenhaupt, the Swedish Minister, acted as temporary chairman. Admiral Rogers, of the United States Navy, was elected permanent president. The important scientific considerations by this Conference will be regarded with universal interest.

It is reported that when the French Chambers meet, both the Minister of War and the Minister of Marine will have to ask for more money. Tonquin and the complications with China have already cost France about £10,000,000, according to M. Jules Richard, who adds,—"Our armaments are killing us. Our Estimates provide for over 600,000 soldiers and sailors. It is proposed to augment this number by forcing all the men of 20 years of age to serve for three years. . . . . . . Better have war at once than this Budget which drains us of men and money." And the writer thinks that on the same principle that Charles X., Louis Philippe, and Napoleon III. were driven from the throne, M. Jules Ferry should be turned out of office.

The Inspector-General of Fortifications, &c., Major-General Sir Andrew Clarke, will visit Aldershot on Monday next, for the purpose of inspecting the buildings in the command, especially those which are being erected in accordance with the plan of camp reconstruction. This scheme looks imposing enough on paper. It provides accommodation, in permanent buildings, for the whole of the troops of all arms composing the 1st Army Corps for active service, and sweeps away the wretched kraals which cumber the ground in the North and South Camps. But to carry out this measure of wholesome reform, an expenditure of at least two millions will be necessary; and hitherto the vote for Aldershot Camp reconstruction has not exceeded £10,000 a year, which means construction at the rate of one building (capable of housing 40 men, about a half-battalion) per month. At this rate of progress it is highly probable that not a few of the Aldershot huts, patched and repaired from year to year until none of the original materials are left, may yet outlast some of the "permanent" buildings, with felted roofs, which have been built during the last two years at a cost of about £800 each, and which already stand in need of repair.

The following startling paragraph appears in the *Times of India* received this week:—"The sentence of the general court-martial on Private Connors, of the Royal Irish Regiment, was read out on Wednesday in presence of the whole of the European troops in the garrison. The crime was attempting to shoot an officer; the punishment awarded, ten years' penal servitude, and discharge with ignominy, both confirmed by his Excellency the Commander-in-Chief of Bombay. It is an astonishing fact that this is the third time this soldier has been sentenced to be discharged with ignominy. In the two previous instances the sentence was remitted by the Commander-in-Chief in India. It is really too bad that such scoundrels as Private Connors should be sent back to serve in their corps among respectable soldiers." Some inspired articles have appeared in the *Times* lately on the want of discretion occasionally shown by commanding officers in dealing with questions affecting discipline, and urging what appears to us culpable leniency in dealing with such cases. We trust that the warning conveyed by Private Connors' case may not be disregarded, and that all officers in command will be encouraged to maintain discipline with the requisite strictness, notwithstanding the disappointment it must naturally cause those in authority who are advocates of young and immature soldiers, to find the returns of crimes and punishments affected thereby. Even the writer in the *Times* could hardly counsel a policy of expostulation with would-be murderers.

The number of sick in the Aldershot command on the occasion of the recent inspection of less than 5,000 troops at the Camp by the Commander-in-Chief was 423. The two battalions in the Permanent Barracks (the 1st Battalion, 17th, and 19th Regiments), close to the lowest haunts of vice in the town of Aldershot, had respectively 47 and 43 men in hospital, a much larger number than any other corps in camp. More than one-half the sickness at Aldershot among the troops at the present time is due to preventible causes.

A correspondent of the *Pall Mall Gazette*, writing from Winnipeg on September 7, says:—

> "A scene took place yesterday in Winnipeg that certainly gave an onlooker food for reflection, and would have thrilled the pulses of an Imperial Federationist. Something like 4,000 people crowded on to the platform of the station in the evening to bid farewell to 75 Manitobans, who were bound for Wolseley's army in the Soudan. There was considerable enthusiasm and much hurrahing and shaking of hands as the two cars full of embryo campaigners rolled out towards the Red River. It seemed a strange thing to stand upon a spot that but yesterday was a desert prairie, crossed by a few Indian and half-breed trails, and find oneself carried off one's feet by a surging and a shouting throng of stalwart Britons bound for the banks of the Nile.

A combined minor operation took place at Aldershot yesterday (Friday) morning, in which nearly the whole of the effective Infantry strength of the Division was engaged. The general idea was that the rear-guard of a force retreating northwards on Chobham had taken up a position on the Fox Hills, to cover the passage of the main body across the Basingstoke Canal, and to check a pursuing force advancing from Farnham. The Northern Force, under the command of Lieutenant-Colonel Helsham Jones, R.E., consisted of the 1st Battalion, 21st Royal Scots Fusiliers, 73rd Highlanders, three squadrons of the 7th and 20th Hussars, and one Battery, R.H.A.; and the Southern Force, under the command of Colonel Nicholl, 3rd Rifle Brigade, consisted of the 3rd Battalion, Rifle Brigade; the 1st Battalion, 17th, and 62nd Regiments, two squadrons 2nd Dragoon Guards, and one field Battery. The operation commenced shortly after 10 o'clock. The officer commanding Southern Force received instructions to press on vigorously, and delay the construction of earthworks by the enemy at Chobham, by causing him to reinforce his rear-guard; while the Northern commander was ordered to delay the enemy as long as possible, and give the officer commanding the main body at Chobham time to complete his entrenchments. After a sharp engagement, in which the Cavalry of the Northern force must have suffered severely, the Northern commander skilfully withdrew his force across the canal, and was holding his opponent well in check, when the "cease fire" sounded. Major-General T. C. Lyons, acted as Umpire-in-chief, with Lieutenant-Colonel Blake, 20th Hussars, Major Hickman, R.H.A., and Major Bridge, 21st Royal Scots Fusiliers, umpires for Northern force, and Major Hunt, 7th Hussars, Major Douglas, R.A., and Lieutenant-Colonel Boughey, 62nd Regiment, for Southern force. Lieutenant-General Sir Archibald Alison, Bart., and Divisional Staff were present during the operations.

L'Armée Française raises its voice against the excessively laudatory terms in which were couched the orders of the day addressed to the troops recently engaged in autum manœuvring. The Reservists were congratulated for their spirit of sacrifice, their devotion to their country, and their discipline. In fact, the troops were congratulated as if they had struggled victoriously through a hard-fought campaign. In another column, *L'Armée Française* points out that the officers of the Reserve were found sadly wanting, that most of them are old one-year volunteers, who are not sufficiently up to their work, and who exhibited the greatest incapacity. The writer truly observes that in order to be a lieutenant, it requires more than one year's soldiering under easy conditions.

The reconstruction of Aldershot Camp drags slowly on, one building, capable of housing about 40 men, being erected each month. At this rate of progress, when the reconstruction is complete, the huts now being built will be very old bricks and mortar indeed. It is not improbable that some of the now condemned huts, erected during the Crimean war, and patched and repatched year after year since until scarcely any of the original material is now left, may yet out-last a few of the permanent buildings erected last year, and which seem to stand in need of repairs already. Accommodation will be provided in permanent buildings for the troops of all arms composing the 1st Army Corps for service. But an expenditure of about one and a half millions will be necessary, and hitherto only £20,000 a year has been voted for the purpose.

Àpropos of our recent remarks on the pernicious Pecksniffian custom of our great dailies and their fashion of lecturing, we take from the *Egyptian Gazette*, which is a Jingo of the Alexandrian type, the following sensible remarks:—

> "Nations, like individuals, are not partial to advice. For years together our *Times* used to lecture the French Empire on the exaggerated character of its armaments, but with no result; and it appeared later on that the French would only have been acting sensibly had they exaggerated their armaments fourfold. After the Empire fell, our writers in the daily press took Italy under their protection, and they have not done with her yet. 'Of what use is a large army to you,' they ask, 'since no one threatens you? You are ruining the country by keeping up an army and navy out of all proportion to your requirements. Much better would it be for you if you gave yourselves to commercial pursuits, and spent your money on educating your millions of ignorant peasants.' Whether the advice be wise or not we cannot undertake to say, but that it should be expected that such advice would be acceptable does not argue a profound acquaintance with the people to whom it was given. There is abundant proof that Italians of all shades of opinion have formed a set determination to give the greatest possible development to their naval and military forces. We see this proof in the literature of the country, in the conversations of statesman, in the support accorded to each successive Government when it is a question of strengthening the national defences. Italians want to show that they have done with foreign patronage; and a country which has suffered, as it has done, under the dominion of the stranger, may well be excused if it takes every reasonable precaution against the recurrence of invasion and a possible fresh dismemberment. 'Our first duty,' writes an Italian, 'was to exist; the next to think about the means of existence.'"

There is but little "generosity" in the treatment of "allies" by any people. In a Spanish History in use in the schools of the Peninsula it is stated, in the account of the invasion by the French in the beginning of the century, that "at this time the English Government, anxious to make a diversion which might save their coasts from invasion, sent an expedition under a General named Wellesley, which rendered considerable help to the National Armies." We, on the other hand, take very little note of the immense support that General received from the Spanish armies and the guerilla. So there is little of Eugene and a great deal of Marlborough in the English histories of Ann's wars, the aid given by the Prussians to Wellington at Waterloo is not prominently recognised, except by such careful and conscientious critics as Hooper and Brackenbury; while the Prussians, *en revanche*, treat Waterloo as a battle in which the British allies made a fine resistance to Bonaparte, but were about to give in when Blucher appeared, and finished off the Emperor. Bazancourt and Kinglake do not quite agree in their appreciation of the relative *rôles* of French and English in the Crimea. Our last example is the case of the Mudir of Dongola, who has fought quite as well and as successfully as Gordon, without his steamers and his Krupps, and who has had not only no leading article, but very considerable suspicion, vilification, and now, it would seem, supersession for his portion. Sir Herbert Stewart could not serve under the Mudir, nor could any English troops; but Major Kitchener, who has shown character and ability, and has gained the Mudir's confidence, could have been left as an intermediary, being in the Egyptian Army. However, if Gordon *farà da se*, it will not much matter. Undoubtedly, the preservation of the great Mudirieh of Dongola has been of an enormous importance and assistance to Gordon in his defence of Khartoum. In an English paper, published in Alexandria, we read:—

> "His Highness the Khedive has received a telegram from the native officers of Debbeh, in which they give an account of the fight and victory of the Mudir of Dongola over the Mahdi's forces. Their account confirms in every respect the one sent by the Mudir, whose forces, it appears, numbered only 400, all told; whilst the enemy brought 3,000 men on the field, all of whom were armed with Remington rifles. The Mudir is stated to have behaved with the greatest bravery throughout the battle."

The same paper announces that the Khedive has promoted Mustapha Bey Yawar, Mudir of Dongola, to the rank of Pasha, in recognition of the loyal and faithful services rendered to the Government of his Highness in holding the province of Dongola against overwhelming odds. We should like to see our own Government making some acknowledgment of their sense of this gallant "native's" courage and conduct, all the more conspicuous in that he is a very fervid Moslem. There has been a steady and apparently successful attempt to run down the Egyptian as an arrant coward because Hicks's army was defeated after three days' desperate fighting without food or water, and Baker's disaster with an impossible canaille. We have not seen in any English newspaper the "orders" which were issued respecting the conduct of the Egyptian troops serving with Sir Gerald Graham's expedition. They were as follows:—

"The Sirdar Sir Evelyn Wood has much pleasure in publishing the following favourable reports on the conduct of Egyptian troops serving with the late Expeditionary Force on the Red Sea Littoral:—*Artillery.*—From Major Lloyd's report, embodied in Gen. Graham's report, dated Tokar, March 3, 1884:—'The Egyptian soldiers and camel-leaders behaved well under fire, and showed perfect discipline, but they were not engaged at the guns. I also received much assistance from Muckhtar Effendi, an Egyptian officer attached to the force. *Infantry.*—Extract from report of D.A.C.G. Rainsford, officer in charge of transport, to S.C.O., dated April, 1884:—'The conduct of the men throughout was good." Extract from report of A.C.G. Nugent, S.C.O., to S.C.O., dated Alexandria, April 19, 1884:—'I can thoroughly endorse the good opinion expressed by D.A.C.G. Rainsford and Major Quirk on the conduct of these men. Their duties were very arduous, but throughout the operations the Egyptian soldiers were cheerful and obedient.' *Cavalry.*—Extract from a copy of a letter received by the Adjutant-General, Egyptian Army, from Lieutenant-Colonel Taylor, commanding Egyptian Cavalry:—'Commander Rolfe, R.N., informed me that these men (14) performed their duties during the action not only well, but bravely.' "

Classes for the training of officers and men of the Regular and Auxiliary Forces in "ambulance drill and first aid to the wounded," will be formed during the present month at all military stations where practicable. The instruction will be carried out under the orders of general or other officers commanding, and principal medical officers of districts. Commanding officers have been ordered to afford medical officers and others undertaking the duty every facility for the formation and instruction of classes, and will detail a competent non-commissioned officer to assist the medical officer in the drill. Officers and men of any branch of the service will be allowed to attend. The course of instruction will consist of at least twelve lectures and drills, of which nine attendances must be certified by the instructing medical officer before application is made for examination as to proficiency. A class will consist of not less than eight persons. Any number of officers and men may qualify, but certificates of proficiency will not be granted to the Regular Forces, but only to the Militia and Volunteers. In Militia and Volunteer corps, two for each company of the rank and file of those holding certificates will be selected as the recognised stretcher-bearers of the corps, and as such, will be entitled to wear the Geneva badge on the right arm. To ensure efficiency, and the retention of the right to wear the badge, the recognised stretcher-bearers of Militia and Volunteer corps will be required to attend four stretcher drills annually.

Whatever steps may have been taken to attract candidates for first appointments as subaltern officers in the Militia to fill the existing vacancies, will be of little avail unless provision is made for the promotion to higher rank of captain now serving, by the retirement at an earlier age than 55 and 60 years of majors and lieutenant-colonels respectively. Were these appointments still held by county gentlemen of influence, the establishment of Militia officers generally would be made up, as formerly, of gentlemen whose position in a county rendered them indifferent to the mere fact of qualifying for higher rank; but the offer of Line commissions has resulted in numbers of young gentlemen joining the Militia with the ulterior object of transfer to the Line—those who are successful in passing the prescribed examination do not all succeed in obtaining a commission in the Line on account of the number of commissions being limited—and after having been put to great expense and oftentimes inconvenience in preparing for examination, submit their resignations with a feeling of disappointment. Promotion is very keenly sought for by the subaltern officers, and comparing the number of vacancies for captain with those for lieutenant it will be clearly seen that with better inducements the establishment for the former would soon be completed, and thus a spirit of emulation would be infused into the lower rank with the effect of candidates offering themselves in larger numbers than at present is the case. In many regiments the same vacancies during training are filled annually by captains whose services are not required with their own battalions, and for whom pay is allowed, providing the vacancy exists in the establishment, through sickness, duly certified. This is in itself a proof that officers are desirous of giving their services; and it would be very advisable if pay were sanctioned to those captains who are attached to fill vacancies caused by the absence of officers on leave or Parliamentary duties. Much dissatisfaction prevails from the knowledge that one's services during a training are not recognised by the Financial Department. If the establishment of captains were complete, the necessity of obtaining the services of officers from other battalions would be obviated, the practice being much deprecated by many commanding officers. Should it happen that the country requires the services of the Militia, the paucity of captains and subalterns would be severely felt, and it is in the interest of the authorities to make the Militia sufficiently remunerative to its officers to enable them to meet the expenses of the annual training, as well as to offer a more certain chance of promotion than now obtains.

Foreign Literature.

The *Militär-Wochenblatt*, referring to the ride made in July of last year by the Russian School of Cavalry Officers, when 149 miles were covered in $40\frac{1}{2}$ hours, of which $27\frac{1}{2}$ hours were actual riding, mentions two further experiments, undertaken in December of last year and March of this year. The ride in December extended over 370 versts (230 miles), and was made from St. Petersburg to Novgorod and back. It was undertaken by seven officers, seven men, and 18 horses, the latter having been prepared for their work during the previous month by forced marches in the neighbourhood of St. Petersburg. The march extended over four days, the average daily performance being estimated at 89·96 versts (55·60 miles). A start was made each morning at half-past 6, and night quarters were to be reached in time to give the horses at least nine hours' rest. Halts during the day were not to be less than three hours. The detachment was to ride alternately pace for one verst (about two-thirds of a mile) and trot for two versts, trotting to be at the rate of from four to five minutes per verst. A start was made on December 27 at 6.30 a.m., and Novgorod was reached at 9.45 p.m. on December 28. The return march was commenced on December 29 at 7.30 a.m., and St. Petersburg was made on December 30 at 10 p.m. The temperature varied between 10° and 12° R. below zero. There was a slight fall of snow on the march to Novgorod, and here and there ice on the ground, but the wind was in the back. On the return march, however, the detachment had snow and wind full in the face the whole way. Officers and men, however, bore the fatigue very well. The horses were all well, one only had a graze. They were fed the whole way on oats and hay. The march took up 3 days $15\frac{1}{2}$ hours, including halts. Deducting rests, the detachment did the 230 miles in $41\frac{1}{4}$ hours. The detachment made from $8\frac{1}{2}$ to $9\frac{1}{2}$ versts ($5\frac{1}{4}$ to 6 miles) per hour. The conclusion drawn from the report is that a horse can do from 56 to 62 miles per day of 24 hours, supposing that it has been properly trained, and work and rest are reasonably distributed. Such marches, however, could not be executed by large masses of cavalry, but by flying columns previously trained. The third forced march was undertaken in March of this year from St. Petersburg to Pskoff and back, a distance of $563\frac{1}{2}$ versts (nearly 350 miles), by a detachment of 13 officers, seven men, and 22 horses, 16 of which had taken part in previous forced rides. The horses had been trained for their work from the middle of January, and during the march similar regulations as during the previous rides were observed. The detachment started from St. Petersburg on March 20 at 6 a.m., reached Pskoff on March 23 at 1 p.m., when a rest was made until the next day. Starting from Pskoff on March 24 at 9 a.m., St. Petersburg was reached on March 26 at 10.30 p.m. Duration of march, 5 days $16\frac{1}{2}$ hours. The actual time of marching was $63\frac{1}{2}$ hours, which gives an average of close upon $5\frac{1}{2}$ miles per hour. During all the time the weather was unfavourable, and the roads were bad, owing to snow and ice. Notwithstanding this, the horses were perfectly sound, with the exception of one. Of course, the heavy work had told upon them, and had taken down superfluous flesh; but they were quite fresh, and fed heartily,—on the whole, better on the return than when starting.

WHOLESALE RETIREMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The ages of majors of Royal Artillery and Royal Engineers—one-fourth from the top of the List—are 45 years; and there is, I believe, no major under 40 years of age. Under existing regulations, majors are to be retired at the age of 48; and since the retirement of lieutenant-colonels can be pretty closely calculated, it is evident that the lower three-fourths of majors R.A. and R.E. must be retired under the age-clause. This will certainly have the good effect of giving promotion to juniors, but it brings ruin on the victims who entered the service thinking to spend their life in it, and who will be too old to start afresh. Surely it cannot be seriously intended thus to retire wholesale a large body of officers because it has been their misfortune not to receive adequate promotion before arriving at the mature age of 48 years.—I am, &c.,

UBIQUE.

Some interesting naval exhibits are displayed at the International Electrical Exhibition, Philadelphia, having been contributed by the United States Naval Department. These include several electric-light projectors used when making land in bad weather, or in time of war, in sweeping for torpedo boats. The 36-in. projector will plainly illuminate an object two-and-a-half miles from its focus. A model of the McEvoy single main torpedo system is arranged to show how, with a single main wire, any one of a group of sub-marine mines can be exploded, or, if desired, the explosion can be left to percussion. The electrical condition of such a group can at any time be determined by the Converse torpedo indicator, which rings a bell when any torpedo is not in firing condition, and fires automatically any mine which is struck by a vessel. The McEvoy torpedo detector, which consists of an induction coil dragged beneath a boat, shows by induction in a telephone when the boat is near such a mine. A fine collection of nautical instruments is also exhibited.

THE ARMY IN INDIA.

[FROM A CORRESPONDENT.]

The Zhob Valley Expedition started from Quettah on September 14 and 16. The list of the Staffs has been published:—Brigadier-General Sir O. Tanner, K.C.B., to command; Captain J. N. Walker, Bombay S.C., Deputy-Assistant-Adjutant-General; Lieutenant W. Chase, V.C., Bombay S.C., Deputy-Assistant-Quartermaster-General; Brigade-Surgeon A. F. Bradshaw, Principal Medical Officer; Captain B. L. Reilly, Bombay S.C., Commissariat and Treasury Officer; Lieutenant H. Parkin, Assistant Commissariat and Treasury Officer; Captain G. F. Francis, Bombay S.C., Transport Officer; Major W. T. Tomkins, R.E., Commanding Royal Engineers; Captain C. Hoskyns, R.E., Field Engineer; Captain M. Martin, R.E., Assistant Field Engineer; Lieutenant F. Blyth, Bengal S.C., Superintendent of Army Signalling; Major H. F. Smyth, R.A., Provost Marshal. Brigadier-General Tanner was second-in-command of his regiment, the 2nd Beloochis, or 29th Bombay N.I., as late as 1879, so that he has of late been lucky in his promotion. He has, however, deserved it. He was of great service to General Roberts during the latter part of the Cabul-Candahar march, and also was in Egypt in 1882, when he was made a K.C.B. for his services. There have been complaints lately of the preponderance of Staff Corps officers on the Staff of the Bombay Army. A glance at the above list will show that Major Smyth is the only officer of the British service on the Staff of Sir O. Tanner for the Zhob Valley Expedition holding an appointment open to officers of both services. The Duke of Connaught has been down to Meerut to inspect the Royal Irish previous to their starting for Egypt. No regiment will replace them at Meerut, but the wing of the Connaught Rangers at Rainkhet are expected to go to Bareilly to take the place of the East Surrey (70th) who have also gone to Egypt. The 1st South Lancashire (40th) leave Peshawur on October 12 *en route* for Aden, their place being taken by a wing of the 2nd Wilts (99th), pending the arrival of the 4th King's Royal Rifle Corps (60th) from Ferozepore in the ordinary course of relief next cold weather. The murderer of Colour-Serjeant Frankland, of the 1st South Lancashire, at Cherat, has been identified, but could not be arrested as he was brought in under safe conduct. The troops in the different Hill stations in the Umballa Division are to be assembled for manœuvres from September 25 to October 10. The scheme includes an attack on Simla, which is to be defended by the Ghoorkhas and Volunteers. The Delimitation Commission were expected to leave Simla on September 1 for Quettah. Surgeon-Major Aitchison takes Dr. Scully's place, and some native botanists from Saharunpore will accompany him. Captain P. J. Maitland, of the Intelligence Branch, and Captain W. Peacocke, of the Royal Engineers, have been nominated by the Commander-in-Chief as members of the Commission. The escort will probably consist of 200 of the 20th Punjab Native Infantry and 150 of the 11th Bengal Lancers. The route selected will probably be by Nushki and the Helmund. The sudden death of General Medley, R.E., late Consulting Engineer to the Government of India for Railways at Lahore, has caused very general regret. The deceased officer had only resigned his appointment a couple of months before, and after being fêted in Simla and Lahore, had left India for good, only to die on his voyage home. Although he had previously been in bad health, he had latterly been much better, and his death was most unexpected. The soldiers employed on the Kashmir road dislike the work immensely. In place of the old system of working pay, a new style of lump payment has been invented, which results in the men getting less than nothing to recompense them for their labour and the wear-and-tear to their clothes. After paying for the tea and biscuit served out in the early morning, the net earnings of a party of 200 men came to about five rupees one month. The Commander-in-Chief's prize for shooting and the cup subscribed for by the Native Infantry have been won this year by the 4th Sikhs. Major-General Rowlands, commanding at Bangalore, was thrown from his horse and severely shaken the other day. Brevet Generals Dandridge and Gordon, the former of whom has been suffering from illness at Peshawur and is now on sick-leave, were anxious to arrange an exchange, but the Commander-in-Chief did not sanction it. Lieutenant-Colonel Unwin, second-in-command of the 5th Ghoorkhas, is about to retire from the service. He has held his present appointment since 1878. Captain A. W. Stiffe has been elected Commandant of the Calcutta Naval Volunteers, vice Captain Brebner, resigned. On July 1 this year a large number of Majors of Infantry regiments came, under the term of the Royal Warrant, on the list for increased pay. Several of the Paymasters of regiments, however, have refused to pay the extra amount, and have referred the case to Calcutta.

One hundred orphan children of soldiers killed in action, &c., from the Soldiers' Daughters Home, were entertained at the Health Exhibition yesterday by Messrs. J. Welford and Sons, of the Warwick Farm Dairies, Maida Vale.

The Admiralty have accepted the tender of the Barrow Shipbuilding Company, at Barrow-in-Furness, to fit new engines complete on board the Icarus, building at Devonport, for the sum of £12,725.

A REAL GRIEVANCE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In the middle of 1872, after waiting, with many others, for two years before getting a commission, I received a sub-lieutenant's commission in a Line regiment. What with new Warrants and promotions going very slowly, it was not until nearly the end of 1883, being abroad at the time, that I was offered, by telegram, a company in another regiment. Not seeing any chance of a step in my own regiment for some years, I accepted the promotion; but it was not until some time after that my name appeared in the *Gazette* at home as a captain, whereas the officer whose step I was given had received his majority some three months previous, and I lost thereby, both seniority and pay, the Government saving the difference of pay between the rank of subaltern and captain for three months. On receiving my pay previous to embarking for home, I was informed that I could only get the difference between a subaltern of over ten years' service, viz., 7s. 6d., and a captain, in addition to my Indian pay as a subaltern from the date of my gazette as captain. Now, as I had only been in receipt of the same pay as a subaltern of three years' service, having received no additional pay in India for over ten years' service, I received less pay than I would have done by a shilling a day, had I had but three years service, Government taking the extra shillings. To put a finishing touch to my ill-luck, the subaltern next to me in my old regiment, who was adjutant at the time I accepted promotion, received the step in his own regiment and was antedated a captain a month previous to my gazette, having been for more than ten years my junior, and being given, by his antedate, pay as a captain in the regiment in which I was actually drawing subaltern pay and senior to him. This is the way I have been treated after serving eleven and a half years in the rank of subaltern.—I am, &c., CRUSHING LUCK.

THE NEW ARMY MEDICAL DEPARTMENT CIRCULAR.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Your articles on the recent circulars enacting that the surgeons and surgeons-major, A.M.D., shall severally have to pass examination for promotion, deserve the thanks of all concerned. It is also satisfactory to notice, from the earnest letter of the ex-president of the Royal College of Surgeons in Ireland, that the Irish schools will protest strenuously against the amplification which the recommendation of Lord Morley and the Committee on this subject has undergone in the pages of the Circular. What was the use of this Committee, with all of its exhaustive inquiry into the condition of the Army Medical Department, if, as in this case, its recommendation is to be treated as inadequate, and to be put aside by those very "superior persons" who drew up the Circular? The Committee recommended the restoration of the examination of surgeons for promotion. The Circular does so, but tacks on that the surgeon must possess a certificate in operative surgery from a professed teacher of the same. You will say that this is mulcting the officer of the five guineas or so, the fee for such a course. Can such a fine (for it is nothing else) be enforced? I doubt it. It is entirely without precedent. In thus exceeding and departing from the Committee's views, and in so far, has a mistake been made. The further departure from their views in exacting an examination for surgeons-major over 20 years' service, which includes questions in operative surgery and practice of medicine, is surely the craze for examination fairly gone mad. It is, as you say, like proposing to examine lieutenant-colonels after 25 years' service in company drill or the rudiments of musketry. Nothing of this is found in the Committee's report, and the Duke of Cambridge, in his evidence before it, expressly stated that examinations after officers have passed the age of 42 are a mistake. By that time an officer's record of service offers sufficient material for pronouncing on his efficiency or otherwise. But, no; the Circular directly traverses his Royal Highness's opinion, and so these old officers must pass under the fasces, or forego promotion. No such blow as this has ever been dealt from without on the Department. Unlucky Department! Discredit without, humiliation within, must be the natural results of this last decree of the *Dii minores* of Whitehall; and grey-haired officers find themselves as schoolboys again, and under a pedagogue *régime!* Surely some modification of this circular will be made in the interests of COMMON-SENSE.

THE NEW VALISE EQUIPMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—For the credit of the inventor of the new valise equipment, I hope you will kindly correct the statement you made in your issue of the 13th inst., that the "new" valise (by which name I suppose the whole equipment is meant) which the Aldershot Equipment Committee "has produced, after much labour and endless experiment, turns out to be merely a modification of the present regulation valise, which has been condemned by all officers who have had practical experience of it on service." The inventor is Lieut. C. B. Mayne, R.E., on whose efforts you at one time inserted a paragraph in your valuable paper. He carried out his ideas in a practical form in 1881, after two years' experience in the Afghan War; and the Equipment Committee adopted his ideas *in toto*, with the exception that he proposed a valise which would unrol and form a waterproof sheet, while the Committee have attached a small waterproof sheet to the flap of the existing valise, and also added two small side pockets to this valise to carry the oil-bottle and the cleaning materials. All the four regiments who have tried it, under the most severe conditions, have reported unanimously in its favour, as also a committee of doctors at Aldershot; and the "much trouble and endless experiment" you refer to have been due to the resistance offered to the Committee's recommendations by the introducers of the 1882 valise equipment. The new valise equipment consists of three distinct and independent parts, viz.,—1st, the waist-belt, with its load (*i.e.*, pouches, ammunition, water-bottle, bayonet, entrenching tool, and grog); 2nd, the braces, from which the waist-belt is suspended at six points; and 3rd, the valise and its contents, which simply hook on to the braces in front and rear. Hence, with regard to the equipment as a whole, it is as far from being a modification of a pre-existing pattern as any two inventions for the same object can be, for it possesses the following invaluable advantages, which the present regulation one has not, and which no mere modification could provide for:—1. The weight is as evenly distributed in front and rear as it is possible to be, and causes a minimum drag to the rear. 2. The valise itself can be rapidly taken off and put on at will by the soldier himself, without interfering with any part of the rest of the equipment; this will be of great value to relieve the men of the weight of the valise in action, at a halt on the line of march, on outpost and sentry duties, for entrenching work on the battle-field, in railway and boat travelling, kit inspections on parade, &c. 3. When the valise is so taken off, the waistbelt and its load is still suspended directly from the shoulders by the braces; in the existing patterns, the whole equipment has to come off with the valise. 4. The waistbelt and valise are quite independent of one another, and, therefore, the removal of the latter does not in any way affect the carriage of the former. 5. The waistbelt is suspended all round from the shoulders, which enables any extra weight (such as extra ammunition) to be placed on it without imposing any hurtful weight on the hips, waist, or back. 6. The buttocks of the soldier is better utilised in helping to carry part of the weight of the valise than in any other existing pattern; the natural tendency of a soldier is to get the valise to rest on his buttocks. 7. The water-bottle and entrenching tool can be carried on the belt without interfering with the arms (which is one fault of the 1882 equipment), and can be easily got at, at any time. 8. The braces pass vertically down in front, and so do not cut the armpits. 9. The pouches can be shifted as required to give relief to the soldier. 10. The waistbelt can be worn loose or open on the line of march (as none of the weight is taken, as in the present equipments, by the tightness of the waistbelt) with increased comfort to the men, and without fear of any of the articles of equipment falling off. 11. The greatest facility is given for marching in light order,—*i.e.*, with great coat, mess tin, and ammunition, but without valise. In the new equipment the sling of the haversack is the only thing which crosses the chest, but by a modification of this sling the haversack can be hung from the waistbelt and this evil avoided. Lieut. Mayne also proposed that a tin or zinc pannikin should be attached to the water-bottle so as to provide the soldier with a mug, so that he may easily obtain drinking-water from streams passed on the line of march, as the water-bottle can only carry a small quantity. This proposal, however, was not accepted. The new equipment, after the valise is removed, is also eminently adapted for an officer's equipment, the sword being carried on the left by two short slings from the waistbelt (as in the "Sam Browne" belt), which also would carry the water-bottle, field-glasses, revolver, ammunition-pouch, food-haversack, great-coat, and, if necessary, a waterproof sheet. A similar belt was worn by a great number of officers in Afghanistan. The adoption of such a belt-equipment for the cavalry would be equally advantageous, and also would enable the carbine to be easily carried on the back when entering into action (in the manner suggested by the Cabul Committee on Equipment), so that, should a man be separated from his horse, he will still have his carbine and ammunition with him.—I am, &c., M.

CAVALRY WEAPONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It has been my pastime to study the various weapons used by different troops under certain circumstances, particularly when contending against a barbarous or half-trained enemy—as, for instance, in Mexico, 1812-1814; and in late times in Ashantee, Affghanistan, the Cape, and Egypt—and to consider the respective effectiveness of those weapons. May I trouble your readers with a few of my ideas on the subject, given for what they are worth, and with all deference to those who are better judges in these matters than myself? I may say, first, that cavalry armament, so to speak, appears to me the most capable of improvement, certainly under the circumstances above alluded to, if not in fighting against a well-disciplined and regularly-organised force. There has not for some considerable time past been much change in the kind and number of weapons supplied to infantry in any civilised countries, though, of course, their mechanism has undergone many highly-improving changes; and this fact alone, I think, we may take as a proof that there is not much to be desired in this branch of the service, unless it be to appropriate the small sword carried with their bayonet by many Belgian and, I believe, French regiments. But as to the cavalry, it has always appeared to me that in modern times the lance has not had its proper place amongst cavalry weapons, nor received the attention to which its effectiveness and utility entitle it. Surely it is the most to be relied on for breaking infantry, in any formation, and for meeting hostile cavalry, as well as for outpost duty and the mere pursuit of infantry already broken by heavy and sword-armed cavalry. Its length, one would think, would commend itself at once to the initiated as well as to the uninitiated as giving the soldier armed therewith a much better chance of coping with an infantry man, armed with long rifle and bayonet, than a man who had only his sabre to depend upon could have. Another idea which the organisation of the Mexican Irregulars (Imperialists)—I forget for the moment their exact name—suggests, is the mixing of differently-armed troops. I believe in the case of Maximilian's soldiers this combining the effectiveness and co-operating of different arms was merely carried to the extent of having a body of cavalry attached to, or rather incorporated in, each regiment of infantry; but it might be carried still further, and the alternate men, or the alternate squadrons of the cavalry, be armed with different weapons,—the one with sword, the next with lance, and so on. There are many other, but perhaps minor, modifications that might be introduced, and certainly too slight and too numerous to trouble you with here. One cannot complain, in these days of camel corps, mounted infantry, and the like, that red-tapeism is as marked and unyielding as it used to be in the days of stocks and straps; nor of the unwillingness of the powers that be to see and adopt anything that seems likely to be a real improvement; therefore, should there be any practical utility in the suggestions I have very humbly made, I am satisfied that it will be recognised.—I am, &c., SUBALTERN.

THE MILITIA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Many letters have appeared lately on the subject of the Militia, and while most are full of complaints, but few offer any practicable suggestions for its improvement. Annoying as the present system is to officers commanding battalions, it is equally so to their adjutants. An officer on appointment naturally wishes to devote himself to the interest of his battalion, but he at once finds himself serving under two masters whose interests are antagonistic. For eleven months in the year (now preliminary drill is in most cases dispensed with), he is entirely under the command of the officer commanding the regimental district, his recruits and permanent staff are taken from his immediate control, and he is liable to all sorts of petty duties connected with the depôt from which his position should exempt him, and, what is harder still, he is deprived of a privilege accorded to staff officers at home, viz., employment on active service. The permanent staff are also dissatisfied with a system which lowers their influence, and brings them frequently in conflict with their Line comrades. It is not surprising, then, that this feeling of discontent pervades the whole battalion, and that we find a dearth of both officers and men. In the first place, the recruits and the permanent staff should be placed entirely under the control of their adjutants, who should be responsible for them, not to the officer commanding the district, but to the officer commanding the battalion. Secondly, the period of employment as adjutant should be reduced to three years, as in the case of the depôt adjutant. These officers are for the most part energetic and highly-trained men, and to employ them as shown above is a loss to the country; in fact, under the present system, a Militia officer could do the work. Thirdly, any interference of the officer commanding the regimental district with the recruits or permanent staff should be referred to and receive the sanction of the officer commanding the battalion. Now he is treated simply as a nonentity, and has no voice in the non-training period, and for a Militia colonel, who has perhaps had the command of his battalion for 20 years, and is an officer of the very highest intellect, to be treated thus by an officer who has only had command of a Line battalion for five years, and that perhaps in an Eastern clime, where his experiences are so very different, cannot but be galling in the extreme. There is one other course practicable, and that is, that a Militia officer of experience should be appointed as Militia officer commanding a regimental district, to whom all Militia matters should be referred. I should like to say one word about expenses. Every officer must know that his own battalion is alone responsible for incurring heavy expenses. The Queen's Regulations are a perfect safeguard to any individual officer. If any one has a right to complain, it is the field-officers, who can least afford it, who have to pay heavily (in proportion to their rank) for entertainments which the junior officers have always (in my experience) been the first to call for. At the same time, I think it might be possible for the Government to facilitate the messing arrangements by organising a system of Army messmen, who might be made available for the training of a Militia battalion, and also for the Line regiments.—I am, &c., F. O.

ARMY CHAPLAINS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The late Chaplain-General, a refined scholar, and, like all great scholars, of much humility, said that he found it difficult to get well-qualified Clergy to be candidates for Army chaplaincies. I see that the Rev. Arthur Robins has announced a hymn and prayer for the Nile Expedition, and a private soldier has actually proposed three cheers for him in the public streets of Windsor. Is not that the kind of man we want, not merely to be cheered in Windsor, but to go out and cheer our brave fellows mid the roughness of active service? It must be very hard for one so soldierly at heart to be confined to the comforts and ease of home, and never once to have known in the least what real soldiering is. I only wish Mr. Robins would give up his living and enter the Army. Who knows but that after years of trying work in the field, in the Colonies and dependencies, and at home, he or any man like him might not at last by hard striving become even Chaplain-General, and an honour to his country?—I am, &c., CLIMAX.

The P. and O. Co.'s steamer Valetta brought to Sheerness on Saturday the paid-off crews of the Vigilant and Swift, from China. The blue-jackets were discharged to the Royal Naval Barracks, and, having received the wages due to them, were granted six weeks' leave of absence. The Royal Marines were conveyed to Chatham to join their head-quarters. The Vigilant has been stationed with the China squadron as despatch-vessel since 1875. It had been intended to relieve her this year, but, owing to the wreck of the Lively and the removal of the Salamis from the active list, on account of her unseaworthy condition, there was no despatch-vessel available to replace her, and the Admiralty were compelled to refit her at Hong Kong and recommission her with a new crew for three years' service. Before this time expires the new twin-screw steel despatch-vessels Surprise and Alacrity, which were recently ordered to be built by private contract, will be out of hand and ready for sea. The Swift is a completely new vessel.

It is stated that the Chinese Government has secured the services of Lieut. J. W. Graydon, late of the United States Navy, who, it is asserted, has several torpedo inventions of considerable value.

The Army.

2ND DRAGOON GUARDS. The strength of the corps is at present 516 of all ranks, with 305 horses.

15TH HUSSARS. Col. Luck, lately commanding, leaves England shortly for India, to assume command of the Kurrachee District.

ROYAL ARTILLERY.

Capt. H. C. Sclater has been appointed Brigade-Major of Royal Artillery in Egypt, vice Brevet-Major F. G. Slade, appointed a Deputy-Assist.-Adjt.-Gen.

Col. Barnes (late Bengal) died of dysentery at the residence of Gen. Stephenson, at Cairo, on the 28th ult., greatly regretted. The deceased commanded two guns manned as Horse Artillery by volunteer officers and serjeants in the Central India Campaign. He was severely wounded, shot through the right breast at the siege of Neemuch in Nov., 1857, and received the thanks of the Bombay Government. Also through the Oude Campaign in 1858-59 (medal and clasp). He joined the army Dec. 9, 1852; became lieut. Aug. 24, 1857; capt. Oct. 1, 1861; major July 5, 1872; lieut.-col. Dec. 31, 1878; and col. Dec. 31, 1882.

ROYAL ENGINEERS.

The *Times* says:—"The new reorganisation scheme for the formation of a Royal Engineer submarine mining battalion from the torpedo and submarine mining companies of the corps of Royal Engineers came into operation on Wednesday, when, in conformity with instructions, the new battalion was formed. The companies which compose the new battalion are the 4th, 22nd, 23rd, 27th, 28th, 33rd, and 34th—the two additional companies—viz., the 22nd and 34th—being made up from the companies at headquarters. Both companies were formerly postal telegraphers, but have since been attached to the second division of the Royal Engineer Telegraph Battalion. The newly-organised battalion will have for its commandant Major R. H. Vetch, with Lieut. C. V. Wingfield-Stratford, as adjt. The under-mentioned officers are attached to it:—Major T. H. Anstey, Capts. A. C. Alexander and A. T. Preston, Lieuts. H. D. H. Haig, J. C. Middleman, E. C. T. Hawker, F. R. Reynolds, P. R. Burn-Murdoch, H. M. Dumbleton, H. B. Roberts, W. M. Hodder, J. F. Edmonds, A. H. Van Straubenzee, W. J. D. Dundee, W. G. Shillabear, E. J. G. Boyce, H. A. L. Puberson, E. Druitt, D. A. Mills, F. V. Jeffrys, H. E. Tyler, L. Quill, A. Grant, L. Jones, J. E. O. Hamilton, A. E. Wrottesley, F. G. Bowles, M. A. Boyd, F. Rainsford-Hannay, O. E. Ruck, J. H. Cowan, and G. F. Leverson. The officers doing duty with the Royal Engineer Telegraph Batn. are Major F. H. Turner, Capts. R. H. Jelf, C. F. C. Beresford, C. K. Wood, R. L. Hippisley, and F. W. Bennet; Lieuts. C. Hill, G. M. Heath, H. E. M. Lindsay, R. W. Anstruther, A. H. Bugnold, G. A. Tower, and A. M. Stuart. In connection with the new battalion a submarine mining depôt has been formed at Chatham."

The 26th Compy., under command of Lieut.-Col. Todd, were encamped at Assouan at the date of our latest advices by post, and were to remain there until further orders.

GRENADIER GUARDS. Col. the Hon. E. H. Primrose, who joins Lord Wolseley's Staff, at the termination of the campaign will return to Vienna to resume his duties as Military Attaché. The statement that any misunderstanding has arisen between Col. Primrose and the Viennese authorities which was likely to lead to his recall is without foundation. The poor fellow Cash, who was killed by a crocodile, is much regretted by the officers and men of his battalion. He had been specially applied for by Lieut.-Col. Colvile, and had only just arrived out to join his master when he met his death. His body was recovered and buried.

4TH KING'S OWN (ROYAL LANCASTER REGIMENT). The 1st Batn., at Aldershot, is clothed with the experimental uniform. It has just been decided to remove the wings on the shoulders. These "decorations" were not suggested by the report of the Dress Committee. The recommendation of this committee was that a detachable epaulette should be provided for all, and that sashes, according to rank, should be provided for all non-commissioned officers, the epaulette and sash to be worn only on parade and when walking out. In designing the new garment, however, these and many other valuable suggestions were scouted, and the present blouse was produced, which is very different, indeed, from the dress proposed by the Aldershot Committee. The material is of the very worst description, and becomes threadbare and goes to pieces with very little wear. Although this clothing has been issued but a short time, in many instances it has become so dilapidated that not a few men have been ordered to provide themselves with new garments (especially trousers) at their own expense.

8TH KING'S LIVERPOOL REGIMENT. Capt. Harrison, 2nd Batn., has been appointed Station Staff Officer at the Darjeeling Convalescent Depôt.

15TH EAST YORKSHIRE REGIMENT. Major Broughton, 1st Batn., has been appointed adjt. of the 3rd Batn., in succession to Major Riall, whose term of service as adjt. expired on the 1st inst. Major Riall will revert to regimental duty with the 1st Batn. on the expiration of his leave of absence, which will terminate on Dec. 1.

35TH ROYAL SUSSEX REGIMENT. A correspondent at Wady Halfa writes on Sept. 29:—"A nuggar, containing two officers and 36 men of the Royal Sussex Regt., has been wrecked on the island of Nilwarhall. Two men were drowned, and all the kits, arms, and provisions lost."

38TH SOUTH STAFFORDSHIRE REGIMENT. Major J. O. Sherrard, 1st Batn., who died at Assouan on the 9th ult. from an attack of fever which was of short duration, was buried on the evening of the following day. The 2nd Duke of Cornwall's Light Infantry furnished a firing party of 200, under the command of Major Disney Roebuck. The 2nd Batn., Essex Regiment, was formed up outside the cemetery, and he combined bands of the two battalions attended. Major encer, Essex Regt., Capt. Vigor and Capt. Carden, 2nd n. Duke of Cornwall's Light Infantry, and Capt. Cckshank acted as pall-bearers, and among the mourners who followed the remains of the deceased officer were Brigdr.-Gen. Grenfell, Col. Richardson, C.B., and all the officers at the station whose duties did not prevent their attendance.

40TH SOUTH LANCASHIRE REGIMENT will leave Peshawur on the 12th inst., *en route* to Aden.

48TH NORTHAMPTONSHIRE REGIMENT left the Curragh on Tuesday, and was conveyed in H.M.S. Assistance from Kingston to Liverpool, arriving at Preston on Wednesday.

ROYAL MARINES.

The under-mentioned officers of the R.M.L.I. embarked on the 1st inst.:—Major and Brevet Lieut.-Col. G. H. T. Colwell, Indus; Lieuts. T. M. Nelson, Duke of Wellington; B. A. Hitchins, Asia; E. E. Chown, Valiant; W. E. Binney, Indus; K. J. Buchanan, Hector; J. R. Goddard, Asia; C. McN. Parsons, Duncan; W. H. M. Warrand, Royal Adelaide.

Lieut. E. C. L. Congdon, R.M.L.I., has been ordered to embark in P. and O. steamer of the 15th inst., for passage to join Royal Marine battalion at Suakim, to replace Lieut. H. C. Money, R.M.L.I., appointed assistant-instructor of musketry at the Gosport Division.

Medals for long service and good conduct have been awarded to Colour-Serjt. W. Davidson, 42nd Compy., and Serjt. G. H. Neill, 10th Compy., R.M.L.I.

58TH NORTHAMPTONSHIRE REGIMENT. Lieut.-Col. P. A. Howley, late of this regiment, died on the 29th ult., aged 46 years.

59TH EAST LANCASHIRE REGIMENT. *The* 5 *and* 9, *Lilywhites' Gazette*, has the following:—"This new formation for attack brings the 'double company' out of its narrow and solitary groove in connection with marching-past. In minor tactics, for attack and defence, it is now to be the unit of the future. It is under one chief, and is self-contained—*i.e.*, it contains everything that is needed, a fighting line with its supports and reserves. Now, if this unit is to be of practical and lasting use for tactics, it must also be the unit for administration. Report says that this is contemplated; and, sooner or later, we may expect to see every battalion divided into four companies, with a major in command and a captain and three or four subalterns under him, according to establishment, for home or foreign service. The captain will find himself reduced to the level of senior subaltern, but the major will gain a very handy little command, more complete, and more independent than anything we have yet seen in the infantry. We may suppose that there will be several changes in the non-commissioned ranks. The four colour-serjeants, having a double charge in the way of discipline, pay, and returns, would probably gain a grade. Each company would want a quarter-serjeant for barracks, clothing, stores, and messing; and also a serjeant-instructor for drill and musketry. Such a unit, in a battalion of any respectable strength, would be capable of drilling alone. It could, in many garrisons, take the guards and fatigues of the day, leaving the three other companies free for drill under the commanding officer. For detachments it would be conveniently capable of expansion or contraction, to meet any requirements. Part of the way is already paved for this change; and, perhaps, the chief difficulty is the drill-book, as this would require to be in great part re-written."

60TH KING'S ROYAL RIFLE CORPS. Capt. Baynes, 3rd Batn., has been appointed to act as deputy-assist.-adjt.-gen. on the Staff of the Alexandria garrison.

61ST GLOUCESTER REGIMENT. Major Collingwood has been appointed Commandant of the Mount Aboo Sanitorium.

64TH NORTH STAFFORDSHIRE REGIMENT. Col. H. Francis, late of the regiment, died at Brighton a few days ago, after a long illness, aged 61. He entered the Army in 1843, became a lieut. in 1845, and was promoted to a captaincy in 1853. In 1857 he served with the 24th Regt. in the Persian Campaign, and he was also engaged throughout the Indian Mutiny, taking part in the defence of the Alumbagh, the action of La Martinière, the second relief of Lucknow, the defence of Cawnpore, and the actions of Kalee Nuddee, Kerkeroulie, Bareilly, Shahjehanpore, Mahomdee, and Bunnai. For his services in India he obtained the brevet of major, and he became a brevet lieut.-col. in 1869, and a col. in 1873.

65TH YORK AND LANCASTER REGIMENT were on the 26th ult. presented by Major-Gen. Newdigate at Dover, with the medals awarded for the Soudan campaign. The regiment was under the command of Brevet Lieut.-Col. Dalgetty. Col. Byam, who is suffering from a kick from his horse, was present in an open carriage. Gen. Newdigate said the events of the campaign were so well known that it would be unnecessary for him to do more than briefly allude to the battles in which they were engaged. The General then read extracts from Gen. Graham's reports, and proceeded to observe that Lieut.-Col. Byam reported he saw these men (who were killed in the right corner of the square at Tamai), take up a position in the fight, whence they would not be forced back. Their bodies were afterwards found on the margin of the ravine where they fell. Those names were brought to the notice of Gen. Graham by Col. Byam. "Col. Byam could not, however, be his own trumpeter, but he (Gen. Newdigate) was quite certain from all he had heard since the war and from all he had read in the accounts which had been published, that the success was owing to Col. Byam's admirable manner of leading the battalion. The great bravery and decision which he displayed at the critical moment when he rallied the battalion, and rallied it in such a manner as to bring the greatest possible credit upon the men, all proved him a worthy soldier. Gen. Newdigate continued: Col. Byam, I most heartily congratulate you upon your success on that occasion. I congratulate the men upon having been led on that occasion by such a brave, determined officer. Men, officers, and non-commissioned officers, I congratulate you all most heartily upon the manner in which you have done credit to yourselves, to your country, and to your battalion." Gen. Newdigate then presented the medals to each of the recipients, commencing with Col. Byam. After the distribution Gen. Newdigate presented Drum-Major Berry with a medal for good conduct, and the Major-Gen. and the Staff were entertained at luncheon.

73RD REGIMENT. The band of the 2nd Batn. Black Watch (Royal Highlanders) gave a series of three concerts in the Albert Hall, Swansea, on Tuesday and Wednesday last. A well-selected programme, admirably performed, showed to advantage the individual talent of several solo performers, and the perfect condition of the band, as a whole.

74TH HIGHLAND LIGHT INFANTRY embarked on board the Serapis on Wednesday for passage to Bombay. The following was the embarking strength of the battalion:—25 officers, 2 warrant officers, 2 staff serjeants attached, 39 staff serjeants and serjeants, 37 corporals, 20 drummers, 794 privates, 8 officers' wives, 6 officers' children, 4 female servants, 40 women, and 43 children. It is greatly to the credit of the regiment that out of over 900 men only two men were absent from parade. These two men are supposed to have deserted. Over 100 men belonging to the regiment, who have either completed or nearly so their period of service, remain behind, and these will in a few days proceed to the regimental depôt.

87TH ROYAL IRISH FUSILIERS. Further particulars have been received concerning the death of the late Lieut. E. H. Mulock. The deceased was shooting in the neigbourhood of Camp Tapa, on the Murree Hills, on the last day in August. He fired at a bear, but missed the animal, which thereupon attacked and fatally injured him. Lieut. Mulock served in the Egyptian war of 1882, and was present at the battle of Tel-el-Kebir.

91ST ARGYLL AND SUTHERLAND HIGHLANDERS. A draft, under Capt. Fowler and Lieuts. Collings and M'Bean, arrived in camp at Etshowe on Aug. 11. Next night a bonfire concert was got up to welcome the new comers. The native force attached to Major Charter's command at Fort Yolland helped to drive deer, and 15 bucks and some bustards were got that day.

96TH MANCHESTER REGIMENT. Major-Gen. G. F. C. Bray, on the Retired List and late of the regiment, died on the 26th ult., at his residence in Kidbrook Grove, Blackheath. He entered the Army in 1844, obtained a lieutenancy in 1846, became capt. in 1855, major in 1862, and in 1868 he served in the Abyssinian Campaign as assist.-adjt.-gen. of the 2nd Division. For this service he was mentioned in despatches, and obtained the brevet rank of lieut.-col. and the medal. He was promoted to the rank of col. in 1874, and became major-gen. in 1883. The funeral took place at Charlton Cemetery, Woolwich, on Thursday. There was a large gathering of officers and friends to do honour to the deceased. Gen. Bray having expressed a wish to be buried by soldiers and among soldiers, the funeral had a military character. The coffin was covered with the Union Jack, and was borne to the grave by a carrying party of the Corps of Commissionaires, consisting of soldiers of the 96th, 39th, and 4th Regts. The pall-bearers were Cols. Scovell and Cannon, Lieut.-Col. Newbiggiug and Doctor Swift, 96th Regt.; Major-Gen. Bigge, 5th; Major Traherne, 39th; Surg.-Gen. Massey, C.B. and Capt. Reid, 96th. The mourners being Mrs. G. Bray, her four sons, and three daughters; Major-Gen. Bray, C.B., late 4th King's Own; Mrs. and the Misses Bray; and the Rev. A. Pope. Amongst the friends and brother officers who took part in the service at the cemetery were:—Gen. H.S.H. Prince Saxe-Weimar, K.C.B.; Capt. Lord A. Seymour (Guards), A.D.C.; Major-Gen. Smyth, R.A., Commanding Woolwich; Capt. Haverfield, R.A., A.D.C.; Major Pakenham, 96th; Col. Harris, R.A.; Major Hill, 96th; Lieut.-Col. Brind; Capt. Eardley Wilmot, 96th; Major-Gen. Scovell, 96th; Col. Hay, D.A.G., R.A., &c.

98TH NORTH STAFFORDSHIRE REGIMENT. Major Roper has vacated his appointment as Commandant of the Mount Aboo Sanitorium, in order to proceed on active service with his regiment.

MEDICAL DEPARTMENT. A correspondent writes:—"You have done (through your columns) your duty thoroughly by the Department in supporting the senior officers respecting the new scheme of examination for them. One of your correspondents alludes to the single qualification of several of the seniors in the administrative ranks. Let me inform him that it is by no means probable any of the men he names will ever be members of the Examination Board, as there will be only too forcible an attempt to confine the constitution of that board to the pets in the office. Talk of examination in practical surgery and medicine! Then by all means let such be made examiners who have not passed all their service at desks, clerking as secretaries, sanitarians, and statisticians in easy posts. To examine in practical work the medical officers must have practical examiners. I mean those who have not only seen practice, but have themselves practised (in the strict sense of the term) extensively in military hospitals through several years of service, in pure executive, and not quasi-executive, positions."

PAY DEPARTMENT. Major Feilding, District Staff, R.A., Woolwich, will shortly proceed to the 9th Regimental District, Yarmouth, vice Major J. W. Barnes, who replaces him at Woolwich. Major J. H. Vander-Meulen is taking over charge of the Pay Office, 47th Regimental District, vice Major D. Creagh; and Major S. E. Wood, from District Office, York, replaces Major Vander-Meulen, with the 72nd Highlanders. Major T. J. Booth, recently home from Egypt, will shortly proceed to the 62nd Regimental District, Devizes; and Capt. R. L. Long, from the Chief Paymaster's Office, Cairo, will be assigned for duty to the Home District Office.

The following lectures will be given at the Royal Naval College:—"Naval History," a course of ten lectures, by J. K. Laughton, Esq., from 11 to 12 on Saturday, beginning on Saturday, Oct. 4. "Practical Astronomy," a course of six lectures, by Staff Com. Martin, from 12 to 1 on Wednesday, beginning on Wednesday, Oct. 8. Officers of all ranks in any department of the public service are permitted to attend. Those officers who are not students of the College are requested to sign their names, with rank appended, at the entrance of the lecture-room.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 69 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

The Committee earnestly appeal for funds to meet the current expenses.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

IMPORTANT to NAVAL and MILITARY MEN.

THE MUTUAL LIFE ASSURANCE SOCIETY.
(*Established* 1834.)

No **EXTRA PREMIUM** for Climate or War Risk is Charged after the Policy has been Five Years in force, and the Life Assured is aged Thirty.

ANSWERS TO CORRESPONDENTS.

INQUIRER.—The paper to which we referred in "Our Answers to Correspondents" some short time ago, was the *Broad Arrow*, of which the proprietors were Messrs. Ridgway, of Waterloo Place. The verdict the *Army and Navy Gazette* gained against the paper for damages and costs in a libel suit, was evaded by the real defenders, on the ground that the publisher of the paper, against whom the action was brought, had died insolvent, subsequently to the trial!—"All honourable men!"

For Books Received, &c., and Notices to Correspondents, see page 727.

The ARMY AND NAVY GAZETTE this week contains eight pages extra.

Army & Navy Gazette.

LONDON, SATURDAY, OCTOBER 4, 1884.

WHEN is the new Chaplain-General to be appointed? It is now six weeks since Bishop Claughton died, and for some months before his death it was well known that he could not continue his duties. We must suppose that the authorities are waiting till they can find a man in all respects suitable to fill the vacancy. When Mr. Gleig retired, it was thought desirable to have a man of some position in the clerical world to succeed him. Chaplains of long standing and experience were passed over, and Bishop Claughton was appointed. He was a busy man when appointed, as he was Canon of St. Paul's and Archdeacon of London. These two offices combined, if efficiently filled, would not have left him much spare time on his hands. But besides these two offices Bishop Claughton helped the Bishop of London in his episcopal duties. The result of the appointmen might have been foreseen. With his incessant wo he had not time to devote to the interests of relig in the Army. His duties in the diocese of Lon prevented his supervising and aiding the work of the Chaplains at the various military stations throughout the country. Surely the authorities are not about to repeat the mistake of appointing some one as Chaplain-General whose hands are already full of work. The Chaplain-General's duties, if efficiently carried out, would tax the energies of a strong man, as he ought to exercise his influence not only in the large garrisons where Army Chaplains are stationed, but in the various depôt centres scattered all over the country. He should also pay an occasional visit of inspection to our garrisons in the Mediterranean. The emoluments of the office are small—only £800 a year—and therefore it is unreasonable to expect any one who has a good position in the Church to give it up in order to go to the War Office as Chaplain-General. It is supposed that the Army looks for a man of influence and position to succeed to the office. But is this really the case? Would not the Army be better satisfied in having a Chaplain-General who has had experience of soldiers at home and abroad, in peace and war time, and who would devote all his time and energies in fulfilling the duties of the appointment? If such be the case, cannot the authorities find amongst the Chaplains themselves, some with thirty years' experience in the service, a man who will fill the vacant office with credit, if not with conspicuous ability? If among the whole body of Chaplains there is not one to be found fit to succeed Bishop Claughton, they must, as a body of Clergy, be far inferior to the generality of their brethren. And if such be the case, who is responsible for this state of things? They were all appointed either by Mr. Gleig or by Bishop Claughton. The pecuniary advantages of a Chaplain's position are such as to make the appointment much sought after. £250 a year to start with, increasing in twenty-five years to £530 a year, with a retiring pension of over £300 a year, will compare favourably with the prospects of clerical income in civil life. There must, therefore, be something wrong in the system which has hitherto obtained, if, with such pecuniary advantages to offer, the Chaplain-General has failed to secure a subordinate of sufficiently high standard to succeed to the vacant office. May this not be regarded as a warning to the Authorities against appointing, as successor to Bishop Claughton, one who is unable to devote his attention to the duties of the Department?

We are glad to state that telegrams have been received from officers in the Camel Corps who sailed on Friday week for Egypt, dated from Gibraltar,—all well. They had had, as we anticipated, a heavy roll in the Bay, but had not suffered overmuch, many of the officers and men being "old campaigners." Letters may be expected on Monday.

The Duke of Cambridge is delighted with his reception in Ireland. The people are more than respectful, —they are enthusiastically inclined, and, popular as his Royal Highness is over here, he is not accustomed to be run after and cheered. The Duke is staying with Sir J. Bateson, whose brother, Major-General Bateson, is his equerry during his inspection of the Northern District. There is, we think, no truth in the report that the Field-Marshal Commanding-in-Chief has come to the conclusion that there are too many troops in Ireland, though he may be of opinion that some of Sir T. Steele's "boys" might be advantageously exchanged for adult specimens of the genus *homo*. We beg and entreat of his Royal Highness to look at the barracks in Dublin—once, not twice or thrice, will do—to convince him they are abominable from a hygienic and nasal standpoint, for a nose can stand anything but a Dublin barrack *cloaca*. It is reported that the Duke was not quite happy about Colonel Chichester and the cavalry generally, but to a less severely critical eye the 5th Lancers and the 20th Hussars would appear very fair regiments of horse, and certainly above the average.

Brevet Lieutenant-Colonel M. G. Gerard, C.B., Bengal S.C., has been selected for special service in Egypt.

Those who have seen some of our soldiers disguised in the mud-coloured uniforms, which are miscalled "Khakie," may have noticed strange projections across the points of the shoulders, looking very like sausages, covered with brown cloth. The wings formerly worn by Grenadiers and Light Infantry gave an appearance of increased width to the shoulders, but these abortive excrescences have the opposite effect. As it is not desirable that our "Line Battalions" should look more lanky than they are, the sausages are to be removed.

How time flies! It is fourteen years since Paris was invested. On September 26, the eighth day of the siege, Nadar made trial of a small captive-balloon. On the 27th there was a little reconnaissance, easily repulsed. On the 28th, Courbet demanded the overthrow of the Column of the Place Vendôme. On the 29th, there was a reconnaissance in front of St. Denis, Villejuif, &c. On the 30th, another on the south side of the Seine, Bougival, &c., and the Viscount of Castrix was killed at Chevilly. Thirty years ago the Allies were investing Sebastopol. It was on the 26th, 27th, and 28th they seized the plateau, and on the 29th Menschikoff occupied the heights over Inkerman and reinforced the garrison.

A correspondent calls our attention to the fact that the Director of Military Education has nothing to do with the curriculum or changes in it, but that the Civil Service Commissioners manage that business. We think it would be much better if the Director had something to say to the studies, but as he has not, of course it is unfair to hold him responsible, or charge him with any fault in connection with them.

It is calculated that at the present rate of progress, the Militia of the United Kingdom will have entirely disappeared in 10 years.

In a "note by the way" in Thursday's *Globe*, there is a curious illustration of the ignorance of the best possible teachers of the world. The writer ridiculed certain Egyptian authorities who asked Lord Northbrook for the restoration of their powers, and declared boldly that their mismanagement had led to disaster. They were described as "the Sheiks of El Beled," the *Globe* evidently believing that El Beled was some town or district where the Sheiks were misconducting themselves. The poor people were the village sheiks (sheiks el-beled), the head men of the villages, who desired nothing more formidable than control of the village watchmen and things of that sort—and whose views Lord Northbrook was anxious to learn through an interpreter.

Lord Hartington stated in July last, in the House of Commons, that a vote for the defence of Aden would be presented to Parliament before the close of the Session. No vote was, however, proposed. We wonder if the Government have again sacrificed efficiency to economy.

In reference to certain letters which have appeared in the *Hampshire Telegraph*, &c., addressed to a recent employé of the *Army and Navy Gazette*, General Lord Wolseley has written from "Kasr-el-Noussa, Cairo, 19-9-'84," to say that they were "certainly not intended for publication;" and Admiral Sir Geoffrey Hornby has intimated that the publication of his letter was "without his permission and contrary to his wishes."

The daily papers have contained very long and eulogistic reports of "Maxim's machine" for "pumping lead" on an enemy, and, from the description of the weapon, it would seem as if a very formidable and destructive weapon, in theory, were waiting to be at the service of the authorities; but we have always found it safest to wait a little for the results of practical trials before we enter upon the state of rapturous enthusiasm about these inventions.

Can any of our readers give us any information about the present condition of the "Hope gun," which has been so long before the world—on paper? Colonel Maitland, we believe, is as anxious as any one can be for the appearance of the marvellous piece which demolished Woolwich and all its works from a neat lecture-battery some months ago.

Lieutenant-General Sir C. P. Beauchamp-Walker, K.C.B., Director-General of Military Education, will be retired on account of age on October 7; and during the present month three battalion commands will fall vacant, on the expiration of the five years' allowed to the holders, namely, Colonel E. Meurant, Royal Irish Rifles, on October 5; Colonel C. J. Horne, Bedfordshire Regiment, on October 10; and Colonel A. H. Tucker, Durham Light Infantry, on October 29. Major John Quarry, Berkshire Regiment, will also be retired this month on attaining the age of 48.

Are men animals? We observe that all authorities are agreed as to isolation, and, in fact, "quarantine," in the case of cattle-disease; but in England, at least, quarantine is derided in the case of human beings as absurd, vexatious, and futile.

"At no period of the history of Austria was the name of Claus Gallas absent from the muster-roll of her armies; on no occasion was the name of Claus Gallas ever associated with anything but defeat." To paraphrase that hard saying of the leading journal after the battle of Gitchin in 1866, we may say that at no period of the history of the War Office was the name of a Surveyor-General absent from the roll of its officers; on no occasion was the name of the Surveyor-General ever associated with anything but attack from inventors. A contemporary, some time ago, in a playful mood, recommended Mr. Brand to take Mr. Lynall Thomas to his bureaucratic bosom, and to throw over the Ordnance Branch. Mr. Macfarlane and Mr. Leake have told us they "think ill of the War Office" in general, and of the Ordnance Branch in particular. Mr. Macfarlane is a Scotch gentleman from Caithness, who sits as a Home-ruler for Carlow by virtue of some strange association of (something more than) ideas between himself and the electors of that agreeable county, and Mr. Leake is an eminent "Engraver for Calico Printers." It is really astounding that the War Office should have refused to grant a Select Committee to inquire into the plaints of Mr. Lynall Thomas because these two experts asked for it! But they did so, and Mr. Lynall Thomas "went for" Mr. Brand in a magazine article, and for Sir F. Campbell in letters, which it is well our respected contemporary, in which they saw the light, could print without the fear of Colonel Hope before its eyes. In these letters, Mr. Lynall Thomas, to quote the paper, "almost directly accuses Sir Frederick Campbell of falsehood and fraud." Our contemporary thinks Sir F. Campbell should be made to take steps to vindicate himself, "which, apparently, he has not yet done." Gently! "Let sleeping dogs lie" is our advice. We are not like our very disinterested contemporary, who "expressed *no opinion* on the merits of the matter, but said, 'Mr. Lynall Thomas has certainly made out a strong *primâ facie* case against the Ordnance Department in general, and Sir F. Campbell in particular!'" But we have our own opinions on the matter for all that.

Sir William Norcott was, we understand, offered the vacant appointment of Colonel Commandant of the 60th Rifles, but declined it, as he had no wish to leave his present regiment, the 47th, in order to join a "green" corps with which he was never associated. General Norcott served in the Rifle Brigade.

The following remarks, made by an infantry officer in a military club a few evenings ago, seem so exactly to describe the present state of the Army, that they may be of interest. The officer said,—"I have 22 years' service, I am a Brevet Lieutenant-Colonel in the Army, a Captain in my regiment, and at present I command 10 duty men." This command must be rather an expensive one from the taxpayers' point of view. But the taxpayer is almost the last person to be considered really, though professedly he controls all military expenditure.

Up to date twelve Paymasters have been promoted Staff Paymasters in the Pay Department during the current year, and four or five more may expect promotion before the end of December. Next year the prospects of advancement are not brilliant, only two officers—a Chief Paymaster and Staff Paymaster—being necessarily retired on the score of age.

Major A. Warry has been appointed Deputy Assistant Adjutant-General, Royal Artillery, Horse Guards, in succession to Lieut.-Col. J. A. Tillard, who has embarked for India to take over the duties of Assistant Adjutant-General, Madras Presidency, vice Lieut.-Col. W. H. Caine, whose period of service in that appointment expires on the 21st inst.

The thirty non-commissioned officers who assembled at Aldershot on June 10 last to form the fifty-eighth Army Cooking Class are but midway through their course. No sane person can believe that it is necessary to put a non-commissioned officer through a six months' course of baking and boiling before he is qualified to superintend the cooking of the meagre fare of the British soldier. Skilled artisans in wood, iron, and leather can be produced in a much shorter time.

In last night's *Gazette* Major-General Martin Dillon is appointed to a division in the Bengal Presidency, in succession to Lieutenant-General R. Hume. General Dillon was for five years Assistant Military Secretary at the Horse Guards. The best wishes of a host of friends will follow General Dillon, who has just been a guest at Balmoral, to his new command.

The appointment of Assistant-Adjutant-General, Royal Engineers, at Head-quarters, War Office, fell vacant on Wednesday, on the expiration of Lieutenant-Colonel Micklem's tenure. His successor is Lieutenant-Colonel W. Salmond, Royal Engineers.

A return was lately moved for showing the number of Martini-Henri rifles which had been manufactured and their disposition. This return has just been issued, and it appears that 506,797 Martini arms of all kinds have been supplied. They are accounted for as follows:—regular troops, 118,493; militia, 89,177; volunteers, 12,665; in store, 281,178. The demand for information was coupled with the request of an estimate of the number of rifles requisite to complete the Martini armament of the Volunteers, and this is given as 158,317.

It would be interesting to know what answer the Governments of the Crown Colonies of Singapore and Hong Kong have returned to the proposal of the War Office that, provided they constructed the necessary fortifications for the efficient protection of those ports, this country would generously give the necessary armament.

It seems improbable the Government of the Cape will accede to the proposal of the War Office that they should undertake the defences of Cape Town, in which case the home authorities would provide for the safety of Simon's Bay, the Naval Depôt, and coaling station, which, like most of our ports abroad, is at the mercy of an enemy's fleet.

The Navy.

ADMIRALTY, Sept. 26, 1884.

Staff Com. A. J. Burniston has been promoted to the rank of Staff Capt. in her Majesty's Fleet (Sept. 24).

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer J. O. Wilson has been placed on the Retired List of his rank (Sept. 26).

ADMIRALTY, Sept. 27, 1884.

In accordance with the provisions of her Majesty's Orders in Council of Feb. 22, 1870, and Nov. 29, 1879, Lieut. W. C. S. Hathorn has been placed on the Retired List, with permission to assume the rank and title of Retired Com. (Sept. 27).

ADMIRALTY, Sept. 29, 1884.

The Rev. William Walmsley Sedgwick, B.A., has been appointed a Chaplain in her Majesty's Fleet (Sept. 26).

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surg. T. R. Warren has been placed on the Retired List, with permission to assume the rank and title of Deputy-Inspector-Gen. of Hospitals and Fleets (Sept. 29).

ADMIRALTY, Sept. 29, 1884.

Royal Marine Light Infantry.—Capt. and Brevet Major R. E. Montgomery to be Major, vice Beechey, to half-pay; Lieut. W. G. Speed to be Capt., vice Montgomery (both dated Sept. 22).

ADMIRALTY, Sept. 30, 1884.

The Rev. F. Flynn, B.A., has been appointed Chaplain in her Majesty's Fleet (Sept. 25).

ADMIRALTY, Oct. 2, 1884.

Royal Naval Artillery Volunteers (Liverpool Brigade)—Rev. R. H. Hammond to be Hon. Chaplain (Sept. 29).

APPOINTMENTS.

Captain—John O. Warren, to the Indus, for the Tamar.

Lieutenants—Arthur C. Middlemass, to the Invincible, additional; Michael S. Beatty, to the Polyphemus; Henry D. Kirwan, to the Briton; George E. Richards, to the Pembroke, additional; George C. Frederick, to the President, additional; Thomas J. Oswell, to the Garnet.

Midshipman—Ronald A. Hopwood, to the Opal.

Chaplains—Rev. Francis E. Pitman, B.A., to the Jumna; Rev. Francis Flynn, B.A., to the Shannon.

Staff Surgeon—James Robertson, to the Brilliant.

Chief Engineers—William E. Beal, to the Pembroke, for the Rambler; George McEwen (a.), to the Indus, for the Acorn; Nathaniel Stearn and John Hall (b.), to the Excellent, additional.

Surgeons—Frederick A. Trevan, to the Indus; Theodore J. Preston, to Royal Marines, Chatham; Bowen S. Mends, to the Temeraire; John L. Thomas, to the Superb; David B. Bookey, to the Hector.

Paymasters—James W. Lishman, to the Jumna; William Trew, to the Indus, for the Tamar.

Assistant-Paymaster—Arthur W. Morrell, to the Swiftsure.

Engineers—William Scott, to the Cambridge, for the Bullfrog; George White, to the Asia, for the Scout.

Assistant-Engineer—Charles J. James, to the Jumna.

Gunners—George Wright and Edwin Irwin, to the Vernon, additional.

Boatswain—Francis Carpenter, to the Valorous.

COASTGUARD.

Commissioned Boatman—William Collins, Tollesbury, to be chief boatman, Whitstable, vice Isaac Spells.

Agamemnon, Capt. S. Long, will be taken into Plymouth Sound prior to be being removed outside the breakwater for a trial of her machinery and other experiments.

Algerine, Com. Fullerton, was at Monte Video on the 26th ult.

Amethyst, Capt. Brent, on the South-east Coast of America station, was to leave Maranhao on Saturday last for Bermuda, in order to be docked. She will afterwards return to her station. The Ready, senior officer's flagship during the absence of the Amethyst, was to be at the Falkland Islands.

Arethusa, attached to the First Division of the Medway Steam Reserve, one of the new type of heavily-armed fast-steaming ocean cruisers, of which there are at present four preparing for sea, viz., the Leander, Amphion, Phaeton, and Arethusa, all the vessels of this class being named after the 50-gun wooden frigates which formed such an important element in the British Navy a quarter of a century ago, has been ordered to be brought forward for commission. The Arethusa is to be armed with 10 6-in. breech-loading rifled steel guns, mounted on the Vavasseur system, together with a formidable equipment of Gardner and Nordenfelt machine-guns. A party of seamen from Sheerness Royal Naval Barracks have been told off to assist in rigging her.

Assistance, Capt. St. Clair, left Portsmouth on Saturday for Queenstown, to carry out a number of military reliefs.

Cherub, Lieut.-Com. Haszard, tender to the Penelope, coastguard ship for the Harwich district, was passed out of the hands of the dockyard authorities at Sheerness on Wednesday, the damage she sustained by the recent collision with the armour-plated turret-ship Hydra having been repaired. The steering gear, which was the cause of the collision, has been replaced.

Coquette, Lieut.-Com. Crowe, has been ordered to Alexandria from Corfu.

Crocodile, Capt. Carr, arrived at Malta on Wednesday, and left for Bombay next day.

Dryad, Com. Hulton, and the hired transport Hankow left Malta on Saturday for Portsmouth.

Grappler, Lieut.-Com. Charles H. Cochrane, arrived at Gibraltar on Saturday last.

Himalaya, Capt. H. St. L. B. Palliser, arrived at Malta on Thursday, and left yesterday for Gibraltar and Portsmouth.

Kingfisher, attached to the First Division of the Medway Steam Reserve, is being completed for sea with all possible despatch at Sheerness, in compliance with Admiralty orders. She will be commissioned on the 22nd inst. for the relief of Dryad, ordered home on account of the bad state of her hull. It had been intended to fit the Kingfisher with a poop to provide increased accommodation for her crew, but owing to the limited time allowed the officials for her refit, the proposal has been abandoned.

Monarch, Capt. Frederick G. D. Bedford, remains at Alexandria.

Neptune, Capt. W. H. Maxwell, was undocked at Portsmouth on Wednesday, after repairs.

Northumberland, Capt. Frederick C. B. Robinson, is being completed with all despatch at Devonport. The fitments below the water-line have been thoroughly examined. One side of the ship, below water-line, has been coated with Kay's composition, and the other side with the Admiralty composition, for the purpose of testing the relative merits of both preparations.

Pylades, in course of construction at Sheerness, is ordered to be ready for launching on Nov. 5. The Pylades was laid down in January, 1883, as a composite sloop, but shortly after she was commenced the Admiralty increased the number of guns carried by vessels of her class and directed them to be designated as corvettes. The Pylades is sister-ship to the Caroline and Satellite, and is built upon the same lines, although smaller in size, as the "C," or Comus class of corvettes. She will be fitted with all the latest improvements in shipbuilding science, and will be mounted with a powerful armament of 14 5-in. steel breechloading guns, working on the Vavasseur sliding-carriages. She will also carry a strong equipment of machine-guns and will be fitted with the electric machinery for discharging the spar torpedoes. The vessel is built of wood and steel, and all her vital parts are protected with shot-proof gratings. The Pylades is estimated to cost £51,015, of which £21,351 is for materials and £29,664 for labour. A further sum of £1,560 is provided for her masts and rigging. She will be fitted with machinery of 1,000 horse-power. The Pylades will be capable of a high rate of speed under sail or steam. The following are the principal dimensions:—Length, 200 ft.; breadth, moulded, 37 ft.; breadth, extreme, 38 ft.; draft of water forward, 12 ft. 9 in.; aft, 14 ft. 9 in.; displacement, 1,420 tons.

Raleigh will shortly be commissioned at Devonport for service on the West Indies station.

Rapid, Capt. H. J. F. Campbell, which has been commissioned to relieve the Opal on the West Coast of Africa, made her full-speed trial from Plymouth, on Monday, in charge of Com. Fortescue, of the Steam Reserve. The engines were worked by Mr. Brooker, Chief Inspector of Machinery. The navigation duties were carried out by Lieutenant Steele. The ship was put on the mile about 10.15 a.m. At that time the draught of water forward was 13 ft. 4 in. and aft 16 ft. 1 in. On the trial in the first four runs, the steam in the boilers was 87·5 lb., the vacuum in the condenser 25, the revolutions per minute, 105; mean pressure in the cylinders—high, 39·7 lb., low, 13·9 lb.; indicated horse-power, high, 642, low, 671—total, 1,313; speed, 12·484 knots an hour. The ship was then put on four runs at two-thirds' power, with the following results—Steam in the boilers, 90; vacuum in the condenser, 25·6; revolutions per minute, 91·3; mean pressure in the cylinder—high, 33·6, low, 8·5; indicated horse-power, high, 475, low, 357—total, 832; speed, 11·125. The ship was next put on one-third power, with the following results—the steam in the boilers was 90 lb.; the vacuum in the condenser was 26; the revolutions per minute, 73·6; the pressure in the cylinders—high, 13·3, low, 7·7; indicated horse-power, high, 250, low, 257—total, 457; speed, 9·62 knots. The trial was regarded as most satisfactory, a higher amount of steam and a greater amount of registered results having been obtained, than were chronicled at the contractors' trial. The circles, which were carried out under an officer of the Chief Constructor's Department, showed that the ship was well fitted, and that she could be turned quicker than her sister ship, the Heroine, which has a similar armament. The Rapid is about to leave Devonport for Cape Coast Castle to meet H.M.S. Opal. The latter ship will then proceed to Tristan d'Acunha. An opportunity will thus be afforded of sending letters to the islanders.

Reindeer, Lieut. Moggridge, is completed for sea at Devonport, and awaits her armament, when she will be ready for active service.

Serapis, Capt. A. L. Douglas, sailed from Portsmouth on Tuesday morning for Bombay, with 15 officers and 259 men, drafts from various regiments. She called at Devonport and made up her complement.

Starling, Com. F. Sanders, is being hastened forward in her overhaul and repairs at Sheerness. On completion she has been ordered to join the Channel Squadron.

Tourmaline, Capt. Boyle, which was recommissioned at Sheerness in Sept., 1880, arrived at Suez on Monday from Madagascar, homeward bound, to be paid out of commission.

Woodlark, Com. Kingscote, has arrived at Malta from Alexandria.

Wye, Staff-Com. A. W. Miller, which has been in the shipwrights' hands in the steam basin at Sheerness for some time past, will be completed on Nov. 1, in readiness to be despatched on a further round of troop and store duties.

Letters from Rear-Admiral Lyons, Swiftsure, flagship, dated Esquimault, the 9th ult., have been received at the Admiralty. He will remain on the Vancouver Division for the present. The Satellite was at Panama on August 30, on passage to Esquimault, and was to call at Acapulco and Guaymas. The Mutine, at Esquimault, was to proceed to the Southern Division of the station after the arrival of the Satellite at Esquimault, probably about, the middle of the present month.

Rear-Admiral Salmon, according to letters received at the Admiralty on Wednesday, was at Simon's Bay with the Boadicea, flagship, on the 10th ult. The Frolic left Table Bay on the 3rd ult. for St. Helena, to join the squadron under the orders of Capt. Brooke, of H.M.S. Opal.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

THE WASP.

The Secretary of the Admiralty has forwarded the following nominal list of the officers and crew, corrected up to the latest information in office:—

Lost:—Lieut. and Com. John D. Nicholls; Lieut. George H. King; Sub-Lieut. Thomas S. Guppy; Gunner John W. Kerrigan; Samuel Adams, warrant officers' servant; Richard Andrews, boatswain's mate; W. J. Brewer, armourer's crew; James E. T. Bartlett, A.B.; John Buckley, signalman, 2nd class; John Bosworthick, leading stoker; Robert Brond, ship's steward, 3rd class; H. A. Cornelious, sailmakers' crew; Patrick Connolly, quartermaster; Edward Chamings, stoker; John Colley, commander's servant; William Coombe, skilled carpenter's mate; William Davey, Henry Dunkley, Richard Dobner, Charles Dillon, and W. H. Dixon, A.B.'s; David Derry, engine-room artificer; Arthur Davis, private R.M.; Langham C. Ennis, chief engine-room artificer; Frederick W. Frost, Samuel Fletcher, and David Flynn, stokers; W. H. Farley, Robert Gartshorne, W. T. Hoyle, F. C. Hornsby, and J. H. Heal, A.B.'s; Watkin Jacobs and Albert Morgan, privates R.M.; Charles Perry, leading seaman; Richard Partridge, private R.M.; R. H. Pengelley, quartermaster; W. J. Robinson, A.B.; John Rumbelow, stoker; Albert Stiles, John Screech, and James Stark, A.B.'s; John Saunders, stoker; Phillip Skinner, ward-room steward; Richard Spriddell, A.B.; Henry Sings, stoker; Thomas Smith, private R.M.; Albert J. West, A.B.; Alfred Watts, private R.M.; Andrew Young, corporal R.M.

Saved:—Philip Andrews, second captain forecastle; Alfred Broomhead, private R.M.; W. H. Dunn, A.B.; John Hatton, ship's cook; Richard Rattenbury, quartermaster; William Styles, private R.M.

The six survivors reached Portsmouth on Sunday morning. They were sent on board the flagship Duke of Wellington, special provision for their comfort having been made by Capt. Rowley, while the medical staff gave attention to their cases, and found that what they chiefly required was rest and quiet.

The statements of the survivors of the Wasp and of Engineer Hudson and Surg. Brown, who were on leave at the time of the wreck, have been forwarded by Admiral Sir G. Phipps Hornby to the Admiralty. The weather in the vicinity of Tory Island has so improved that the island fishermen and the Coastguard were able to bring one of the bodies recovered from the Wasp to the mainland. It was placed in one of the rooms at the Coastguard station at Falcarragh to await a coroner's inquest. It is feared there will be some difficulty experienced in regard to the identification of the body, owing to the absence of the survivors. The Earl of Leitrim's steamer Norseman passed Tory Island on Wednesday, and her captain reported that no other bodies have been recovered.

Rear-Admiral Lethbridge has instructed H.M.S. Banterer to proceed from Westport to Tory Island, where she will remain there ten days, to assist in recovering the bodies of the men lost in the Wasp.

James Eva, a seaman belonging to the ill-fated gunboat, who was left behind on sick-leave at Westport, has been sent to Tory Island to identify any bodies recovered. A special list, with minute descriptions of the men, has been sent to all the Coastguard and Constabulary stations in the vicinity of Tory Island. News has reached the mainland from Tory Island that the body recovered from the wreck of the Wasp was interred in the island on Tuesday. It could not be conveyed to the mainland owing to the continued heavy sea.

The court-martial in connection with the loss of the Wasp will be held at Portsmouth next week.

WANT OF CRUISERS.

During the past few weeks, many eminent men who should know their subject have written and spoken on the present condition of the Navy, but nearly all have confined themselves to statistics with regard to our ironclad fleet, showing weight for weight of armour compared with other nationalities, and all tending to show the inferiority of the English. I do not wish for a moment to enter the lists with them, or to say that our ironclad fleet is in any way what it should be, or what the English people have a right to expect it should be; but I would wish to draw attention to the fact that the main fault does not lie so much with the condition of the armour-clad portion as in the utter uselessness and incapacity of our unarmoured and ocean-cruising class. As a French paper recently observed, in case of a war with England, their ships would not attempt to fight our ironclads unless forced to do so, but they would devote their energy and money to harassing our commercial fleet. Our ocean cruisers are, with very few exceptions, rotten and utterly useless for their work. They cannot steam fast, they carry old and obsolete guns, and they have no coal-carrying capacity, and yet we go on spending large sums of money in patching them up, when a sum much smaller than their original cost would build infinitely superior ships. Sir E. Reed, M.P., very justly remarked, in his speech in response to the toast of "The Navy," that no matter which party were in power, the main idea seemed to be to cut down the Navy Estimates. Ironclads are no good for the protection or convoy of shipping, and unless we can surely guarantee the safety of our merchant fleet, we can never really be successful. What ship have we in any degree approaching the Esmeralda, the type of what a modern cruiser should be?

The Russian Imperial cruiser Craysser, Capt. Ostolopoff, arrived at Plymouth Sound on Saturday evening. She will effect necessary repairs at Plymouth, and proceed to China.

Letters from Com. Craigie, of the Flirt, Senior Officer of the Bights sub-division, dated at Bonny, Aug. 25, were received at the Admiralty on Thursday. The Flirt, in the oil rivers, would go to Opobo, Old Calabar, Cameroons, and Ambas Bay. The Alecto, on the Gold Coast on July 28, would visit all the ports between Accra and Lagos. The Forward, in the oil rivers on Aug. 21, would go to Ambas Bay and Cameroons.

THE STATE OF THE NAVY.

Mr. W. H. Smith, First Lord of the Admiralty in Lord Beaconsfield's Cabinet, has written the following interesting letter on the state of the British Navy :—

"Early in the last Session of Parliament, Sir John Hay asked the Government to grant a Committee of the House of Commons to inquire into the state of the Navy and its adequacy to protect the interests of this country in the event of a sudden war with a maritime Power. Although I insisted on the complete and sole responsibility of the Government of the day for the defensive forces of the Empire, I strongly urged upon them the expediency of granting the inquiry, as, notwithstanding the repeated assurances of the Admiralty, there was a sense of insecurity in the public mind which could only be allayed by a full and impartial—not necessarily a prolonged—examination of the facts by a body independent of present and of past Governments, but whose verdict would carry with it the confidence and the respect of the nation. The controversy has continued and has increased, and the feeling of alarm and insecurity has widened and deepened, but the representatives of the Government evade the real issue, and satisfy themselves by piling figures upon figures, in order to prove that they have at least done as well as those who preceded them in office. That is not, I venture to think, a question about which the public at large care anything at all. They want to know whether our own shores and our colonial possessions are safe; whether we have a fighting fleet, which can dispose of any probable combination of forces which could be brought against it in battle; whether our food supplies, our trade, and our commerce are reasonably secure from interception by an enemy; whether, in point of fact, we are strong enough to make it in the highest degree improbable that an attack shall be made anywhere, and impossible that such an attack can be successful. These are questions which are being asked on all sides, and with increasing frequency. They are not party questions, for they are being urged with the greatest vehemence by warm supporters of the Government, and, unless they are dealt with exhaustively and immediately by such a committee as I have indicated, disquiet and anxiety will increase and swell until some little incident will turn it into a panic. We may be told that Parliament does not assemble in October for the consideration of administrative questions, and that the attention of the Prime Minister is absorbed by the measures for the extension of the Franchise; but the country will not be satisfied with any such answer. There is an impression gaining ground that our system of government by party is not conducive to good administration, and that the thoughts and energies of our statesmen are devoted rather to the game of checkmating their opponents than to the less sensational but more anxious and laborious duties of administration; but, if it comes to pass that the vital interests of the country are sacrificed to the paltry exigencies of party warfare, the demand for a radical change in our system will become irresistible. It will, perhaps, be said that this alarm is most mischievous, and may tend to bring about the very evil against which we wish to guard; but it is imbecility to suggest that foreign Powers do not know the condition of our forces of every kind, at least as well as every member of our own Government, with the exception, perhaps, of the Secretary of State for War and the First Lord of the Admiralty. If those Powers are our allies, or our friends, they will rejoice to see England awake to the duty of self-preservation; and if they are secretly hostile, they will not be more disposed to attack us because we are placing ourselves in a condition of comparative security. Our neighbours take pains to acquaint themselves with the facts—our Ministers do not care to know more than is convenient on such a disagreeable subject. Let me add, also, that very much might be done at once, if it is found to be necessary. The ships now building in the dockyards, and to be completed in three, four, and five years, could be finished and made ready for sea in the course of 1885, 1886, and the first half of 1887, if the orders were given now; and these ships would be more efficient, and would cost very many thousands of pounds less, if they were finished off-hand, than if the usual time is spent in building, pulling to pieces, and rebuilding, according to past and present programmes. Will the Government give the inquiry when Parliament meets in October? It might be conducted by a committee of the House of Commons, or a joint committee of both Houses; but means must be found to satisfy the country that in these days of restless ambition our Navy is strong enough, or forthwith will be made strong enough, to protect it from aggression, and to secure to the Empire of Great Britain safety and tranquillity."

We hear from Cairo that the news of Sir Edward Malet having been appointed her Majesty's Ambassador Extraordinary and Plenipotentiary at Berlin was received with the greatest satisfaction in all the leading circles at the capital.—*Egyptian Gazette.*

NAVAL LEGISLATION.

The internal regulations of the Navy have, we are reminded, secured some attention of the Legislature, and more than one statute has been passed this year which is of considerable interest and importance to the Naval service.

First, as regards Naval enlistment, by Chapter 46 some encouragement is given to the view that for the trained skill of a seaman a long service is desirable. Two years are here added to the period for which boys may be entered for the Navy. Thus, a boy may now be entered for continuous and general service for 12 years, or if he is less than 18 years old, then up to the age of 30. Or, rather, the Admiralty is allowed by Act of Parliament to extend the limit of enlistment as much as this. Another portion of the Act includes marines, within the statute of 1853, which provides for the temporary transfer to the Navy in case of need, of pensioned seamen employed in other public services.

Next, Naval Discipline commands attention. One rule with regard to courts-martial has been that a court cannot be held unless three at least of her Majesty's ships are together when it is held. As in these days of ironclads our ships are powerful rather than numerous, the minimum number required for a court-martial is reduced to two. The necessity of having two officers who are commanders or of higher rank present at a court-martial besides the president is abolished, where it is a lieutenant that is being tried, but is retained where the trial is of a commander. Some alteration is made in the law relating to cases where offences are tried by the commanding officer of a ship himself. The restrictions imposed on the sentence to be awarded by him are now simply that he may not award penal servitude or imprisonment for more than three months. Any important restriction is placed on the cumulative sentences that may be awarded by Courts-martial. Where an offender has already been sentenced to imprisonment or penal servitude a Court-martial for another offence has been able to award him another sentence to commence at the expiration of the first. It is now directed that this provision shall not cause a man to undergo imprisonment for a period exceeding two consecutive years. When a man has been sentenced by Court-martial to penal servitude, the Admiralty has hitherto had to notify the fact to a Judge of the High Court, and the Judge has thereupon made an order for the penal servitude of the offender. The intervention of a Judge is now made unnecessary, the order of the Admiralty, or of the Commander-in-Chief, or of the officer ordering the Court-martial being sufficient warrant for the offender being removed to some prison in which a convict sentenced by a civil court in the United Kingdom can be confined either permanently or temporarily.

A marine establishment called her Majesty's Indian Marine Service, is employed under the direction of the Governor-General of India in Council for the transport of troops, the guarding of convict settlements, the suppression of piracy, the survey of coasts and harbours, the visiting of lighthouses, the relief of distressed or wrecked vessels, and other local objects. The maintenance of the establishment is, of course, supplied out of the revenues of India. The members of the service are, however, not subject to the Naval Discipline Act or the Merchant Shipping Act, or to any corresponding law made by the Government of India. Accordingly, power has been conferred on the Governor-General of India in Council to make laws for the purpose of maintaining discipline in the service. But it is only when an offence is committed within the limits of Indian waters that these laws are to apply; and "Indian waters" include the high seas between the Cape of Good Hope on the West and the Straits of Magellan on the East, and all the territorial waters between those limits. Moreover, the punishments to be imposed by these laws are to be similar in character and not in excess of those for similar offences in the Navy—with one exception, and that is, that in the case of persons other than Europeans or Americans imprisonment for a term not exceeding 14 years or transportation for life may be substituted for penal servitude. A restriction is also placed on the power of making laws that impose sentences of death, the previous approval of the Secretary of State for India in Council being necessary for a law which permits any Court besides the High Court to sentence to death any of her Majesty's natural born subjects, born in Europe, or any of their children. In time of war the Queen is empowered to direct by proclamation or by order in Council that any vessel of the Indian Marine Service be under the command of the senior naval officer of the station. Thereupon it will be deemed a ship of the Royal Navy, and the men and officers will be, for the time being, subject to the Naval Discipline Act.

DIMNESS of SIGHT.—Dimness of Sight and Blindness are often caused by the use of unsuitable Spectacles. Mr. H. LAURANCE, F.S.S., Oculist Optician, 1A Old Bond Street, scientifically adapts his improved Spectacles to strengthen and assist the weakest sights. Testimonials from Earl Lindsay, Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, containing valuable suggestions, post free.

BOOKS, Etc., RECEIVED FOR REVIEW.

"Stray Shots," by Sir Edward Sullivan, Bart.; My Friends and I, edited by Julian Sturgis (Longmans, Green, and Co.)—La Guerre de Surprises et D'Embuscades, par A. Quinteau, tome I. et II. (Paris: H. Charles-Lavauzelle).—The Social Code, 1884, compiled by George Ager, LL.D. (Effingham Wilson).—Magazines for October: Blackwood's Magazine (W. Blackwood and Sons); The Argosy (R. Bentley and Son); The Nineteenth Century (Kegan Paul, Trench, and Co.); The Royal Navy List (Witherby and Co.); The United Service (Philadelphia: L. R. Hamersley and Co.); The Army and Navy Magazine (W. H. Allen and Co.); The Atlantic Ocean (Macfarlane and Co.); Colburn's United Service Magazine (Simpkin, Marshall, and Co.); The Illustrated Naval and Military Magazine (Illustrated London News Office).

NOTICES TO CORRESPONDENTS, Etc.

Several Naval and Military letters, &c., are in type, but are forced to stand over through want of space.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

London Amusements.

The COVENT GARDEN Promenade Concerts are shortly to be identified with some extra performances, when oratorios will be given in the afternoon. On Saturday evenings the theatre is henceforth to be opened at an early hour, and the Royal Artillery band is engaged to play between 6 and 8 p.m.

To the GAIETY was transferred, on Monday night, Mr. Walter Browne's three-act farcical comedy called "A Wet Day," originally produced last August at a Vaudeville morning performance, and since played at several theatres in the provinces. The plot is framed on a familiar pattern, and the action is limited to the morning, afternoon, and evening of one day. A stockbroker, taking the advantage of his wife's absence on a visit to her mother, goes with an alderman, his father-in-law, to some late revels, which lead to ultimate disturbances of domestic peace. At last all is satisfactorily explained, and the result is a general reconciliation. Some rather broad allusions in the dialogue have been advantageously modified, and, as now briskly acted by the members of the Gaiety company, the piece seems well suited to the theatre. The burlesque of "Little Fra Diavolo" has been revived as an addition to the reconstituted programme.

The ST. JAMES'S THEATRE reopened for the season on Thursday evening with "The Ironmaster," supported by the same excellent cast which gave such remarkable vitality to the play during the earlier portion of the year.

The SURREY produced on Monday night a new sensational drama, in six acts and eight tableaux, called, "The Sins of the City," written by Messrs. George Conquest and Paul Meritt.

The ALHAMBRA is closed pending the application to the Middlesex Magistrates for a music licence. The CRITERION will be reopened this evening with "Featherbrain;" and the NOVELTY THEATRE will commence a new season on the sam night, producing a comic opera in two acts and three tableaux, entitled "Polly," composed by Mr. Edward Solomon, and written by Mr. James Mortimer. "Called Back," at the PRINCE'S THEATRE, has now passed its 120th representation, and seems to be steadily increasing in popularity. Mr. Edgar Bruce left last week for New York to arrange for the production of the authorised version in all the great cities of the United States.

Obituary.

Admiral Patrick John Blake, on reserved half-pay, died at Thurstow, Bury St. Edmunds, on Monday last, aged 86. He obtained his commission as lieutenant as far back as July, 1823, and was appointed commander in January, 1830. He took part in the Chinese war of 1841, and commanded the Larne in the operations against Canton, for which he received the medal. He was promoted to captain in May, 1841, became rear-admiral in January, 1861, vice-admiral in April, 1866, and admiral in October, 1872.

A QUERY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Can you kindly tell me what is the difference between the "honorary rank of captain" granted to paymasters, and the "honorary and relative rank of captain," granted to quartermasters? I have asked many the question, without satisfactory results. Again, a warrant officer holding an honorary commission is an officer within the meaning of the Army Act. Is it correct to address him as a "warrant officer," as is the case in India? Can he be both a warrant officer and a commissioned officer, these being two different grades which do not coalesce?—I am, &c.,

MARRIAGE.

Piper — Nicholas. — On October 1, at Christ Church, Brondesbury, by the Rev. C. W. Williams, D.D., rector of the parish, John Townend Piper, Esq., of Vernon House, Brondesbury, to Frances Charlotte Elizabeth (Lily), daughter of Major Griffin Nicholas, retired full pay, 5th or Northumberland Fusiliers, and half-pay her Majesty's Honourable Corps of Gentlemen-at-Arms.

DEATH.

Bray.—On September 26, at 16 Kidbrook Grove, Blackheath, Major-General George Frederick Campbell Bray, late Colonel 96th Regiment and Assistant-Adjutant-General Southern District.

NOTICE is HEREBY GIVEN, that I, the undersigned, WILLIAM EDWARD BURDETT, of Ringstead Lodge, near King's Lynn, in the County of Norfolk, a Captain in H.M.'s Reserve of Officers, and late a Captain in the 61st Regiment, intend henceforth to USE the Surname of BURDETT in lieu of my present Surname of NESS, and that I intend henceforth to style myself and in all acts, deeds, matters, and things whatsoever, to use and subscribe, and be known by, the Surname of BURDETT. And I have testified and declared such my intention by a Deed Poll under my hand and seal, dated the 30th day of September, 1884, and which Deed Poll was enrolled in the High Court of Justice, Chancery Division, on the 1st day of October, 1884.—Dated this 3rd day of October, 1884, WILLIAM EDWARD BURDETT.

ARMY and NAVY CO-OPERATIVE SOCIETY (Limited),
117 Victoria Street, Westminster, London, S.W.

THE ECONOMIC LIFE ASSURANCE SOCIETY (Established 1823),
6 New Bridge Street, Blackfriars, London, E.C.,
affords Mutual Assurance with Perfect Security without Individual Liability.

The Funds now amount to £3,619,661, and Annual Income to £377,000.

The Directors having carefully revised their rates for non-participating assurances, Policies may now be effected at proportionately low rates of premium, Without Profits.

The attention of those who desire to effect Policies, at the lowest present cost, is invited to the Society's New Prospectus.

BONUS POLICIES.

Rates of Premium.—From 9 to 26 per cent. less than those charged by other Life Offices.

Results of Economical Management.—Large Bonuses have been declared. Instances are on record of Policies having been trebled by Bonuses.

Division of Profits.—By the mode of dividing the profits, Policies are not only valuable as a provision in case of early death, but become increasingly valuable as an investment in old age.

SPECIMENS of POLICIES in FORCE at VALUATION, 1883:—

Policy effect'd in the Year	Age at Entry	Sum originally Assured.	Bonus to 1883, inclusive.	Total Sum Assured.	Per-centage of Bonus on Premiums Paid.			Surrender Value of Policy and Bonus.			Equivalent Free Policy, inc. Bonus to Dec. 31, 1883.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

HOLLOWAY'S PILLS.—NERVOUSNESS AND WANT OF ENERGY.—When first the nerves feel unstrung and listlessness supplants energy, the time has come to take such an alterative as Holloway's Pills to restrain a disorder from developing into a disease. These excellent Pills correct all irregularities and weaknesses. They act so kindly, yet so energetically, on the functions of digestion and assimilation that the whole body is revived, the blood rendered richer and purer, while the muscles become firmer and stronger, and the nervous and absorbent systems are invigorated. These Pills are suitable for all classes and all ages. They have a most marvellous effect on persons who are out of condition; they soon rectify whatever is in fault, restore strength to the body and confidence to the mind.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 23 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill:—

Captain Fleming, R.A.,
Major Creagh, R.A.,
Captain Hippisley, 2nd Dragoons, and
Major Churchill, Northumberland Regiment,
were successful.
Captain Grieve, R.A., qualified.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITIA COMPETITIVE EXAMINATIONS, 1885. MAJOR COWPER has vacancies for two or three pupils desiring a small class and expeditious preparation.

Individual attention from each instructor.

From 1881-1884 (seven examinations) 22 pupils have competed, and 15 passed, viz., 1st, 8th, 10th, 21st, 28th, 29th, 30th (twice), 33rd, 34th, 37th, 58th, and 64th. Preparation for the Further and Preliminary. Terms moderate.

Testimonials and References on application to MAJOR COWPER, 10 Clifton Vil'as, Maida Hill, W.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London. By Order,
G. W. FORSTER, Secretary.

LEAVE SEASON.

35.	Capt. E. R. Evans, 1st Batn. Royal Welsh Fusiliers	2008

and four others qualified.

NEXT COURSE for STAFF COLLEGE and PROMOTION commences OCTOBER 15.

Militia and other Courses now going on.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

JERSEY HIGH SCHOOL for GIRLS (Limited).

PATRONS.

The Right Reverend the Lord Bishop of WINCHESTER.

His Excellency the Lieut.-Governor of JERSEY.

Head Mistress—Miss M. E. POPE,

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey

ARMY EXAMINATIONS.—PREPARATION in FRANCE.—M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of TEN successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIX SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

TO PARENTS, GUARDIANS, WIDOWERS, OFFICERS going ABROAD, and ANGLO-INDIANS.—Major WILLIAMS has a few VACANCIES for BOYS over 6 years of age. Healthy locality, home comforts, liberal diet. Extensive recreation grounds; superior educational advantages, preparatory and classical. Twenty-two Scholarships, &c., of £40 to £110 per annum, tenable at the Universities. Terms on application. Unexceptionable references.—Pyon Lodge, Bodenham Road, Hereford.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

CANDIDATES for the ARMY.—TUITION by CORRESPONDENCE in GEOMETRICAL DRAWING, by a successful Teacher and Author.—"A. B.," Stanton House, 1 Belleville Road, Wandsworth Common, London.

INDIAN MEDICAL SERVICE.

INDIA OFFICE, September 20, 1884.

An EXAMINATION for FIVE APPOINTMENTS as SURGEON in her Majesty's Indian Medical Service will be held in LONDON in February, 1885.

Copies of Regulations for the Examination, with information regarding the pay and retiring allowances, &c., of Indian Medical Officers, may be obtained from the Military Secretary, India Office, London, S.W.

The exact date of the Examination will be announced hereafter. EDMUND NEEL,
Assistant Military Secretary.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of Charge. References kindly permitted to the late Secretary of State for War.—Apply by letter only, No. 69 Berners Street, London, W.

MILITARY COMPETITIVE EXAMINATION.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

CONNAUGHT MILITARY COLLEGE, WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES.—A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c.—Address, HEAD MASTER.

AN OFFICER in the ARMY WISHES to RECOMMEND strongly a PREPARATORY SCHOOL for YOUNG BOYS on the South Coast.—Apply to Colonel ABBOT ANDERSON, Professor of Military Topography, R.M.C., Yorktown, Farnborough.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

BRIGHTON.—TUITION for SANDHURST.—A Private TUTOR who takes only five Resident Pupils, has ONE VACANCY. Terms, £150 per annum; no extras. Can enter at any time.—83 Montpellier Road, Brighton.

SOUTH COAST.—PREPARATORY SCHOOL.—Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second.—PUNDIT, 21 Beechholme Road, Clapton, London.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

ARMY EXAMINATIONS.—PREPARATION for WOOLWICH and SANDHURST in the Modern Side of Derby School. Fees £70. Sons of Officers, £60. Lists of successes and of Scholarships tenable at School can be obtained from the Rev. WALTER CLARK, B.D., the School, Derby.

MAGIC LANTERNS, £6 6s, and Patent Pamphengos, marvellous results, price £4 4s. Rational amusement for the Army and Navy at home or abroad. Three-wick Lanterns, £2 2s; Educational 3½, £1 10s. Magnificent Triple and Biunial Limelight Lanterns, 50,000 to select from; beautiful effects. Novelties. Illustrated Pamphlets, 2d; Catalogues (200 pages), 9d.—HUGHES, Patentee, Brewster House, Mortimer Road, Kingsland Road, London, N.

THE MANOR HOUSE, LEE, S.E.

A CLASS for OFFICERS going up for the PROMOTION EXAMINATION in January next will be BEGUN at the MANOR HOUSE, LEE, S.E., on October 21, under the direction of Lieutenant-Colonel NEEDHAM, P.S.C., late Professor of Fortification, Tactics, &c., and formerly Garrison Instructor.

The MILITARY COMPETITIVE CLASS for MILITIA OFFICERS begins on October 14.

THE MANOR HOUSE, LEE, S.E.—
SANDHURST and WOOLWICH.

In consequence of the numerous applications he receives as to various Examinations, Mr. WOLFFRAM begs to notify that he PREPARES ONLY FOR MILITARY EXAMINATIONS.

At the last Army Examination, July, 1884, the following SIXTEEN PUPILS PASSED from Mr. Wolffram's Establishment:—

JULY, 1884.

THE MANOR HOUSE, LEE.

The NEXT TERM for MILITIA OFFICERS reading for the MILITARY COMPETITIVE, and for OFFICERS desirous of passing for Promotion in January next, COMMENCES OCTOBER 14, 1884.

MAJOR DE THOREN'S COURSE of INSTRUCTION for MILITIA OFFICERS READING for the MILITARY COMPETITIVE EXAMINATION in March next, and the COURSE for OFFICERS STUDYING for their PROMOTION EXAMINATION will COMMENCE on THURSDAY, October 16.

Major de Thoren receives but a limited number of Militia Officers, each of whom obtains great individual attention. He particularly desires gentlemen will join his class, if possible, *at the time of its formation*, in order that they may go steadily through the five months' course, by which time they ought to be thoroughly well prepared in the various subjects.

For particulars, apply to Major DE THOREN, Bellefield, St. Helier's, Jersey.

NATIONAL LIFE ASSURANCE SOCIETY,

A. J. Windebank, Esq., Chanda House, Fratton Street, Portsmouth, December 22, 1883:—"Watch, chain, and ring to hand. I am very much pleased with their appearance, the watch especially looking a very strong, handsome one, and equal to many I have seen at double the money."

Mr. H. A. Illingworth, 82 Queen Street, Batley, March 7, 1884:—"After four years' trial of one of your 25s. watches, I now desire to express my thanks for the same. During all the time I have had it I have not paid one halfpenny for repairs. It is as good to-day as ever. When I have shown it to my friends, they have valued it at double and frequently at treble the money. To those who wish to possess a cheap, good, everyday watch, I especially recommend the above."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to
Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

REPORT.—"I cannot speak too highly of the gold watch No. 17,179 of your make, and which I purchased from you in January, 1875. It was my constant companion during the winter 1875-1876 in the Arctic, and accompanied me sledging. It was about the best, if not the very best, in the 'Discovery,' and since my return home continues to perform equally satisfactorily."

Sole Address—3 THE HARD, PORTSEA.

TO MILITARY MEN.

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,289.—Vol. XXV.] SATURDAY, OCTOBER 4, 1884. [REGISTERED FOR TRANSMISSION ABROAD.] GRATIS.

THE NILE EXPEDITION.

Lord Wolseley and his Staff left Cairo on Saturday last for Wady Halfa. The movement marks a distinct epoch in the history of the Expedition, implying, as it does, that the Commander-in-Chief has completed his arrangements and that he entrusts their execution to the subordinates he leaves at his base. A good deal of the materiél has yet to be delivered. To provide for the contingency of the desert route from Ambukol having to be adopted, orders are being drawn out for the efficient organisation of the camel force. Telegraphic communication has been restored with Ambukol, which lies 60 miles south of Wady Halfa, and is distant 150 or 160 miles by land route from Berber. According to present arrangements Lord Wolseley will remain at Wady Halfa, which is just 759 miles from Cairo, for a week or two, until all the preparations for the general advance are completed. Meanwhile troops are pushed up to Dongola, but the main body with all the stores and equipments will be concentrated at Wady Halfa during the sojourn there of the Commander-in-Chief. What Lord Wolseley will do when he reaches Dongola—whether three battalions are to occupy Berber, and five advance to Khartoum, while two are to remain on the lines of communication—depends on the disposition of the Mahdi's followers, and what Gen. Gordon himself may accomplish in the course of the next few weeks, or even days, for the way from Khartoum to Dongola seems to have been opened up by the recapture of Berber.

The first detachment of the Nile boats—30 in number—arrived at Assiout on the 26th ult. by railway from Alexandria, where they disembarked from the Pelican.

The 11th Company, Royal Engineers, left Cairo on the 26th for the South.

The special correspondent of the *Morning Post* at Keneh writes on Sept. 14:—"There is now amassed at Assouan and Wady Halfa a store of nearly 300,000 rations, or, in other words, rations to feed 3,000 men for 100 days. The force at and above Assouan is composed of four battalions of infantry—namely, the Sussex Regt. (35th) (Lieut.-Col. Vandeleur), the Staffordshire Regt. (38th), Lieut.-Col. Eyre; the Essex Regt. (56th), Lieut.-Col. White; the Duke of Cornwall's L.I. (46th), Col. Richardson, C.B.; the Mounted Infantry, numbering 400, and some Royal Engineers and Blue-jackets. These infantry battalions average a strength of 700 men each, and with the Mounted Infantry and the small detachment of Engineers and Blue-jackets make up a total of about 3,300 men. This force, therefore, is rationed approximately for three months. But this force is to receive an addition of three battalions (either the two battalions—the (18th) Royal Irish, and the (70th) East Surrey—coming from India—with the (1st) Royal Scots, from the West Indies—or a brigade (probably the Highland Brigade from Cairo), an addition which will raise the number of men preparing to advance on Khartoum to about 5,000 combatants. Then there is the force of 400 cavalry coming from England, which, with the 19th Hussars, who will proceed to the front from land, will amount to about 800. There will thus be troops to be fed numbering about 6,000 above Assouan after the advance begins in its entirety. The 800 boats, which are to start from Wady Halfa with rations in each for 10 men for three months, give a supply of 800,000 rations, roughly speaking, and this added to the amount of 300,000 already accumulated at Assouan and Wady Halfa, will bring the provision for the whole expedition up to a total of 1,100,000; or, in other words, rations for 6,000 men for six months. Of the cavalry force of 800 and the mounted infantry of 400, not more than 400 probably will be mounted upon horses, and these horses will be furnished by the Egyptian cavalry, who, whatever service they discharge, will have to accept the duty of acting dismounted. The remainder, 400 cavalry and 400 mounted infantry, will be mounted upon camels, which will be obtained at Dongola. A considerable quantity of forage for horses and camels will be found at Dongola, but a certain proportion of it may be forwarded from Wady Halfa, and this forwarding can be done by camels. It may be computed, therefore, that without drawing upon local supplies for anything but forage in inconsiderable quantities, we shall have accumulated by the time that the entire force sets out from Wady Halfa provisions between Assouan and Dongola for 6,000 men for six months. The amount and quality of labour in these preparations may be estimated through a consideration of the following statement of distances and transport resources:—From Cairo to Assiout, 254 miles by train; from Assiout to Assouan, 344 miles by river, by means of steamers and steamers towing barges; from Assouan to Philæ, nine miles of train round a cataract; from Philæ to Wady Halfa, 240 miles by river, by small steamers towing boats; from Wady Halfa to Dongola, 262 miles by boats, sailing or rowing, by river, and by camels by land—a total distance of 1,000 miles, over the last stage of which—from Wady Halfa to Dongola—the stretches of water are so broken by cataracts and rapids as to be nearly impassable, except for very small boats at very high Nile; and unfortunately the Nile of this year is not a very high Nile, and the boats can surmount this difficult section of river only aid of traction from the banks. Col. Sir Herbert Stewart has proceeded to take command at Dongola, where he will have the disposal of the Sussex Regt., 200 of the Mounted Infantry, and the Egyptian troops under the Mudir, the remaining 200 of the Mounted Infantry being not sufficiently far advanced to arrive at Dongola for some weeks. Ambukol, the point from which an advance of 160 miles across the desert to Shendy will be made, if such an advance is decided upon, is about 100 miles beyond Dongola, and it is at Corti, near Ambukol, that the Mudir of Dongola, according to recent intelligence, apparently reliable, reported by Lieut.-Col. Colvile, who is at Dongola, met and completely defeated two Emirs of the Mahdi. Ambukol, consequently, is a point of importance, and the river thence from Dongola is free from serious difficulties, so that it is not impossible that Col. Stewart may push his reconnaissances to this point, and even establish a post there, either with the view of pushing forward stores, or of conducting a further reconnaissance by land into the desert, or of achieving both these highly advantageous objects. The Mudir of Dongola is understood to have promised that if English troops were sent him he would, by help of the prestige of such a force, accomplish, if not establish, communication with Gen. Gordon. The desert from Ambukol to Shendy is one of the least forbidding of deserts so-called. It has vegetation, and except over one considerable stage a fairly ample supply of water from wells that do not run dry, being visited as a rule by tropical rains in June and August, or perhaps, having regard to the general untrustworthiness and imperfection of the information we possess about these distant regions, it is safer to say that such are the blessings it is reputed to possess. The transport of the troops by boat above Wady Halfa is, and will remain probably until it is actually entered upon, a matter involved in doubt and uncertainty. Directed by the intelligence and resource of Lord Wolseley, its success will be regarded as assured by all but the most faint-hearted of pessimists; but the precise methods by which it will be conducted must be as yet subjected to trial. Experiments of the capacity of the camel for towing are being made, and it is probable that the worst obstacles of the rapids will be overcome by the means of camels and men towing, and where this is impossible, owing to the extent of mud upon the banks, or to the sheer descent of precipice into the river, by carrying the boats, the system known in Canada as 'portaging.'"

The *Times*' correspondent at Dongola writes on Oct. 1:—"Two hundred and sixty-nine Mounted Infantry, under Major Gough, have reached Dongola, having joined the boats at Tangoor, the horses being too tired to proceed quickly. The voyage was very satisfactory, all the cataracts being passed without great difficulty and with loaded boats. A slight accident occurred near Hannek, fortunately without bad result. The boats were becalmed, and all the men were ashore. Some sparks from a pipe caught the dry grass and ignited the vegetation for half a mile along the bank, and also the last nuggar. The ammunition and stores were promptly thrown overboard and saved. The men proceeded by another nuggar. The only loss was a few articles from the men's kits.* The stores for the Staffordshire Regt. have already passed Dal, where the regiment is expected to arrive shortly. It is proposed to establish a hospital camp on the river bank between Wady Halfa and Dongola. Farras Bey and some of Sir E. Wood's Staff accompanied the Mounted Infantry to inspect the localities."

THE DEFENCE OF KHARTOUM.

The correspondent of the *Times* at Khartoum writes on April 28 (*viá* Kassala, Massowah, and Suakim):—"Since my last telegram to you on April 21 we have been almost daily engaged with the rebels, who now thoroughly surround Khartoum. Gen. Gordon is busily engaged laying out mines in front of the works in all directions. Yesterday and to-day the rebels came down to a village opposite and fired heavily on the palace. We returned the fire with artillery and musketry, and on both occasions the Arabs soon retreated. There was no loss on our side. The town is quiet. Over half the population before the siege began went over to the rebels, thus weeding out all bad characters. Gen. Gordon is issuing rations to the poor. Food is very dear. We have corn and biscuits for about four months. Gen. Gordon has issued paper money, as our treasure is still at Berber. The merchants accept it as money, and all the arrears to the soldiers can be thus paid off. Gen. Gordon has sent emissaries to offer to all the slaves of the rebels their freedom if they abandon their masters and come in. If they do this, it will be a fearful blow to the rebels. The General has hired the large mission premises on the river, and has moved all the ammunition there; in case of attack with artillery on the fortifications it will be perfectly safe. A messenger from Seyid Mahomet Osman, of Kassala, who is an Emir of Mecca and chief among the Mussulmans in the Soudan, has come in bringing a letter. The Seyid says he has beaten the rebels around Kassala, and he tells General Gordon to be of good heart and he and all his men will come to his relief. In such respect is this man held that the rebels did not dare to stop the bearer of the letter. One of Gen. Hicks's bandsmen came in last night from El Obeid. The Mahdi has sent two guns, 40 boxes of shells, and 60 Remingtons to be used against Saleh Bey, who is still holding out against the rebels at Mesalimieh. This soldier states that Slatten Bey, at Darfour, has not surrendered to the Mahdi. The Blue Nile is slowly rising, and we hope that in 10 or 15 days the steamers will be able to smite the rebels hip and thigh. The health of the town is excellent, and we three Englishmen here are well and hopeful. There are now around the lines, in addition to all other obstacles, such as crowsfeet, broken glass, wire entanglements, and *chevaux de frise*, three lines of land torpedoes or percussion mines. They are enormously powerful, and are much feared by the Arabs. We have no news whatever of the intentions of her Majesty's Government. We learned to-day that a man with a post from Berber was taken by the rebels and killed."

On July 30 the same correspondent writes:—"We have been now five months closely besieged, and can at best hold out but two months longer. The soldiers and people live in hopes of English relief, as since last May there are daily reports of English advancing from Dongola and Kassala. The Arabs have strong forts with cannon along the river, and they push the siege as vigorously as ever. General Gordon has protected all the steamers with bullet-proof plates of soft wood and iron, and on the six armoured barges has put up castles 20 ft. high, giving a double line of fire. We have no fears of a rising in the town, as before the siege 8,000 to 10,000 men left and joined the rebels. The troops to be loyal must be paid, and General Gordon is badly off for money, none of that which left Cairo for his use ever having reached Khartoum. He has issued £50,000 worth of paper money. Food is daily distributed to the poor. Since March 23 the following are the chief events of the siege:—March 23.—Hassan and Seyid Pashas were put to death for treachery in the battle of the 16th, in which we lost 350 killed and wounded. April 16, 17, 18, 19, and 20.—Attacks by the rebels on the palace from the villages opposite. Fearful loss of life to the Arabs from mines put down by Gen. Gordon. April 27.—We heard of the surrender of Saleh Bey at Mesalimieh to the rebels, with 50 shiploads of food, 70 boxes of cartridges, 2,020 rifles, and a steamer. May 1.—The officer commanding engineers having put down a mine of 78 lb. of powder, trod on it, and with six soldiers was blown to pieces. May 3.—A man reported an English army at Berber. May 6.—Heavy attack from the Arabs at the Blue Nile end of the works; great loss of life from mines we had placed at Buri. May 7.—Great attack from a village opposite; nine mines were exploded there, and we afterwards heard that they killed 115 rebels. The Arabs kept up a fire all day. Col. Stewart, with two splendidly directed shots from a Krupp 20-pounder at the Palace, drove them out of their principal position. During the night the Arabs loopholed the walls, but on the 9th we drove them out. They had held the place for three days. May 25.—Col. Stewart, while working a mitrailleuse at the Palace, was wounded by the rebel fire, but he is now quite well. May 26.—During an expedition up the White Nile, Saati Bey put a shell into an Arab magazine. There was a great explosion, 60 shells going off. During May and June steamer expeditions were made daily under Saati Bey. Our loss was slight, and much cattle were captured. June 25.—Mr. Cuzzi, English Consul at Berber, who is with the rebels, came to our lines, and told us of the fall of Berber. Mr. Cuzzi has been sent to Kordofan. June 30.—Saati Bey captured 40 ardebs of corn from the rebels, and killed 200 of them. July 10.—Saati Bey having burnt Kalakla and three villages, attacked Gatarneb, but, with three of his officers, was killed. Col. Stewart had a narrow escape. Saati's loss is serious. July 29.—We beat the rebels out of Buri, on the Blue Nile, killing numbers of them and capturing munitions and 80 rifles. The steamers advanced to El Efan, clearing 13 rebel forts and breaking two cannon. Since the siege began our loss has been under 700 killed."

And again, on July 31.—"This is the end of the fifth month of the siege. Yesterday I sent you, *viâ* Kassala, a despatch giving the situation here and the chief incidents of the siege since March 23. I wrote you several times each week up to April 23, when all hopes of men getting through to Berber had ceased. For the last five months, the siege has been very close, the Arab bullets from all sides being able to fall into the Palace. Since March 17, no day has passed without firing, yet our losses in all, at the very outside, are not 700 killed. We have had a good many wounded, but as a rule the wounds are slight. Since the siege Gen. Gordon has caused biscuit and corn to be distributed to the poor, and up to this time there has been no case of anyone seriously wanting food. Everything has gone up about 3,000 per cent. in price, and meat is, when you can get it, 8s. or 9s. an ober. The classes who cannot accept relief suffer most. Since the despatch which arrived the day before yesterday, all hope of relief by our Government is at an end, so when our provisions, which we have at a stretch for two months, are eaten, we must fall; nor is there any chance, with the soldiers we have, and the great crowd of women, children, &c., of our being able to cut our way through the Arabs. We have not steamers for all, and it is only from the steamers we can meet the rebels. One Arab horseman is enough to put 200 of the bulk of our men to flight. The day Saati Bey was killed eight men with spears charged 200 of our men armed with Remingtons. The soldiers fled at once, leaving Saati and his Vakeel to be killed. A black officer cut down three of the Arabs, and the other five chased our men. A horseman coming up rode through the flying mass, cutting down seven. Col. Stewart, who was unarmed, got off by a fluke, the Arabs not having seen him. With such men as these we can do nothing. The negroes are the only men we can depend upon. The attack made by the Soudani troops, under Mehemet Ali Pasha, on the 28th of this month, was most successful; the Arab loss must have been very heavy. As Gen. Gordon has forbidden the soldiers to bring in the heads of rebels they kill, it is now hard to know the exact number. We captured that day sixteen shells and cartouches for mountain gun, a quantity of rifle ammunition, 78 Remingtons, a number of elephant and other rifles, nearly 200 lances, 60 swords, and some horses. Our loss was four killed and some slightly wounded. This action has cleared away the rebels, who day and night have been firing into our lines at Buri, on the Blue Nile. The following day (29th inst.) a flotilla of five armoured steamers and four armoured barges with castles on them went up to Gareff, on the Blue Nile. I went with them. On the way up we cleared 13 small forts, but at Gareff found two large strong forts—earthworks revetted with trunks of palmtrees. There were two cannons in one. For eight hours we engaged these forts, and with the Krupp 20-pounder disabled their two cannons. The Arab fire was terrific, but, owing to the bullet-proof armour on all the vessels, our loss was only three killed and 12 or 13 wounded. Towards the evening we drove the rebels, who were in great numbers, out of the forts. In three days Gen. Gordon will send two steamers towards Sennaar. It is hoped they will retake the steamer Mehemet Ali, which the rebels took from Saleh Bey. Gen. Gordon is quite well, and Col. Stewart has quite recovered from his wound. I am quite well and happy."

---

* The writer does not give a thought to the crops and to the palm-trees, on which the people depend for food! All destroyed by "a spark from a pipe!"

Reviews.

SOME MAGAZINES.

The *Illustrated Naval and Military Magazine*, No. 4.—We cannot say much in praise of this periodical, which is published at the office of the *Illustrated London News*. On examining the contents we find a paper on what is oddly styled the ("Etappen!") on the British Army, meaning the commissariat, cooking, &c., arrangements, which the author, Major Arthur Griffiths, seems to think erroneously are included in the charge of the Etappen commands of the German Army; "Mr. Melton Prior (the *Illustrated News* artist) on his way to the Soudan;" a paper by Sir G. Elliot, in which there is a comfortable demonstration, with extracts from Mr. Dunckley's article in the *Contemporary Review* and *Engineer*, that with equal forces at sea, France could command the Mediterranean, and therefore possess the Suez Canal; the historical equipment of the British Army, "Insolvable Problems in Gunpowder" (most useful, by Lynall Thomas); "The Princess Beatrice"—an interesting paper by Capt. O'Callaghan; "Richard Keigwin," whose remarkable career is well sketched by the author, and illustrated by the artist; a continuation of papers on "Magazine Rifles," "A Story of the Afghan War," "A Biography of Sir Evelyn Wood," with a bad portrait, a continuation of Col. C. Brackenbury's valuable papers on "Tactics," with four maps of battles.

Cornhill.—The October number opens with an article of striking merit. The subject is a weird one, "John Cann's Treasure," treated with skill. The other articles in this number are scarcely up to the average, always excepting the further instalment of "The Talk of the Town."

Blackwood contains a political article named "The Franchise Bill Unmasked," written with considerable spirit. It is followed by another "The Second Autumn Session." The article, however, which will attract the greatest interest, is a beautiful and touching sketch of "Rosalind," the most perfect of Shakespeare's female characters. It is from the pen of a lady whose dramatic genius rose superior to all competition, and who did so much to preserve and improve on the best traditions of the stage,—Helen Faucit Martin.

There is considerable variety of matter in *Temple Bar*—an interesting article on "The Reading of Books;" then some further chapters of "A Perilous Secret," and the first part of "Doctor Beroni's Secret," which is written with considerable humour. "Emma, Lady Hamilton," may be regarded as "the *pièce de résistance*" of the number. We have not space for more than one extract, a portrait of Lady Hamilton, sketched by Sir Gilbert Elliot. "She is the most extraordinary compound I ever beheld; her person is nothing short of monstrous for its enormity, and is growing every day. She tries hard to think size advantageous to her beauty, but is not easy about it. Her face is beautiful; she is all nature and yet all art—that is to say, her manners are perfectly unpolished, of course very easy, though not with the ease of good-breeding, but of a barmaid excessively good-humoured, and wishing to be pleased and admired by all ages and sorts of persons that come in her way. But besides considerable natural understanding, she has acquired since her marriage some knowledge of history and of the arts, and one wonders at the application and pains she has taken to make herself what she is,—with men her language and conversation are exaggerations of anything I ever heard anywhere, and I was wonderfully struck with these inveterate remains of her origin, though the impression was very much weakened by seeing the other ladies of Naples." The further instalments of "Peril" are sensational in the extreme, but do no more than startle the readers who have followed the writer's footsteps during several months past.

The *Argosy.*—"The White Witch" absorbs one-half the number, the other half contains some very pleasant writing.

There are several sterling articles in *Colburn* for this month, the most important being decidedly "The Present Position of Tactics in England." It is not a very cheerful subject to write upon, and, moreover, it is one which requires experienced handling. Col. D. Knollys, the writer of the article, complains very justly that, notwithstanding the vast amount of literature which has been squandered on the subject during the last fourteen years, this country has not yet arrived at a solution which has been accepted as satisfactory, more particularly as regards the handling of infantry. Having ennnciated this proposition, Col. Knollys applies himself to a consideration of what is the present state of the question, especially as indicated by recent works on the subject. In doing so he has written a very instructive treatise, one which, no doubt, will be fully appreciated by very many military men who have not hitherto had their attention directed to this important subject. The article will be continued in the November number of *Colburn*.

The second number of the *Atlantic Ocean* is much to be commended. It opens with a thoughtful article on "Coming Improvements in Ocean Steamships," contributed by Capt. George Willoughby. The object of the writer is to point out the necessity for increased economy in the propulsion of steamships. The editor also contributes a long article on "Luxurious Railway Travelling," which gives many strange particulars connected with travelling on the European Continent. The number is capitally illustrated, and well deserves favourable criticism.

Stray Shots. (Longmans.)—Sir E. Sullivan was well advised to collect all his literary bullets and put them into a compact cartridge; but we do not think he was right in calling such well-aimed and penetrating projectiles stray shot, for we do not know of any harder or straighter-hitting paper artillery than he has been firing through the *Morning Post* at our common enemies. He opens his battery with a characteristic shrapnel fire in an introductory range-finding which is capital,—a profession of faith in some of which we do not agree, but in which we find so much that we go with heart and soul, as to make us suspect we are wrong where we differ from the gallant—he is gallant—baronet. The book is a repertory of facts and arguments, invective founded on sense and logic, and fine, manly, incisive positivism—a *vox clamantis* may be, but not the less worthy of attention.

The Social Code, 1884. Compiled by George Ager, LL.D. (Effingham Wilson.)—We learn from the preface that this code is specially adapted to the every-day requirements of social life, enabling the senders of telegrams to express themselves in a few words to distant friends. The special advantages it offers are economy, secrecy, and accuracy.

Messrs. W. Clowes and Sons, Limited, have published some useful handbooks relative to the International Health Exhibition. The very important subjects of Ambulance, Organisation, Equipment, and Transport, are compiled by Surgeon-Major G. F. Evatt, M.D., of the Army Medical Department, who admits that they are without novelty, being simply "cullings and extracts from the great writer's works on the subject." Although the element of novelty is thus disclaimed, there can be no doubt that the compiler has produced a very pleasing and very instructive illustrated pamphlet.

Midland Counties Watch Company.—This is, in its way, a remarkable production. It is merely a catalogue, but one of rare description, crammed to repletion with illustrations and testimonials. Probably the most "fetching" attraction in the work is the assurance of its manager that if its readers write, asking for a copy, it will be sent gratis and post free to all parts of the world.

The Duke of Cambridge, attended by Col. Stephens and Lieut.-Col. Lord Algernon Gordon Lennox, left London on Sunday for Dublin, on a visit of inspection, and is the guest, while staying, of Gen. Sir T. Steele, commanding the forces in Ireland.

Sir Frederick Abel, Professor of Chemistry to the War Department, presided at the annual dinner of the Royal Arsenal Association of Foremen at the Holborn Restaurant on Saturday night. The chairman having referred to the stirring days of the Crimean war, 30 years ago, during which he joined the Royal Arsenal, said that they had just gone through another test which had proved the zeal and resources of the national establishments, and they had had the satisfaction of aiding the effort which was now being made to rescue their friend Gen. Gordon, and to do that which was right in Egypt and the adjoining countries. At the heads of the several departments of labour in Woolwich were placed officers carefully selected on account of their military experience, practical knowledge, and power of organisation; and these officials invariably showed their qualifications, not only in retaining the good opinion of those who administered the Government, but also in gaining the respect of the men under their command. Sir Frederick Abel proceeded to sketch the rise and progress of the Royal Arsenal, and, speaking of its different branches, complimented the Royal Gun Factories on the marvellous development of artillery which its skill had brought to such conspicuous excellence, and testified his admiration of the genius displayed in the many productions of the Royal Laboratory and carriage department. The torpedo, or submarine mine, he regarded as a diabolical instrument which he wished had never been created, for it was a sneaking, underhanded weapon, and its power for mischief was most terrible, cruel, and unsparing. He feared that, although comparatively little harm had yet been done by the torpedo it was destined to play fearful havoc in the wars of the future.

FAST CRUISERS.

Speaking at Elswick, Newcastle, on Tuesday, Sir William Armstrong said:—"It is hardly right that I should sit down without making some reference to the very important warship called the Esmeralda, which has lately been turned out by this company, and which has excited a great deal of attention, and received the most unqualified commendation. She is the swiftest and most powerfully-armed cruiser in the world, and though she has sufficient coal-carrying capacity to enable her to keep the sea for an unusual length of time, she has, nevertheless, the great advantage of being of comparatively small dimensions. She is unarmoured, as all cruisers ought to be, but as her boilers, engines, and magazines are all below water-level, and are covered by a strong steel watertight deck, which is also below water-level, she is almost absolutely secure against the worst effects of projectiles. The guns are shielded against small arms and machine-gun fire, and by means of mechanical appliances require very few men to work them. Her flotation and stability when pierced in exposed parts are secured by methods which are now generally acknowledged to be sufficient; so that she would be very difficult to sink or disable, even if opposed to an ironclad. Happily, she has passed into the hands of a nation which is never likely to be at war with England; for I can conceive no more terrible scourge on our commerce than she would be in the hands of an enemy. No cruiser in the British Navy is swift enough to catch her or strong enough to take her. We have seen what the Alabama could do, what might we expect from such an incomparably superior vessel as the Esmeralda? It is surprising that so much apathy should be displayed regarding the unprotected state of our commerce. There is at present a well-founded scare about the insufficiency of our Navy; but the cry is chiefly for more ironclads, which are of little or no use for protection of commerce, and we hear but little of the need of fast cruisers to save us from depredations at sea. No nation is so dependent upon commerce as we are. Without imported food we should actually starve. We have, beyond comparison, the most numerous mercantile navy in the world, and our ships are spread over every sea. Yet our fleet of swift cruisers is perfectly insignificant in relation to the number of ships to be protected, or the extent of ocean to be covered. Nothing can be more certain than that in the event of war our merchant shipping would be attacked, and if any enemy contented himself by assailing our commerce with a fleet of swift and powerful cruisers, he would give the go-by to our ironclad, and inflict fatal injury upon us with little cost to himself. As to adapting our mercantile and passenger steamers to act as cruisers in case of emergency, nothing, in my opinion, can be more delusive; they would simply supply victims for Esmeraldas. Independent of the protection of commerce, ships of the Esmeralda class have much to commend them. They will never be out of date, while ironclads often become obsolete almost as soon as made. Swift cruisers can ram and use torpedoes just as well as armour-clads, and, in fact, much better, for they have an advantage of superior quickness and handiness. It is only in an artillery fight that an armour-clad has any advantage, and rams and torpedoes will probably have quite as much to do with the fate of naval battles as artillery. Besides, for one first-class armour-clad we could have many swift and powerful cruisers; and I think it may fairly be argued that the superiority of number would prevail against the armour-clad. At all events, it is certain that fast cruisers properly constructed and armed have a far wider field of usefulness than costly armour-clads, and ought not to be placed in a secondary rank of importance. The fate of a nation might turn upon the loss of a monster armour-clad either by defeat or by accident, but powerful ships of the cruiser class may be had in such numbers at a practicable cost that individual losses would be comparatively of small importance. The mercantile and colonial conditions of this country eminently require a numerous and ubiquitous fleet, and this we never can have with armour-clads, neither would they be suitable for general purposes if we could." All very sound sense, worthy of the great engineer, and a very good puff for Elswick, which does not want it, for the firm have more than they can do on hand.

AN EX-FIRST LORD ON THE NAVY.

Speaking at Newport, I.W., on Wednesday night, Mr. W. H. Smith, M.P., referred to the state of the Navy, and said:—"He would divest himself of all party or political feeling in dealing with the question, for it was not a matter to be kicked about between two parties. It was, on the other hand, the most important and most vital question that could be considered by the country. Let them consider how entirely they depended upon the sea for their very life. More than half the food they consumed came from beyond the sea, while half the industries of the country were supported by the whole materials which were imported. The issue, therefore, they had to try was whether the preparations for the security of the seas and for the safety of every ship flying the English flag was sufficient? He had come in contact with the representatives of European Powers, and he had seen what was being done in European Navies, and he had realised the temper and spirit which existed among the representatives of European Powers in different parts of the world, and upon this he had come to the conclusion that our present Naval force was inadequate. The question was whether the strength they had was adequately sufficient to protect them against the danger and give security to the industries of the country, and to the people who must buy their food, which came across the sea. Let them consider what the Navy had to do. At present we maintained nine squadrons abroad—the Mediterranean, the Channel, the North American and West Indies, the South-East Coast of America, the Pacific, the West Coast of Africa and the Cape of Good Hope, the East Indian, the China and the Australian Squadrons. The Squadrons were necessary now for the protection of the interests of this Empire. Had we the force necessary of men, of ships, and of guns of the best material and pattern, or had we the force necessary to augment these squadrons in the event of war? He was afraid we had not. And there was something more than that. Our ships in the olden times had to be conveyed, not under steam, but under sail, and a good frigate was capable of convoying 30 or 40 sailing-ships. Now ships went under steam, and most of them did not go more than eight or nine knots an hour, and consequently, if these ships came across a fast cruiser they instantly fell a prey. It followed, then, that we must have fast cruisers enough to make it impossible for the cruisers of the enemy to sweep the seas, and it was a serious question whether we had enough fast cruisers to keep the seas secure from the enemy. There was a significant article the other day in a French newspaper that had a large circulation, and which, in speaking of what it was pleased to call the 'Naval scare in England,' said that France would certainly, if engaged in war with England, not attack the English fleet of ironclads, but that she would arm and equip and send into all parts of the world a number of fast cruisers which should attack our ships and cripple our commerce. That is precisely what an enemy would do, and he was afraid would do it without much regard to modern usages of war; and they might be sure of this, that if war did break out between any other country and England it would be followed up as intensely by the country whose desire would be to do as much evil as was possible, and do it as quickly as was possible, and there would be no consideration hindering the enemy from wreaking full vengeance upon us. English people had of late come to consider that war was something that could not occur. He believed that war was as possible now as at any time during the history of England. The passions of men were as liable to excitement and cupidity as ever, and he could not shut his eyes to the fact that England had few friends in the world, that prosperity had not given them friends, while our disposition to share the burdens and troubles of others had not made us friends. In fact, we stood, to a large extent, alone in the world. They had the sympathy of their friends on the other side of the Atlantic, but they would not fight for us. It behoved England, therefore, to be strong in order that she might be at peace, and in order that she might preserve peace. They were bound, as people holding a position of responsibility, in justice to themselves and to others, to use all the precautions which were necessary to make the sea as safe for the flag of this country as they believed their island home to be. He expressed his most earnest hope that the question would be examined and dealt with. There was no doubt that unless the professional officers of the Navy were able to say positively that they were prepared now with as much force as was necessary to secure the interests of this country at sea, then the force must be increased, and the means must be procured."

SIR EDWARD REED ON THE NAVY.

Sir Edward Reed, speaking at the Cannon Street Hotel, London, on Wednesday night, said the difficulty which he and others, who were anxious about the Navy of this country, had to encounter was the great, the astonishing, and continual indifference of the people of England to our position as a naval nation. For years past this country has been prepared to expend, and has expended—not, in his opinion, always wisely—many millions more upon its Army than it has ever expended upon its Navy. And at this moment, with no Army interest whatever, which he had intelligence enough to discern, in the least degree comparable to the interests which hang upon our naval authority on the face of the globe, they were prepared to go on spending fifteen or more millions every year upon the Army, which cannot do more than outlying and isolated duties, and cannot confront the armies of Europe, and were content to let the Navy go forward, starved and sacrificed, because they did not realise the frightful penalties that must ensue from a single overthrow of our Naval force. Nowadays, men asked whether the Navy of England was not equal to any combined two or three navies of Europe. The speaker continued:—"I tell you that the people who put that question are in blank and abject ignorance of the state of the facts. I state that the time for comparing the English naval force with the combined force of two or three great Powers of Europe has passed away, and the question which this country has to confront is whether it is equal, whether it will be equal three or four years hence, not to a combination of European Powers, but to a single Power, which has not and cannot have one tithe of the interest which this country has in its power upon the seas. What I wish to point out to you is that not merely in the strength of your Navy, but in the circumstances of your Navy, you run risks and incur penalties such as have never before been run or incurred. We live in a time when the temptations to sacrifice for the single purpose of economy are boundless, and when every administration—and I myself have had experience of administrations of both parties—when every administration yields to one necessity—and what is that? Not, I maintain, to keep the power of England adequate—for that no Cabinet, whatever it may be, whether Conservative or Liberal, ever thinks of. They never think of keeping the power of England what it should be. What they do think of is preventing any increase, or any substantial increase in the Navy Estimates for the year. I am a man under obligations to the party that at present governs the country, and have many and many a time held my tongue when I should have followed my own impulse, and spoken, because I would not create embarrassments for the party that I represent. But I do say—and therein lies the root of the whole question—that no Government you have had ever cared about the actual position of the Navy so as to influence the expenditure upon the Navy. The one thing that it does care about is to obey the behest of the Treasury, and to keep down to one fixed point the expenditure upon it. Hence it is that we have reached the position which we have reached to-day. I hope that if the naval question is to be discussed in this country, it will be discussed in a spirit which shall sweep completely away the subterfuges to which men resort in order to keep the expenditure upon the Navy low, and the expenditure upon the Army great. The people of England have for many years past been content to see the pensions of its naval officers and its army officers continually devouring the effective strength of the Navy, and keeping down that strength upon which this country ought to rely, and must rely in the end."

OLD NAVAL NAMES IN THE CAMEL CORPS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In looking over the names of the officers appointed to the Camel Corps, it is rather remarkable to find so many whose forefathers won their laurels in the senior service, the Navy. In the Heavy Cavalry I find Lord St. Vincent, adjutant, Lord Rodney, and Lord Cochrane, all anxious to distinguish themselves under Lord Wolseley—on the Ships of the Desert.—I am, &c., C. R. T.

Joseph Anneng, quartermaster, and Michael Regan, gunner's mate, of the Cambridge; James John Tapper, gunner's mate, of the St. Vincent; Robert William Venning, engine-room artificer, of the Asia; Joseph Nicholls, second captain of the forecastle, of the Royal Adelaide; Charles William Banting, leading stoker, of the Jumna; Lloyd Burgess, able-bodied seaman, of the Trincomalee; John Edward Miner, quartermaster, Francis Purchase, ship's cook, 2nd class, and Henry Ball, stoker, of H.M.S. Foxhound; Robert Stumble, boatman, and George Jones and Joseph M'Carthy, commissioned boatmen, of the Coastguard, have been awarded "the medal for long service and good conduct."

Staff Com. Pender, on the Retired List, has been allowed to assume the rank of retired captain.

The first vessels of war owned by the Queensland Government, the gunboats Palumal and Gayundal, have been put through their speed and gun-firing trials off the harbour of the Tyne. These gunboats have been ordered by the colonial authorities in accordance with the report made upon the defences of the colonies by Sir William Jervois, who recommended the adoption of floating batteries in place of fortifications. They have been built and armed by W. G. Armstrong, Mitchell, and Co., and are excellent vessels of their class. They are twin vessels, each being 120 ft. long and 26 ft. across the beam, with a draught of 9½ ft., and a displacement of 450 tons. Their armament consists of one 8-in. 12½-ton gun forward, one 6-in. 4-ton gun aft, and four Nordenfelt machine-guns so placed that three will bear on a broadside. They were tried for speed over the ten miles course between the Tyne and Newbiggin Church, and both attained a speed of a shade over 10½ knots per hour. They were built to run ten knots. The engines, which were supplied by Messrs. R. and W. Hawthorne, worked remarkably well. The large guns were tested with common shell, and with chilled shot, and gave perfect satisfaction. The colonists will have no small cause for congratulation when they come into possession of such handy yet powerful vessels of war as the Palumal and Gayundal, which have not inappropriately been given the aboriginal names for thunder and lightning respectively.

The infantry brigade field-firing was brought to a close at Aldershot on Wednesday, when the third brigade was exercised, under the command of Major-Gen. Feilding. The results have shown the value of the preliminary company and battalion exercises carried out for some time past, the percentage of hits and rounds fired being much higher than on any previous occasion. The entrenched position attacked by each brigade was prepared under the direction of a general officer commanding another brigade, and the distances were entirely unknown to the attack, though range-finders were used by the officers, who were permitted to communicate the distances to the men. In the entrenched position attacked by the 3rd brigade were placed a sufficient number of dummy guns and wooden figures (standing, kneeling, and head and shoulders) to represent a strong defence, and a large number of oval frames, 14 in. by 10 in., covered with canvas, representing heads, also lined the trench. The attack was carried out under the immediate orders of the general officer commanding the brigade, who assembled the officers under him, and explained to them thoroughly what he required them to do, which they communicated to the men under their command. The fire was under the control of the section leaders, who designated the men (or files) who were to fire, and who saw that the men attended properly to the elevation necessary at the different distances. The attack was divided into three stages, and at the end of each stage the "cease fire" sounded, and the number of rounds expended were counted and hits recorded. After the first stage the fighting line was reinforced by the supports, and after the second stage by the main body. The results have been satisfactory, not only as regards the merit of the shooting, but also indicating where improvement is necessary.

The Admiralty and War-office authorities visited the works of Messrs. Yarrow and Co., Poplar, on the 2nd inst., the object being to inspect the stern-wheel steamer just completed for the Government, to take part in the Nile Expedition. The Admiralty was represented by G. W. Rendel, Lord of the Admiralty, N. Barnaby, C.B., Director of Naval Construction, James Dunn, Chief Constructor; while the War Office was represented by Sir Ralph Thompson, Permanent Under-Secretary, Sir Arthur Herbert, K.C.B., Sir Edward Roberts, and Morris, K.C.B., Commissary-General at Head-quarters, Gen. Reilly, C.B., Col. Cameron, V.C., E. C. Nepean, Esq., Director of Army Contracts, and Lieut.-Col. Grove. In addition to the above, J. Allington, Esq., and T. Soper, Esq., were present on behalf of the Constructive Department of the Admiralty. One of the remarkable features in the construction of "Yarrow, No. 2," was the marvellously short period in which it was accomplished, the entire vessel and its machinery having been completed in 17 days. It is also to be observed that six Canadian captains are coming over to meet the steamer in Egypt, men who have been accustomed to the management of the stern-wheel type of steamers.

CADETSHIP EXAMINATIONS.

An examination for cadetships at the Royal Military College, Sandhurst, will take place at the University of London, Burlington Gardens, by permission of the Senate, on Dec. 2 and following days. The medical examination of the candidates will take place on the previous day at 109 Victoria Street, Westminster. The subjects of examination, the limits of age, and other conditions will be those specified in the regulations issued with General Order 116, of 1884. There will be 112 cadetships to be awarded, of which 90 will be for infantry, 15 for cavalry, and seven for West India regiments. Intending competitors must inform the Military Secretary before the date fixed for examination whether they elect to be considered candidates for cavalry or infantry. If within the prescribed limits of age, they may return their names (1) for both infantry and cavalry, expressing a preference for one or the other; (2) for infantry only; or (3) for cavalry only. Cadetships will be given to successful candidates, subject to the above limitation of numbers, in order of merit, in accordance with the election they have made. In the case of (1)—viz., those who have returned their names for both infantry and cavalry, they will be taken for infantry or cavalry in accordance with the preference expressed by them. The number of cadetships to be awarded in each arm will not be exceeded, and candidates must distinctly understand that the election made by them before the examination will be absolutely final, and that it cannot be altered after the result of the examination has been declared. The seven West Indian cadetships will be awarded in the same manner as heretofore. Twelve cadetships, in addition to the above, will also be offered for competition by University candidates, as provided for in the regulations. The successful competitors will be required to join the Royal Military College, as gentlemen cadets, on February 10, 1885. Applications cannot be received unless made in strict accordance with the regulations, October 15 next being the latest date on which applications can be received. Candidates who have been previously examined should forward with their applications a certificate of good conduct for the intervening period. If intending competitors wish for any further information relative to the examination, they should apply by letter to the Military Secretary, Horse Guards, War Office.

"THE TRUTH ABOUT THE NAVY."

"R. N." says:—"'One who Knows the Facts,' in his 10th paragraph, 'Docks,' remarks that 'although there is a dock building at Hong Kong, if the Audacious were injured she would have to go to Sydney, or come back to Malta to refit.' This is an error. The Audacious can be docked either at Hong Kong or at Japan."

Indian Notes.

The Calcutta correspondent of the *Times* writes on Sept. 28:—"A scheme which it is expected will have a very good effect on the future of the Indian Army is in contemplation at head-quarters. It is proposed to establish agencies in the Punjab, the North-West Provinces, and Oude, for providing pensioned native soldiers with lucrative employment. It is felt that a decided reaction has set in against the purely competitive system of appointment to subordinate positions in the Government departments, and it is believed that the introduction into the railway and other services of natives of approved character and loyalty, who have done good, faithful work in the army, will commend itself to the majority of the respectable natives, whose interest it is to support the British Government. It is thought that after 15 years in the ranks the sepoy would still be fit to bear arms when occasion demanded, and also to perform certainly 10 years' more good service in civil employment. The Commander-in-Chief and the Government cordially approved the suggestion, and many local administrations have pledged themselves to support the movement by instructing their executive officers to help native soldiers of good character in procuring employment."

In connection with his Royal Highness's visit, the following District Order was published at Dublin on the 21st ult.:—"As it is probable that his Royal Highness the Field-Marshal Commanding-in-Chief will make a tour of inspection in this command in October, and under existing arrangements will visit Dublin and the Curragh, the Commander of the Forces desires that all officers whose regiments are quartered at either of the stations above-named, and who may at present be on leave, should rejoin their corps by Oct. 1, and that no further leave of absence be given to officers at those stations until after the departure of his Royal Highness. (By order.)—Signed. H. COOPER, D.A.A.G. for D.A.G." His Royal Highness has made inspections of the troops and establishments at Dublin and the Curragh.

The *Evening News* says:—"The full strength of the British cavalry force is 15,000 men and 10,000 horses, from which, in war time, must be deducted the permanent garrisons of Ireland and India, leaving practically not more than 6,000 men and 4,000 horses available for the field. Germany, on the other hand, on a peace footing, has 70,000 men and horses, France 66,000, and Russia 84,000; while in case of war any of these countries could put into the field, without difficulty, 100,000 trained cavalry. These figures speak for themselves. In the wars of the future cavalry are destined to play an important part, so that, bad as the condition of England's Navy is represented to be by her Admirals, it is positively efficient compared to the state of her Army as represented by her officers."

In consequence of the retirement of Major Beechey, the following promotions have been made in the Royal Marine Light Infantry:—Capt. and Brevet Major R. E. Montgomery, to be Major, and Lieut. W. G. Speed, to be Captain, vice Montgomery. By the promotion of Capt. Speed, the post of Assistant-Instructor of Musketry at Chatham Division has been placed at the disposal of the Admiralty.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, Sept. 30, 1884.

Staff.

Major-Gen. A. Carnegy, Bombay S.C., to be a Major-Gen. on the Staff of the Army in India, to command a division of the Bombay Army (April 1, 1883).

Lieut.-Col. and Col. S. de B. Edwardes, C.B., Bombay Infantry, to command a brigade of the Bombay Army, with the rank of Brigdr.-Gen., vice Major-Gen. A. Carnegy (Nov. 16, 1881).

Major W. R. H. Craufurd, Princess Louise's (Argyll and Sutherland Highlanders), to be Aide-de-Camp to Lieut.-Gen. the Hon. Sir L. Smyth, K.C.M.G., C.B., commanding the troops in South Africa, vice Major F. L. Story, who has retired (July 11).

Lieut. B. Deane-Freeman, the Lancashire Fusiliers, to be Aide-de-Camp to Major-Gen. H. R. Browne, commanding the troops in the West Indies (Jan. 1).

Memorandum.

Deputy-Comy.-Gen. H. J. Wilkinson, Commissariat and Transport Staff, to have the local and temporary rank of Comy.-Gen. whilst acting as Senior Commissariat Officer in Egypt (Aug. 26).

INDIA OFFICE, Sept. 30, 1884.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments of India:—

Bengal Staff Corps.

To be Lieutenant-Colonel:—Major C. K. Mackinnon (July 20).

To be Major:—Capt. A. de C. Rennick (July 6).

To be Captains:—Lieuts. H. J. Bolton (July 17) and H. H. R. Heath (July 24).

Madras Staff Corps.

To be Lieutenant-Colonels:—Majors T. H. B. Young and F. J. Wroughton (both dated June 25), H. H. H. Hallett (July 24), and W. H. Hoskins (July 20).

To be Major:—Capt. A. W. H. Hornsby (July 26).

Madras Medical Establishment.

To be Brigade-Surgeon:—Surg.-Major R. W. Cockerill (June 13).

Bombay Staff Corps.

To be Majors:—Capts. G. W. Sawyer (June 28) and W. H. D. Jones (July 26).

Brevet.

To be Colonels:—Lieut.-Cols. F. S. Cherry, Madras Cavalry (May 3), and A. H. Prinsep, Bengal Cavalry (July 21).

To be Lieutenant-Colonels:—Majors W. D. B. Ketchen, Madras Cavalry, in succession to Major-Gen. C. P. Hildebrand, Bengal Infantry, transferred to the Unemployed Supernumerary List (Dec. 10, 1883); H. Y. Murray, Bengal Cavalry, in succession to Col. (borne as Major-Gen. on the Indian Gradation List) A. B. Marsack, Madras S.C., transferred to the Unemployed Supernumerary List; A. W. Graham, Bengal Infantry, in succession to Major-Gen. J. M. Earle, Bengal Infantry, transferred to the Unemployed Supernumerary List (both dated Dec. 16, 1883); G. T. Halliday, Bengal Cavalry, in succession to Lieut.-Gen. A. W. Lucas, C.B., Bombay S.C., transferred to the Unemployed Supernumerary List; William Henry Beckett, Bengal Infantry, in succession to Major-General F. Schneider, Bombay Staff Corps, transferred to the Unemployed Supernumerary List; Thomas James Quin, Bengal Infantry, in succession to Major-Gen. G. B. Mainwaring, Bengal S.C., transferred to the Unemployed Supernumerary List; N. F. Parker, Bengal Infantry, in succession to Major-Gen. R. M. Macdonald, Madras S.C., transferred to the Unemployed Supernumerary List; C. N. Hodgson, Bengal Infantry, in succession to Major-Gen. J. C. P. Baillie, Bengal Infantry, transferred to the Unemployed Supernumerary List (all five dated Jan. 1); (now Lieut.-Col.) W. W. Hooper, Madras Cavalry, in succession to Col. (borne as Major-Gen. on the Indian Gradation List) C. S. Elliot, Madras S.C., transferred to the Unemployed Supernumerary List (April 14).

FRIDAY EVENING.

ARMY.

WAR OFFICE, Pall Mall, Oct. 3, 1884.

The Worcestershire Regiment—Lieut.-Gen. and Hon. Gen. R. W. D. Leith, C.B., to be Col., vice Gen. E. A. Somerset, C.B., transferred to the King's Royal Rifle Corps (Sept. 14).

The King's Royal Rifle Corps—Gen. E. A. Somerset, C.B., from the Worcestershire Regt., to be Col.-Comdt., vice Gen. R. Rumley, deceased (Sept. 14).

3rd Dragoon Guards—Lieut. J. E. F. H. Roche to be Capt., vice R. K. Parke, seconded for service as an Adjt. of Auxiliary Forces (Sept. 25).

5th Dragoon Guards—Lieut. S. W. K. Cradock to be Capt., vice W. H. Atherton, promoted (April 16).

4th Hussars—Capt. W. A. Ramsay to be Major, vice Brevet Lieut.-Col. H. F. Grant, seconded; Lieut. W. P. Wilson-Todd to be Capt., vice W. A. Ramsay (both dated May 21).

8th Hussars—Lieuts. W. K. Mitford to be Capt., vice E. J. Fell, promoted (April 1); H. N. M. Thoyts, from the 3rd Hussars, to be Lieut., vice W. K. Mitford.

10th Hussars—Lieuts. C. S. Greenwood to be Capt., vice R. P. Sandeman, resigned (Aug. 27); E. Baring, from the Prince of Wales's (North Staffordshire Regt.), to be Lieut., vice C. S. Greenwood.

12th Lancers—Lieut. W. J. Rant, from the 6th Dragoons, to be Capt., vice H. A. C. Walker, resigned.

19th Hussars—Lieut.-Col. P. H. S. Barrow, C.B., C.M.G., to command the regiment (Sept. 10).

Royal Artillery—Major W. R. Rudge retires upon retired pay, with the hon. rank of Lieut.-Col.; Lieut.-Col. E. R. Cottingham, from half-pay, to be Lieut.-Col., vice Col. C. J. Hope-Johnstone, retired (Sept. 10); Capts. F. M. Robinson to be Major, vice Brevet Lieut.-Col. G. A. Russell (late Bengal), promoted, with seniority next to and below Major G. H. O'Malley; E. W. Adams to be Major, vice Brevet Lieut.-Col. P. H. Greig (late Bombay), promoted, with seniority next to and below Major R. de Marylski (both dated Jan. 1); Capt. and Brevet Major Edmond R. Elles to be Major upon the Seconded List; Capts. de C. Daniell to be Major upon the Seconded List; H. W. B. T. Haverfield to be Major upon the Seconded List; P. L. MacG. Skinner to be Major upon the Seconded List; and W. Aitken, from the Seconded List, to be Major, vice Brevet Col. A. Harness, C.B., seconded on appointment as Secretary to the Royal Military Academy (all five dated Sept. 20); Lieuts. A. D. Macdonald to be Capt., vice F. M. Robinson, promoted; Henry Stopford Dawkins to be Capt., vice E. W. Adams, promoted (both dated Sept. 1); C. D. Scott to be Lieut. upon the Seconded List, for service with the Punjab Frontier Force (Sept. 11); and A. F. Montanaro to be Lieut. upon the Seconded List, for service with the Hyderabad Contingent (Sept. 12). In consequence of the promotion of Majors Robinson and Adams, with effect from Jan. 1, 1884, the dates of promotion of the under-mentioned officers are altered as stated against their names:—Capts. R. L. Haines and H. P. Hickman, Jan. 1; K. S. Dunsterville, C. E. Walker, and W. F. G. Moberly, Jan. 9; A. Tracey, Jan. 16; A. E. Russell, March 1; W. A. Smith, March 13; G. H. Bittleson and W. J. Hicks, March 18; H. O. Piers, May 31; P. L. Williams, June 1; C. A. Howard, June 13; A. Chambers, June 17; E. A. Burrows and C. H. Crofton, July 2; W. H. H. Waters and C. D. Cottrell, July 30; A. H. Carter, Aug. 1; E. A. Lambart and C. E. Maturin, Aug. 14; K. S. Davison and R. M. Crofton, Aug. 17; C. H. Blount, Aug. 20; G. N. H. Barlow, Aug. 25; G. M. Boothby, Aug. 26; F. B. Elmslie and N. B. Inglefield, Aug. 27.

Royal Engineers—Lieut.-Cols. and Cols. W. C. Phillpotts to be Col., vice T. Inglis, C.B., retired (Sept. 14); J. Le Mesurier (late Bombay), to be Col., vice H. F. Hancock, removed as a General Officer (June 21); H. L. Prendergast (late Madras), to be Col., vice J. Mullins, removed as a General Officer (July 20); A. R. MacDonnell has retired upon retired pay, with an annuity and the hon. rank of Major-Gen. (Sept. 8); Majors and Brevet Lieut.-Cols. T. F. Dowden (late Bombay), to be Lieut.-Col., vice J. Le Mesurier (June 21); R. Thompson (late Madras), to be Lieut.-Col., vice A. L. Prendergast (July 20).

Grenadier Guards—The Christian names of Lieut. "Augustus Frederick Walpole Edward Webster" are now as described, and not as previously stated.

Line Battalions.

The Buffs (East Kent Regiment)—Lieut. P. Green to be Capt., vice A. C. Jackson, promoted (April 16).

The Royal Fusiliers (City of London Regiment)—Lieut. H. Porter to be Capt., vice C. L. Mortimer, seconded (Aug. 31).

The Norfolk Regiment—Capt. F. A. Currie to be Major, vice D. K. Robertson, seconded for service as an Adjt. of Auxiliary Forces; Lieut. W. F. Percy to be Capt., vice F. A. Currie (both dated June 28).

The Devonshire Regiment—Lieuts. G. H. D'Oyly to be Capt., vice S. B. Astley, appointed to the Army Pay Department (June 20); G. M. Evans to be Lieut., vice E. C. B. Cotgrave, appointed a probationer for the S.C.

The Prince of Wales's Own (West Yorkshire Regiment)—Lieut. C. H. Cox to be Capt., vice S. J. Butler, promoted (April 2).

The Princess of Wales's Own (Yorkshire Regiment)—Qrmr. G. Croft, from the Royal Sussex Regt., to be Qrmr., vice G. Hedingham, who exchanges.

The Royal Scots Fusiliers—Lieut.-Col. E. T. Bainbridge to command a batn.; Major F. G. Jackson to be Lieut.-Col., vice Col. G. F. Gildea, placed on half-pay; Supernumerary Major W. A. Bridge to be Major, vice F. G. Jackson (all three dated Aug. 25). Qrmr., with the hon. and relative rank of Capt., U. F. Lapham retires on retired pay.

The Cheshire Regiment—Lieut. W. K. Richardson to be Capt., vice D. W. Rogers, resigned (Sept. 10).

The Royal Welsh Fusiliers—Supernumerary Capt. E. H. Clough-Taylor to be Capt., vice L. Griffiths, retired (Sept. 10).

The East Surrey Regiment—Major L. A. Gregson retires on half-pay; Lieut. H. W. Benson to be Capt., vice H. Butler, deceased (Aug. 10).

The Border Regiment—Lieut. J. Ross, from the Cameronians (Scottish Rifles), to be Capt., vice P. Eyton, promoted.

The Royal Sussex Regiment—The notification which appeared in the *Gazette* of April 15, cancelling the promotion of Capt. A. S. H. Gem to the rank of Major, is cancelled; Capts. W. F. Kelly to be Major, vice E. J. Courtenay, seconded (March 5); F. S. Campbell to be Major, vice A. J. H. Daubeny, retired (July 7); F. H. Thorndike to be Major, vice W. F. Kelly, seconded for service on the Staff (July 29); S. M. Gully to be Major, vice W. Tolson, promoted; G. Harden to be Major, vice S. M. Gully, seconded for service as an Adjt. of Auxiliary Forces (both dated Aug. 6); Lieuts. R. Gore to be Capt., vice W. F. Kelly (March 5); G. A. Trevor to be Capt., vice F. S. Campbell (July 7); Qrmr. G. Hedingham, from the Princess of Wales's Own (Yorkshire Regt.), to be Qrmr., vice G. Croft, who exchanges.

The South Staffordshire Regiment—Major C. H. Gordon-Short, from the Royal Munster Fusiliers, to be Major, vice L. C. Potts, who exchanges.

The Dorsetshire Regiment—Capt. R. C. A. Beatty to be Major, vice M. B. Luby, seconded for service as an Adjt. of Auxiliary Forces (July 2); Lieut. P. Farrer to be Capt., vice E. W. Conran, seconded (July 30).

The Prince of Wales's Volunteers (South Lancashire Regiment)—Lieut. H. E. Grimes to be Capt., vice W. Capel, promoted (Aug. 6).

The Welsh Regiment—Lieut. T. G. Barclay, from the Royal Inniskilling Fusiliers, to be Capt., vice A. J. Irvine, retired.

The Sherwood Foresters (Derbyshire Regiment)—The promotion to the rank of Capt. of Lieut. H. C. Wylly is antedated to May 1, vice H. L. Smith-Dorrien, seconded; Lieut. F. C. Godley to be Capt., vice J. G. Sparkes, promoted.

The Queen's Own (Royal West Kent Regiment)—Lieut.-Col. and Col. C. H. Browne, having completed five years' service as a Regtl. Lieut.-Col., has been placed on half-pay (Sept. 9). The seconding of Capt. A. P. Cronyn for service as a probationer of the Army Pay Department, dated Aug. 24, is cancelled.

The King's (Shropshire Light Infantry)—Lieut. J. S. Talbot to be Capt., vice B. McClintock, retired (Aug. 27).

The King's Royal Rifle Corps—The names of Lieut. Craufurd Alexander Gordon Clark are as now, and not as hitherto stated.

The Prince of Wales's (North Staffordshire Regiment)—The name of Qrmr., with the hon. and relative rank of Capt., J. McGuinness is as now, and not as hitherto stated.

A. Lee (all three dated Aug. 27); Capt. J. C. Hilliard to be Major, vice R. A. Crawford, promoted (July 28).

The Gordon Highlanders—Lieut. F. F. Ramsay to be Capt., vice E. Gilpin-Brown, resigned (July 2).

The Rifle Brigade (The Prince Consort's Own)—Capt. L. H. Bathurst to be Major, vice R. H. L. Anstruther, retired on half-pay (Sept. 10); Lieuts. C. A. Lamb to be Capt., vice C. D. Sherston, seconded; A. E. W. Colville to be Capt., vice A. H. W. Hervey, seconded (both dated Aug. 1); J. S. Richer, Adjt., to be Capt., vice the Hon. D. Home, retired (Aug. 16); T. B. Ramsay, from the 5th Lancers, to be Lieut., vice C. A. Lamb; Gent. Cadet Edward Kenrick Bunbury Tighe, from the Royal Military College, to be Lieut., vice A. E. W. Colville.

The Prince of Wales's Leinster Regiment (Royal Canadians)—Capt. A. C. Denison to be Major, vice W. A. T. Helden, C.M.G., retired; Lieuts. J. Willcocks to be Capt., vice A. C. Denison (both dated Aug. 21); W. B. Moir, from the 18th Hussars, to be Lieut., vice G. H. Weller, appointed a probationer for the Indian S.C.

The Royal Munster Fusiliers—Major L. C. Potts, from the South Staffordshire Regt., to be Major, vice C. H. Gordon-Short, who exchanges.

Staff—Major-Gen. M. Dillon, C.B., C.S.I., to be a Major-Gen. on the Staff of the Army in India, to command a Division in the Bengal Presidency, vice Lieut.-Gen. R. Hume, C.B., whose period of service in that appointment is about to expire (Nov. 30); Lieut.-Col. and Col. P. E. Hill, half-pay, R.A., to be a Col. on the Staff, to command the Royal Artillery in the Dominion of Canada (Sept. 6); Major and Col. C. W. Robinson, the Rifle Brigade (the Prince Consort's Own), to be an Assist.-Adjt. and Qrmr.-Gen., vice Lieut.-Col. and Col. R. Harrison, C.B., C.M.G., R.E., who has vacated that appointment (Sept. 20).

Army Pay Department—Staff Pymr. and Hon. Major G. W. Rippon to be Chief Pymr., with the hon. rank of Lieut.-Col., vice J. George, retired; Pymr. and Hon. Major B. K. Whiteford to be Staff Pymr., vice G. W. Rippon (both dated Sept. 23); Pymr. and Hon. Capt. L. R. Dowdall to have the hon. rank of Major in the Army (Oct. 1); Capt. W. Moyers, the Gloucestershire Regt., to be Pymr. (April 4).

Half-Pay—Capt. G. C. E. Rowley, from the Royal Welsh Fusiliers, to be Major (Sept. 26). The under-mentioned officers from the Royal Artillery to be Lieut.-Cols., under the provisions of Art. 78 of the Royal Warrant of June 10:—Majors W. F. M. Hutchinson, A. T. Wodehouse, O. F. Le Mottée, P. FitzG. Gallwey, C. H. F. Ellis, and Brevet Col. J. F. Owen (all dated Oct. 1).

Memoranda.

Major-Gen. C. J. Merriman, C.S.I. Royal (late Bombay) Engineers, to be Lieut.-Gen., vice F. R. Maunsell, C.B. (late Bengal), removed to the Unemployed Supernumerary List (June 21).

Cols. H. F. Hancock, Royal (late Bombay) Engineers, to be Major-Gen., vice C. J. Merriman, C.S.I. (June 21); J. Mullins, Royal (late Madras) Engineers, to be Major-Gen., vice J. G. Medley, Royal (late Bengal) Engineers, retired (July 20).

Lieut.-Col. G. U. Prior, the Royal Scots (Lothian Regt.), to be Col. (Oct. 1).

The under-mentioned Lieutenant-Colonels of the Indian Staff Corps to be Colonels:—C. M. Griffith, Bombay; H. C. B. Tanner, Bombay; W. J. Bell, Madras (all three dated June 8); J. C. Gunning, Madras; H. M. Repton, Bengal; G. Rowlandson, Madras; F. Wheeler, Bengal; J. W. Cleland-Henderson, Madras (all five dated June 9); E. S. Berkeley, Madras; W. L. N. Knyvett, Madras; S. W. B. Sherman, Madras; B. H. Preston, Madras; F. B. Boone, Madras; J. Upperton, C.B., Bengal; H. C. T. Jarrett, V.C., Bengal; G. Murray, Madras (all eight dated June 10); C. Mackenzie, Madras, and R. C. Budd, Madras (both dated July 20).

Deputy-Comy. and Hon. Lieut. E. D. Hart, Bombay Establishment, to have the hon. rank of Capt.

Lieut. A. V. H. Brooke, half-pay, retires from the service, receiving a gratuity.

Qrmr. U. F. Lapham, the Royal Scots Fusiliers, to have the hon. and relative rank of Capt. (Sept. 30).

Reserve of Officers.

Lieut. R. A. C. Forster, Capt. 3rd Batn. the Royal Fusiliers (City of London Regt.), to be Capt.

INDIA OFFICE, Oct. 3, 1884.

The Queen has approved of the retirement from the service of the under-mentioned officers of her Majesty's Indian Military Forces:—

Lieut.-Col. G. Tyndall, of the Madras S.C. (Sept. 1).

Majors T. Dawes, Bengal S.C. (Sept. 3), and C. M. A. Morant, of the Madras Army (July 3).

Deputy-Surgs.-Gen. J. E. Tuson, M.D., of the Bengal Army (Sept 8), and J. A. C. Hutchinson, M.D., of the Bengal Army (Sept. 28).

Surg.-Major R. Mantell, of the Bengal Army (July 16).

Brevet.

The under-mentioned officers have been granted a step of hon. rank on retirement:—

To be Colonel:—Lieut.-Col. G. Tyndall, of the Madras S.C. (Sept. 1).

To be Lieutenant-Colonel:—Majors T. Dawes, of the Bengal S.C. (Sept. 3), and C. M. A. Morant, of the Madras Army (July 3).

To be Surgeon-General:—Deputy-Surg.-Gen. J. J. Clarke, M.D., of the Bengal Army (Jan. 14).

To be Deputy-Surgeons-General:—Brig.-Surgs. W. Watson, M.D. (Dec. 21, 1883), and T. Mathew, of the Bengal Army (April 24).

1st Tower Hamlets (the Tower Hamlets Rifle Volunteer Brigade)—Lieut. H. Coningham to be Capt.; Alexander Elkan Elkan, gent., to be Lieut.

Where not otherwise stated, the foregoing commissions and announcements bear date Oct. 4, and the current year must be understood.

Mr. Angear, Chief Constructor of Devonport Dockyard, left Devonport on Wednesday for London, to attend the committee which is taking evidence on matters connected with the Navy.

Capt. the Hon. H. W. Chetwynd, R.N., Chief Inspector of Lifeboats, has forwarded a copy of the report on the value of "Oil on the Troubled Waters," which he has presented to the governing body of the Royal National Lifeboat Institution. The report will receive due attention.

A correspondent on board the Miranda, Com. Acland, on the Australian station, reports a mishap to that ship. As she was going through a narrow passage from Tommy Island, Mallicollo, under steam and sail, she touched a coral bank, but fortunately got off again immediately. The damage is believed to be slight. Divers will examine the bottom of the ship, and repair any defects arising from the mishap. This is the first accident that has occurred during the ship's commission. The correspondent remarks:—"We shall have to remain here (Island of Ambrym, New Hebrides), until the middle of October before we return to Sydney, unless we should be recalled on account of the mishap. The health of the ship's company is excellent, and everything is done by Capt. Acland and the officers to make everybody comfortable and happy. We cannot, however, get any news from home in consequence of so few ships coming south."

Comdre. Molyneux returned to Suakim on Saturday last. There were stationed there on the 10th ult. the Sphinx (commodore's ship), the Carysfort, the Tyne, the Humber, the Albacore, the Dolphin, and the Condor, the last-named ship having gone, as announced, to Massowah, on the 21st ult.

The transport Poonah arrived at Portsmouth on Thursday morning from Alexandria, Malta, and Gibraltar, with invalids, numbering altogether six officers and 370 men. One death occurred on the voyage.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, Oct. 4, 1884. Letters on Business and Remittances should be sent to Mr. Richard James Wood.

NOTICE.—Captain R. Armit, *Central London Rangers, formerly Lieutenant R.N., lately engaged on the Staff of* The Army and Navy Gazette, *having received notice of dismissal six months ago, has ceased to have any connection with this office. This notice is rendered necessary in consequence of statements having been made in circulars, &c., that Captain* Armit *had severed his connection with* The Army and Navy Gazette.

⁂ *NOTICE.—The* Editor *of the* Army and Navy Gazette *is*

MR. WILLIAM HOWARD RUSSELL.

All communications and correspondence not connected with the advertising, commercial, and financial business of the paper, should be addressed to the Editor *only.*

☞ *Advertisements, applications for copies of the paper, remittances, and communications on business, should be addressed to*

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* Editor *of the* Army and Navy Gazette.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

MEROË, or Merawe, to which Colonel Stewart*—whom we are afraid we must term the ill-fated—was proceeding when he was attacked, lies on the right bank of the Nile, and is a ferry station, whence there is a desert route to New Dongola, or Ordee, which must not be confounded with Old Dongola, near Debbah. It is significant of the great change which has taken place in the relations of the Natives to Europeans since this unhappy complication in the Soudan, that for the many years the route has been used no previous act of violence has been recorded, and in no instance have European travellers been molested. At a place not far from Meroë, called Gebel Barkal, there are some remarkable ruins, an avenue of sphinxes of the time of the Ethiopian, or twenty-fifth dynasty, and groups of pyramids, for these old Egyptians, whose descendants are branded as arrant cowards, marched South and East, overran Palestine, invaded Persia, and swept over the regions now misruled by the Turk. From Meroë camels are generally procured for Berber. The description of the route is not agreeable. For five hours the route on the first day lies on the bank of the river. Next, there is a stretch of seven and a half hours through the desert to a well. Another journey of eleven hours brings the traveller to a halting-place, where there is a well of dirty water, but it is better to make a long stretch of five and a half hours further to Kereet, where there is better water. Thence to Berber, three long days through a most rugged and beautiful country, there is no water at all! From Berber to Khartoum, winding all round by the river, and passing the Fifth Cataract, takes another from nine to twelve days, according to the wind; but the steamers which were returning from the demonstration against Berber would probably arrive at Khartoum in a week. The distances given in Murray by boat from Dongola to Berber are as follows:—To Debbah, five days; to Meroë, four days more; to Abu-Kareet, three short days by desert; to Berber, three long days by desert. If no intelligence by the desert route was received at the latter place, Gordon would naturally suppose that Colonel Stewart had made good his way down the Nile with the German and the French Consuls, to Dongola, and was in communication with Sir Herbert Stewart and the authorities; and it is difficult to say what enterprise he may attempt to undertake in the belief that his communications so far have been opened with the relieving force. In the very last newspapers received from Egypt special note was taken of the energy of the French Consul, M. Herbin, who, arriving in Cairo after Gordon had been some time at Khartoum, and when the way was exceedingly dangerous, proceeded without escort of any kind along the very same road that Gordon had previously taken, in order to repair to his post at a time of danger. Nothing has appeared in the English newspapers respecting that gallant enterprise. Herr Hausel, the Austrian Consul, whose fate is probably involved in that of Stewart, had for a long time been resident at Khartoum, and had sent most valuable and interesting communications from time to time of the state of things in the district at the commencement of the Mahdi's movement, and the progress of the great politico-religious revolution extending over Kordofan, Darfur, and the Soudan, of Hicks's short career, and of his overthrow. Whether Mr. Power, the acting English Consul and correspondent of the *Times*, to whom we have been indebted of late exclusively for any intelligence of the actual operations around Khartoum, was with Stewart or not cannot positively be asserted; but as he was a man of great energy, and appears to have gone out with most of the expeditionary columns of the garrison, the probabilities, we think, are that he was on the steamer, and therefore with the party, all of which are reported to have fallen. It appears even yet uncertain whether Berber is in the possession of friends or foes; that is, whether the inhabitants who cleared out under the fire of the Khartoum steamers returned and actually chased Colonel Stewart or not. One of the most distressing incidents connected with the painful catastrophe—bad enough in all points—must be the effect produced on Gordon's mind by the absence of Colonel Stewart, on which he will probably place an erroneous construction.

ANOTHER powerful ship of war, belonging to what is technically known as the "Admiral" class in our Navy, was successfully launched at Chatham on Wednesday. Now that the condition of the British Navy is commanding most serious attention, the addition of the *Rodney* to our Naval strength is especially satisfactory. The event indicates the progress that is being made in this class of first-class armour-clad vessels which severally bear grand old names, famous in the naval history of the nation. The five sister-ships of the *Rodney* are the *Collingwood*, the *Howe*, the *Camperdown*, the *Benbow*, and the *Anson*. The *Rodney* was preceded by the *Collingwood*, commenced at Pembroke more than four years since, and launched in November, 1882. The displacement of the *Rodney* is 9,600 tons, and the engines, of 7,500 horse-power, will realise a speed of fifteen knots. The armament of the ship consists of four 13½-inch breech-loaders of 63 tons, half-a-dozen 6-inch breech-loaders, and several machine-guns. The ship is constructed of steel and has two screw propellers and the armour is wrought of compound plates 18 inches thick. The two barbette towers are polygonal in form, their armour being on the slope. The muzzles of the guns will be always visible over the edge of the barbette, but the breech end will drop below the summit during loading, which will be performed under cover. The broadside guns will not be protected by armour, but will be shielded from a raking fire by a massive armoured screen extending from the barbette towers to the side of the ship. An under-water deck of steel will afford protection to the citadel fore and aft, and there will be armoured communication between the barbettes and the protected part of the ship below. An armoured belt will shield the water-line in the central part of the vessel. The ships of the "Admiral" class will have no sails, a military pole-mast alone being carried for signals and for working the Nordenfelt guns. The squadron of "Admirals" will be costly. The energetic efforts of foreign Powers must at last awaken those who are responsible for the state of the British Navy. There must be no false economy, no delay, or lethargy. When the entire squadron of "Admirals" is ready for the pennant they will constitute merely a portion of the fleet that must be afloat in the near future. Recent experiments have proved that invulnerability is a chimera, as modern artillery has pierced and broken the thickest plates. Despite all these results, the necessity to keep "pegging away" is imperative. The *Italia*, *Lepanto*, *Dandolo*, and *Duilio* could "drive our Admirals off the water, or sink them in battle," but the knowledge of the vast power of those vessels belonging to the Italian Government will not prevent the construction of the six barbette ships. The *Duilio* carries four 100-ton guns behind 22 inches of armour. The *Benbow* is intended to carry two 17-inch 100-ton guns in each barbette, and ten 6-inch guns on the broadside, the armour being 18 inches thick in the central belt, 12 inches on the barbette towers, and six inches on the transverse screens. The two great guns to be carried in the *Benbow*, one in each barbette, will possibly exceed the specified weight of 100 tons each. The French will, we are reminded, soon have, in the *Amiral Baudin*, the *Requin*, the *Formidable*, the *Caiman*, the *Indomptable*, and the *Terrible*, a first-class squadron with which our "Admirals" would be unequally matched. The Naval expenditure of other Powers has increased forty per cent., while that of England has diminished, and the Admiralty "in vain beseeches the Treasury for the extra millions which are wanted to make us safe upon the sea, and to restore that Naval supremacy, without which Great Britain must soon sink to the rank of a second-rate Power." Insufficient attention has been bestowed upon the "hideous and deadly torpedo." Our torpedo service is utterly inadequate. Other nations are aware of the necessity for as perfect a torpedo fleet as science can invent and modern mechanism supply. Unarmoured light cruisers—swift, heavily equipped, and unsinkable—should be numerically increased, and a word must be uttered relative to the supply of trained men, who, it is asserted, are "falling off alarmingly." The new line-of-battle ship is a welcome addition to the British Navy.

WE have received a very strong letter complaining of the complete upset of all right and established order in the composition of the force which has been detailed for Egypt as supplementary to the regimental organisation; but we can only point out that it was the outcome of the established disorder which, under the name of reorganisation and selection, now prevails. Whether the Commander-in-Chief resists or approves we know not, but we do know and see that her Majesty has had all the names of the selected officers under her eye, and that having approved, it is to be supposed that the Queen received the advice of the authorities in the selection of the officers, every one of whom, no doubt, is a most excellent and zealous soldier, whom, however, it would be unduly to exalt if we were to say he has left behind him none so good as himself. Who has a right to complain when the Queen approves and the authorities sanction? One strong will dominating all the feeble natures around him, declares the thing must be done, and that it is the best thing to be done. And that strong man is clearly right. He is charged with the conduct of a difficult operation; his reputation depends upon success; and what we believe to be far dearer to him than his reputation,—the performance of the duty assigned to him in a manner which will prove advantageous to the country, and to the honour of the Crown. "I will, therefore," says he, "take the men I believe to be best for my personal Staff; I will have young gentlemen whom I know personally, on whom I can confide, who are relatives of friends whom I am anxious to oblige, or of my own. They are as good as any others, and if there are better men I do not know them, and cannot look out for them. As to my executive Staff, I shall select the officers,—I do not care what their rank, or how employed, or with what effect on the prospects or feelings of others,—who have done me good work; men who have displayed ability, courage, and energy, and to whom I can give orders with a certainty that they will be intelligently and effectively carried out. You may tell me that there are men just as good, Brown here and Jones there, who have more "claims," and who ought to have a chance. My answer is that I will take no one on chance. I acknowledge no claims whatever to be employed on such special service as I am engaged upon; and as no one can gainsay me, I will just take the men whom I know, who have done good work with me before, so that not one link in the chain I am forging shall be weak or defective with my consent or my knowledge. As for the composition of the special force which is ordered out, I have sought to conciliate and enlist the sympathies of the largest possible number in the country, and most influential classes connected with the Army and out of it, by the novel expedient of composing a patchwork quilt, under which I can smother any amount of individual grumbling. If you look down the names of my officers, you will see in the list many scions of noble houses, a fair representation of the great plutocrats, a relish of the mercantile element, a large batch of landed gentlemen and of the squirearchy, a Serene Highness, and the Equerry of a Royal Field-Marshal. Even the Navy is included in the wide sweep of my net. Never was there so small a body of men sent out of England, Ireland, and Scotland, leaving behind them such far-reaching, deep-seated, powerful roots to be tended at home with the greatest care and affection!" Every regiment in the three kingdoms has its contingent, and what has seniority—which is often, I say, but another name for stupidity—to say to the arrangements I have proposed? And who can maintain that, having the will and the power to do this, the strong man is not justified in doing it? Not we, certainly!

---

* Last night there was a report that three Europeans had been saved. We hope it may be true. If so, Stewart is probably alive. The other Europeans were Mr. Herbin, Herr Hausel, and Mr. Power.

THE Court-martial held at Portsmouth on the survivors of her Majesty's ship *Wasp* came to the inevitable conclusion that the vessel foundered in consequence of want of due care and attention in the navigation of the gunboat while proceeding from Westport to Moville. The survivors, who were tried *pro forma*, according to service regulations, were, as a matter of course, acquitted from all blame, those of the officers who were responsible for the navigation of the ship being beyond the reach of censure, having paid the penalty of their carelessness with their lives. It would be difficult to find a similar instance of reckless navigation, disorganisation, and sheer lack of ordinary precaution in the whole history of maritime disasters. Although from the first the cause of the wreck was evident, it is altogether inexplicable that a gunboat of the Royal Navy should have been lost on a well-known coast, and over fifty gallant men sacrificed, under the circumstances detailed in evidence before the Court. Had the engineer, Mr. William Hudson, been on board at the time of the disaster, his evidence would have been of much importance, but although he was examined before the Court, he could only afford general information to the effect that when he went on leave the engines and boilers were in good working order. In reply to questions by the Court, Mr. Hudson stated that it would take forty minutes to get up steam when the fires were banked; and he further gave the suggestive information that the *Wasp* had never been under banked fires at sea since he joined in January, 1883, adding,—"We were never under sail alone at all, but always steaming, except on one occasion of half an hour." It appeared from the evidence of this witness that the ship had a full supply of coal, there being no directions given to the *Wasp*, other than those appearing in ordinary regulations, as to proceeding under steam. The other witnesses, with one exception, asserted that the accident took them completely by surprise. One of the survivors, Philip Andrews, the second captain of the forecastle, who was on watch when the ship struck, was the first to notice that the ship was in danger, as she rolled a great deal, but he did not give any warning to the officer of the watch, for the simple reason that "he might have been told to mind his own business." Whether, at this time, intimation of immediate peril would have tended to save the ship, it is impossible to say, but a few minutes afterwards the *Wasp* struck "about ten yards from the shore." The one man on the look-out shouted louder than usual in reporting land ahead, and Lieutenant Guppy gave the order "Hard-a-port," while the Commander, who was on the bridge, shouted "Hard-a-starboard," but the vessel, then within a few yards of a dangerous island, obeyed neither helm. Utter chaos prevailed, and the astonishing tale is sensational and startling. From the statement of the quartermaster, Richard Rattenbury, an experienced petty officer, it appears that there was nothing in the state of the weather to prevent the Tory Island light being seen at a considerable distance. The vessel was entirely dependent upon her canvas, the fires being banked, and her speed was from six to six-and-a-half knots, at the time of the accident. There was no leadsman in the chains during the first watch, neither was there any leadsman in the cutter, when the quartermaster came on deck. The lead was usually hove from the quarter-boat. It was not shown whether Commander Nichols was called prior to the ship striking on the rocks, but he was on the bridge immediately afterwards, not having had time to dress himself, so sudden was the mishap. Every officer was calm and collected before the gunboat struck, and they met an untimely death, as British officers are ever wont to do, and thus terminates the story of the wreck of the ill-fated *Wasp*, and the loss of more than fifty of her crew. This pitiful disaster ought never to have happened, and the lamentable particulars, showing gross carelessness in the navigation of the ship, will assuredly result in a greater degree of care being taken in the management and handling of vessels in close proximity to a dangerous coast. Considering all the circumstances attending this disaster, and carefully analysing every particular point of importance, there remains nothing but utter astonishment at all the surroundings, and surprise that such an event could have possibly occurred. The night was clear, and the lights along the coast were duly sighted. Tory Island light was made at 1 o'clock a.m., about half a point on the bow; the course was altered half a point, and there the light remained one point only on the bow until just before the ship struck at forty minutes past 3 o'clock. Sub-Lieutenant Guppy was on the bridge, it appears, during the whole of the watch, and it is astonishing that he did nothing until the ship was in the breakers. The Commander did not appear on the scene until the vessel struck; the Navigating Lieutenant steered an unsafe course, and the officer of the watch deliberately let her run on the island. The tide turned to the eastward at a quarter to 3 o'clock—about an hour before she struck—and probably contributed to the disaster. The lessons taught by this sorry affair are plain, and should be remembered. Why was the *Wasp* under sail only, on this dangerous although well-known coast? Were the fires banked by direction of the Commander, or in obedience to general instructions issued for purposes of economy? Is not the real clue to the disaster that reliance was placed, thoughtlessly, on a force that was not available? Steam was generally up on board the *Wasp*, as Mr. Hudson explained, and it is more than probable that the fact of steam power being unavailable at the time of the mishap was not taken into consideration, and hence the disaster may, to a certain extent, be accounted for. When steam is habitually at the disposal of those in command, the limitations of sailing are not considered. This really appears to have been the case when the *Wasp* ran on the rocks and foundered. Another question has arisen relating to the sufficiency of officers to carry out the necessary duties on board. The watch on deck does not appear to have been strong, and it will possibly be of future advantage to direct attention to this importont administrative question. A statement has been made that responsible officers are induced to be over-parsimonious in the use of coal, and that "the accident was mainly due to false economy." This assertion does not appear to be supported by past experience, for the engineer asserted that the ship was "always kept steaming," except on a specified occasion. Any parsimonious direction as to the saving of coal is preposterous in gunboats, and the Admiralty might consider the desirability of issuing an order directing that steam shall be always available off a dangerous coast. The loss of the *Wasp* will be painfully remembered chiefly in consequence of the great loss of life, and the event will probably bring about the adoption and official promulgation of those necessary checks, safeguards, and precautions which lessons, only paid for at a great cost, almost invariably secure. Conduct similar to that which resulted in the wreck of the *Wasp* would merit censure in the case of an under-manned merchant vessel, in charge of an inexperienced master.

IT is useful to give an abstract of the situation at Khartoum, according to the latest intelligence made public,—that is, the communication from Mr. Power published in the *Times*. It will be observed that the telegrams from Gordon himself are not published. They are official, and the authorities are reported to have received several through the Mudir of Dongola, Major Kitchener, &c., of which only scraps and bits have reached the public. On April 28 the Soudanese thoroughly surrounded Khartoum. "We have biscuits and corn for about four months," says Mr. Power, writing to the *Times* at that date. Food was dear. Gordon's "treasure was at Berber." There crops up now a new hero, Seyid Mahomet Osman of Kassala, whose messenger arrives at Khartoum to tell Gordon "to be of good heart," as Osman, who had beaten all the enemy around Kassala, would come to his relief. But he did not or could not come. On July 30 Mr. Power writes:—"We have been five months closely besieged, and can at best hold out but two months longer." So if there was not a miscalculation at first, at the end of September the garrison and people would be starving. All through April there was hard fighting. In May the same. Towards the close of that month and in June, as the Nile rose, expeditions up the river were common and successful. They were commanded by Saati Bey, who seems to have been a most valiant, capable native, if our correspondents and editors will allow such a creature to be possible. On July 10, Saati Bey, who had been harassing the enemy incessantly and with much success, capturing cattle and corn, in one instance, 500 quarters, was killed in the attack on a fortified village. Up to that time, the loss of the garrison was 700 killed, and it is not too much to assume that there must have been about 2,000 wounded. Looking into the "Diary" of Mr. Power, it may be gathered that Gordon had five steamers available, which are described as armoured. These were employed in towing barges with castles upon them, defended by armour and mounted with guns. Early in August, Gordon probably sent some of these steamers up the river towards Sennaar, and to retake a vessel captured by the enemy from Salah Bey at Masalimieh, whether successfully or not we must wait to ascertain by-and-bye. But these steamers having returned, it is quite probable that Gordon would despatch the force, of which we have previous information, to clear the enemy out of Berber, with instructions that one of the steamers was to proceed to Dongola with Colonel Stewart, the others returning to Khartoum.

IN the general depression of the labour market, it is not impossible that the forthcoming winter will be decidedly favourable for Army and Militia recruiting, and consequently there will be no further decrease in our ranks. Recruits from the towns and the agricultural districts are commencing to present themselves more briskly than they have done for some time past, and from the reports of the Recruiting officers, it appears more than probable that this disposition to enter the service will increase. In spite of explanations, however, the fact remains that our Army is and has been for some years short of men, and the employment of the Militia as a recruiting agency for the Army proves that it has been necessary to resort to extreme measures to obtain the supply we have. If more attention had been given to the organisation of recruiting agencies, instead of issuing Circular Warrants and General Orders, which only increase the labour of Staff officers and their clerks, better results might have been attained; but neglect alone would not account for our want of men. The labour market is the basis on which depends our supply; and "the Army's meat is the nation's poison" as regards recruiting. Already some gangs of farm labourers in certain districts have left their employers *en masse* to enlist. Though the cause is not encouraging in a national sense, those who avail themselves now of the advantages the Army presents will not be the worst of their class. After some years, when prosperity has returned, as, let us hope, it will, we shall perhaps have a difficulty in getting recruits; and by that time further changes may have become necessary, the short-service system will have required further development, and the period of service a further reduction, in order to pave the way for conscription, or the alternative.

EVERY incident and detail points to the absolute criminality of the delay that has occurred in preparing for this expedition. It is quite true that it would have been impossible to have taken the Nile route until the river had attained a fair height; but having before them the moral certainty that it would be necessary to send an expedition, it is inconceivable how the authorities could have delayed the necessary preparations so that at the present moment, when the river is rapidly falling and Gordon is obviously placed in great straits for the first time with accumulating dangers, to which there has been added a menacing element just now, they are actually sending out men from Ottawa for boat service on the river, and discovering that the camels on which they depended are not to be had, and that if they were forthcoming, the saddles provided for them are rotten and unfit for service. Here is the pick of the British Army, all ready for work, échelonned up six hundred miles of river, absolutely paralysed for want of means to do that work for which they have been sent out from this country. The stars in their courses now and then appear to have been fighting against us. One step after another has led to deeper and more serious difficulties, and at a critical moment the news came that the telegraph communication above Assiout was interrupted,—in other words, that the whole of Nubia and the Soudan was plunged into darkness as far as we are concerned. It might have been a mere accident; we hope it was. But the intelligence of the breakdown of the short railway at the First Cataract, of engines disabled, carriages off the line, &c., points to impediments to the rapid progress of the expedition, and of the conveyance of stores at the bases established at Wady Halfa and elsewhere, which must be watched with anxiety. The *Deccan* and *Australia* arrived in due time at Alexandria, and the men of the Camel Corps were disembarked with a commendable diligence on Tuesday last at Alexandria, thanks to the magnificent quays due to Ismail Pasha, at which some eight or ten transports can lie alongside and discharge their cargoes with rapidity and ease close to the railway terminus. But so far, the men of the Camel Corps are without camels, and are reposing under ths shadow of the Pyramids. It seems to have been forgotten that the waste of these animals has been enormous, and that the supply is limited. If military operations had not exhausted very much of the stock on hand, there might have been difficulties even now, at this particular time of the agricultural year, in collecting a sufficiency for the transport wants of the Army. An Egyptian peasant can scarcely live without the aid of the "ship of the desert," in many parts of the country, even where buffaloes and donkeys are abundant. As Lord Wolseley must be impatient to get on, he will very probably be forced to order the men to take to the boats, and, with the aid of steamers, they can be towed up as far as Wady Halfa, the men making use of their oars at times, or dragging the boats with the help of natives where the banks admit of it, an operation which will be attended with great destruction of the senna and ordinary crops on the narrow strips of cultivated soil between the desert and the stream. There may be no fighting after the expedition leaves Wady Halfa. The advanced guard reached Dongola without difficulty, and the natives are reported to be friendly; but it must be remembered that it is south of Dongola that the enemy's country really begins, for our friend the Mudir has so far made our paths pleasant.

THE *Avenir Militaire* contains another long and not uninteresting article on the French Fleet, from which we gather the following opinions. We are first of all reminded that Captain Gougeard, ex-Minister of Marine under M. Gambetta, is in favour of abandoning the construction of the *Brennus* and the *Charles Martel*, which were laid down last year. The writer says that "the experiments made by the German Fleet relative to the protection of the coast, and the comparative value of torpedo-boats and ironclads, has fully confirmed the experiments of our own Fleet in the Mediterranean. It has been found impossible to protect ironclads from torpedoes; and at Spezia it was recently proved that the strongest plates can be pierced by modern artillery." After dwelling for a while on this new aspect of affairs, the *Avenir* asks,—"What works already commenced must be suspended, in order to undertake new constructions without supplementary credits?" M. Charmes, who has taken up the Naval question very warmly, and to whose articles in the *Débats* we have referred in previous numbers, pronounces himself very decidedly in favour of interrupting the works on all the ironclads now building, for they will require £4,000,000 to finish them. He proposes that they shall be transformed into transports destined to accompany in the distance the torpedo-cruisers of the future, small, fast, handy craft, unable, on account of their small dimensions, from carrying any large amount of stores. These transports would act, in fact, as tenders to the fighting division. "This is a proposal," says the *Avenir*, "which deserves to be taken into consideration by competent men, and decided upon without loss of time. It is permitted to hope that the large ironclads, disembarrassed of the turrets and heavy guns they were destined to carry, will be able to receive an increased motive-power, which will permit them to keep pretty well up with the torpedo-cruisers, so as always to remain under their protection. Mere transports might be armed with small guns, and above all with machine-guns." The *Avenir* hopes that this matter will be brought before Parliament, as the *Brennus* and the *Charles Martel* in no way answer the exigencies of the moment. They were designed two years ago, when there was no suspicion that the reign of huge ironclads was drawing to its close. "Over a million sterling might be saved," exclaims the *Avenir*, "and with this sum we might in a short time build a large number of sea-going torpedo-boats." M. Charmes writes in favour of 40-ton torpedo-boats, such as those which behaved so well during bad weather in the Mediterranean a few months ago; they can be built for £10,000, and do not expose more than a dozen lives. Captain Gougeard, on his side, advocates a more costly and larger craft, costing £100,000, and having a displacement of 1,800 tons. M. Charmes thinks that the *Italia*, which is supposed to be the most powerful ironclad afloat, would stand less chance if attacked by twenty small torpedo-boats than by two of those recommended by Captain Gougeard. The chief objection urged against the small torpedo-craft is the fact that in a long voyage they would soon become dependent upon their transports. The *Avenir* pronounces itself in favour of vessels of 280 tons, several of which are on the stocks, and which will be able to cross the Atlantic without being accompanied. Should these cruisers be a success, there will be no need of constructing any larger, and they might be built in eighteen months or a year.

IN the exceedingly interesting, learned, and laborious work of Captain Quinteau, just published,* there is an instructive account of the Camel Corps which Napoleon created in Egypt to crush the Mamelooks and Bedouin. During his excursion down the shores of the Red Sea he met a caravan escorted by Arabs on dromedaries. He at once ordered Eugène de Beauharnais and Colbert—the precursors of the Reginald Talbot and Stanley Clarke of to-day—to mount camels and ride them; and, satisfied by the result, he ordered a regiment to be provided with these animals,—the true mounted infantry of the Desert. But we think it rather doubtful that "each dromedary carried fifty days' provisions and fifty days' water," as the author asserts. Each man—infantry volunteers—had a lance, a musket and bayonet, and 100 cartridges, and the regiment had two cannon, each drawn by six camels. At first the corps was laughed at. Napoleon and Berthier rode about Cairo on camelback to put down detractors, and facts soon justified the wisdom of the organisation. The Bedouins were run down and destroyed, and not only that, but the corps preserved all the communications of the Army from insult or annoyance, and Bonaparte was able to write,—"For fourteen months during which the campaign lasted, I had never a convoy or even a courier intercepted." In Algeria, Camel Corps were largely and successfully employed. General Monge directed the creation of a corps of 600 dromedaries, carrying 1,200 men and provisions for twelve days, which he organised with the assistance of Colonel Cavalier, ancient Chief of the Camel Corps of Napoleon from 1798 to 1800. Under Carbuccia† they were of immense service. In 1853 Major du Barrail mounted his infantry on camels, and marched fifteen leagues a day with them; and in 1864 Yusuf employed a battalion of Tirailleurs Indigènes with equal success. One caution worth attention is given by Colonel Trumelet, who served with the corps:—"It is absolutely necessary for the Infantry to dismount well in advance of the place where they expect the enemy, on account of the deplorable facility with which the camel species gives way to panics." *A propos de bottes*, Captain Quinteau having given some instances of remarkable marches, observes:—"These were all done by old soldiers, tried in war; but let your troops be young and unaccustomed to fatigue, and your column will soon break up on the road. In the present state of our (the French) army, it seems difficult to expect that our troops shall cover more than sixty kilomètres in the twenty-four hours, and that in an easy country and not under too hot a sun." "On one pair of English legs do march two Frenchmen," said the poet; only they do not go quite so fast. M. Quinteau also alludes to our Camel Corps in 1859 in India.

The Duke of Edinburgh will join the *Minotaur*, next week, according to present arrangements, and the Channel Squadron will proceed to sea on a winter cruise for a couple of months, unless Eastern events unexpectedly take a critical turn, the starboard division from Portsmouth joining the port division from Portland or Plymouth. The boilers of the *Minotaur* are only given three months to last. At the termination of the cruise, the Duke of Edinburgh will probably haul down his flag, and be succeeded in command by Rear-Admiral Sir Anthony Hoskins.

The Lords of the Admiralty will, we understand, be asked to sanction the expenditure of £18,500 for the erection of the necessary stores and offices at Portsmouth, required in consequence of the transfer of the custody and fitting of Naval gun-mountings from the War Department to the Admiralty.

A correspondent, writing under the signature of "An Admiral," points out that by an Order in Council the First Lord of the Admiralty is to be held responsible to the Queen and to Parliament for all the business of the Admiralty. How, it may reasonably be asked, is it possible for Lord Northbrook to be responsible to her Majesty and the Legislature when he is in Egypt? The finances of the Admiralty are, it is alleged, at the very lowest ebb, and the "sinews of war" are lacking, while the estimates have been exceeded, and credit and "indemnity" have to be depended on. Such a condition of affairs, in the present somewhat excited condition of the country, is simply lamentable. It is as well that "my Lords" have gone "on tour," under the circumstances. Lord Alcester remains in town to bear the brunt of the work.

Commander the Hon. Maurice A. Bourke has been appointed to the *Dreadnought*, commissioned by Captain the Hon. Edmund R. Fremantle, C.B., C.M.G.

Captain J. B. Warren, who has been selected by the Lords of the Admiralty for service in her Majesty's ship *Tamar*, has seen much active service in the Baltic and in the Chinese War. While commanding the *Swallow*, he received the thanks of the Colonial Government of the Cape for assistance rendered in the expedition for the relief of the Trek Boers in 1879.

In Nile navigation the principal danger is incurred when vessels are going down stream. If a steamer or dahabeah grounds in going up she is backed off with comparative ease, should she have run end-on. If she swings there is more difficulty, as the mud settles with astonishing rapidity on the side exposed to the stream. But when a vessel strikes going down the river there is much delay and some risk, and if it be on rocks there is little chance of getting her off in a falling Nile, unless she can be lightened by taking out cargo. Generally, the bottom is of mud, but there are rocks and reefs in well-known areas of the river.

It is stated that Captain P. H. Colomb, borne on the books of the *Asia*, has been selected for the *Duke of Wellington*, flagship of the Commander-in-Chief, on Capt. C. J. Rowley being promoted to flag-rank.

The triangular duel in Marryat's "Midshipman Easy" has been repeated on board the *Northumberland* in Devonport Dockyard. Three of the Midshipmen, who had, it is stated, been perusing the tale referred to, having private revolvers of a very small pattern, arranged themselves in a triangle in that part of the ship devoted to Midshipmen's chests and hammocks, and commenced to snap their revolvers at each other. There was a ball-cartridge in one of the chambers of the weapon handled by Mr. Tracey, of course, quite unknown to him. The bullet entered Mr. Tilley's cheek, traversed his face through his upper lip and nose, and made its exit, to the detriment, for the present at least, of the poor lad's personal appearance.

Vice-Admiral Richards has reluctantly "entered the arena of discussion on a subject of paramount importance to the nation,"—the state of the Navy. He reviews exhaustively the present condition of affairs, and maintains that the remedy is "to place the Navy, in as short a time as possible, in such a condition that its rulers may be fairly held responsible for the safety of the country." Admiral Richards does not propose to double the Estimates, but advocates a "construction grant" being made at once; but we must wait a little, though the department is now going on credit. He is opposed to commissions or committees, as suggested, "unless it be a committee of one strong man." The results of all the commissions which have sat for a quarter of a century have, it is contended, been fruitless. It is evident that Admiral Richards does not believe that in a multitude of councillors there is wisdom, or he would not suggest individual action and responsibility. It will be asked at once,—Who is the "one strong man"—standing head and shoulders above all others in ability, capacity, and matured experience—to be entrusted with so onerous a work? The question is difficult to answer. And if he were found, would Parliament give him the power? Assuming that the "one strong man" be forthcoming, and willing to undertake the duty, the proposal for a Parliamentary Committee of Inquiry is reasonable and desirable. It is beyond doubt that, taking into consideration the existing state of public opinion, if a committee, strongly constituted, reports, in terms that cannot be mistaken, on the state of the Navy, no Ministry will venture to neglect its recommendations. The subject that has caused so voluminous a correspondence must occupy the attention of Parliament shortly, and immediate action must follow, unless all the prophets be wrong, and the experts deceived.

---

* *La Guerre de Surprises et Embuscades.* Charles Lavauzelle, Paris.

† General Carbuccia wrote a paper on "The Camel as a Beast of Burden and of War."

A new transport, the *Calédonien*, has just been launced in France. This vessel, which is built of iron, which has a displacement of 3,990 tons, and which is 74 metres long and 10½ broad, is intended to ply between Brest and New Caledonia by way of the Cape of Good Hope. It is said that the new transport will accomplish the voyage in 100 days, and that she is to do the whole distance without stopping. The *Calédonien*, built and got ready for sea at a cost of £128,000, will carry two 14 centimetre guns.

Professor J. H. Lock, of New York, has constructed the "Peacemaker," which is 30 ft. long, built of iron, and costs $16,000 to build. Under ordinary circumstances the top of the boat is not much above the surface of the water, and she can be driven entirely under water by inverted "fins," the motive power being electricity. The boat may be sunk to any depth by expelling air from and letting in water into reservoirs. In the interior of the vessel, which is lighted by electricity and supplied with compressed air, are placed the "crew" of the boat, consisting of the electrician and the engineer, the latter of whom attends to the air-pump. The captain, who is also steersman, is placed in a kind of well on the deck of the boat. He is clad in diver's dress, and surrounded by water. From his place he signals to the electrician to manage the boat and discharge the torpedoes. The latter, charged with dynamite, are made buoyant with cork. When an offensive movement is intended, the boat, driven by electricity from storage batteries, runs up under the bottom of the vessel to be attacked, when the captain places a torpedo on either side of the keel, the torpedoes being made to adhere by electric magnets. The torpedo-boat then runs off, and the torpedoes are exploded. According to Professor Tuck, who is said to have been 25 years perfecting his invention, the torpedoes may be attached to vessels going at a speed of 10 knots an hour.

"Whatever the condition of our ships may be," writes Mr. E. H. Carbutt, M.P., "there is no doubt that our guns are not what they should be." Although the condition of the British Navy is admitted to be defective, it has not been shown that our guns are inferior. Mr. Carbutt anticipates delay in arming our ships if war breaks out, and expresses a belief that "we should find that, in those ships that had guns, they were inferior of range and power of penetration to the guns made for foreign governments," adding, however, that "this would be very difficult to prove, except in action." The broad and vague statement regarding the alleged superiority of the guns of foreign governments is not borne out by any facts adduced after experiments. Last week, at Spezzia, a 100-ton gun, loaded with 3 cwt. of gunpowder, was fired against a Schneider armour-plate of hammered steel, a compound Brown, and a compound Cammell plate. They were all penetrated, the Schneider being broken in three pieces, the compound Brown in four, and the compound Cammell in six pieces. It may be judicious for the War Department to direct further experimental trials of our most modern guns, and the suggestion of Mr. Carbutt that a handsome sum of money should be placed at the disposal of "an independent (not departmental) committee to inquire thoroughly into the matter," may be worthy of consideration. Mr. Carbutt rebukes the late Government for neglecting a good opportunity of testing a different system of guns from their own, after the purchase of the *Neptune*, "complete with her guns and supply of ammunition." These guns, made by Sir Joseph Whitworth, were taken out and replaced with Woolwich guns, "at a cost of £100,000." Against this proceeding Mr. Carbutt protests, and contends that the results obtained by a 9-in. steel Whitworth gun have never been equalled by either a Woolwich or an Elswick gun. But there is no service Whitworth ammunition, and there would be manifest inconvenience in novel projectiles and cartridges being introduced into the service to meet the need of one ship's armament. Whatever the reasons were, it is improbable that there were not good grounds to justify the course adopted. Admitting that "the prejudices of the War Office should not be allowed to stand in the way of our having the best guns," it may be reasonably contended that more evidence is required of the prejudice—meaning unreasonable opposition—of the authorities, and of the "inferiority" of our guns, than is at present forthcoming. We admit, of course, that we are much behindhand, and dangerously so as regards the latter.

Commander W. des V. Hamilton, who has been acting as Commander of H.M.S. *Hercules*, flagship of Rear-Admiral Sir A. Hoskins, K.C.B., Admiral Superintendent of Naval Reserves, has been selected to act in a similar capacity to the *Nelson*, flagship on the Australian station, the command of which Rear-Admiral Tryon shortly takes over. Commander Hamilton, who rendered valuable service with the Naval Brigade in Egypt in 1882, will be succeeded in the *Hercules* by Commander F. Powell.

Vice-Admiral F. A. Close, referring to the loss of the *Wasp*, gives the following information, which will be read with interest. He states that her Majesty's ship *Trident*, under his command, might have been lost under a lighthouse in the same way as the *Wasp*, had he not accidentally discovered that the navigating officer was "moon blind"—that is to say, he could not see the light of the lighthouse staring him in the face (like a full moon), distant half a mile. Quite recently many of the engine-drivers on our railways were discovered to be "colour blind." If, remarks Vice-Admiral Close, every commissioned officer in the Royal Navy had to pass a periodical examination for eye-sight, say on appointment to a ship, we should hear of fewer wrecks. Also a few simple questions on judging distances (with the naked eye) of lights, &c., by night should, the writer contends, be added to the examination of all sub-lieutenants.

The *Shannon*, which in 1813 fought the historical duel with the *Chesapeake*, is still afloat, in New York Harbour. Long ago she was reconstructed for the merchant service, but her hull is substantially the same to-day as it was 84 years ago, the date of her birth, or her launching. Her last public service was the transporting of troops to and from India. Latterly, she has been bringing a cargo of chalk from England, and just now she is loading petroleum for the return voyage. She is about 1,300 tons, and on her stern she displays what is said to be a capital likeness of Sir Philip Broke.

On Saturday the keel of the ironclad *Katrina II.* was laid at Nicolaieff, and on Tuesday the keels of the ironclads, *Tschesme* and *Sinope*, were laid with great pomp in presence of the Grand Duke Alexis, and the highest officials and ministers at Sebastopol. These two ships will, it is announced, form the nucleus of the future Black Sea Fleet, and may be considered as the first fruits of the denunciation of the Treaty of Paris by Russia 14 years ago. It was just about this time, 30 years ago, the allies were preparing the bombardment of Sebastapol. A new floating dock is to be constructed at Sebastopol. It is announced from St. Petersburg that the estimates for the next Russian Budget show a large increase as compared with those of past years. An additional sum of 4,288,488 roubles is provided for the construction of new war-vessels alone.

Information has reached this country stating that there is good reason to believe that the worst abominations of the African slave-trade are now being reproduced on the New Guinea coast, and that a salutary exercise of authority by the representatives of her Majesty's Government in that quarter is imperatively required to check the evil. It appears that several labour-vessels from Queensland have lately been engaged in recruiting labourers at East Cape, and that no fewer than thirty-eight natives were shot by the crews of four of these vessels. Other outrages on the same coast are reported, and it is satisfactory to learn that some time ago a schooner concerned in the nefarious traffic was seized by her Majesty's gunboat *Swinger*, and sent to Cooktown in order to be made the subject of judicial investigation. The public will await with anxiety the further proceedings in this case. It is obviously necessary that some adequate British authority should be set up on the southern shores of New Guinea.

The Prime Meridian Conference will, it is feared, fail to come to an agreement in consequence of French opposition to the selection of Greenwich as the standard meridian. This determined opposition appears to be the result of "patriotic" rather than practical considerations. The French will hear of no other prime meridian than Paris, and the responsibility of the failure to arrive at a common understanding will rest with France.

We hear that the Admiralty are what is vulgarly called "going on tick." They have got no money. It is likely that the War Office is proceeding on the same time-honoured principle.

Critical comments of a somewhat facetious description have succeeded an announcement, the purport of which is that the chief stimulant to be served out to our men during the coming Nile Expedition will be "a kind of rum, which is not rum, but that beverage minus its alcoholic properties." It has been formally announced that "the chief stimulant for ordinary use among the men engaged in the Nile flotilla will be rum, which is being sent out in large quantities from the Royal Victualling Yard at Deptford, where, by a special process, the heavy portion of the alcohol is got rid of, and that of lighter specific gravity is retained, thereby rendering the rum light and exhilarating, instead of stupefying and intoxicating. The scientific treatment to which the rum is subjected, removes, with the heavy spirit, all its irritating properties, and renders the troops who drink it cheerful, without being excited and quarrelsome." If this be strictly correct, a valuable discovery has been made, and it is asserted that it ought not to be kept a secret. Suggestions have been thrown out that when Parliament meets some Member should ask the following questions:—"To inquire of the Secretary to the Admiralty whether he will inform the House what it is which the authorities at the Deptford Victualling Yard put into the national rum to 'render the troops who drink it cheerful without being excited and quarrelsome;' and whether he will cause parcels or casks of the same material to be distributed to the licensed victuallers throughout the country?" Temperance principles in the services merit every encouragement, but further information is sought anent this "Nile flotilla rum."

It is somewhat curious to find a paper like the *St. James's Gazette* using the word "*morale*" for "*moral*," in reference to the spirit of the services,—the Army, rather. It is a common error to some, but it is not one we thought our contemporary would fall into.

A Government viewer from the Royal Small Arms Factory attended at Aldershot on Wednesday last to inspect the arms of several battalions. In many instances the cleaning-rod of the rifle has become so loose that in firing it gradually moves forward, and projects to such an extent as to be a source of danger. Steps will be at once taken to remedy this defect. In future inspections of this kind, it would be as well if the functionary from Enfield would try to be more punctual to time than on the occasion referred to. In the case of the battalions inspected, who were kept waiting for several hours, it means the complete loss of a day—musketry, military training, and all other instruction being of necessity suspended.

It is almost aggravating to find that a little bit of a kingdom like Servia has, thanks to the organisation of Colonel Petrovitz, the Minister of War, an army of 70,000 men and 288 guns in the 1st Ban, or active army; in the 2nd Ban, 56,000 men; and in the 3rd Ban, 53,000 men.

The want of dates in communications from the South country destroys the value of the information. It is oftentimes due to the ignorance of the European who transmits the news, for he may not understand the Mahommedan calendar, and it is not easy to an unfamiliar to make the needful correction. Thus, when we read that "from Massowah we hear that General Gordon is at Sennaar, fighting the rebels and collecting taxes," we want to know *when* that was? Sennaar is a district on the Blue Nile, south of Khartoum, and if Gordon be there he has broken loose from Khartoum, and the siege is raised. But then we heard from Mr. Power that Mesalamieh, a town defended by Saleh Bey, which is in Sennaar, on the Blue Nile, was captured by the Mahdi some time ago, and that Gordon was going to send an expedition to try and recover Saleh Bey's steamer, and it may be the echo of the attempt which comes to us now. The telegraph lines, which under Ismail Pasha were stretched across the desert from station to station, and were regarded as sacred by the tribes, are now probably destroyed; but there may be telegraphic communication between Massowah and Kassala, and the report may have reached the latter place. If so, there seems to be no reason why the Egyptian Government should not be able to verify it, as the line to Massowah is open, we presume.

The Secretary of State for India in Council having, with the concurrence of the Secretary of State for War, approved of a limited number of probationers for the Indian Staff Corps being appointed annually from regiments serving elsewhere than in India, revised regulations on the subject have been published, and G.O. 117 of 1878 and 1 of 1882 have been cancelled.

The officer commanding a certain field battery at Aldershot does not seem to have profited much by the course of "combined minor operations" carried out during the drill season, if we may judge by the remarks of the Umpire-in-Chief (Major-General Feilding), published during the week, on the minor operation of the 3rd inst.,—the last of the season. The Chief Umpire observes that "the Field Battery attached to the Southern force was not well handled. The first position was too exposed to admit of its being held. The second position, whilst shelling Crown Prince Wood, was unnecessarily exposed to the fire of the Infantry occupying that wood. The third position (only about

200 yards from that previously occupied), was on the exposed part of Romping Down and the R.A. umpires on both sides obliged the battery to limber up before more than one shot had been fired. The fifth position (50 yards in rear of a line of skirmishers) was even worse, and the battery was again sent away. The sixth position (on Blackhill) was fairly good, but the guns neither shelled the fort at Longdown nor the road and bridge at Curzon Bridge, both of which could be seen and enfilated from the battery. The seventh and last position, viz., inside Longdown Fort, was badly chosen, inasmuch as it was in a regular shell trap, exposed to the fire of the enemy's artillery on Windmill Hill." On the Northern side, "the half-battery Royal Horse Artillery, which was intended to operate with the Cavalry, was so indifferently handled that it was of very little service all day, and succeeded in losing a gun (captured by the Queen's Bays), and eventually lost its way, and was cut off from the main body." It is evident from the foregoing that somehow the Artillery combatants did not, on the 3rd inst., enter fully into the spirit of the last "combined minor operation" of the Aldershot drill season.

With a view to encourage soldiers to qualify themselves in Army signalling, extra-duty pay will in future be issued to signallers with an army in the field.

A sealed-pattern suit for Schoolmasters has been sent to the various military centres. As a special privilege, those schoolmasters who are warrant officers are permitted to wear a gold-embroidered crown on the forage-cap, to be provided "at their own expense," which indulgence will not be granted to the junior Schoolmasters.

We see that Lord Wolseley and Sir Redvers Buller have very wisely taken refuge in a dahabeah moored in the stream by the bank at Wady Halfa. A step and a plank take them on shore, and they escape the dust and trouble somewhat, if nothing else. A dahabeah affords very comfortable quarters. It is, as many of our readers now practically know, however unacquainted they might have been with the craft a few years back, a large decked boat, with kitchen accommodation for the crew and servants in the fore part, and a raised house and deck divided into sleeping cabins, with a saloon above; and there is a fair promenade provided with awnings, where the dinner is generally spread. The nuggar, of which we are beginning to hear a good deal, is only a half-decked boat, much smaller than the dahabeah, which is used on the shallower water of the Nubian part of the river. The last news from Cairo shows that the Nile there is still of an average height; but as soon as the northern canals are all open from the First Cataract northwards and drained into the fields, the absorption of water from the main stream becomes enormous, and the depth and current are rapidly diminished in the upper waters.

The new edition of the Aldershot Divisional Standing Orders has at length been published, and, as announced in a recent Divisional Order,—"The Lieutenant-General commanding expects that every officer will make himself acquainted with them," *i.e.*, purchase a copy—for they cannot be obtained otherwise, being supplied by a local printer at the rate of 1s. 6d. per copy. It seems rather hard that officers should be compelled to purchase a necessary official book of this nature, though the price is small. A ecrtain number of copies ought to be handed, free of charge, to the commanding officer of each regiment or corps at the station.

The sooner the existing regulations regarding the preliminary drill for Militia recruits are revised, the better for all concerned. There would not appear to be any necessity for retaining the title "preliminary drill" as applied formerly; for now that 90 per cent. of the Militia recruits attend for their 56 days' drill at the depôt on enlistment, the conditions of Pars. 244 to 249 of the Militia Regulations, 1883, as amended by General Order 118, of 1883, have become somewhat obsolete; and a plainer reading might, we believe, be substituted for the not very easily understood regulations embodied in the General Order above referred to.

The intelligence that Lord Northbrook has recommended the abolition of the Egyptian Army, and the creation in lieu of it of a force of 9,000 policemen should, we hope, be received with caution. But his lordship has certainly evinced what may be considered a somewhat dangerous energy in the scope of his measures for the reconstruction of Egypt. The abolition of the Army would certainly be the logical outcome of the complete annexation of Egypt by England and by the permanent establishment of British garrisons all over the country, under which the police could maintain internal tranquillity and order. But it is a measure that no Egyptian Minister would ever sanction. It would be dangerous in the last degree in its effects upon the Mahommedan population, and we do not believe it would be safe in any sense. Of course, the theory having been established in the popular mind that all Egyptians are cowards, it is easy to demonstrate the uselessness of an army of such materials; but then, *per contra*, it would be very hard to prove that a police composed of the same men, without discipline such as the soldier had, could cope with peasantry who are liable to sudden outbursts of tumultuous assemblages, or with the Arabs on the borders. Till further advised, we cannot accept the story as at all probable. Certainly, if it be true, we do not believe the conclusion will receive the assent of any one at all acquainted with the condition of Egypt. Lord Northbrook has shown boldness at all events. He was sent out to "advise and report," and the first result of his action is a *coup* which Arabi did not make. Arabi was attacked and overthrown on the ground for which there was no tangible proof whatever that he probably would make it. The metropolitan papers treat very lightly the consequences of a suit before the International Tribunals, and the *Times* was ill enough advised to jeer at their power. Our contemporary said that the Egyptian Government would not enforce a decree against itself, and that our Government would not be very likely to help the Tribunals, to the creation of which it most energetically contributed. But surely that would be a mockery of justice, and it would besides be grossly impolitic to set the decress of the Tribunals aside. Can we suppose that the great Powers concerned with ourselves in the creation of these tribunals and in their maintenance would look with indifference at the overthrow of a system on which they founded great hopes for the protection of their subjects and the execution of the law in Egypt, because an inconvenience resulted from the action of the Courts with regard to the obligations of the State!

Our attention has been invited to the greatly increasing number of cases of conviction for felony, assault, trespass, &c., which shows that there is but little trouble taken in regard to the moral character of recruits.

Captain Walsh, of the Mounted Infantry, took ten days to reach Dongola from Sarass, a distance of 200 miles; and, according to the *Telegraph*, he found what is called the Tong-wa Cataract, 50 miles from Sarass, quite impassable without towing, which from the banks is impracticable. This leaves much to the imagination, as we cannot understand how Captain Walsh ever arrived at Dongola, if he had to encounter an impassable cataract which could only be overcome by an operation that was impracticable.

A revised edition of the "Text-Book on Fortification," by Colonel Phillips, R.E., which is in use at the Royal Military College, and by the Militia candidates for Line commissions, has now been completed, and is ready for issue.

A general meeting of the Divisional Race Committee was held at Aldershot on Thursday last, at which were present representatives from all regiments and corps in the garrison, for the purpose of passing the year's accounts and arranging a programme for the Spring Steeple-Chase Meeting next year. In the hands of Lieutenant-Colonel Toogood, R.A., the Hon. Secretary, recent Aldershot race meetings have been very successful, the funds being now in a more flourishing condition than they ever were before. Previous to Colonel Toogood accepting the management of these races they were in a very bad way, the funds were nowhere, and a feeling of dissatisfaction generally existed. Now all this is changed, and the present management is everything that could be desired. Colonel Toogood has, at the earnest request of the Race Committee, consented to continue in office for another year, and it is stated that the Committee have decided to mark their appreciation of the invaluable services rendered by him in resuscitating racing at Aldershot, by presenting him at an early date with a testimonial in the shape of a piece of plate.

The result of an inquiry made by the French Minister of War shows that out of 3,844 one-year volunteers who will shortly be liberated, only 341 are fit to be appointed sub-lieutenants in the reserve; 554 might be made serjeants; the others have not sufficient capacity to fill any rank higher than that of corporal. We mentioned last week that the officers of the reserve drawn from the one-year volunteers had not given satisfaction. This does not say much in favour of short service.

No changes of badges or facings are to be made by Volunteer corps which have become Volunteer battalions of Territorial regiments, without first obtaining sanction from the Secretary of State through the General Officer Commanding the district.

When the "corps of clerks," A.P.D., was at first spoken of, we heard much of the benefits which regimental officers would derive from its formation. We heard that, in this way, the regimental Paymaster would obtain a valuable clerk, belonging to his own department, and not removable at any moment, nor eligible for other regimental appointments. So far as matters have yet gone, however, the result of the attempt to induce regimental paymaster-serjeants to become military staff clerks has been quite different to what was expected. As has hitherto always been the case, the regimental officers are the losers. The aspirants are neither sent to Regimental Districts, where there are already, or should be, considering the importance of the work, men qualified to perform it; or to district offices, which for the most part seem to be filled with well-paid and highly able clerks, civil and military, and which could indeed easily enough submit to a reduction of their strength, instead of desiring an increase thereof. The unfortunate regiments suffer heavily meanwhile, losing their men of experience, and having to put up with untrained men in their place. In this way the chief point at first aimed at by the establishment of this body is missed,—viz., the improvement of the position of regimental pay offices. It is even doubtful if many of the men concerned would have entered their names had they known that they would be removed from their corps; for the slight increase of pay does not compensate for the loss of other advantages obtainable by a man serving in a regiment.

The appointment of Assistant-Adjutant and Quartermaster General at Dublin will shortly be vacant by the promotion of Colonel Montgomery-Moore, for the next vacancy on the establishment of general officers.

Instructions are issued with Clause 198 of this month's Army Circulars, for guidance at a time when there is reason to anticipate an outbreak of cholera, or when it is actually prevalent among the troops. There are in all 32 instructions, all of which appear both sensible and necessary; and if these be carried out in their entirety, there would seem to be every prospect of an outbreak of cholera being prevented, or if it should break out of its being confined to the very narrowest limits. The proper disinfectants to be used are also enumerated, and directions are given for fumigation, and the method of producing the necessary gases.

It is probable that Colonel Swaine, who is exceedingly popular as Military Attaché in Berlin, will return to that capital should the Nile Expedition not be prolonged.

The whole of the field-firing at Aldershot (Cavalry and Infantry) has now been completed. The new system has met with much favour at the Camp, and the experimental company and battalion practices, carried out for the first time this year, have been the means of improving the brigade firing, which has been better than on any previous occasion. The new system certainly takes up much time, but this time has not been wasted, and a step in the direction of improving the shooting of the British soldier has been taken.

In 1882, General Gordon had some correspondence with the Cape Government, relative to the organisation of their Colonial Forces, of which he was then in command. Portions of that correspondence, in which the General expresses his views as to the expediency of using Field Artillery in "guerilla warfare," are published, with some explanatory remarks by Colonel Goodenough, in the last number of the *Proceedings of the Royal Artillery Institution*—that "periodical" which is produced, as it informed us, "at indefinite periods!" General Gordon and Colonel Goodenough agree in considering that the expense, inconvenience, and delay, caused by taking guns into country unsuitable for wheeled carriages, far outweigh the effect they may be expected to produce in action. General Gordon tells us that, in the attack on Morosi's Mountain, "1,443 rounds of artillery were fired," with the effect, as he heard "on good authority," of five killed and five wounded. We were often told that in the Kaffir wars long ago, it took a Kaffir's weight in bullets to knock him over; but 144 rounds from artillery is a far heavier price to pay for each savage killed or disabled. In the pursuit of a flying and disorganised enemy, by cavalry, it would be foolish to wait for infantry; in attacking positions in mountainous, broken, or thickly wooded country, cavalry might prove only a useless incumbrance; so, in like manner, artillery, if unsuitably employed, might do little more than impede the movements of the other arms. The opinions of General Gordon, and the sensible comments of Colonel Goodenough, may be read with advantage by officers who think that their particular branch of the service is almost omnipotent and should be literally, what the Royal Artillery is virtually according to motto—*ubique*.

The appointment of Colonel N. Stevenson, half-pay, late 87th Fusiliers, to succeed Sir T. Baker as Deputy-Adjutant-General at Dublin, has given general satisfaction in Ireland. Colonel Stevenson was a good and popular commanding officer, and gained golden opinions at Cork, as a very able and hard-working staff officer.

In the Army Circular just issued, a new Royal Warrant is promulgated, which finally amalgamates into one whole the Army Medical Department and the Army Hospital corps, under the title of the "Medical Staff Corps." The officers of the Medical Staff will command the Medical Staff Corps, as well as all patients in military hospitals, and such officers, non-commissioned officers, and men, as may be attached for duty to the Medical Staff Corps; but they will not, of course, hold any command outside the corps. By this warrant, also, the officers of the Medical Staff are given power to inflict punishments on the non-commissioned officers and men in cases of misconduct, negligence, or inefficiency, by the stoppage of departmental pay, and by reduction to a lower grade. The regimental pay of the new corps remains much the same as that of the Army Hospital Corps, except that the highest rate of pay for a Staff-Serjeant has been increased from 4s 4d a day to 4s. 6d. a day, and a new rank, to be designated Staff-Sergeant 2nd Class, has been created with pay at the rate of 4s. 3d. a day.

There is also an alteration in the manner of distributing Departmental Pay and Extra Duty Pay. The rate of Departmental Pay will in future be the same for all throughout each rank, and all non-commissioned officers and men are entitled to receive it, provided only that "they be present and effective at their posts." All serjeants and lance-sergeants, no matter what may be their respective duties, will receive Departmental Pay at the rate of 1s. a day; all corporals, lance-corporals, and privates graded as 1st Class Orderlies, 8d. a day; all privates graded as 2nd Class Orderlies and Buglers, 6d. a day; and all other privates 4d. a day. Some few will, by this arrangement, gain an increase of pay, but the majority, who were receiving Extra Duty Pay for various duties, will receive no benefit, the rates of Extra Duty Pay having been reduced to correspond with the increase of Departmental Pay, with the exception, apparently, of Instructors at the Depôt and the Training School, who will receive an increase of 6d., or 2d. a day, according to rank; and attendants on cases of contageous or infectious disease, requiring the isolation of both patient and attendant, in which case the attendant will receive 4d. a day Extra Duty Pay.

Reviews.

Reminiscences of an Indian Official. By General Sir Orfeur Cavenagh, K.C.S.I. (W. H. Allen and Co.)

The distinguished author of this work need not offer any apology for publishing the reminiscences of his career as an Indian official. He sketches the leading incidents of his life from "cadet to governor," in a plain, unvarnished style. The volume is full of interest. It takes the reader over some of the most celebrated battle-fields in India, and at the same time makes him conversant with diplomatic matters of great import, in a personal narrative written with remarkable facility, and a style of no mean order. Altogether, General Sir Orfeur Cavenagh, instead of pleading *ad misericordiam* for publishing this record of his services, may congratulate himself upon having brought before the public a large amount of very interesting matter. As a specimen, we give the General's reminiscence of "Holkar's Daughter": —"After the battle of Mahedpore the Bheema Bhai, 'Holkar's Daughter,' with a small body of retainers, for a long time kept the country in a flame. One day Sir John Malcolm was moving with a large force, when the lady was seen on horseback on a neighbouring eminence, attended by only one follower. The order was given to surround the hillock, so as to ensure her capture. The slave escaped before the necessary cordon could be formed, but Holkar's daughter made no attempt to fly. When, however, it was thought that her apprehension was certain, she suddenly made a dash towards the small party near the General, and owing to her mare's turn of speed, got away scot-free." Among the many and varied anecdotes told by the author is one relating to his commanding officer, a gallant soldier of the old school, who, at the assault of Bhurtpore, though suffering from a raging fit of gout, took his place at the head of his company, accompanied the storming-party, and was literally carried up the breach by the Sepoys. On parade he was often very choleric, and sometimes was not altogether blameless. On one occasion, he applied to the second-in-command an expletive, which the latter, a first-rate officer, was determined not to allow to pass unnoticed. When the parade was dismissed, and officers called to the front, he addressed the colonel, and in the most respectful manner pointed out that no gentleman could submit to such language as he had used towards him, and consequently he felt it incumbent on him to make a representation to higher authority. The old gentleman was somewhat startled, but he was not easily disconcerted, and at once, to the astonishment of every one present, asserted that Captain H—— was labouring under a mistake, as the remarks that had given him umbrage had been addressed to himself. Upon which, the captain quietly observed,—"Of course, Sir, if you d——d your own eyes, and not mine, I have nothing further to say in the matter." We find a little further on a somewhat similar story told of Sir Harry Smith. It appears that a private of the 50th fell out to take a stone from his shoe which prevented him from marching. Whilst in the rear he was perceived by Sir Harry, who called out, "What are you doing there, you d——d coward?" Hurrying on to overtake his regiment, the man replied, "You are a d——d liar." The day after the action the General rode down the ranks of the 50th, recognised his friend, and said, "You are the man who called me a d——d liar yesterday?" "Yes, sir," replied the private, "and I will call any man a d——d liar who says I am a d——d coward!" The author speaks most favourably of the Irregular Cavalry, with which force he was for some time connected. The service was very popular amongst the native gentry and yeomanry, and as promotion was made in a great measure by selection, and not by mere seniority, many of the native officers were superior men, perfectly capable of commanding troops and squadrons, and thoroughly acquainted with their drill, whilst in appearance they were particularly fine, soldier-like fellows. For all the duties of light cavalry, such as outpost work, reconnoitring, foraging, and skirmishing, they were particularly well-fitted. Such is the testimony given by the author as to the excellence of this branch of the service.

Petite Bibliothèque de l'Armée Française. (Henri Charles-Lavauzelle, Editeur, 11 Place St. André des Arts, Paris.) — We have to acknowledge the receipt from the publisher of some of these very handy pocket-books, as they may be called, dealing with matters of interest to the services, particularly the Army. The new practical instruction for the service of cavalry in war time, approved by the Minister of War this summer, may be studied with advantage, as the last word of such an excellent officer as Gallifet, and intelligent reformers who have sought to conserve what was best in the French soldier, without completely upsetting all his traditions and ideas. Probably Sir F. FitzWygram, General Fraser, and others interested in the welfare of the Army, are already well acquainted with the recent developments in cavalry instruction on the other side of the Straits of Dover; but even they should not be above looking into this little book. Another volume, the first of what may be called the study of theory at home, is devoted to the military education of the soldier; a second concerns his instruction. Then there is a very compact account of the military operations to which we have paid too little attention in the war which went on so long between the Chilians and Peruvians. We have been accustomed to gauge the importance of our combats by what is called th "butcher's bill." The battle of Tacua, fought on May 26, 1880, bears a strange relation to that of Inkerman in the forces engaged and in the losses. The Chilians had 8,492 men in action. They lost 23 officers killed, and 84 officers wounded; 463 soldiers killed, 1,558 wounded. The Peruvians and the Bolivians lost a few hundreds more. In the long list of actions none were more sanguinary or important; but several combats led to great loss of life, and very resolute fighting, in which the Chilian generals and troops displayed skill and courage. The "Notions on fresh meat for soldiers" contains an immense amount of information about rations, &c., in a very few pages. Another booklet of the series is devoted to the attack and defence of fortresses. Clearness and precision go hand in hand together apparently in the work of the writers who contribute to this series, and it is highly to be commended to notice.

SOME MAGAZINES.

[SECOND NOTICE.]

It is not usual to find an entire absence of Naval or Military matter in the *Nineteenth Century*. But so it is in the October number. There are several articles which deserve notice,—among others that on "Charles Reade," contributed by A. C. Swinburne, and Mr. Beavington Atkinson's "The Art Treasures of Prussia."

The *Army and Navy Magazine* contains an article by Mr. Charles Marvin on "The New Russian Highway to Central Asia." The Orenburg route to Turkestan, after fifty years of unexampled notoriety, has been quietly placed on the retired list of military highways by the Russian Government, and a fresh road inaugurated, completely altering the position on the Oxus. The story of the discovery and opening-up of this route has never yet been told in Russia, and is quite unknown in England. "It is too full of interest and political significance to be left longer unnarrated." "Every improvement that takes place in regard to the Russian position in Central Asia gives increased significance to Herat, for the simpler becomes the task of occupying the stronghold of Afghanistan, the more menacing grows the Russian advance upon India." There is an article of considerable research and interest contributed by Col. Malleson, entitled "Ambushes and Surprises," and Major M. King-Harman communicates a few notes on the Italian Army.

The two steel-constructed fast-steaming cruisers Severn and Mersey, each of 14 guns and 6,000 horse-power, with a displacement of 3,550 tons, now building at Chatham Dockyard, are being hastened forward in their construction, as it is intended that both shall be ready to be launched early in the approaching year. It was originally proposed that both vessels, and all the ships of the same class, should be fitted with the recently introduced military topmasts, but it has now been decided that they shall be provided with the ordinary mast tops, which are found to be the most suitable for them.

The Danish corvette Fyen, Capt. M'Dougall, arrived at Spithead on Monday and saluted the flag of the Commander-in-Chief. The compliment was returned from the Duke of Wellington, flag-ship. Subsequently the captain, accompanied by Mr. Vandenburgh, the Danish Vice-Consul at Portsmouth, paid his respects to Admiral Hornby, Admiral-Superintendent Herbert, and Gen. Sir George Willis. The corvette is fitted with torpedoes and the electric light. Her armament consists of 14 6-in. Krupp guns in her battery, and four long Krupps on her upper deck. Her tonnage displacement is 2,500, and she is of 1,215 indicated horse-power. She has been in the Atlantic for the purpose of testing her seagoing qualities, but she was not fortunate enough to catch a breeze. She took in coal at Portsmouth, and afterwards sailed for Denmark.

Letters have been received at the Admiralty from the Commodore at Hong Kong dated Aug. 28. The Audacious was at Amoy on Aug. 24, and remains. The Daring arrived at Hong Kong from Canton on Aug. 20, and had since left for Shanghai. The Swift had left Hong Kong for Canton. The Zephyr was at Hoihow on Aug. 15, and was ordered to Hong Kong on being relieved by the Foxhound. The Tweed, which left Hong Kong on Aug. 15, was at Swatow on Aug. 18. The Wivern and the Esk were at Hong Kong on Aug. 28, in First Division of Steam Reserve.

The Army.

3rd Dragoon Guards. The regiment was specially inspected at Colchester on this day week by Major-Gen. White. The head-quarters and service troops embarked at Portsmouth on Wednesday in the Jumna, for India. The depôt has proceeded to Colchester.

3rd (King's Own) Hussars. Col. Vincent is about to be placed upon half-pay, his period of service in command of the regiment having expired.

5th Lancers. The Duke of Cambridge, at the inspection of the Dublin Garrison last week, spoke in most complimentary terms of the appearance and drill of the regiment, which is just now in the highest state of efficiency. See a paragraph referring to a statement in last week's paper.

6th Dragoons. So little has been heard of the regiment lately from its isolated station in South Africa, that the following, copied from the letter of a special correspondent of the *Natal Witness* at Ekowe, will no doubt prove especially interesting:—"The camp at Ekowe stands back from the edge of the table-land about a mile and a half, and is clustered round Fort Curtis, so named after the gallant colonel of the Inniskilling Dragoons, who commands the brigade here, and which will hand down his name to future generations when the town of Curtisville, the nucleus of which already exists, is established here. The fort is a most formidable earthwork; with artillery at the angles, surrounded by a deep ditch, it would keep all Zululand at bay for an indefinite period, and is practically impregnable therefore. I was particularly struck on reaching the camp with the ruddy and sturdy appearance of the men, and although there are brigaded here parts of the 91st, 41st, Inniskilling Dragoons, and Royal Artillery, there was only one man in hospital. This speaks volumes for the salubrity of the place, and goes far to make the station a pleasant one, notwithstanding its distance from civilisation. The men seem cheerful and content, but I daresay will be glad once more to get under a roof, many of them having been under canvas now for some three years, the Inniskilling Dragoons having had a particularly rough time of it during that period; and yet the men look sturdy, bronzed, and hardy in an unusual degree. The camp is a perfect picture of neatness and cleanliness. This speaks volumes for the care and thoughtfulness of the commandant, whose energy is felt in every direction. The men have football, cricket, and an occasional gymkhana, wappenshaw, or camp fire; and the officers, polo, shooting, and fishing, and an occasional run with a small pack of hounds, which relieves the monotony of their surroundings; but the duties are heavy and onerous, for every military precaution is taken exactly as if the force was in an enemy's country. Outpost, picket, and sentry duties on these lonely hill-tops on dark, wet, and often bitterly cold nights, is anything but romantic, and especially so when month after month brings no relief to the men whose period of service has expired. Col. Curtis and his able staff officer, Major M'Kean, of the 6th Dragoons, have been here a year now, and there is no doubt that it is due to the judicious manner in which the forces under his command have been handled that this part of the Reserve has not been completely depopulated. Col. Robley, 91st, is the moving spirit in the 'wappenshaws,' and takes the utmost interest in the rifle shooting. He has gone off to the Tugela on an alligator-hunting expedition. Major Mills, Capt. Bewicke, and Mr. Pryse are off on a shooting expedition. Their return will be the signal for much festivity, as they are said to bring back loads of buck, paaws, koran, dikkop, and other dainty things, the very name of which makes one's mouth water. Your readers who know Major Anley, 41st, and Capt. Tye (that most genial of Irish dragoons)—and who does not know them?—will regret to learn that they are suffering from the effect of accidents, which are not, however, serious. Capt. Fletcher commands the Royal Artillery here, Mr. Yolland worthily represents the Engineers, Major Anley commands the 41st, while the *beau sabreur*, Capt. Crosse, worthily supported by Lieut. Gray, are in charge of the detachment of dragoons. Surg.-Major Rae and Surgs. Dugdale and Carmichael represent the Army Medical Department, and Mr. Winter the commissariat; the medical gentlemen, in this climate, enjoying almost a sinecure."

9th Lancers. Capt. Lord William Beresford has been appointed military secretary to the Earl of Dufferin, the new Viceroy of India.

11th Prince (Albert's Own) Hussars. Lieut.-Col. J. D. H. Stewart, who was junior to Lieut.-Col. Balfe and senior to Lieut.-Col. Kinchant, has, there is too much reason to believe, lost his life under the circumstances familiar to our readers, in the desert, near Meroë. He was born in 1845. He became at 20 an ensign in the 12th Foot, and he was appointed a cornet in the 11th Hussars on Sept. 22, 1865. He was made lieut. in 1869, capt. in 1876, major in 1881, and lieut.-col. in the same year. On April 27, 1879, he was appointed Vice-Consul in Asia Minor, and did excellent work under Sir C. Wilson, in pursuance of the policy inaugurated by Lord Beaconsfield and abandoned by his successors, travelling very actively and widely, and reporting on the state of the country. In 1882 Col. Stewart was called from Asia Minor, with Major Chermside and Sir C. Wilson, and was soon busy in Egypt. He was also engaged in reporting on the prisons in Tanta and elsewhere, and in October in that year he was recommended by Sir Charles Wilson to report upon the state of the Soudan. He proceeded to Berber, which he reached in Dec., 1882, and then started for Khartoum. In Jan., 1883, he reported on the attitude of the population and the chief causes of the rebellion. Col. Stewart continued to forward reports from Khartoum on the various military operations carried on in the Soudan. On April 23, 1883, his temporary mission in the Soudan terminated, Lord Dufferin expressing his "high appreciation of the energy and industry with which you have discharged the duties imposed upon you, in spite of innumerable difficulties." At the beginning of the present year Col. Stewart proceeded to Khartoum with Gen. Gordon.

The *Dublin Daily Express* says:—"Col. Stewart was an Irishman, a member of a well-known and respected Ulster family, who resided some years ago in Dublin. By the united testimony of all who met him, he was a soldier every inch, a man of a noble courage, most amiable manners, and a highly cultivated understanding. But what has fixed his worth in the eyes of the empire is the simple fact that out of all the officers of the British Army he was the man selected by Gen. Gordon to be his second-in-command. It is felt to-day that England and the empire have lost one of their most reliable and competent servants. The sadness thus caused is hardly relieved by the fact that he died in harness, bravely endeavouring to maintain England's prestige in a far country; for with this consoling thought comes another, by no means consoling—namely, that he was sacrificed through our own shortsighted and selfish policy, if not through the grossest mismanagement and the densest ignorance. What other nation in the world would have permitted one of its most valuable public servants to undertake an important and dangerous expedition through a hostile country with 40 men? Cheeseparing economy and good management will not go together, where stakes are great, and high interests and questions of national honour are concerned." A correspondent, writing to the *St. James's Gazette*, says:—"Among those who knew Col. Stewart there can be only one opinion as to the wisdom of the selection made in sending him to Khartoum, and one feeling concerning his death. Truly, such men are few, and his place cannot easily be filled. He was a tall, slight, grey-eyed man, young-looking for his age, with the quiet manner and watchful eye of one conscious of his own power, but not anxious to impress others with his importance. A cheerful disposition he had, a gentle smile, and the bearing due to an honest kindly heart. A man, moreover, for whom hardship and privation had no terrors, who could groom his own horse and sleep in a tree or on the ground. Wherever he went he carried with him the good-will and esteem of all who met him, and he was regarded by the ablest men among his seniors as standing perhaps first among the younger generation of soldiers. Surely there is a duty which devolves on England, all the more if the sad news of Col. Stewart's murder be confirmed; and this is not only to bring to justice those who are guilty, but to save the great man who survives. While there is time, while the terror inspired by his own prowess and by the appearance of the British in Upper Egypt is felt by the dispirited adherents of the Mahdi, a blow should be struck to open up every possible route and to secure the line of his communications. If the difficulties of the Nile route and its expense are found too great, the base of operations should be widened, and other routes should be tried. But it must be done now. It must not be left until too late."

Capt. Hon. H. A. Gore has been appointed extra Aide-de-Camp to the Lord-Lieutenant of Ireland.

18th Hussars. See a paragraph referring to a statement in last week's paper.

20th Hussars. See a paragraph referring to a statement in last week's paper.

ROYAL ARTILLERY.

Col. H. Le Cocq has succeeded Col. Williams in command in Dublin.

Brigdr.-Gen. Oldershaw has been appointed to the command of the Belgaum District, Bombay Army, vice Brigdr.-Gen. Brice, whose tenure of Staff service has expired. Brigdr.-Gen. Oldershaw has held the command of the Sind District since April, 1881.

An Indian good-service pension has been conferred on Major-Gen. D. MacFarlan, Ordnance Consulting Officer for India.

Major W. Smith has assumed command of T Baty. 1st Brig., in succession to Lieut.-Col. Yeatman-Biggs, appointed Brig.-Major at Aldershot.

Major W. S. Langley has been ordered, on vacating the post of Brig.-Major, to remain for temporary duty at Dublin Barracks pending further instructions.

Capt. Johnson, Brigade Major, R.A., at Dublin, vice Major W. S. Langley, whose term of Staff service has expired.

It seems that Lloyd's Battery, now at the Citadel, Cairo, is ordered to be in readiness to move to "the front," wherever that may be. There are five batteries now in Egypt.

The following Royal Warrant has been issued relative to the Retirement of Officers of the Royal (late Indian) Artillery:—"Whereas We deem it expedient to amend the regulations governing the retirement of officers of Our Royal (late Indian) Artillery in respect of those majors who have been promoted to the rank of lieutenant-colonel since the 31st December, 1883:—Our will and pleasure is that the following paragraph be inserted in Article 92-III. of Our Warrant of the 10th June, 1884, after the words '978-*XI.*,' in the 17th line of that Article:—A major of Our Royal (late Indian) Artillery, if promoted to the rank of lieutenant-colonel since the 31st December, 1883, may, after completing seven years' service from the date of his promotion to the rank of major, be granted such extra-annuity, in addition to the pension to which he would have been entitled as a major under Indian Retiring Regulations if he had not been promoted to the rank of lieutenant-colonel.—Given at Our Court at Balmoral, this 26th day of September, 1884, in the 48th year of Our Reign, by her Majesty's command, HARTINGTON."

ROYAL ENGINEERS.

Col. Innes, V.C. (late Bengal), who has held the Inspector-Generalship of Military Works, Bengal, since March, 1882, has been awarded an Indian good-service pension, in succession to Col. R. Barter, C.B.

Lieut.-Col. C. J. Moysey has been appointed Assistant-Director of Works at the War Office, vice Lieut.-Col. Salmond.

Col. W. D. Marsh, late Secretary and Treasurer of the Royal Military Academy, succeeds Col. Brooke in command of the Royal Engineers at Mauritius.

Grenadier Guards. Surg.-Major Baker, 1st Batn., has been ordered to proceed from Dublin to London for duty.

6th Royal Warwickshire Regiment. The 1st Batn., which has been stationed at Chatham about two years and a half, left there on Monday for Plymouth. The battalion was very weak, as it recently despatched a large draft to India to join the 2nd Batn.

8th, the King's (Liverpool Regiment). On Friday afternoon last, on the Curragh Ranges, the competition took place for the large silver challenge cup. The teams of five aside consisted of, for the officers, Capts. Wade and Evans, Lieuts. Seel, Parker, and Swann; for the non-commissioned officers, Colour-Serjts. Walton and Simpson, Serjts. Brown, Lynch, and McDonald. Seven rounds were fired at 200, 500, and 600 yards. The officers led from start to finish, and, much to the surprise of the serjeants' mess, the cup has left its former resting-place, and now helps to enliven the mess-hut of the officers. The cup was started in 1873, and has been won an equal number of times by each side since its inauguration.

12th Suffolk Regiment. "At a recent meeting of the Town Board of Galway, the chairman said there were a few matters he wished to mention. They were all aware that the Suffolk Regt., through change of stations in the Army, was about to be removed from Galway to Cork; and every member of that board was also aware that the men of the regiment, during their time in Galway, had always behaved with conduct beyond praise. They were well-conducted men passing through the streets of Galway, and it would be wanting on the part of the Town Commissioners, as representing the public, if they did not place on record their feeling of appreciation of such conduct, and with that object in view he would ask the board to adopt a resolution which he had drawn up on the subject. The chairman then proposed the following resolution:—'Resolved—That as the 2nd Batn. of the Suffolk Regt., on change of stations of the Army, is about to be moved from Galway, we desire to place on record and bear testimony to the uniform steady good conduct of the men of the regiment, and the good-feeling that has existed between them and our fellow-citizens during the two years that it has been our good-fortune to have them quartered in Galway. We request our chairman to convey to Col. O'Shaughnessy and the officers under him our thanks for their courtesy and assistance on all occasions, our regret at their departure, and our best wishes for the future prosperity and success of the regiment wherever quartered, or wherever they may be called on to serve their country.' Mr. Persse seconded the resolution. Mr. Hennessy then proposed that the seal of the Corporation be attached to the document. This was agreed to."—*Galway Express.*

16th Bedfordshire Regiment. The command of the 1st Batn. fell vacant yesterday on the expiration of Col. Horne's term of appointment. His successor will, it is understood, be Lieut.-Col. Westby.

23rd Royal Welsh Fusiliers. The 1st Batn. will leave Dum Dum on the arrival of the 54th Regt. as relief, for Rawul Pindee.

38th South Staffordshire Regiment. The *Egyptian Gazette* says:—"As announced by us a few days ago, Major Sherrard died at Assouan on Sept. 9, from an attack of fever, which was of short duration. The funeral arrangements were carried out by the 46th, and the interment took place on the evening of the following day. The 46th furnished a firing-party of 200, under command of Major Disney Roebuck. The 56th Regt. was formed up outside the cemetery, and the combined bands of the two battalions attended. Major Spencer, 56th, Capts. Vigor and Carden, 46th, and Capt. Cruickshank acted as pall-bearers, and among the mourners who followed the remains were Brigdr.-Gen. Grenfell and Col. Richardson, C.B."

39th Dorsetshire Regiment proceeded on Monday from Aldershot to Chatham.

42nd Black Watch (Royal Highlanders). At Assouan, Oct. 6, a case of small-pox having been discovered, the battalion was placed in quarantine.

44th Essex Regiment. The London correspondent of the *Western Morning News* says:—"A court-martial of almost unprecedented interest is about to assemble at Aden. Col. Rennie, who commands the 1st Batn. of the Essex Regt., now serving in India, has experienced rough treatment at the hands of a subaltern in the same regiment, and the offending officer is under arrest, pending his trial at Aden by a district court. In view of the extreme penalties attached to an assault on a superior officer, the officers to comprise the court have been selected with great discrimination from regiments serving in India. The accused, who received his commission only two years ago, has, it is said, engaged the services of a Bombay lawyer to defend him. It is stated that the assault was committed in the colonel's quarters, and that the motive was revenge for certain forcible language applied to the accused on parade."

46th Duke of Cornwall's Light Infantry. Lieut. Francis has been appointed Adjt. of the Depôt formed at Cairo of men who, for various reasons, have not accompanied their regiments to the front.

50th Queen's Own, Royal West Kent Regiment. Lieut.-Col. Tweedie has been appointed commandant of the depôt which has been formed at Cairo of men who, for various reasons, have not proceeded to the front with their respective regiments. Lieut. W. Francis, of the Duke of Cornwall's Light Infantry, has been appointed adjutant of the depôt.

54th Dorsetshire Regiment. On the arrival of the 4th Batn., 60th Rifles, at Peshawur, the regiment is to leave that station for Nowshera.

76th West Riding Regiment. Lieut. Santon is a probationer for the Commissariat and Transport Staff.

78th Seaforth Highlanders. Capt. M. A. Walker, formerly of the regiment, died at Goldsmid Road, Brighton, on the 7th inst.

80th South Staffordshire Regiment moved yesterday from Lichfield to Manchester.

91st Argyll and Sutherland Highlanders. A special correspondent of the *Natal Witness*, at Ekowe, writes:—"I was anxious to see the two outposts, Fort Chater and Fort Yolland, the first named after Major Chater, of the 91st, who first occupied it. Fort Chater is distant about 13 miles south-west from Fort Curtis, by a good road across the plain, and is built on a commanding knoll in the Entumini range of hills. This range extends some 10 miles in length, and consists of a series of high and rounded hills joined by saddles or necks. It commands a considerable area and is an important outpost, although lessened in value now that the more advanced post of Fort Yolland is occupied. It is garrisoned by the 91st Highlanders, under Lieut.-Col. Forbes Robertson, with Capt. McDonald, Lieuts. McKie, Cavendish, Johnston, and Robinson, and Surg. Lecky. The country round about is simply perfect with fair beauty—forest, hill, and stream combine their charms and leave nothing to be desired in the landscape. Nestled in a picturesque valley close under the fort is the mission station of Entumini, with its quaint little church and snug-looking dwelling and out-houses, all peeping from among fruit-laden orange trees, and masses of the gay yellow bloom of the acacia, a perfect picture of repose, and the very antithesis of its new neighbour on the hill. Col. Robertson has been at a great deal of trouble in providing pure water for his men, and with much ingenuity has planned a catchment basin, settling bed, and series of filters with the crudest materials, ensuring an endless supply of perfect drinking water, with the result that not a man of his force was on the sick list, and all looked ruddy and hearty. Constant communication is kept up between here and Fort Curtis by means of the heliograph, and the white tents of which are distinctly visible to the naked eye across the intervening plain. The most rigid military precautions against surprise are here carried out as at Fort Curtis, making the duties severe for the garrison, whom I can well conceive therefore do not quite enter into the enthusiasm of the passing visitor in his admiration for their surroundings, the monotony of the isolation, and the fatigues of duty day and night, being calculated to blunt the enjoyment of even the keenest lover of nature. I received a most cordial and kindly reception from the 91st here, and was sent on my way rejoicing."

98th North Staffordshire Regiment. A telegram from Calcutta, dated Sept. 28, says:—"The Zhob Valley Expedition began somewhat inauspiciously, 49 men of the 98th being sent back from Kuch invalided."

99th Wiltshire Regiment. A correspondent of the *Natal Witness* writes from Ekowe:—"I visited the remains of the fort in which Col. Pearson stood the siege, distant about two miles from the present camp. Its area is about that of one-half of our Market Square, and in this for weeks were cooped up some 1,200 men; the wonder is, not that some died of fever, but that any escaped. The place is in a hollow, completely commanded on three sides, and might have been rendered untenable in a few days had the Zulus understood the use of rifle pits. Close by is the little graveyard of such melancholy interest to many of us. Poor young Coker's grave, and that of Adjt. Johnston, of the 99th, two gallant boys cut off in the flower of youth, are marked by substantial stone crosses, but the other memoirs, being only of wood, are decaying rapidly, some of them are in fragments. I was glad to hear, however, that Col. Curtis has in view the restoration of the whole place in a substantial manner, a duty which I am sure he will regard as a labour of love." A Lahore paper understands that, instead of a wing of the 2nd Batn. taking the place of the 40th at Peshawur, as was intended, the whole regiment will proceed there to be stationed.

101st Royal Munster Fusiliers. The *Egyptian Gazette* says:—"Major Hare, of the Egyptian Army, who has been serving as staff officer at Suakim, being about to revert to regimental duty with the British Army, the Khedive has directed Sir Evelyn Wood, the Sirdar of the Native Force, to express to Major Hare his Highness's sense of gratitude for the excellent work that officer has performed at Suakim at the time when the Egyptian troops he was serving with were engaged in active operations."

Rifle Brigade. The 2nd Batn. left the Curragh on the 3rd inst., and proceeded to Kingstown, where it embarked in the Assistance for Portsmouth, *en route* to Aldershot.

Medical Department. A correspondent suggests that:—"There is one very pointed manner by which Army Medical officers can show their protest against the recent harassing legislation of their own chiefs, and that is to absent themselves, when the time comes, from the annual departmental dinner. This dinner was instituted to encourage *esprit de corps*. How can these nice words be made to express a condition which cannot and does not exist, when three-fourths, if not all, the members of the Department are discontented and humiliated by the recent examination schemes?"

Commissariat and Transport Staff. Comy.-Gen. Sir E. Morris has been engaged in making an inspection of the corps at Aldershot. On Monday, he inspected the mounted and dismounted companies, and on Tuesday the supply and barrack branch, and commissariat sections; he also visited the depôt and stores. In the evening he was entertained at the Commissariat and Transport Staff Mess in company with Sir A. Alison and his staff. Deputy-Assist.-Comy.-Gen. Bridge has taken over the command of No. 1 Compy., relieving Capt. Bunbury, D.A.C.G., under orders to proceed to China. Captain Heath, having handed over No. 16 Compy. to Capt. Erskine, has assumed the duties of Adjt. at Aldershot. It is probable that No. 13 Compy. from Shorncliffe will shortly be moved to Aldershot, being relieved by No. 8 Compy. Capt. Hardy, D.A.C.G., has taken over the command of No. 7 Compy., vice Capt. Lumb, D.A.C.G., who has proceeded to Egypt. We are glad to learn that at the recent examination for Queen's Scholarships at Westminster School, the first place was taken by Arthur R. Knapp, a pupil of the Cork Grammar School, the son of Assist.-Comy.-Gen. Knapp. These scholarships are worth £80 a year, tenable for five years. They are gained in open competition by boys under 14 years of age, and we should be pleased if many of these prizes were taken by the services.

YEOMANRY CAVALRY.—2nd West York Yeomanry. Sir Henry Edwards is about to retire from the command, which he has held for 21 years.

ANSWERS TO CORRESPONDENTS.

L. C. F. T.—Thanks. Your letter was not received till Saturday morning, too late.

TYKE.—Thanks for your interesting communication.

"J-2."—The battery does move as you say.

ADJUTANT.—The higher rank does not save him from pro motion.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

Several Naval and Military letters, &c., are in type, but are forced to stand over through want of space.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, OCTOBER 11, 1884.

THERE are three powers now in Egypt,—Lord Wolseley, Lord Northbrook, and the Messrs. Cook,—and under them are Boards of European administrators, who convey their wishes to the Native officials from the Khedive downwards. Not one of these authorities, however, has the smallest idea, or probably much care, as to the manner in which the enormous expenditure which is now going on will be met. The reinforcements, if charged to the Egyptian Government at the same rate—that is, £48 per head per annum—as the troops of the Army of Occupation, will raise the annual charge on Egypt to £600,000 per-year, and that at a moment when the commerce of the country is deranged, the revenue diminishing, and the national bankruptcy established under the authority of the Government, and sanctioned by the protecting or invading Power represented by the First Lord of the Admiralty, and the charges to this country will be counted by millions. Gordon was sent out to Khartoum to arrange for the evacuation of the Soudan and of the adjacent regions south of some undefined line across the Nile. Having failed in that, and being besieged himself, we are sending out a costly Expedition to get him out of Khartoum; but meantime he has been spending, as he tells us, since March last, £1,500 a day, and that money he has raised on paper, with his name, which must be honoured. But if we are to take Lord

Hartington's declaration as the expression of the intention of the Government in sending Lord Wolseley up the Nile, it would appear that all idea of providing for the safety of the Egyptian garrisons is abandoned, and that they and the civil populations, established under the protection of the Khedive's Government and troops, are to be left to their fate. Perhaps, as we suggested last week, Zebehr will come in at last, or terms will be made even with the Mahdi,—if Gordon does not smash him. Our contemporary, the *World*, in an interesting account of what it is pleased to term the Nile "picnic," makes a few mistakes, which, in so many details, is not to be wondered at. Our contemporary is wrong in stating that camels are to be had in plenty. It is just the contrary. Lord Wolseley, indeed, is exceedingly anxious about the supply, but he is so confident in the success of his corps, if he can mount them, that in a private letter he says he would not at all fear to attack the whole of the Mahdi's army with his 1,200 mounted men; but he has not got the camels yet, although the promises of the sheiks and the friendly tribes about Dongola give some hope that when the men get to Wady Halfa the animals will be ready for them. The *World*, in speaking of the supplies of the Expedition, seems to think that the force is teetotal; but if we are not misinformed, a goodly supply of a peculiar doctored rum has been sent out, in addition to the medical stores and a measurable quantity of champagne. It will be interesting to note the progress made by the first detachment of boats, which have already proceeded up the Nile from Philæ to Wady Halfa. All will wish them God-speed. It will, we fear, be quite the end of this month before any movement of importance can take place south of the Second Cataract, and by that time it will be pretty well ascertained whether the river route beyond the Belly of Stone can be pursued with advantage by the boats and steamers, or whether the relieving column will start from Dongola, the Camel Corps striking by one of the desert routes to reach the river at Berber, or possibly still further south. It will be by no means a picnic when the force has to strike out from its base to assume the form of a flying column on a scale very little contemplated when the expedition was first projected. There is no comparison at all, as was suggested by a correspondent of the *Times*, between this enterprise and Baird's march from the Red Sea to Kenneh when the Indian Division was sent out to support Abercromby, because the Arabs were all friendly, the wells were safe, the water-supply between the sea at Kosseir and the Nile at Kenneh much more abundant, the whole country open at the time. All these conditions are reversed on the route from Suakim to Berber, or from Berber to Khartoum, wherever the desert must be traversed.

Just at the moment that Lord Dufferin is receiving deputations of self-constituted and, no doubt, very intelligent and well-meaning advisers on Indian matters, there comes the news that the young Nizam is about to form a standing camp of a formidable size at the Fort of Golconda. This may be what is called a sham, or it may be a pretext for the vigorous action which, it is understood, Government is urged to take in reference to the standing armies of the Native States. It is better to perpend a while, and see what truth there is in the story. We do not believe a bit of it. Probably it is a *ballon d'essai* sent up, as sportsmen sometimes use paper kites to frighten wild birds.

Sir Cromer Ashburton, who is stated in a weekly contemporary to be in command at Alexandria, arrived in England on Wednesday, and will presently take up his staff duties.

Mails for the Army of Occupation, Camel Corps, &c., in Egypt next week will be made up on Tuesday morning for the Italian postboat from Trieste; on Wednesday morning for the French postboat from Marseilles; on Friday evening for the British steamer, *viâ* Brindisi. Letters are generally received in Cairo in six or seven hours after the arrival of the mail steamer in Alexandria. From Cairo the mails are conveyed south as far as Assiout by rail, thence by the postal steamers of the Egyptian Government to Assouan. The mailbags will, no doubt, be forwarded direct to Wady Halfa, and other stations along the Nile by the military authorities, who have taken the charge of the postal telegraph, as it would seem, from the complaints of the correspondents in the London newspapers. It is highly important, of course, that the Mahdi should not become acquainted with the secrets of military operations, and it seems to be assumed that he has an active and intelligent agent to forward him, by some mysterious wire, accounts of all things going on in London, where, however, he will hear very little to his advantage.

In last week's number there was a paragraph received from a Dublin correspondent in which it was stated that the Duke of Cambridge "was not quite happy about Colonel Chichester and the cavalry generally at the field-day in the Phœnix Park." We have received an assurance, on which we place implicit reliance, that the Field-Marshal Commanding-in-Chief on that occasion and at the inspection expressed to Colonel Chichester his highest approval of, and entire satisfaction at, the appearance of the 5th Lancers in every way, and General Harman has officially made known the fact. We have requested our correspondent to inform us how it was he was led to make such a statement, and meantime express our regret at its appearance in our columns. The 20th Hussars, which were mentioned under the same heading, are not in Dublin, and the 18th Hussars, which are there, and which were inspected by the Duke, did not cause his Royal Highness the least unhappiness, but were, we hear, considered particularly smart and efficient at the Cavalry field-day in the Phœnix.

It is not easy to understand why our newspapers indulge in fantastic spellings of Meroë—Merawé, Meraweh, &c. It was once a famous city, the capital of Candace, built, says Lyttleton, by Cambyses, and so called from his mother's name.

The British Lion is roused at last! He has roared in the *Times* his loudest,—and he has probably "roared like any sucking dove" in the Cabinet. The mighty voice has rolled over the sea and under it to the Cape of Good Hope, and Pretoria trembles. But analysing, so to speak, the component sound of the roar from Printing House Square, we come to a shrill treble of anger at the Boers, a deep base note of warning to the Colonists, and a grumble at the supineness of the Cape Government, and a plaintive cry for cooperation and assistance in dealing with these rapacious, mendacious, and daring Dutchmen. It is an awkward business—just now especially—but it must be faced, and dealt with, or we must haul down the flag in South Africa. "A good job, too; perish South Africa!" some will exclaim; but they are not either peacemakers, or good subjects of the Queen; and much as war in these Colonies of ours—leading, perhaps, to civil war at the Cape, and involving the Orange River Free State—is to be deprecated, it seems inevitable, if the Government of the Transvaal does not control and punish its subjects, and make reparation for wrong done to ours and to our allies.

Mr. Lynall Thomas calls attention to the fact that Colonel Colthurst, M.P., Captain Price, M.P., Captain O'Shea, M.P., supported Mr. Macfarlane's motion, and we gladly state it, although we cannot undertake to "mention the whole facts of the case."

We are all in favour of the principle that the best men should command battalions and fill all the high places in the Army. Only we want to know, you know, how the bestness is to be discovered. Admirably educated officers sometimes turn out to be arrant duffers in the field. By the test system and Civil Service examination ordeal Marlborough would most certainly have been rejected, for he was ill-educated, even for his time. Wellington would have been nowhere in a race with crammed dumplings to-day. Lord Clyde had no education to speak of till he taught himself in the Army; and, only we are afraid of lightning from a clear sky, we would humbly ask a few questions of distinguished Generals yet alive on subjects every fellow ought to know, which would elicit astonishing answers. No; the selection of the best is a bad form of the exercise of favour and affection—of patronage and backstairs influence. The survival of the fittest has been knocked on the head by the age-retirements. Very often selection might mean the choice of the worst.

Should it be necessary to reinforce the troops at the Cape by a Brigade of Infantry, as is probable, the selection will be made from the 105th, 39th, and the 1st Battalions of 3rd, 7th, and 22nd Regiments, which, being on the increased establishment of rank and file, are now first for foreign service.

The peculiar development of the British brain, which takes place under certain conditions in consequence of the owner being a long time abroad, is curiously illustrated in the general correspondence of the London newspapers from Alexandria. The sublime indifference to the feelings of what is called the native element would lead one to believe that it did not exist. We are assured that Alexandria is the real capital of Egypt, because there are a great many Europeans there engaged in trade,—cotton, sugar, grain, &c.,—who have large dealings with the natives of the Delta; who speak the language of the fellah indifferently well, and who are acquainted with the details of agricultural produce. Therefore, any one who wants to know about Egypt should not go to Cairo, but should frequent the town and the native coffee-houses of Alexandria! This is scarcely an exaggeration of the stupendous argument which has been put forward to justify Lord Northbrook's visit to the European capital of the Delta, where, by-the-bye, the Europeans steadily refuse to submit to the laws of the "natives," or to pay any contribution to the expenses of the Government.

Colonel A. K. Rideout, who was, we learn, offered the command of the Artillery in Egypt, vacant by the death of Colonel Barnes, retires with the rank of Major-General.

"King John is giving trouble." Is he, indeed? "He wants Sanheit." That is, the savage wishes to get hold of a town which the much-abused Egyptians have rendered habitable, and civilised with a post-office and telegraph-office, schools, police, &c., and to reduce it to the state of unutterable filth, disease, and misery which are the characteristics of the "cities" of his own Abyssinia. We protested against the ill-omened mission of Sir W. Hewett, which gave the barbarian and his ferocious bandit chief, Ras Aloula, the pretext they wanted for the invasion and plunder of the poor people who were hitherto protected, by the troops and police of the Khedive, from their felonious neighbours. That was one of our greatest mistakes, and God knows that is much to say. There is no correspondent to tell what is now going on in the invaded country.

Sir J. Willoughby only left London last Monday to proceed, *viâ* Trieste, to join the Camel—or, it may be, the Boat—Corps in Egypt, and his fine stud has been sold at a heavy loss.

"Forty centuries are looking down" on the Camel Corps, which has got no camels, and which is encamped under the Pyramids of Gizeh, within a donkey-ride of the capital. The quails are not in yet, and the country is still a good deal under water. Mosquitoes are not wanting, and flies abound as of old; but it is better to have the men there than in Cairo, the morals and habits of which have not improved of late.

Lord Northbrook must have seen a very interesting spectacle at the First Cataract on Thursday when the boats were being towed up, which is an easy operation enough. The Sheik of the Cataract and his Arabs are accustomed to pull up large dababeahs all through the tourist season, and are very expert at the work.

Lieutenant H. E. Wise, 26th Cameronians, has been appointed Aide-de-Camp to Major-General Middleton, commanding the Militia in the Dominion of Canada.

A correspondent writes from Natal:—"Among the unread riddles of the early future may be reckoned the future of Zululand. For some weeks now the news from thence has been more or less humdrum. We have heard of military movements in the Reserve, of detachments of this or that regiment sent thither, of forts being erected, and of supposed approaches toward the embarrassing 'Inkandhla;' but that is all. Whatever may have happened in Zululand proper, in the Reserve at any rate peace seems to have prevailed. That order and security prevail there it would be less easy to declare. Travellers through the northern outskirts of the territory say that so far as property is concerned, they have had to keep watch and ward as though the country they were passing through was the abode of brigands and robbers. The Boers will be the absolute factors of success in all future operations in Zululand should the Imperial Government maintain its present attitude of absolute abstention from interference in affairs beyond the Reserve."

We do not observe, in the Egyptian newspapers, Baker Pasha's name in the list of officers present at recent ceremonies at Cairo,—such as the departure of Lord Wolseley, &c.

The *St. James's Gazette* on Wednesday, having pointed out the wickedness of Germany and of the Bismarckian policy in the matter of Angra Pequena, says that the latter is the most convenient spot that could be selected for reaching the Transvaal and the Orange River Free State. "To this we can add a piece of information which only a few possess, which is this:—The German Government secretly began years ago to work a plan for obtaining a kind of protectorate over the Dutch communities in South Africa; in point of fact, it was very much on that account that Lord Carnarvon resolved on his Confederation scheme. Put all these considerations together—our relations with the Boers, their relations with Germany, Germany's colonial aims in South Africa, and the hopeless state of dependence into which our Government have got themselves in Egypt, and the enforced 'complaisances' of her Majesty's Ministers may be no joke." We quite agree with our contemporary; but was it a joke to annex the Transvaal if we were not quite ready to fight for it—either the Boers or the Germans, or both?

Major Wilberforce Clarke, R.E., Director of Railways on the staff of the General (Sir Evelyn Wood) of Communications, with rank as Assistant-Adjutant-General at Wady Halfa, has sent to the *Times* a list of the Nile steamers, which will be found elsewhere.

A Paris newspaper, having called upon Captain Fournier to explain certain erasures and alterations in a photo-copy of the Treaty of Tien-Tsin, published by a contemporary, has received a fiery reply. He had given his honour about the matter to the President of the Council. That sufficed for his conscience; for every one who was not satisfied with that, there is, says the gallant Captain, "the point of my sword; it has never been found wanting by any man."

The Navy.

ADMIRALTY, Oct. 3, 1884.

The Rev. John Edward Scott Mason, B.A., has been appointed a Chaplain in her Majesty's Fleet (Feb. 21).

ADMIRALTY, Oct. 4, 1884.

In accordance with the provisions of her Majesty's Order in Council, of Feb. 22, 1870, Lieut. G. H. Blake has been placed on the Retired List, with permission to assume the rank and title of Retired Commander (Sept. 28).

Royal Marine Light Infantry.—Capt. and Brevet Major J. H. Sandwith, serving as Deputy-Assistant-Adjutant and Quarter-master-General on the Staff of the Army in Egypt, is placed on the Seconded List, under the provisions of Articles 43 (*b*) and 146 (*a*) of the Royal Warrant of June 10, 1884 (Sept. 18).

ADMIRALTY, Oct. 6, 1884.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer J. Muir has been placed on the Retired List of his rank (Oct. 4).

ADMIRALTY, Oct. 8, 1884.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Lieut. E. J. Bellett has been placed on the Retired List, with permission to assume the rank and title of Retired Com. (Oct. 4.)

ADMIRALTY, Oct. 9, 1884.

The Rev. Francis John Odell, B.A., has been appointed Chaplain in her Majesty's Fleet (Aug. 11).

APPOINTMENTS.

Commanders—W. des V. Hamilton, to the Nelson; Francis Powell, to the Hercules.

Staff Commanders—Frederick K. Taylor, to the Liffey; Robert Travers, to the Agincourt.

Lieutenants—Gerald A. Ellis, to the Repulse, for Coast-guard duty, at Wells; Hon. Walter H. Jolliffe, to the Lord Warden, for Coastguard duty, at Wick; Henry W. Target, to the Agincourt; Reginald Y. Smith, to the Agamemnon; William Ricketts, to the Vernon; H. C. Carré, to the Tamar; E. A. Richmond, to the Valiant; Frederick G. Dundas, to the Valiant, for Coastguard duty, at Galway.

Navigating Lieutenant—John D. Moulton, to the Tyne.

Sub-Lieutenant—Arthur G. M. Meredyth, to the Mallard.

Chaplains—Rev. John S. Knight, to the Indus, for the Tamar; Rev. Arthur P. Hill, to the Neptune; Rev. John Evans, to the Carysfort.

Chaplain and Naval Instructor—Rev. James Blunn, to the Nelson.

Fleet Surgeon—William Graham, to the Penelope.

Chief Engineers—Alexander F. McIntyre, to the Pembroke, for the Chasseur; William Barclay, to the Dreadnought; Henry W. White, to the Pembroke, for the Benbow; John R. Harvey, to the Pembroke, for the Warspite; James Wootton, to the Asia, for the Camperdown; William T. C. Brewer, to the Asia, additional.

Paymasters—John Hynes, to the Valorous; Henry W. Paul, to the Duncan; Bernard G. Lloyd-Evans, to the Hercules; George Finlay, to the Swinger; Sydney W. Wright, to the Britannia; George W. H. Maggs, to the Hector.

Engineers—John T. Coombs, to the Starling; William McIntyre, to the Revenge; William Annan, to the Asia, for the Mercury; Thomas H. Hyde, Henry T. Hammond, and John H. Walton, to the Dreadnought; Cornelius Pitt, and William Rabbidge, to the President, additional.

Assistant-Engineers—James H. Watson, and William J. Waugh, to the Dreadnought.

Chief Gunner—Will Rowland, to the Eagle.

Chief Boatswain—William Guard, to the Duke of Wellington, additional, for the Victory.

Gunners—Frank Williams, to the Mallard; Frederick Adams, to the Neptune; Thomas Hawkins, to the Asia; William J. Thompson, to the Vernon; Thomas Willard, to the Asia, additional, for the Cormorant; T. C. Jones, to the Vernon, for torpedo duties, additional, for the Vesuvius; G. J. Flux, to the Vernon, as torpedo instructor; Frederick J. Bishop, to the Asia, for the Active; George H. Nicholls, to the Hibernia, for the Thunderer.

Boatswain—William Ingram, additional, for the Calliope.

Carpenters—James T. Haines, to the Osprey; W. H. Newham, to the Asia, additional, for the Cormorant.

COASTGUARD.

Commissioned Boatman—David Davies, Howth, to be chief boatman, Crookhaven, vice J. Murphy.

Agamemnon, Capt. S. Long, arrived at Portsmouth from Plymouth on Monday last. Her torpedo fittings will be completed forthwith. This new double-turret ship, which is intended to strengthen the English naval force in China, has been placed in the deep dock. She is in every respect a reduced copy of the Colossus, and there is no reason why she should have been sent round from Devonport to the already overburdened Portsmouth yard, but the simple and decisive one that the western port does not possess a dock sufficiently large to accommodate her. After being docked and coated with cement, she will be provided with her Whitehead torpedoes and fittings, and will afterwards return to Devonport. It is expected that the Ajax, the sister ship, now under completion at Chatham, will also be sent to Portsmouth to relieve the Dreadnought as a training ship for the practice of hydraulic gunnery.

Assistance, Capt. W. H. C. St. Clair, arrived at Portsmouth on Sunday, having on board the 2nd Batn. of the Rifle Brigade for the Curragh.

Black Prince, having been ordered to be brought forward for commission as flagship of Vice-Admiral the Duke of Edinburgh, in command of the Channel Squadron, is being proceeded with, artisans having been told off in Devonport Dockyard to commence work. All the available force of the dockyard will be put on the Black Prince as soon as the Agincourt, Achilles, and Northumberland are out of hand.

Cherub, Lieut.-Com. Haszard, left Sheerness on Wednesday for Harwich, to resume her duties as tender to the Penelope, Coastguard-ship for the Harwich district.

Comus, recently ordered to be taken in hand at Sheerness to be refitted, will not be proceeded with at present, owing to the pressure of work in completing the Kingfisher and Ruby for sea. The Admiralty have decided to make some important alterations in the Comus, so as to make her as powerful a vessel as her sister ship, the Calliope, recently built at Portsmouth. The Comus, which was the first of the "C" class of corvettes built for the Navy, has had one commission, of four and a half years' duration, on the Pacific station.

Constance, Capt. F. P. Doughty, left Honolulu on Sept. 23 for Washington Island.

Coquette, Lieut.-Com. J. H. Crowe, at Limassol, Cyprus, is ordered to proceed to Suakim. Letters to be sent to Suez.

Dreadnought, Capt. Hon. Edmund R. Fremantle, C.B., C.M.G., will be commissioned on Tuesday next. She will relieve the Inflexible in the Mediterranean. The number of officers and men required will amount to 400, and it is understood that the demands upon the different steam reserves to supply her complement of stokers will completely exhaust the supply. Having had her hull recoated with Col. Crease's anti-fouling paint, the Dreadnought was undocked at Portsmouth on Thursday.

Dryad, Com. E. G. Hulton, arrived in Plymouth Sound yesterday, from the East Indies station. She was shown by the survey at Bombay to be in so rotten a condition in vital parts of the hull, that it was with the greatest anxiety that Com. Hulton undertook the task of navigating her home, and precautions were taken on board to mitigate the effects of any casualty that might occur. During the voyage fever broke out on board, six officers and sixteen of the crew being down at one time; only one case proved fatal. The Dryad was engaged in the Egyptian war, and two of her Gatling guns were taken by the rebels at El Teb at the time that Lieut. Stewart, son of Sir Houston Stewart, and several others of her crew were killed. The guns were recaptured, and have now been brought home. The Dryad will proceed to Sheerness to-day, where she will be paid off, and her crew will probably be turned over to the Kingfisher.

Euryalus, bearing the flag of Vice-Admiral Sir William Hewett, arrived in Mauritius from Aden on July 11. "The stay of the Admiral," writes a correspondent, "has been marked by an event which has attracted public attention. On July 17, the Governor gave a dinner at Réduit in honour of the Admiral. Amongst the guests were some officers of the garrison, and four or five influential members of the community. The Governor, Sir John Pope Hennessy, drank to the health of his guest, recalling the brilliant career of Sir William Hewett, and, above all, the part he had just taken in the Soudan campaign. He greatly praised the Naval Brigade under the command of the Admiral, and attributed the victory of El Teb in a great measure to it. His Excellency likewise did justice to the Army, but, as he was welcoming the Admiral, he especially referred to his services. Sir William Hewett replied, and said he could only accept a part of the praise, for, if the Naval Brigade had done its duty and contributed to the victory, the Army had also behaved valiantly and had given a rare example of courage and self-denial. After this interchange of kind words and good feelings, one of the guests, a member of the Council of Government, rose and proposed the Governor's health. In the course of his speech he declared that the Governor was the 'only one who had done justice to the merits of the Mauritians.' The Admiral seemed sensibly impressed by those words, and without rising, and as if speaking to himself, was heard saying with animation 'No, no! this is not fair, I cannot allow this to pass unchallenged.' The speaker again asserted that of all the Governors who had administered the colony, Sir Pope Hennessy was the 'only one who had really taken at heart the interests of the colony, and done justice to the merits of the Mauritians.' The Admiral then rose, said he drank with pleasure the Governor's health and that of Lady Hennessy. He had no doubt Sir John was a good Governor, and that he had at heart the interests of the colony; but while he was pleased to recognise those qualities in him, he could not allow it to be said that he was the 'only good Governor who had come to Mauritius,' for amongst his Excellency's predecessors, he, the Admiral, counted excellent friends, skilful administrators who had had also the interests of the colony in view. The matter went no further, and the Governor's health was drank; but a chilling effect had been produced, and soon after everyone rose. The following day rumours began to circulate relative to the incident described, and a newspaper had the bad taste to become the echo of it. The official press took up the matter, and made personal attacks against the Admiral. The incident took place on Aug. 17, and as far back as the 11th, the day of the Admiral's arrival, the proposal to offer him a banquet had been submitted by the Hon. C. Antelme to his colleagues of the Council of Government, who readily accepted it. Adhesions were only collected a few days after the circulation of the list of subscribers, and the incident at Réduit, however, coincided. The Governor at once brought the circumstances together, and concluded that the banquet had a political aspect, and was directed against himself. He was doubtless strengthened in his impression by some of the guests at Réduit. It was then no secret to anyone that his Excellency would not attend the banquet. The Hon. C. Antelme, as much by respect as by courtesy, then wrote to Sir John in order to dispel his vexatious impressions, and to give him the assurance that the banquet was not the expression of any hostility towards him. This letter remained unanswered. The banquet had so little political significance that the Colonial Secretary and the members of the Council of Government had signed the subscription list two days after the dinner at Réduit, at which several of them had taken part. The Admiral had two interviews with the Governor, and seeing that he was quite resolved not to attend the banquet, he wrote to the promoters of that altogether peaceful manifestation not to put their proposal into execution, and not to invite the Governor in order to spare him the trouble to meet it with a refusal. Sir William Hewett's wishes were carried into effect; the banquet is 'only a souvenir.'"

Flamingo, Com. Reginald N. Custance, which has been serving on the North America and West Indies station for nearly eight years, is ordered to return to England to be paid out of commission, and to be placed in the Steam Reserve. The Flamingo was recommissioned at Bermuda with a new crew on Nov. 23, 1880.

Goshawk, Lieut.-Com. W. J. Moore, arrived at Simon's Bay on Tuesday.

Hawk, tender to the Hercules, flagship of Rear-Admiral Sir A. H. Hoskins, superintendent of naval reserves, has arrived at Chatham to embark supernumeraries and stores for the various coastguard stations. It is anticipated that Admiral Hoskins will embark on board the Hawk, and proceed on a tour of inspection of the naval reserves.

Impregnable, Capt. J. E. M. Wilson, training-ship for boys, was inspected on Monday last by the Commander-in-Chief at Devonport, Admiral Sir Houston Stewart, K.C.B.

Invincible, Capt. Claude E. Buckle, arrived at Limasol from Alexandria on Saturday morning.

Jumna, Capt. U. C. Singleton, left Portsmouth yesterday, conveying the 3rd Dragoon Guards and officers and drafts of various corps to India. On arriving at Bombay, which the Jumna is timed to reach on Nov. 7, the Dragoon Guards will be forwarded to the Bengal Presidency, in which the regiment is to be stationed.

Lily, Com. H. W. S. Gibson, was undocked at Devonport on Wednesday, after having her valves examined. She will relieve the Griffon on the North America and West Indies station.

Lion, Com. A. G. McKechnie, training-ship for boys at Devonport, was inspected on Wednesday by Admiral Sir W. Houston Stewart. The boys were inspected at drill, and the various departments of the ship were examined. The Admiral expressed himself as perfectly satisfied with all that had come under his notice.

Northumberland, Capt. F. Robinson, has been undocked at Devonport after repairs.

Rapid, Capt. H. J. F. Campbell, C.B., arrived at Plymouth on Wednesday after a two days' cruise at sea. The ship steamed up harbour to make good some defects in her gun fittings, and will probably leave for her station early next week.

Serapis, Capt. Archibald L. Douglas, has arrived at Malta from Plymouth, having on board 1,215 officers and men, including the 2nd Batn. of the Highland L.I., and drafts of various regiments. She will proceed without delay on her voyage to Bombay.

Stork, Com. Arthur Blennerhasset, which was commissioned at Sheerness in Jan., 1883, has completed the usual 18 months' service on the West Coast of Africa station, and the Admiralty have now directed her to proceed to the South-East Coast of America station to relieve the Wrangler. The Stork's place on the West Coast of Africa will be taken by the Watchful. The Wrangler, which was commissioned on May 10, 1881, will return to England to be paid out of commission.

Tamar will be commissioned on the 21st inst. at Devonport by Capt. J. B. Warren, with a reduced complement of officers and men, for passage to Australia. Her complement will be supplemented by the crews of the Nelson, Diamond, Undine, Harrier, and Lark, now on the Australian station, and who will return to England in the Tamar. The Admiralty have requested the co-operation of the commanders-in-chief of the various naval stations in the selection of the new crews for her Majesty's ships Nelson and Diamond.

Wye, Staff Com. A. W. Miller, is ordered to be ready for sea by the 24th inst., when she will leave the Medway for Bermuda with supernumeraries and stores for the squadron on the North America and West Indies station.

The Admiralty have directed that discharges by purchase from the Royal Marines of non-commissioned officers and men are to be limited, for the present, to one man per month from each division.

The following ships have been placed under orders to return home, to be paid off and put out of commission:—The Dryad, 9, steam sloop, Com. E. G. Hulton, from the East Indies; Flamingo, 3, screw composite gun-vessel, Com. R. N. Custance, from North America and West Indies; Fly, 4, double-screw composite gun-vessel, Com. John Hope, from China; Tourmaline, 12, composite screw-corvette, Capt. R. H. Boyle, from the East Indies; Wrangler, 4, composite screw-gunboat, Lieut.-Com. William Farr, from the south-east coast of America.

The transport Hankow arrived at Portsmouth on Wednesday with about 100 men and invalids from Egypt, and the families belonging to the 1st Batn. Royal Irish Regt., and other drafts, mostly women and children, from Malta and Suez.

The Admiralty have directed telephonic communication to be established at Sheerness Dockyard between the offices of the captain-superintendent, the chief constructor, and the various workshops.

The Lords of the Admiralty have issued a circular which has been received at the Royal Naval Hospitals at Haslar and Stonehouse, containing regulations for the female nursing staff, which it is proposed shall to some extent supersede the present staff of male nurses employed in these hospitals. The circular contains a list of 38 rules, which, under their Lordships' orders, are to be obeyed and observed by all concerned.

A very satisfactory trial was made on Thursday of the electric lighting apparatus on board the Colossus at Portsmouth.

A court-martial was held at Portsmouth on Thursday morning for the trial of a marine named Henry George Merchant on five charges of attempting to strike and striking a private of marines and the ship's corporal. He was sentenced to 18 months' hard labour.

The trial of the centrifugal pump on board the Mariner, in the basin at Devonport, took place on Monday, with very satisfactory results, the object being to see what amount of water could be pumped out of the bilges in the event of a serious leakage. The contract specified 200 tons per hour, with 40 lb. steam pressure on the boilers, but during the trial the pump discharged 355 tons per hour with 40 lb. of steam, or about 78 per cent. in excess of the contract.

THE WASP COURT-MARTIAL.

A court-martial upon the survivors of H.M.S. Wasp assembled on board the Victory in Portsmouth Harbour on Monday last. The Court consisted of Rear-Admiral Herbert (president), Capts. Rowley (Duke of Wellington), Fremantle (Dreadnought), Nicholson (Asia), Maxwell (Neptune), Fisher (Excellent), Markham (Vernon), Singleton (Jumna), and Stewart (Hecla). Capt. St. Clair, of the Assistance, was also in attendance, but his services were not required. Mr. G. P. Martin, barrister-at-law, officiated as Deputy-Judge-Advocate.

Although the survivors were nominally prisoners, the trial was for the exclusive purpose of obtaining evidence as to the cause of the disaster, and under the circumstances the prisoners were called upon to relate all the circumstances within their personal knowledge of the occurrence. Mr. Otway Peter Browne, M.D., and Mr. William Hudson, the surgeon and engineer of the Wasp, were also called as witnesses, but their evidence was only formal, as they were on leave of absence when the vessel was lost.

The Judge-Advocate opened the proceedings by reading the Admiralty Warrant for the convocation of the Court to inquire into the loss of the gunboat and to try the survivors. After the Court had been formally constituted,

John Hutton, ship's cook, was called, and his written statement, which has already been published, read over to him. In reply to the Court, witness said he was told that Lieut. Guppy was officer of the middle watch at the time the gunboat struck. That was about 10 minutes to 4, when he heard a cry, "Clear lower deck; hurry on deck; the ship's among the breakers." When he came on deck he saw the light on Tory Island shining just between the fore and mainmast. It was just showing over the cliff. This was before the ship struck, and he did not see the light afterwards. After the ship struck he saw Sub-Lieut. Guppy and Mr. Kerrigan standing on the port side of the forecastle. The sea struck heavily on the ship just abaft the fore rigging when she struck. He could not tell whether it broke further aft. He was on deck five or six minutes before the ship struck. During that time the only orders were to shorten and furl sail, but he could not say where the orders came from. Nothing was done to shorten sail while he was on deck. The force of the wind was a whole-sail wind—a stiff breeze. The sea was running very high where they ran into. They were inside the breakers when he came on deck. The light he saw was on the starboard beam. The yards were braced sharp up on the port tack when he came on deck. It was a starry morning, clear overhead. He entered the Navy on June 8, 1850, and served in the Wasp two years and ten months. He thought the Wasp a seaworthy vessel. She was not under steam at the time. The wind was fair, and the ship was under all plain sail with the exception of the gaff topsail. The only sail he saw taken off before the vessel struck was the clew of the starboard foresail, which was done by witness and the boatswain's mate. When he saw the light at Rathlin O'Birne they were going about six or seven knots. It was about 10 miles distant and three points off. The navigating-lieutenant, the sub-lieutenant, and the gunner usually had charge of the deck. He considered that nothing could have been done to save life after the ship struck.

Richard Rattenbury, quartermaster, was next called, and his statement read:—He said he had been 17 years in the service, and 12½ years a petty officer. He was in his bed when the vessel struck, and ran on deck. He ran off to the wheel, and heard an order given, "Hard-a-port." He looked on the starboard side and saw land; he then crossed to the port side and saw the rocks from there. He went to the bridge and took the starboard life-buoy and got into the starboard main rigging. As he was going up the rigging, the ship went from underneath him and he was washed into a little creek, when he got to shore. When he came on deck he saw Com. Nicholls on the bridge, in his nightshirt, with Lieut. King and Sub-Lieut. Guppy. A sea came and washed the officers away. The weather was logged at 12 o'clock as "Light clear; passing showers." The vessel was going from six to six and a half knots.

In answer to questions by the Court, the witness stated that Lieut. King was sent for at 11 o'clock owing to the light being seen off the port bow. The witness was told at 8 o'clock to log Rathlin O'Birne bearing south-east. He believed there was lee way logged, but he could not say whether the ship made much lee way quickly. He was quite sure that no order was given by Lieut. Nicholls or the officer of the watch; the sails were not touched during the first watch. The captain was in the habit of leaving night orders, but he did not know whether any were left on the night in question. The course to steer, which was by standard, was given by the quartermaster at 8 o'clock. The course was not altered for any reason that he knew of. There was no difficulty in steering the course they were in. There was no leadsman in the chains during the first watch; neither was there any leadsman in the cutter when he came on deck. The lead was usually hove from the quarter boat. Tory Island was not in sight when he left the deck at 12, but he had seen the revolving light at 10 o'clock, when he took the log on the bridge. There was nothing in the state of the weather to prevent the light on Tory Island being seen at a distance.

The ship was not under steam at the time of the accident, the fires being banked. As far as he knew, the engines were ready for use at the time of the disaster.

Phillip Andrews, the second captain of the forecastle, stated that he was in the forecastle at the time the ship struck, as it was his watch. He had been there 10 minutes. It was dark at the time she struck, but starlight. He saw land at half-past 3 o'clock. The ship was going at about six knots through water, and the land was about half a point on the starboard bow, and at 1 o'clock when he came on deck at seven bells land was still half a point on the starboard bow, and Lieut. Guppy was the only officer on the bridge. At about 20 minutes to 4 the ship was brought up to about a point and a half to the northward and about ten minutes afterwards she struck. They had the main trysail set. He saw Mr. King on the deck with the chart in his hand, and he heard Lieut. Guppy give the order, "Hard-a-port," and the captain, who was on the bridge, "Hard-a-starboard." He could not say which side the ship struck. The vessel did not obey the helm, and she got wedged in between the island on the starboard side, and the rock on the port side. Mr. Guppy piped watch, and they shortened sail. He went to his station after the trysail was set. It appeared to be about five or six minutes between the time she first struck and when she fixed herself in the rocks. They were amongst the breakers when she first struck. An order was given to man the boats, but the boat abaft the main rigging being lowered she was smashed to pieces. He was washed overboard and climbed on a rock, and he then noticed that the ship had disappeared.

By the Court.—The sea seemed to increase towards the end of his watch, and he noticed between 3 and 4 o'clock that she rolled a good deal. At about 25 minutes to 4 he noticed that the ship was in danger. She was then on the starboard bow. He reported it to one of the men on watch.

The President.—Why did you not go to the officer of the watch, and tell him what danger you thought the ship was in?—I might have been told to mind my own business.

He could not say whether the officer of the watch was aware that the ship was in danger, and the reason which he had given was the only one which prevented him from telling him, and thus doing his duty. He was unable to say whether Com. Nicholls was called before the ship struck. The officers of the watch appeared to be calm and collected, and to have done their duty. When the ship first struck, she was about ten yards from the shore. At 1 o'clock it was officially reported land had been seen. There was only one man on the look-out, at the time that he was on the forecastle; when the look-out man reported land ahead, he shouted in a louder voice than usual.

The statement of William Dunn, able seaman, was next read. When the order was given to lower the boats he lowered the aft fall of the gig a little way, when it was washed away and smashed. He was washed ashore.

By the Court.—The officer of the watch was on deck the whole time the witness was at the wheel. The captain was not called during the same period. He did not run her off her course for any purpose while he was at the wheel.

After an adjournment the statement of William Styles, private Royal Marines, was read. He was sentry on board, but was not on duty at the time. He was in his hammock under the forecastle when he heard the alarm, and clambered up the funnel. He heard the order to shorten sail and sound the well.

Alfred Broomhead, another Marine, stated that he was in his hammock when the ship struck, and the first he knew of the affair was hearing the pipe, "Clear lower deck; the ship is on the reef." He then heard the pipe, "Shorten sail." He went to his station on the clew-garnets, and nearly got the foresail up. He was washed about by the breakers, and heard the order to take to the rigging, which he did, and afterwards scrambled on to the rocks, hurting his left foot in so doing.

Neither of these witnesses was examined by the Court.

Mr. William Hudson, engineer on board the Wasp, stated that he went on leave on Sept. 3, returning on the 24th.

The President.—When you proceeded on leave, were the engines and boilers of the ship Wasp in good working order? Witness.—Yes.

On the fires being banked, under ordinary circumstances, how long did it take before the vessel was ready to proceed under steam?—About 40 minutes. He had never been under banked fires at sea in the Wasp since he joined in January, 1883.

By the Court.—During that time was it usual to draw fires when the vessel was under sail without steam?—We were never under sail alone at all, but always steaming, except on one occasion of half an hour, when we stopped to sweep tubes. The ship had a full supply of coal when he left at Westport; there were no directions given to the Wasp other than those given in the ordinary regulations with regard to proceeding under steam.

Mr. H. Small, from the Department of the Controller of the Navy, produced various documents having reference to the Wasp, including the official report.

Staff Com. Jackson (Duke of Wellington), said he had laid down a track in pencil of the course of the Wasp from the statements of the survivors. With regard to the statement that the Wasp passed within six miles of the Rathlin O'Birne light, he could not bring the distance to less than 18 miles. He put in a written statement showing that the time of high water at Tory Island on Monday, Sept. 22, was 6.43 a.m., and the rise of the tide 11 ft. The probable rise at the time of grounding, 3.45 a.m., was 8 ft. The stream would turn to the eastward at 5.45, and the greatest strength of the tide would be two knots. The stream from 8.30 on Sunday till 2.45 on Monday would be setting to the westward, the rate being uncertain. Rathlin O'Birne light was fixed, and visible for 16 miles. Arran Island light was revolving, white and red alternately for 20 seconds, and was visible for 25 miles. Tory Island light was fixed, and visible for 16 miles. The witness added that sometimes these lights were visible for a greater distance than was given in the directions. The course he had laid down for the Wasp was not safe and reasonable, allowing for a deviation in the standard compass.

This concluded the evidence, and the Court was cleared. On being reopened at the end of an hour, the finding was read by the Deputy-Judge-Advocate as follows:—"The Court finds that her Majesty's gunboat Wasp was wrecked on Tory Island on the morning of Sept. 22, 1884, in consequence of the want of due care and attention in the navigation of the gunboat while proceeding from Westport to Moville. The Court further finds that no blame is attributable to any of the surviving officers, petty officers, and crew of her Majesty's gunboat Wasp for her loss, and, therefore, acquits them of all blame in respect of it."

The Banterer, gunboat, arrived at Sheephaven Bay on Sunday evening, with the bodies of J. C. F. Bartlett, John Buckley, David Derry, Langham Ennis, and W. F. Hoyle, which were washed ashore on Saturday afternoon from the wreck of the Wasp. The islanders, under the direction of the Rev. Father M'Donnell, enclosed the bodies in rough wooden shells, and were about to bury them in the island graveyard when the Banterer hove in sight. James Eva, who had been sent from Queenstown to identify the bodies, was put on shore from the gunboat, and was able to recognise five. He was unable to identify the sixth. All the bodies were greatly disfigured. The bodies were buried in the cemetery on Monday at Dunfanaghy.

The body of Alfred Morgan, private Royal Marines, who was drowned in the Wasp, was recovered on Tuesday and buried at Dunfanaghy.

LAUNCH OF THE "RODNEY."

The second of the new armour-plated vessels, to be named after great Admirals, was launched at Chatham on Wednesday last, the christening of the Rodney being graciously performed by the Duchess of Edinburgh. The streets of the town from the railway station to the dockyard were lined by detachments of the troops in the garrison. In the neighbourhood of the dockyard the work of planning and carrying out the triumphal arches and so forth was entrusted to the men of the Royal Engineers, but towards the railway-station and through the principal streets the inhabitants combined to make a brave show of flags, mottoes, and even more imposing specimens of ornamentation, on their own account. The very narrowness of the Chatham thoroughfares lent something to the effectiveness of the display put forth. And, moreover, the crowd itself in the streets and dockyard was a picturesque one, for, as in all garrison towns and naval stations, there are uniforms ready to hand to impart the requisite colour on any occasion of public display. Reverting, for a moment, to the decorations, the principal triumphal arches were four in number. The railway arch near the station was faced with scarlet cloth, relieved by armorial and other devices, and bore the inscription, "Welcome to our Royal Visitors," with the words, "Success to the Navy" beneath. In front of the fire brigade station, at the bottom of the Military Road, was a well-designed triumphal arch formed of two fire-escapes, meeting at an angle, and supported by the engines, hose, reels, and other appliances of the Kent Fire Brigade and the Chatham Volunteer Fire Brigade. Further along the route the Royal Engineers furnished an example of their technical skill in a trophy made up of sand-bags and baskets, which concealed the permanent railway arch and gave it the appearance of a temporary military bridge. In niches on either side were lay figures dressed in divers' helmets and costumes, while torpedoes, shells, and mortars at the base and at various available points of the structure completed the design. The Royal Marines, too, put forth their best efforts in honour of their colonel, the Duke of Edinburgh. Near their spacious barracks, which lie on the left hand side of the road going in the direction of the dockyard gates, they had raised a lofty and well-proportioned arch, gay with bunting and glittering with several large stars, composed of bayonets. Across the face of this arch was the inscription "Welcome to our Colonel and his Consort." The main entrance to the dockyard was likewise hung with flags, and there was another arch at the further end, near the slip where the Rodney reposed in readiness for the ceremonial of the day. Some of the decorations of the houses and shops displayed much taste and originality, and mottoes of loyalty, coupled with sentiments breathing success to the new ironclad, abounded. Along the whole line which the royal procession was to take the thoroughfares were flanked by venetian masts, the couplings of which were hidden by flags in unbroken continuity. Altogether the scene was picturesque and animated, the streets being crowded through their whole length, and every available spot in the dockyard being thronged with spectators. The Duke and Duchess of Edinburgh travelled by special train from Eastwell Park. Their Royal Highnesses were driven along the gaily decorated route, amid the cheers of the thousands of spectators, and in passing through the dockyard their carriage was taken beneath two specially erected triumphal arches in front of the residence of Rear-Admiral Watson. They were received by the Admiral Superintendent of the dockyard, and conducted to a staging erected over the ram of the new ship. Among those present were the Lords of the Admiralty, Admiral Sir A. Cooper Key, and the Controller of the Navy, Sir Thomas Brassey, Admiral Sir T. Brandreth, and the Admiral Superintendent of the dockyard, and many naval and military officers, foreign attachés, and ladies. The Rodney, by measurement of her load displacement (9,470 tons) may claim to rank with the first-class armour-clads in our Navy. The Rodney's measurements are—length between perpendiculars, 325 ft.; extreme breadth, 68 ft.; depth in hold, 26 ft. 5 in.; draught—forward, 26 ft. 3 in.; aft, 27ft. 3 in.; mean, 26 ft. 9 in. The great width of beam, as may be supposed, gives the ship the appearance of possessing that buoyancy and stability which are necessary to an armoured vessel carrying a considerable top weight of steel-plated turrets and heavy guns. Throughout the Rodney is built of steel, and a broad belt of steel-faced armour is carried along her sides amidships, protecting the water-line from shell or shot. Her citadel is made secure by armour 18 in. thick along the sides and 16 in. at the ends, and her gun deck is shielded from a raking fire by armoured screens, while the two polygonal barbettes in which the heavy guns are mounted are cased in armour 10 in. to 11½ in. thick, with the facets set at a slope. Below the load-line is an armoured deck which before and abaft the citadel is 2½ in. thick. The main deck over this important part of the vessel is formed of three thicknesses of 1-in. steel-plates. The launch was accomplished successfully and without a hitch. Her Royal and Imperial Highness, by merely turning a tiny wheel, released weights which in their fall knocked away the supports that alone held the big hull in its massive cradle on the sloping ways, and, amid the cheers of the many thousands of dock-hands and towns-people who had been admitted to the shed, the ship slid into the river, the timber-shoring smashing up with a report like that of cannon as she took the water. As soon as she was fairly afloat, a party of sailors from the Pembroke, who had gone aboard for the purpose, let go her bow-anchors and brought her to before she had half crossed the stream. She will now be towed into one of the new docks to receive her engines, and to have the armouring of the barbettes, &c., completed. As launched, she drew 13 ft. of water forward. The armament will include four 63-ton breechloading guns, to be placed two each in the barbettes; six 6-in. breechloaders on the gun deck, 12 6-pounder quick-firing shell guns, eight Nordenfelt, and two Gardner guns. There are also four positions, two on each side, for the discharge of Whithead torpedoes, of which she will carry 12. With twin screw vertical compound engines, it is expected that a speed of 16 knots per hour will be attained. Of these engines, which are from the works of Messrs. Humphrys, Tennant, and Co., the contract power, when working under forced draught, is calculated at 9,500 horse-power, and this, it is hoped, will exceed 10,000 horse-power when officially tried. Each set of engines will have one high-pressure cylinder of 52 in. diameter exhausting into two low-pressure cylinders of 74 in. diameter, with a stroke of 3 ft. 9 in. The crank shafts and propeller shafts are made of Whitworth's hollow steel, and all the other large working parts of Siemens-Martin steel. The frames for carrying the crank shafts are also made of Whitworth steel, and form part of the structure of the vessel, thus saving a great deal of weight. In general design, the engines closely resemble those supplied for the recently finished armour-clad Collingwood, of the same type as the Rodney, for the Conqueror, and for the Brazilian armour-clad Riachuelo. The boilers, 12 in number, made of Siemens-Martin steel, will be placed in four separate and independent stokeholes. The Rodney's complement of coals is 900 tons. She will have a crew of 430 men. After luncheon the royal visitors left Chatham, their return drive through the streets giving occasion for another manifestation of loyalty and good feeling on the part of the public.

THE NAVY.

From official returns up to the end of the last quarter, it appears that seven vessels of various tonnage and power had been added this year to the Royal Navy, and in the same period five vessels were ordered to be constructed, and in most cases were begun. At the present time there are, in addition to the number previously mentioned, twelve others on the stocks which had been begun prior to the commencement of this year. The vessels now being fitted or ready for service and launched this year include three screw composite gunboats, carrying four guns each, named the Acorn, Mariner, and Racer; a double-screw steel second-class steam cruiser, of 10 guns, 3,750 tons, with engines of 5,000 horse-power, sister ship to the Arethusa, Amphion, and Leander, and named the Phaeton, now at Chatham Dockyard; a steel twin-screw armour-plated barbette ship, carrying 10 guns, of 7,390 tons, and 8,000 horse-power engines, named the Warspite; a 16-gun screw corvette, built of steel and iron, cased with wood, of 2,700 tons, and with engines of 3,000 horse-power, built at Portsmouth, and named the Calliope; and a screw composite corvette, of 1,420 tons and 1,010 horse-power engines, named the Caroline. The new vessels ordered during the past nine months include the following:—Two steel twin-screw despatch-vessels, to be named the Alacrity and Surprise, and under construction by the Palmer Shipbuilding Company, Jarrow-on-Tyne; a twin-screw steel second-class steam cruiser, of 3,550 tons, to be named the Forth, and ordered to be constructed at Pembroke Dockyard; a twin-screw steel torpedo cruiser, building by Messrs. Thomson, of Glasgow, and to be named the Scout; and a double-screw composite gun-vessel, of 950 tons and 850 horse-power engines, to be named the Icarus, to carry eight guns, and under construction at Devonport. The other vessels now being built, some of which are in a forward state for launching, include two double-screw steel armour-plated barbette ships, each to carry 10 heavy guns, of 10,000 tons displacement, and to be supplied with engines of 7,500 horse-power, to be named the Anson and Benbow, the former building at Pembroke, and the latter by the Thames Ironworks Company at Blackwall; three twin-screw armour-plated barbette ships, each to carry 10 heavy guns, to be named the Camperdown, Howe, and Rodney; a double-screw steel armour-plated turret-ship and ram, of 6,200 tons, and to be fitted with 4,500 horse-power engines, under construction at Chatham, to be named the Hero; a screw composite corvette, to carry 14 guns, of 1,420 tons, and 1,000 horse-power engines, to be named the Pylades, and building at Chatham; two double-screw second-class steam cruisers, each of 3,550 tons, and to be supplied with engines of 6,000 horse-power, to be named the Thames and Severn; a double-screw composite gun-vessel, of 1,040 tons, to carry eight guns, building at Sheerness, and to be named the Swallow; and a screw composite gun-vessel, of 950 tons, with engines of 850 horse-power, to carry eight guns, building at Malta, and to be named the Melita.

Ernest Roberts, Plymouth Division, Royal Marines (H.M.S. Briton), has been awarded the silver medal of the Royal Humane Society and a sum of money, in recognition of his gallantry in saving the life of William Slade, stoker, who jumped overboard in a fit at Suakim.

MARRIAGE.

THOMPSON—BARTER.—On the 2nd inst., at Gowran, County Kilkenny, by the Rev. J. Steuart Hickey, rector of Goresbridge, William Thompson, Esq., Surgeon, R.N., of Sandeville, County Kerry, to Mary Agnes, youngest daughter of the late Dr. Barter, of St. Ann's Hill, County Cork.

DEATH.

GILBERT.—On the 6th inst., at Cerne Lodge, Worthing, Charles John Gilbert, Major, retired pay, late 23rd Royal Welsh Fusiliers, third and youngest son of the late Rev. Edward Gilbert, vicar of Hardingstone, Northamptonshire, in the 42nd year of his age.

ROYAL AQUARIUM,
WESTMINSTER.
Saturday, October 25, 1884.
ANNIVERSARY OF THE BATTLE
OF
BALAKLAVA.

GRAND MILITARY FETE,
Assault-at-Arms & Prize Competition.

Prizes will be given for
Bayonet, Lance, Cavalry, and Infantry Sword Exercise,
Fencing, Single-Sticks, Foils, Clubs, Dumb Bells,
FEATS OF SWORDSMANSHIP,
Cutlass Drill, Sword *v.* Bayonet, Bayonet *v.* Bayonet, Tug of War,
AMBULANCE DRILL,
Nordenfelt Gun Drill, Lance *v.* Lance, Lance *v.* Sword,
BOXING AND WRESTLING, &c.

Entries must be sent to Sergeant-Major J. W. WILKINSON, 1st C.L.A.V., Hon. Sec. Fête Committee, Royal Aquarium, Westminster.

GREAT ATTRACTIONS.
COLLECTION OF TROPHIES FROM CRIMEAN WAR ON VIEW ALL DAY.
MILITARY BAND.

Mr. Pennington will Recite
THE CHARGE OF THE LIGHT BRIGADE.
For Full Particulars see Future Announcements.

THE CEDARS and MORNINGTON PARK ESTATES, near West Kensington and Addison Road (Kensington) Railway Stations, and Omnibus Route to City, &c.—HOUSES to be LET or SOLD. Rents from £55 to £150. Well built, of white bricks, Bath-stone dressings, admirably designed, with all modern improvements, bath-rooms, electric bells, venetian blinds, &c. These well-known and fashionable Estates afford advantages which cannot be surpassed in any of the suburbs—within easy access of the West End either by road or rail, and within the four-mile radius from Charing Cross. For Military and Naval officers and persons of moderate incomes who require good family residences, they are unequalled. Soil is fine gravel. St. Paul's Schools (from St. Paul's Churchyard), erected on the Estate, afford exceptional advantages to sons of residents. Lawn-tennis and ornamental gardens on the Estates.—Particulars post free upon application to GIBBS and FLEW (Limited), Cedars Estate Office, West Kensington Station, W.

WOOLWICH, near the Common and Military Academy, on high ground, in quiet position; eminently suitable for a Naval or Military officer. To be LET, DETACHED RESIDENCE, with four reception, ten bed and bath rooms, and full domestic offices; standing in 1¼ acres of pretty flower and productive kitchen gardens, lawns, large vinery, greenhouse, &c.; stabling; rent low.—Apply to MASTERMAN, GIBBS, and CO., Surveyors, 37 Walbrook, E.C.

CHELTENHAM.—TO LET, several Gentlemen's RESIDENCES, for the season or otherwise. Also, for SALE, in Gloucestershire, a first-class, perfectly-fitted MANSION, standing in 10 acres; splendid stabling, &c.—POTTINGER and CO., Estate Agents.

FOR SALE.—The property of Officer ordered abroad.—A GREY HORSE, about 15-3, quiet in harness, steady charger, and regularly ridden on parade. A well-bred CHESTNUT MARE, about 15-3, six years old, steady charger, and regularly ridden on parade; been hunted, and is fast. Above horses believed perfectly sound, and subject to V.S. examination.—Can be seen at STABLES, 1 Harrington Gardens, South Kensington, S.W.

WILL be SOLD at TATTERSALL'S, on MONDAY, the 20th inst., a BLACK MARE, handsome, perfect charger, with all arms; has carried a lady regularly, quite steady in harness. The property of Colonel Horne, who has just vacated the command of the Bedfordshire Regiment.

TO be SOLD, the LAST MODEL of the BATTLE of WATERLOO, made by Captain Siborn, in glass case, 19 ft. by 9 ft., containing 22,000 miniature soldiers. Would suit an Exhibition or ante-room of a Military Club.—Apply, FREDERICK BARRINGTON, Ringsend Foundry, Dublin.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S

WORLD-FAMED

BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

HOLLOWAY'S OINTMENT and PILLS.—Diseases of the most formidable and chronic characters have been cured by Holloway's remedies. Ulcerations which have proved incurable by any other known means have healed kindly under the purifying and regenerating influence of this excellent Ointment. Sprains, stiff joints, contracted muscles, and glandular swellings can be most safely and effectually healed by Holloway's Ointment and Pills, which can do no harm under any circumstances. Neither of these medicaments has anything deleterious in its composition; both are essentially purifying and strengthening in their nature. The combined power of these noble remedies enables them successfully to cope with most descriptions of impurities, and to cure, or at least relieve, most varieties of diseases.

MILITIA COMPETITIVE. — Major LENDY, assisted by a Field Officer, Graduate of the Staff College, PREPARES a limited number of Candidates. Two hundred and thirty-one of his Pupils have passed for the Staff College and Militia.—Sunbury-on-Thames.

SANDHURST & WOOLWICH.—Assisted by Four Resident Tutors (Cambridge Wrangler, Oxford Honoursman, French and German Diplomés), Major LENDY RECEIVES a limited number of Candidates. Of the last 22 Pupils sent up to compete, 19 were successful. Last July four only went up, and passed 4th, 7th, 10th, and 77th.—Sunbury-on-Thames.

ARMY EXAMINATIONS.—Colonel LONSDALE HALE, R.E., recently Professor at the Staff College, and formerly Instructor in Fortification, R.M.C., and also Garrison Instructor, Home and S.E. Districts, and Lieutenant-Colonel C. W. FOTHERGILL, F.G.S., P.S.C., late Instructor in Military Topography, Royal Military College, prepare Officers of the Army for Promotion and for Entrance to the Staff College, LIEUTENANTS of MILITIA for the MILITARY COMPETITIVE EXAMINATION, and Officers of the Auxiliary Forces for the Examination in Tactics.

Candidates also prepared for Woolwich and Sandhurst, and for the Militia Literary Examinations.

STAFF COLLEGE ENTRANCE, 1884.

Of Six Candidates who read with Colonels Hale and Fothergill :—

Captain Fleming, R.A.,
Major Creagh, R.A.,
Captain Hippisley, 2nd Dragoons, and
Major Churchill, Northumberland Regiment,
were successful.
Captain Grieve, R.A., qualified.

For particulars and terms, apply to Colonel LONSDALE HALE, 57 Sinclair Road, Kensington.

MILITIA COMPETITIVE EXAMINATIONS, 1885. MAJOR COWPER has vacancies for two or three pupils desiring a small class and expeditious preparation.

Individual attention from each instructor.

From 1881-1884 (seven examinations) 22 pupils have competed, and 15 passed, viz., 1st, 8th, 10th, 21st, 28th, 29th, 30th (twice), 33rd, 34th, 37th, 58th, and 64th. Preparation for the Further and Preliminary. Terms moderate.

Testimonials and References on application to Major COWPER, 10 Clifton Villas, Maida Hill, W.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Under the patronage of her most Gracious Majesty the QUEEN.

CHAIRMAN—Major-General J. T. BOILEAU, R.E., F.R.S.

Applications from Candidates for admission to this School, either by Election, by Votes at £12 per annum, or at £80 per annum without votes, should be forwarded without delay to the Secretary.

The Daughters of all Officers on the Active and Retired List in her Majesty's Army, inclusive of the Royal Marines, are eligible; but the Daughters of Officers who have severed their connection with the Army by having sold out or commuted their pensions, are eligible *only* if born before the date on which such officers quitted the service.

Office, 20 Charing Cross, corner of Craig's Court, London. By Order,
G. W. FORSTER, Secretary.

and four others qualified.

NEXT COURSE for STAFF COLLEGE and PROMOTION commences OCTOBER 15.

Militia and other Courses now going on.

ARMY EXAMINATIONS.—From 15 to 20 Pupils are received by the Rev. WALTER BAKER, M.A., Batcombe Rectory, Evercreech, Bath. A Permanent Staff of five highly qualified Instructors, all resident in the village, besides occasional Assistants, gives a guarantee of individual attention impossible where the number of Pupils is large. There are two departments under separate sets of Instructors, the one under two Graduates, Classical and Mathematical, and a Foreign Master for Candidates for Sandhurst, Woolwich, the Preliminary and Qualifying Literary Examinations; the other under two Experienced Officers for the Final Military Competitive for Lieutenants of Militia. A large per-centage, viz., nearly two-thirds of the Pupils sent up during the last 17 years have passed their respective Examinations. At the recent Military Competitive eight Lieutenants of Militia went up, and four of them who had received all their instruction at Batcombe passed among the first 40, one (Mr. W. H. Lord) taking FIRST place on the list. References are permitted to Sir John Adye, G.C.B., General Elmhirst, C.B., General Thompson (late 7th Dragoon Guards), Colonel A. H. King, R.A., A.D.C. to the Queen, the Bishop of Bedford, and many others, all parents or near relatives of former pupils.

JERSEY HIGH SCHOOL for GIRLS
(Limited).

PATRONS.

Certificate of London University General Examination for Women, with honours, and distinction in French, Scholar of Girton College, Cambridge, and Second-Class Natural Science Tripos in the University of Cambridge.

This School has been established for the purpose of giving a high-class education, on the principles of the Church of England. The school buildings are situated in a healthy suburb of St. Helier's, near the sea. The climate of Jersey is mild and healthy. Special facilities are provided for the acquisition of the French language. Ordinary fees—board (washing included), sixteen guineas per term; tuition, three, four, and five guineas per term.—Application for prospectuses may be made to the Secretary, R. CREWS, Esq., Wyvil House, Georgetown, Jersey

---

ARMY EXAMINATIONS.—PREPARATION in FRANCE. — M. D. I. COWLES, M.A., Oxford, and Mr. W. H. RUSTON, M.A. (18th Wrangler), late Senior Assistant-Master of the Oxford Military College, RECEIVE PUPILS at the CHATEAU de la SALLE, Montreuil-Bellay, near Saumur. Special arrangements for receiving Students from the Universities and Public Schools during Vacations.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the six Militia Competitions which have taken place since September 1, 1881, Colonel WILKINSON and Lieutenant-Colonel SHAW have secured for their Pupils FORTY-NINE COMMISSIONS, although they have only Prepared and sent up a very Limited Number of Candidates. In the March, 1884, Examination, out of SIXTEEN SENT UP, TEN PUPILS succeeded; one other was two places out, and three more within a few places of being successful. Lieutenant C. J. Stanton took the SECOND PLACE at this Examination, with 2,083 marks.

At the Militia Literary Examinations during the same period, a Number of Pupils have also passed; in this Competition the FIRST PLACE was taken in April, 1883, by Lieutenant Lord Skelmersdale, and the SECOND PLACE in the following October Examination by the only candidate sent up, Lieutenant the Honourable Victor A. Pelham.

At the WOOLWICH EXAMINATION held last winter Mr. W. V. Scudamore passed SIXTEENTH on the list. This candidate made very high marks in languages.

At the recent WOOLWICH and SANDHURST Examinations NINE PUPILS competed, and EIGHT CADETSHIPS were obtained (one Woolwich, seven Sandhurst); Mr. H. D. Radcliffe taking SIXTH PLACE on the Infantry list for Sandhurst, with 7,308 marks, and making the highest score of any candidate in German—1,855 marks out of 2,000. At the Sandhurst Further also, the qualifying Militia Examination was passed by Lieutenants Lord Athlumney and A. R. Warren; making a total of TEN successes for ELEVEN candidates sent up.

For the Staff College, Captains G. F. C. Mackenzie and C. E. de la P. Beresford have been successful; no other candidates sent up.

The general score now amounts to ONE HUNDRED AND SIX SUCCESSES, obtained by Pupils since September 1, 1881.

Address, DARMSTADT, GERMANY.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

AN ARMY SECTION IS NOW ADDED. PUPILS PREPARED FOR SANDHURST AND WOOLWICH.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, ONE of the Five successful Competitors was a Pupil of this Establishment. Two others qualified, one taking sixth place. In June, 1883, of the four who passed, the First and Third were from this School.

CHARDSTOCK COLLEGE, CHARD.

Beautiful country; remarkably healthy. Special Preparation for Army, Navy, Public Schools, Universities, &c. Terms moderate. Cricket, fives, gymnastics, &c.

TO OFFICERS, ANGLO-INDIANS, and OTHERS.—First-class School, established 15 years, where boys are prepared from an early age for the Army Examinations. Numerous Staff of Experienced Graduates in Honours. System pursued has resulted in 35 successes and no failures. Indian children received. Highest references.—C. V. GODBY, M.A. (Oxon.), Bute House, Petersham, S.W.

ANGLO-INDIAN HOME.—Mrs. PRICE-WILLIAMS, St. Clare's House, Esplanade, Tenby, OFFERS a Happy, Refined HOME, combined with a first-class Education, and all the advantages of sea bathing and pure air, to CHILDREN whose Parents are abroad. Tenby (the Naples of Great Britain) is noted for its beautiful climate, which is especially adapted to children born in Foreign Countries. Highest references and testimonials.

CAVENDISH COLLEGE, CAMBRIDGE.

This College has been founded by the County College Association, Limited, under the Presidency of His Grace the Duke of Devonshire, K.G., in order to enable students at the earliest practicable age and at a moderate cost to take the University Degree, whether in Arts, Law, or Medicine.

Students are admitted at 16, and a Degree may be taken at 19.

The College charges for Lodging and Board (with an extra term in the Long Vacation), including all necessary expenses of tuition for the degree of B.A., are £84 per annum.

For further information apply to the WARDEN, Cavendish College, Cambridge.

CANDIDATES for the ARMY.—TUITION by CORRESPONDENCE in GEOMETRICAL DRAWING, by a successful Teacher and Author.—"A. B.," Stanton House, 1 Belleville Road, Wandsworth Common, London.

MAJOR DE THOREN'S COURSE of INSTRUCTION for MILITIA OFFICERS READING for the MILITARY COMPETITIVE EXAMINATION in March next, and the COURSE for OFFICERS STUDYING for their PROMOTION EXAMINATION will COMMENCE on THURSDAY, October 16.

Major de Thoren receives but a limited number of Militia Officers, each of whom obtains great individual attention. He particularly desires gentlemen will join his class, if possible, *at the time of its formation*, in order that they may go steadily through the five months' course, by which time they ought to be thoroughly well prepared in the various subjects.

For particulars, apply to Major DE THOREN, Bellefield, St. Helier's, Jersey.

ARMY EXAMINATIONS. WELLINGTON HOUSE, DORCHESTER.

Preparation for Sandhurst and Woolwich by an English and French University man, and late Modern Language Master in Haileybury and Wellington Colleges. Number limited to twelve. —For particulars and references to parents of Pupils, apply to the PRINCIPAL.

THREE sent up in March, TWO PASSED; Hill, 4th, Cumberland, 20th. Third only just failed. Many former successes. Tuition for all Competitive Examinations.—Captain PINHEY, 16 Nevern Square, Earl's Court, S.W.

CONNAUGHT MILITARY COLLEGE,
WOOLWICH COMMON.

Principal—SAMUEL H. WINTER.

The Pupils of this Establishment have been uniformly successful. In July, 1882, Mr. F. Close was SECOND on the Woolwich List, being FIRST in Mathematics; in July, 1883, Mr. G. Close was TENTH and Mr. R. F. Edwards TWELFTH, all at their first trial. Mr. Winter has prepared more than 200 Pupils for various Military Examinations.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MILITARY EXAMINATIONS and GENERAL EDUCATION.—AVRANCHES. —A GENTLEMAN, for many years successfully engaged in preparing Candidates for the Military Competitive Examination and Universities, wishes to RECEIVE PUPILS. Great facilities for acquiring the French language. Terms moderate. Highest references to Parents and Guardians of former Pupils, and to Clergymen and Country Gentlemen.—Apply to Captain CHAWNER, Bois-Guerin, Val-St.-Père, Avranches.

ARMY EXAMINATIONS.—Mr. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES SEVEN PUPILS for WOOLWICH and SANDHURST. Special Masters for French, German, and Science. In 1880, of FOUR Candidates for Woolwich, ALL of whom passed, one was 6th and another 29th. In 1883, of THREE Candidates for Sandhurst, TWO were successful.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS, 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, Fives Courts, &c. — Address, HEAD MASTER.

MILITIA CANDIDATES for the LINE.—TUITION in MILITARY SUBJECTS for the COMPETITIVE ARMY EXAMINATION.

Lieutenant-Colonel FITZROY WILSON, late Rifle Brigade, a Graduate of the Staff College, and afterwards Garrison Instructor of the Eastern District, offers the above; also TUITION in MILITARY SUBJECTS to Officers of the Regular Army, partly by letter or otherwise.

For prospectus, containing terms, testimonials, and references, address, East Bergholt, Colchester.

SOUTH COAST. — PREPARATORY SCHOOL.—Mr. H. N. TRAVERS RECEIVES a LIMITED NUMBER of Gentlemen's Sons to PREPARE them for the Public Schools. Well-appointed house, facing the sea. Indian and delicate children receive every care. Reasonable terms. References to Noblemen and others.—Address, Pennington House, Bognor.

HINDUSTANI TAUGHT, Cito, Tuto, Jucunde. Correct Idiom guaranteed. Instructed only one candidate, Captain Fleming, R.A., for Staff College, Sandhurst, and he passed in second. — PUNDIT, 21 Beechholme Road, Clapton, London.

A LADY, living in a healthy Suburb of London, WISHES to RECEIVE one or two little children, whose parents are abroad or in India, to live with her and educate with her own little girl, five years of age. She can offer a happy home with thorough good education. Having had great experience, would be willing to take charge of a delicate child needing special care. The highest references given.—For further particulars apply in first instance, "M. D.," 58 Coleshill Street, Eaton Square, S.W.

MILITIA COMPETITIVE EXAMINATION.—Militia Officers coached by correspondence for the above Examination.—For full particulars, apply to H. E. MORGAN, Post Office, Tynemouth.

MILITIA ARMY COMPETITIVE.—Captain HAYES, late R.A., PREPARES MILITIA SUBALTERNS for above Examination. During last four years he has passed more than half the number sent up.—Address, Junior Army and Navy Club, St. James's Street, S.W.

A MEDICAL MAN of considerable experience, whose wife is very fond of children, is willing to receive into his house TWO or THREE YOUNG CHILDREN whose parents may be going abroad. References will be given and required.—Address, "A. B. C.," care of LIBRARIAN, St. Bartholomew's Hospital.

DR. J. COLLIS BROWNE'S CHLORODYNE

ORIGINAL AND ONLY GENUINE.

COUGHS,
COLDS,
ASTHMA,
BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff) discovered a remedy to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false*.

Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the *Times*, July 13th, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE,
RHEUMATISM.

IS THE GREAT SPECIFIC for
CHOLERA,
DIARRHŒA, DYSENTERY.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

From SYMES and CO., Simla:
